

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

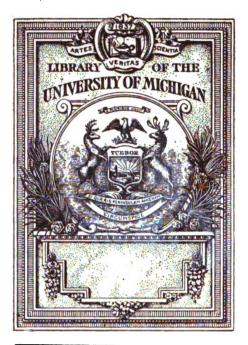

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

I have the honor to submit the Thirtieth Annual Report, and accompanying Schedules, representing the operation of the Liquor License Laws.

NUMBER OF LICENSES.

Schedule A is a comparative statement of the number of Licenses of the various denominations issued, and of the number extended, transferred or removed in each of the License Districts of the Province during the past three license years, and may be thus summarized:

			I	Extensions, transfers									
		Tav	ern.					8	and removals of licenses.				
Years.	Yea	rly.	Six m	onths.									
	Ordinary.	Beer and wine.	Ordinary.	Beer and wine.	Shop.	Wholesale.	Total.	Extensions.	Transfers.	Removals.	Total.		
1902-3	2,593	35	53	13	307	22	3,023	23	491	18	532		
1903-4	2,548	29	65	10	300	22	2,974	. 46	524	11	581		
1904-5	2,495	21	55	7	298	22	2,898	39	505	15	559		

PROVINCIAL REVENUE.

The same schedule shows the Revenue derived by the Province from Licenses and Fines to have been for

1903-4	 	304,677 70
1904-5	 	297,825 44

LICENSES IN COUNTIES AND CITIES.

Schedule B is a Statement of the number of Licenses issued in the several Counties and Cities during the past thirty years.

LICENSES IN MINOR MUNICIPALITIES.

Schedule C gives in detail as regards each City, Town, Incorporated Village and Township, and the Unorganized Territory of the Province, the number of Licenses, and of extensions, transfers and removals granted during the past three years.

TOTAL COLLECTIONS.

This Schedule also gives the amounts collected on account of Licenses and Fines, including the sums imposed by municipal by-laws, the totals of which were as follows:

1902-3		• • • • •		\$644,095 94	£
1903-4	•••••	•••••	***************************************	649,412 90)
1904-5				637,762 58	3

'MUNICIPAL REVENUE.

The payments to the Municipalities are shown by the same Schedule to have been in

1902-3	••••	 ***************************************	\$250,229	76
		·····		
1904-5		 ·	248,492	60

The amounts imposed in each Municipality by by-laws, in excess of statutory duties, are also given in this Schedule.

FINES.

The fines collected during the past year, as shown by Schedule D, amounted to \$21,004.33, as compared with \$20,465.00 in 1903-4.

SALARIES OF INSPECTORS—EXPENSES OF COMMISSIONERS.

The payments under these heads are also shown in Schedule D.

MISCELLANEOUS EXPENDITURE.

Schedule E shows the expenditure of enforcing the Act in the several districts other than those included in Schedule D, consisting of office rent, postage, stationery, printing, advertising, magistrates, constables, witness, counsel and detective fees, etc., etc.

COMMITMENTS FOR DRUNKENNESS.

Schedule F shows the number of Prisoners committed for drunkenness during the years from 1876 to 1905 inclusive. The number committed during the year 1905, as compared with 1904, shows an increase of 567.

The average yearly commitments for each period for five years from 1876 to 1900 inclusive are as follows:

From	1876	to	1880	inclusive	 ····	 · • • • · · · ·	 3.812
	1881	to	1885				
	1886	to	1890				
	1891	to	1895	"	 	 	 2,703
			1900	"			
	1901	to	1905	"			

The names of Municipalities in which Local Option By-laws are in force, and detailed statements showing the vote polled are given in Schedule H.

A statement showing the number of prosecutions under the Act and the result thereof will be found in Schedule I.

The statutory duties payable for wholesale, tavern and shop licenses, are set out in Schedule G.

The names and post office addresses of Inspectors of Licenses are set out in Schedule K.

SPECIAL INSPECTION OF LICENSE DISTRICTS.

The special inspection of the License Districts, and the examination of the work of the license officials therein, from time to time, have been continued during the past year.

Respectfully submitted.

W. J. HANNA,

Provincial Secretary.

The six Months' Licenses and the Licenses extended do not appear in the above Schedule or recapitulation, and as a consequence the total number of Licenses issued, according to the Statement, does not correspond with the number as shown in Schedules A and C. Beer and Wine Licenses are included with the ordinary licenses, under the heads of Tavern Licenses and Vessel Licenses respectively. An extended License is good for a period not exceeding three months. It is not in the nature of a new License, but simply a permission, granted by the Board of Commissioners, to the holder of a license expiring in April, to continue his business under the old license for the specified period, that he may be able to dispose of his stock on hand and quit the business without loss. Six Months' Licenses run from the first day of May to the thirty-first day of October, and are not valid after the latter date. They are granted to localities which are largely resorted to in summer by visitors, where the Board of Commissioners are of the opinion that increased tavern accommodation for the summer months is necessary.

SCHEDULE C.

SCHEDULE C.

COMPARATIVE STATEMENT BY MUNICIPALITIES, Showing the number of Provincial Licenses, whether Ordinary or Beer and Wine, issued, and the number extended, transferred or removed, the gross sums deposited to the credit of the License Fund Accounts therefor, and for fines, the amount

Ninth Annual Report

OF THE

Provincial Municipal Auditor 1905

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:

Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty.
1906.

WARWICK BRO'S & RUTTER, LIMITED, PRINTERS TORONTO.

To H is Honour the Honourable W. Mortimer Clark,

Lieutenant-Governor of Ontario:

MAY IT PLEASE YOUR HONOUR:

I have the honour to present to you the report of the Provincial Municipal Auditor for 1905.

J. J. FOY,

Attorney-General.

Parliament Buildings, Toronto, 2 January, 1906.

Parliament Buildings, Toronto, 2 January, 1906.

To the Honourable J. J. Foy, K.C., M.P.P,
Attorney-General:

SIR,—I have the honour to present to you my report for the year 1905.

J. B. LAING, Provincial Municipal Auditor.

REPORT OF THE MUNICIPAL AUDITOR.

PARLIAMENT BUILDINGS,
TORONTO, 31 December, 1905.

To the Honourable J. J. Foy, K.C., M.P.P.,

Attorney-General for Ontario:

SIR,—I have the honor to submit to you herewith the ninth annual report of the Department of the Provincial Municipal Auditor. The audits of the following municipalities, which were not finished last year, are now completed, and appear in their proper place in this report, viz.:

Township of Tilbury East.
" North.

Town of Essex.

The following municipalities have presented petitions for audits during the past year:

Township of Osgoode, County of Carleton.

Cambridge, County of Russell. Nipissing, Parry Sound District.

" Sombra, County of Lambton.
Chapple, Rainy River District.

Village of Grimsby, County of Lincoln.

Township of Colchester South, County of Essex.

" Front, Yonge and Escott, County of Leeds.

The first three of these municipalities have been duly audited, and the

reports are given in full at the end of this report.

Three others, Colchester South, Grimsby Village and Front of Yonge and Escott Township, were inspected by myself and audits not recommended at the present time. The municipalties of Sombra and Chapple are to be passed upon during the coming year.

In comparatively few of these audits or inspections was there any evidence of dishonesty on the part of the Township officials, although there were numerous cases of bad bookkeeping. Indeed, this year of 1905 has shown a marked absence of some of the distinguishing features of former years. For instance, in 1904 the audit of Tilbury East disclosed a deficit on the Treasurer's part of \$5,920.90. (See report.) In the case of the Town of Essex, a report is shown of the Collector's rolls from 1859 to 1903, disclosing a shortage in that time of \$3.197.18, a serious state of affairs in any municipality. In the group of the trio of Townships, Tilbury North, Tilbury East, and Tilbury West, the first named (Tilbury North) appears to be the only one to come out of the ordeal of their respective audits unscathed. Tilbury West, as shown in last year's report, being the most prominent offender:

The following inspections and examinations of the books of the munici-

palities throughout the Province have been made by myself:

FEBRUARY, 1905.

County of Wentworth.

The total receipts of this County for 1903 were \$204,443.95. and payments \$142,834.32. leaving a balance in the Bank of Hamilton of \$61.609.63. This was Good Roads year, and the cash transactions were exceptionally large.

For 1904 the receipts were \$147,471.22, and the payments \$100,980.30, showing a balance in Bank of Hamilton of \$46,490.92. The assessment of the County is \$14,236,225, which at 3 mills in the dollar of a tax rate yielded \$43,000 for county rates, all paid. The assets of the County for 1904 were \$275,729.01, which included the above cash item in Bank of Hamilton and county property, \$220,000.00. Liabilities were \$173,829.45, nearly all debenture liability. The County Treasurer has been in office 10 years and keeps the County books carefully and well. He receives a salary of \$1,300 per annum.

Township of Barton, County of Wentworth.

The assessment of this Township for 1904 was \$1,171,513.00. The tax rate, not including schools, 5 7-10 mills. Collector's roll, \$12,901.74, practically all paid. There is a Clergy Reserve Fund of \$18,091. Total assets, including cash in bank and Municipal Loan Fund, \$26,779.00. Total liabilities, \$6,772.40. The Treasurer keeps his books well and receives a salary of \$200 per annum. Has been in office 13 years.

Town of Dundas.

The books of this municipality appear to be better kept than in former years. Receipts for 1904 were \$69,766.61. Payments, \$70,659.30, showing an overdraft in Bank of Commerce of \$892.69. The tax rate for 1904 was 24 2-10 mills. Collector's roll, \$25,674.22, on which the sum of \$21,893.92 had been paid at the date of my visit. The total assets, which include water works, schools, and a Sinking Fund of \$25,046.59, amount to \$193,139.02. Liabilities, \$78,168.32, nearly all debentures. Treasurer is an efficient officer and receives \$750 per annum. The above list of assets and liabilities is for 1903. There is an increase in 1904 liabilities, the debentures amounting to \$103,950.64.

Township of East Flamboro', County of Wentworth.

For 1904 the total receipts of this Township were Total payments	\$19,071 16,184	
Balance in Bank of Hamilton, Hamilton	\$2,887	2 3

Total assessment of same, \$1,500,532.00. Collector's roll, \$13,560.33. nearly all promptly paid. Tax rate, 4.80 mills in the dollar, excluding school rates. There are no liabilities except to school trustee. This for 1903. Treasurer receives \$120 per annum and has served 6 years. He is a good officer.

Village of Waterdown, County of Wentworth.

This community is not increasing, receipts in 1904 being less than 1903. Receipts for 1904 were \$1,916.14, and payments \$1,905.54. Collector's roll for same year, \$1,785.80, of which \$1,612.00 was paid at date of my visit. The total assessment of the village is \$125,000. Tax rate, 1½ cents on the dollar. Total assets, including town hall and fire engine, \$1,700. Liabilities, \$303.80. The Treasurer receives \$20 per annum. It is lucky for him that he has some other occupations or he would fare badly. He is a good man and deserving.

Township of West Flamboro', County of Wentworth.

The total assessment of this Township for 1903 was \$1,270,035.00. Tax rate, without schools, 5.09 mills. Collector's roll, \$12,238.50 for 1903; practically paid in full, \$9 being remitted by Council.

 Total receipts for 1904 were
 \$20,572 65

 Total payments for 1904 were
 18,186 77

There is no municipal bank account kept by the Treasurer, which is a pity, as his accounts are otherwise a credit to him. Salary, \$150; in office 12 years. Assets, including Clergy Reserve Fund of \$15,255.75, \$21,924.81. Liabilities, \$2,598.27.

Township of Ancaster, County of Wentworth.

The equalized assessment of this Township was for 1904, \$2,501,914.00. Tax rate, without schools, 7 mills. Collector's roll, \$19,919.53, of which at the date of my visit there was due the sum of \$5,112.09. The total receipts for 1904 were \$21,700.11. Payments, \$16.183.93, leaving a balance in the Traders' Bank of Canada, Hamilton, of \$5,516.18. The assets, including the above cash balance, were at the close of the year \$38,313.27, with no liabilities. Salary of Treasurer, \$200 per annum; in office 7 years. Books fairly well kept.

Township of Glanford, County of Wentworth.

Total receipts for 1904 were	\$10,393	33
Total payments for 1904 were	10,286	83

Assessment of municipality, \$1,065,455.00. Collector's roll, 1904, \$7,586.07; paid in full. Tax rate, excluding schools, 5 2-10 mills. The assets at end of year were \$11,312.73. Liabilities, \$701.06. Salary as Clerk and Treasurer, \$200. One year in office. Books fairly well kept.

Township of Saltsleet, County of Wentworth.

The total receipts of this Township for 1904 were, up to 15 December, 1904, \$24,132.75. Total payments, \$22,450.92, leaving a balance of \$1,681.83 in the Traders' Bank, Stoney Creek. The Collector's roll was \$17,446.87, all paid except \$177.46 uncollectable. Tax rate, 8 mills on dollar. Total assessment of Township, \$1,817,139.00. Salary of the Treasurer, who also acts as Clerk, is \$350 per annum. The assets of the Township were \$8,517.10, and the school debentures \$7,450. I cannot speak positively as to the correctness of these figures, as the Treasurer did not bring the authorized form of cash book with him.

Township of Beverley, County of Wentworth.

Total receipts for 1904	\$26,499 48
Total payments for 1904	22,110 24

Assessment of Township, \$2,770,515.00. Collector's roll, \$18,907.29, paid in full except \$4 remitted by Council. Tax rate, 4 1-5 mills without school rates. Total assets, including cash in bank, \$22,086.74. Total liabilities, \$2,034.99. Treasurer has been in office 10 years and receives a salary of \$160 per annum. There are no debentures.

MARCH.

Township of Adjala, County of Simcoe.

Total receipts of this Township for year 1904 were	\$15,221	39
Total payments of this Township for 1904 were	13,603	28
Balance in Treasurer's hands	\$1,618	11

Assessment of Township was \$847,340.00. Collector's roll, \$10,394.48; practically paid in full except \$50 remitted. Tax rate, 5 9-10 mills without school rates. Books poorly kept and there is no bank account. Treasurer's salary, \$75 per annum; in office 3 years. Total assets, \$3,432.47. Total liabilities over \$3,000, most of which is the county rate.

Town of Alliston, County of Simcoe.

Total assessment of town, \$328,386.00. Collector's roll for 1904, \$9,-253.20, of which at the date of my visit there was due the sum of \$625. Tax rate, 25 mills on Back street and 27\frac{3}{4} mills on Front street. Total receipts for 1904, \$12,674.51. Payments, \$12,063.72. Balance on hand and in bank, \$620.79. Treasurer keeps his books in good order and receives a salary of \$80. He has been in office for 10 years. Total assets, \$53,334.51, which includes a Sinking Fund of \$13,681.96, and water works for fire purposes only, \$19,341.02. Liabilities, \$52,893.95, of which debentures amount to \$50,000.00.

Township of Tecumseth, County of Simcoe.

Total receipts for 1904	\$26,563 23,693	49 40
		<u> </u>
Balance in Traders' Bank, Beeton	2.870	09

Total assessment of Township, \$1,671,620.00. Collector's roll, \$20,920.07; paid in full. Tax rate, 7 2-10 mills without school rates. Total assets, \$3,693.66. No liabilities. Treasurer does not use Government form of cash book, but has promised to do so in future. Treasurer has been in office 10 years and receives \$140 per annum.

Township of Innisfil, County of Simcoe.

The assessment roll of this Township for 1904 was \$1,403,101.60. Receipts for the same year, \$23,180.65. Payments, \$19,519.99, leaving in Bank of Toronto, Barrie, \$3,962.38. Collector's roll, \$18,031.81; practically paid in full. Tax rate, 8 4-10 mills without school rates. Treasurer has been in office 6 years and receives a salary of \$150 per annum. The books of the muncipality are well kept. Assets and liabilities foot up about the same, viz., \$7,000.

Township of Essa, County of Simcoe.

Total receipts for 1904 footed up	
Balance in Bank of Toronto, Barrie	\$720 06

Total assessment of Township, \$1,310,779.00. Tax rate, 7 8-10 mills without school rates. The Treasurer is one of the few who have so far declined to keep the Government form of cash book. He has been in office 11 years and gets a salary of \$125 per annum. His accounts might be better kept if he had tried harder. The assets on 31 December consisted of the above bank balance and about \$700 on Collector's roll. Liabilities about \$300.

Township of Tossorontio, County of Simcoe.

Total assessment of Township, \$745,985.00, for 1904.	
Total receipts	\$8,932 20
Total payments	7,853 44

Leaving a balance of cash in bank and on hand of \$1,078 76

Tax rate, 3 9-10 mills on dollar, without school rates. Collector's roll, \$7,447.57; paid in full except some few dollars remitted by Council. Assets consist of the above cash balance and some road machinery. There are no liabilities. Treasurer keeps his books fairly well, but he does not get much encouragement, Council only paying him \$50 a year since 1893.

Township of Sunnidale, County of Simcoe.

Total receipts for 1904, \$15,707.01. Total payments, \$12,862.77, leaving a balance on hand and in bank of \$2,844.24. Total assessment of Township, \$814,356. Tax rate, 5 4-10 mills without school rates. Collector's roll, \$9,779.27; paid in full except \$46 returned to County Treasurer. Total assets, including above cash balance, \$3,773.51. Total liabilities, including county rate and debentures, \$6,780.98. Treasurer has been in office 42 years and receives \$100 per annum for his services, which are worth considerably more.

Township of West Gwillimbury, County of Simcoe.

Assessment roll of 1904 foots up \$1,050,714. Tax rate, 4 4-10 mills without school rates. Collector's roll, \$11,327.94, of which \$500 remained unpaid at the date of my visit. Total receipts for 1904, \$11,987.23. Total payment, \$11,315.03, leaving a balance in bank and on hand of \$672.20. The assets were at the end of the year \$2,009.33. Liabilities none. Treasurer gets \$60 per annum and has only been in office since 1st January, 1905.

Village of Bradford, County of Simcoe.

Total receipts for 1904 were \$7,939.27. Payment, \$5,830.27. Balance in Standard Bank, Bradford, \$2,109.00. Total assessment of village, \$257,760. Tax rate, 21 mills. Collector's roll, \$5,256.54; paid in full except \$31.20 returned to County Treasurer. Total assets, including above cash balance, and \$14,500 for town property, amount to \$22,434.46. Liabilities to \$3,899.71. Treasurer has been in office for 6 years and gets a salary of \$45 per annum, which ought to be increased.

Township of Vespra, County of Simcoe.

Total assessment of this Township amounts to \$946,000.00. Receipts also for 1904, \$15,929.08. Payments, \$12,409.20, leaving a balance in Bank of Toronto, Barrie, of \$3,519.88 Collector's roll, 1904, \$11,951.94; all paid except about \$250.00. Tax rate, $5\frac{1}{2}$ mills, excluding school rates. Books are very well kept considering that the Treasurer is 85 years of age. He has been Treasurer of this Township for 51 years and has the best of records. Total assets, including cash in bank, \$6,014.80. Liabilities, \$6,055.26.

Village of Creemore, County of Simcoe.

This village seems to be in a very good way financially. Receipts for 1904, \$4,451.40. Payments, \$4,137.74. Balance on hand and in bank, \$313.66. Collector's roll for 1904, \$2,719.29; paid in full. Total assessment, \$135,000.00. Tax rate, 2 cents on dollar. The assets at end of year were \$1,596.46, and the liabilities \$1,034.33. The Treasurer has been in office 12 years but as his salary is only \$20 per annum it is time for an increase. I see waterworks are promised next year, which will mean increased work and responsibility to this poorly paid but efficient officer.

Village of Tottenham, County of Simcoe.

The municipality has an assessment for 1904 of \$150,000. The tax rate is 27 mills. Cash receipts for year, \$8,132.93. Payments, \$7,978.73. Balance in Traders' Bank, Tottenham, \$154.20. Collector's roll, \$4,286.95; all paid except about \$50, a good record. The assets at the end of the year were \$10,681.12, which includes electric light plant, \$6,300, and the liabilites, \$8,185.20. I understand that the electric light investment does not pay, but it may do better in time. The Treasurer has been in office 18 years but so far he has not benefited very much by it, his salary being only \$25, besides which the Council pays his premium to the guarantee company. He is a fairly good officer, too.

Town of Barrie, County of Simcoe.

The total assessment for 1904 foots up \$1,630,955.00. Total receipts, \$101,678.57. Payments, \$95,756.53. Balance in Bank of Toronto, Barrie, \$5,922.04. Collector's roll for 1904 was \$41,169.40, of which at the date of my visit there still remained due \$2,442.47, the most of which is no doubt paid ere this date, the balance remaining on 1903 roll not reaching \$100. The tax rate was 25 mills for 1904. The assets for 1903 were \$295,014.07, and the liabilities \$268,739.58; debentures comprising \$250,000 of the latter. The debentures for 1904 amounted to \$277,714.29. Waterworks department and electric light plant are entered in the assets at \$111,321.84 and \$42,-261.84 respectively, and the town hall, public schools and collegiate institute represent \$60,000 more. The Treasurer has been in office 7 years and receives \$1,000 per annum. His accounts are well and accurately kept. He also acts as Clerk of the municipality.

County of Simcoe.

The equalized assessment of this large County is \$32,720,000.00. The total receipts for 1903 were \$213,093.67. Total payments, \$185.469.91, leaving a balance in the Bank of Toronto, Barrie, of \$27,623.76. The cash book

for 1904 had not been written up at the date of my visit in March, owing to the illness of the Treasurer, who died some months afterwards, so 1904 will have to be taken up at my next visit. The county rates for 1903, \$57,260.00, were all paid. The assets of the County amounted to \$247,102.65, which included \$85,000 for county buildings, and the liabilities to \$171,942.20, mostly debentures. Treasurer received \$1.500 per annum, and had been in office 7 years. Tax rate, 13 mills on dollar for 1903.

Town of Orillia, County of Smcoe.

The total assessment of this municipality for 1904 Total receipts for 1904	. \$129,783 14
Total payments for 1904	. 131,897 28
Overdraft, Dominion Bank	. \$2,114 14

Collector's roll, \$37,401.43. Balance due 1 January, 1905, \$4,827.54. Tax rate, 25½ mills, 5 per cent. discount if paid by 10 December same year. The assets of the town were, at the end of 1904, \$434,716.60, which comprised town hall and school buildings, \$66,000.00, waterworks and electric appliances, \$111,000, market and opera house, \$26,500, parks, \$27,750.00, power transmission plant, \$176,395.65. Liabilities were \$329,175.71, of which debentures amounted to \$314,642.54. Treasurer is an efficient officer and has been in office since 1883. He acts as Clerk, also, receiving \$1,400 per annum, \$200 of which goes to pay a junior assistant.

Township of Oro, County of Simcoe.

Total receipts for 1904	\$19,657 96 14,634 31
Balance in Union Bank, Barrie	\$5,023 65

Total assessment of Township, \$1,087,310.00. Collector's roll for 1904, \$13,829.72; all paid except \$95. Tax rate, 5 8-10 mills without school rates. Assets, \$8,777.99. Liabilities, \$4,119.38, of which county rate forms the greater part, \$3,950. Treasurer is a good officer and acts as Clerk as well as Treasurer, receiving \$475 per annum.

Township of Orillia, County of Simcoe.

Total receipts for 1904	
Balance in Dominion Bank, Orillia	\$1.373 68

Total assessment of Township for 1904, \$596,314.00. Assets, \$17,713.68. Liabilities, \$4,993.43. Collector's roll, \$13,952.18; paid, excepting exemptions \$170.28, returns to County Treasurer \$250.00. Tax rate, 14 2-10 mills without schools. Treasurer's salary as Clerk and Treasurer, \$500 per annum. A careful officer and correct. In office since 1898.

Township of Medonte, County of Simcoe.

Total receipts for 1904, \$23,237.08. Payments, \$22,780.28. Balance in hands of Treasurer, \$456.80. Total assessment of municipality, \$1,319,822.00. Collector's roll, \$16,100.42; Balance due at date of my visit, \$732.65. Tax rate, 4 9-10 mills on dollar, without schools. Treasurer acts as Clerk also and receives \$400 per annum. In office 12 years. Assets of Township, \$6,567.05. Liabilities, \$8,333.88. This at end of 1904.

Township of Flos, County of Simcoe.

The total receipts of this Township for 1904 were	\$28,642	68
The total payments of this Township for 1904 were	19,178	53
Balance in Bank of Toronto, Elmvale	\$9,464	15

Total assessment of municipality, \$990,668.71. Tax rate, 10 mills without school rates. Collector's roll, 1903, \$17,444.74; all paid except about \$100 defaulters' list. Collector's roll, 1904, \$18,974.83; balance due at date of my visit, \$1,098.94. Total assets at end of 1903, \$12,389.74. Liabilities, \$37,179.51, of which \$28,000 were debentures. Treasurer acts as Clerk also and receives a salary of \$500. Has been 13 years Clerk and 7 years Treasurer. A capable officer.

Township of Tay, County of Simcoe.

Total assessment of municipality, \$769,889.00. Tax rate, 6 7-10 mills without school rates. Total receipts for 1904 were \$17,771.62. Liabilities, \$15,797.04. Balance in Western Bank of Canada, Midland, \$1,974.58. Collector's roll for 1903, nearly all paid; balance due on roll of 1904, totalling \$15,500, the sum of \$5,500 at date of my visit. Assets at close of 1903, \$11,863.17. Liabilities, \$6,925.20. Treasurer acts as Clerk also and for dual services receives \$350 per annum. Books well kept. In office 24 years as Clerk and 17 years as Treasurer.

Town of Penetanguishene, County of Simcoe.

Total receipts for 1904 were	.\$22,789 22,291	42 64
Balance in Western Bank, Penetang	\$497	78

Total assessment of town, \$600,000. Collector's roll, 1904, \$17,383.08. Balance due at date of visit in March, \$1,419.12. Tax rate, 2½ cents on dollar. Total assets, which include water works, \$40,000, amount to \$81,196.55. Liabilities, \$84,540.51, of which debentures amount to \$76,521.33. Treasurer has been in office since 1901 and receives \$200 per annum. Books fairly well kept. The water works department barely meets expenses.

Tiny Township, County of Simcoe.

Municipality is assessed for 1904 at \$958,493.54. Tax rate, 7 2-10 mills without school rates. Collector's roll for 1904, \$13,454.38; all paid except \$50 remitted by Council. Total receipts, \$15,643.67. Payments, 16,951.42, showing a balance of \$1,307.75 due Treasurer. The Treasurer is a very

worthy man but has no pretensions as a bookkeeper and the books are poorly kept. Assets are, end of 1903, \$15,764.45. Liabilities, debentures \$76,581.37 and the above amount advanced by Treasurer.

Town of Midland, County of Simcoe.

Total receipts for 1904	\$80,381	99
Total payments for 1904	75,306	88

Balance in Bank of Brtish North America, Midland \$5,075 11

Total assessment of municipality, \$960,440.00. Collector's roll for 1904, \$26,412.17; due on 15 December, \$4,389.54. Tax rate, 27½ mills on dollar. Assets, \$160,334.98, inclusive of water works, \$83,936.25, and electric light plant, \$34,431.66. Liabilities, \$200,884.19, of which debentures amount to \$186,425.88, and Bank of B. N. America, \$10,000.00. Treasurer acts as Clerk also and receives in his dual capacity \$720 per annum. When I was in Midland on 16th March, 1905, the auditor's report was not ready owing to Treasurer's illness and other causes.

Total assessment of municipality, \$2,517,189.00. Collector's roll for 1904, \$25,793.28. Balance due at date of my visit, \$5,970.70. Tax rate, .0037 mills. Total receipts for 1904, \$24,249.96. Payments, \$23,445.60. Balance on hand and in bank, \$804.36. Treasurer has been in office as Treasurer 22 years and Clerk 18 years. He receives a salary of \$700 for the dual offices and is a careful and efficient officer. Total assets at end of 1904, \$38,070.35. Liabilities, \$12,828.75.

MAY.

Town of Dunnville, County of Haldimand.

Total	receipts for	1904		\$ 36,098	
Total	payments for	1904	•	37,878	42

Balance overdraft Bank of Commerce, Dunnville \$ 1,780 41

Total assessment of municipality, \$700,930.00. Collector's roll for 1904, \$16,558.11, paid in full except \$55.91 uncollectable. Tax rate, 23 mills on dollar. Assets, including water works, \$22,000 and school property, \$24,800.00, amount to \$67,881.33. Liabilities, including \$42,000 of debentures, \$48,419.25. Treasurer keeps his books but poorly. He has been in office 3 years and receives \$150 per annum for salary.

Township of Canborough, County of Haldimand.

The total assessment of this township is about \$400,000. Collector's roll for 1904, \$4,820.36, which was all paid except about \$13. Tax rate, 9.20 mills on dollar, without school rates. Books are fairly well kept, although Treasurer does not keep a bank account. Receipts for 1904, \$6,707.22. Payments, \$6,245.08, leaving a balance in the Treasurer's hands of \$462.14. Total assets at end of 1904, \$1,144.78. Liabilities, \$543.07. There are no debentures. Treasurer receives \$40 per annum, which salary it is safe to say should be doubled. He has been 5 years in office.

Township of South Cayuga, County of Haldimand.

Total receipts for 1904, \$3,730.32. Payments, \$3,575.83. Balance in Bank of Commerce, Dunnville, \$154.49. Assessment of Township, \$393,-600.00 (1904). Collector's roll for same year, \$3,092.21, paid in full. Tax rate, 5 3-10 mills without school rates. There are no debentures against the Township. Total assets at end of year were \$1,649.99. No liabilities. Treasurer, who also officiates as Clerk, receives a salary of \$71 per annum and has been in office 14 years. Books are fairly well kept.

Township of Dunn, County of Haldimand.

Total receipts for 1904	\$4,375 78 3,807 31
Balance in Bank and on hand	\$ 568 47

Assessment of municipality, \$403,380 (1904). Collector's roll, \$3,886.89. All paid except \$2 remitted by council. Tax rate, 5 mills without school rates. Collector's roll, \$7,203.98, paid in full. There are no liabilities. Assets amounted to \$1,543.47 at close of year. The Treasurer has been in office 6 years and keeps the Township books as well as can be expected for \$35, which is his annual salary.

Township of North Cayuga, County of Haldimand.

Total receipts for 1904 \$7,752.44, payments, \$7,663.77, balance, \$88.67. Total assessment of township, \$741,185.00. Tax rate, 4½ mills, without school rates. Collectors' roll, \$7,203.98, paid in full. There are no debentures or other liabilities and the assets at close of year stand at \$472.12. The Treasurer keeps his books very well and has held his position for 3 years. As Clerk and Treasurer, he receives an annual salary of \$100 per annum.

County of Haldimand.

The total assessment of this county for 1904 was given at \$10,694,446.00. The tax rate, .0024 mills, which yielded for the County rates \$25,666.67, which sum was all paid to the Treasurer prior to my visit. I found the Treasurer's books correct. Total assets, including \$40,000 for County property, \$51,567.27. Liabilities, \$7,306.36. The Treasurer was in office 20 years and received a salary of \$700 per annum. He was a valuable officer to the County, and his death, which occurred a few months ago, was deeply regretted. There are no debentures against the County.

Township of Sherbrooke, County of Haldimand.

The total receipts of this Municipality for 1904 were		\$1,591 91	
The total payments of this Municipality for 1904 were		1,550 91	
Balance	\$	41 00	

Total assessment of Township, \$150,212.00. Tax rate, 6 mills on the dollar without school rates. Collector's roll for 1904 was \$1,308.46, which was all paid except \$1.80. There are no liabilities and the assets amount to \$2,405.22, of which \$1,600 is school money and is deposited in the Bank of Hamilton, Dunnville. I cannot say much in favor of the Treasurer's book-keeping, but as he acts as Clerk also, and for the dual position only receives \$45 per annum, and that for four years, he can scarcely be blamed if he does not come up to the mark.

Township of Oneida, County of Haldimand.

Total assessment of Township, \$955,305 (1904). Collector's roll, \$7,621.04, paid. Tax rate, 5 6-10 mills without school rates. Total receipts,

for 1904, \$8,933.70. Payments, \$8,078.64. Balance \$855.06 in Treasurer's hands at end of year. Total assets, \$1,455.06. No liabilities. Treasurer has been in office 2 years and receives a salary of \$50 per annum. Township books poorly kept.

Township of Moulton, County of Haldimand.

Total receipts for 1904	\$6,445 99 8,470 49
ville	\$2.024 50

Collector's roll, \$5,951.93, paid in full. Tax rate, 4 mills, without school rates. Assets, \$3,430.96. Liabilities, \$4,279.39, due school fund. Treasurer gets \$65 per annum and has been in office since 1887. I cannot say much in favor of his book-keeping qualifications.

Township of Rainham, County of Haldimand.

The total assessment of the above Township for 1904 was \$535,655.00. Total receipts, \$8,398.90. Payments, \$7,775.76. Balance in Treasurer's hands and in bank, \$623.14. Collector's roll, \$7,150.63, paid in full. Tax rate, 7 mills without school rates. There are no liabilities. Assets, including trust funds for schools, \$5,912.73. Books are fairly well kept by Treasurer, who receives \$50 per annum and has held office since 1893.

Village of Cayuga, County of Haldimand.

Total receipts for 1904, \$52,186.93. Payments, \$51,420.91. Balance, \$776.02, in Bank of Commerce, Cayuga. Total assessment of Village, \$184,230. Tax rate, 23 mills on dollar. Collector's roll for 1904, \$4,814.75. All paid, except about \$60 uncollectable. Total assets, including municipal and school property, \$16,000, \$22,694.46. Liabilities, \$29,769.00. Treasurer has held office for two years and receives an annual salary of \$50. He is a careful man but I cannot say much in favor of his book-keeping, but his accounts appear to be correct.

Village of Morrisburgh, County of Dundas.

Total receipts for 1904	\$26,780 24,938	
Balance on hand and in Molson's Bank, Morrisburgh	\$ 1.842	03

Total assessment of municipality, \$536,300.00. Collector's roll for 1904, \$11,865.30, paid in full. Tax rate, 22 mills on dollar. The municipality has water works and electric light departments which are claimed to be self supporting. Assets foot up \$86,046.05, inclusive of water works, \$31,000. Electric Light, \$31,000. Schools, \$19,000. Liabilities, inclusive of debentures, \$72,625.45, amount to \$80,673.26. I found the Treasurer's books accurate and well kept. He has been Treasurer since 1892 and receives a salary of \$75 per annum.

Village of Winchester, County of Dundas.

Total receipts for 1904, \$9,820.58. Payments, \$10,031.73, leaving an overdrawn balance in Bank of Ottawa, Winchester, of \$211.15. Collector's roll for same year, \$5,892.34, paid in full. Tax rate, 21 mills. Assets, including school property, \$15,000, and Town Hall, \$5,500, \$23,031.75. Liabilities, including debentures, \$8,741.84, \$9,752.99. The assessment of the Village is placed at \$282,961.00. The Treasurer has been in office only a few months and for first year receives a salary of \$20.

Township of Mountain, County of Dundas.

			•••••	\$24,211	40
Total	payments f	or 1904		26,092	94

Balance overdrawn Bank of Ottawa, Winchester \$ 1,881 54

Total assessment for 1904, \$1,322,560.00. Collector's roll, \$18,435.01, all paid but \$67.20. Tax rate, 8.63 mills without special drainage taxes. Assets and liabilities, I could not ascertain with any degree of accuracy on account of the state of the drainage accounts. I should recommend an audit (special) of this Township very soon. Treasurer receives a salary of \$60 per annum and has been in office one year.

Township of Williamsburgh, County of Dundas.

Total assessment of this Township, \$1,474,085.00. Total receipts for 1904, \$32,325.69. Payments, \$30,863.23, showing a balance of \$1,462.46 in Bank of Ottawa, Morrisburgh. Tax rate, 7½ mills without school rates. Total assets at close of year, \$5,406.86. Liabilities, \$20,200, inclusive of \$20,000 debentures. Treasurer receives \$50 per annum and has been in office 20 years. Books fairly well kept.

Village of Chesterville, County of Dundas.

Tax rate, 10 mills without school rates. Collector's roll for 1904, \$27,-908.19, mostly paid. Assets without drainage, \$6,769.23. Drainage assets, \$48,343.48. Liabilities, including drainage debentures, \$79,327.15. Outstanding accounts, \$81.59. Treasurer in office since 1st Jan., 1905. Salary, \$100 per annum.

Township of Lochiel, County of Glengarry.

Total receipts for 1904	\$16	,429	32
	16	5,403	43
Balance in Treasurer's hands	\$	25	89

Total assessment of municipality, \$1,012,915. Tax rate, 7 mills on dollar without school rates. Collector's roll for 1903, \$14,365.97, paid in full. No bank account kept. Books otherwise kept well. Total assets for 31st Dec., 1904, \$15,241.49. Liabilities, \$12,109.47. Treasurer has been in office since 1889. Annual salary, \$100.

Township of Charlottenburgh, County of Glengarry.

Total assets of municipality, \$1,179,500.00. Tax rate, 6 mills on dollar, without school rates. Collector's roll for 1904, \$23,057.21.. Due at date of my visit in May, \$2,689.26. Total receipts, \$23,756.10. Payments, \$26,348.29. Balance overdrawn in Merchants' Bank of Canada, Lancaster, \$2,592.19. Assets at close of year, \$11,499.25. Liabilities, \$15,557.90. Treasurer has been 2 years in office and receives a salary of \$125 per annum.

Village of Lancaster, County of Glengarry.

Total receipts for 1904, \$2,213.03. Payments, \$1,684. Balance in Merchants' Bank, Lancaster, \$528.81. Total assessment of Village, \$85,000. Collector's roll, \$1,676.19, practically all paid. Tax rate, 20 mills. Total assets, \$641.20. Liabilities, \$329.50. Treasurer keeps books fairly well, has been in office 2 years and receives a salary of \$35 per annum.

United Counties of Stormont, Dundas and Glengarry.

The assessed value of these Counties in 1904 was \$16,746,133, with the equalized value about \$500,000 more. The County rates footed up \$37,602.82. At the date of my visit in June, the balance remaining unpaid of this amount was \$1,850.72. Tax rate, about $2\frac{1}{2}$ mills on the dollar. Treasurer is an efficient officer and receives \$900 salary per annum. Has been in office 2 years. The assets of the County, inclusive of the County buildings, \$61,000. Bridges, \$29,406. Cash in Bank of Montreal, \$8,000, amount to \$127,912.43. Liabilities, \$56,865.83, of which about \$46,000 are debentures.

Township of Lancaster, County of Glengarry.

Total receipts for 1904, \$14,333.89, payments, \$14,131.24, leaving a balance of \$202.65 in the Merchants' Bank, Lancaster. Total assessment for 1904, \$938,807, for 1905, \$2,250,000.00. Collector's roll for 1904, \$13;771.94. Due 1st June on this roll, \$718.93. Tax rate, 6 2-10 mills without school rates. Treasurer has been in office 25 years and receives a salary of \$70 per annum. Assets at close of year, \$4,534.68. Liabilities, \$3,651.84. Books fairly well kept.

Village of Maxville, County of Glengarry.

Assessment of Village for 1904, \$71,540.00. Collector's roll, \$1,946.55, paid in full except \$8.50 uncollectable. Tax rate, $2\frac{3}{4}$ cents on the dollar. Receipts for 1904, \$2,110.57. Payments, \$2,110.57. Total assets at close of year, \$4,120.00. Liabilities, \$3,670.06. Treasurer receives \$10 salary. He is a new beginner, and it is to be hoped will have it speedily increased.

Township of Roxborough, County of Stormont.

Total receipts for 1904		
Ralance due Tressurer	\$ 3 345	-09

Assessed value of Township, \$789,305.00. Collector's roll, \$22,133.02. Due 1st June, \$2,471.34. Tax rate, 8 mills on dollar, without school rates. No reliable record of debentures could be found. These are supposed to be about \$60,000, but by no means certain. I should strongly advise an audit of this municipality. The Treasurer is a very worthy man and has been in office 27 years, but he knows very little about accounts. An audit should be applied for to get those drainage accounts into shape. Treasurer's salary is \$50 per annum. Assets and liabilities, I am not in a position to give from information at my command.

Township of Osnabruck, County of Stormont.

Assessed value of this Township for 1904 was \$1,179,450.00. Collector's roll for 1904 was not produced, but said to be paid. Tax rate, 7 mills without school rates. Total receipts for 1904 were \$26,833.64. Payments, \$21,034.43. Balance in Molson's Bank, Wales, \$5,799.21. Treasurer very worthy man, but not well up in his official duties, receives a salary of \$100 per annum. Has been 8 years in office. I am unable from material available to give either the assets or liabilities. An audit here would do no harm.

JUNE.

Township of Cornwall, County of Stormont.

Total receipts for 1904	\$29 384 51 24,181 83
Balance on hand and in Bank	\$ 5.202 68

Total assessment of Township, \$1,174,765.00. Tax rate, 8 mills on dollar without school rates. Collector's roll, \$20,213.16. About \$1,000 due at date of my visit in June. Total assets at close of year, \$12,528.68. Liabilities, \$22,688.00. Treasurer officiates as Clerk also and for the dual position receives \$350 per annum. In office 12 years. Books correct and well kept.

. Township of Finch, County of Stormont.

Total receipts for 1904	
In Treasurer's hands	\$ 2 201 63

Assessment of Township for 1904, about \$1,000,000. Tax rate, 20 mills, including schools. Collector's roll, \$21,163.34. Returned to County Treasurer, \$421.28, unpaid, \$831.96, balance paid. Treasurer has been in office only 10 months and has yet to show his efficiency. He receives \$100 per annum. Assets of Township, \$5,000. Liabilities, \$6,000.

Town of Cornwall, County of Stormont.

Assessment of Town for 1904, \$1,794,775.00. Tax rate, 18 mills. General rate schools, 4½ mills. Separate schools, 8 mills. Collector's roll for 1904, \$49,891.35. Balance due 1st June, 1905, \$12,894.56. Treasurer keeps his books very well and receives a salary per annum of \$300. He has been in office since 1st Jan., 1905. Total assets, including town hall, schools and parks, \$60,500.00. Water works, \$135,632.73, \$279,180.50. Liabilities, \$290,339.59, which includes overdraft to Ontario Bank of \$11,207.11. Balance in depentures, \$279,132.48. Total receipts for 1904, \$64,142.14. Payments, \$75,349.25. Overdraft in Ontario Bank, \$11,207.11. The Treasurer of the water works was short in his accounts 31st Dec., 1904, to the extent of \$3,273.97. Of this sum \$1,969.82 has been refunded and I understand the balance is to be paid shortly, if it has not been already done.

Township of Sombra, County of Lambton.

Total receipts for 1904	\$39,867 46 38,075 15
Balance on hand and in Bank	\$ 1,792 31

Total assessment of Township, \$1,649,370.00. Tax rates, without schools or drains, 4 mills on dollar. Collector's roll, \$31,523.70, of which \$24,243.07 was paid on 13th June. Total assets at end of 1904, \$69,432.66. Liabilities, \$47,283.64. Treasurer does not keep his books as well as might be done. He also acts as Clerk, for which dual position he receives \$400 per annum. An audit was petitioned for by a considerable number of petitioners, and was granted by the Government to take place in January, 1906.

City of Peterborough, County of Peterborough.

Total assets of City, \$5,874,264.00. Tax rate, 18 mills. General rate, separate schools, 19 4-10 mills. Collector's roll, \$108,868.04. Up to 1st July, 1905, balance remaining \$1,358.48. Sinking funds amount to \$77,-

010.98. The Water Works Department cost \$247,000 and is managed by a Board of Commissioners.

The receipts for 1904 were	\$171,586 28
The payments for 1904 were	198,357 83

Balance overdraft in Ontario Bank, Peterborough \$ 26,771 55

Including this overdraft and the current liabilities, the latter stand at \$31,730.40, and adding the debentures, \$662,315.08, the entire liabilities stand at \$694,045.48. The assets at \$852,720.82. The principal items of these are:

Surplus in hands of original Board of Commissioners	\$ 43,314	26
Sinking Funds		
City property	147,525	
Schools	82,516	00
Water Works		
Ashburnham W. Works and Buildings, lately annexed	19,500	00
Sewers		
Granolithic walks		
Bridges	21,985	83
Miscellaneous	60,402	80
•	\$852,720	82

The books of the new city are well and accurately kept by the Treasurer, who has acted as such since 1896. His salary at present is \$700 per annum.

Township of Asphodel, County of Peterborough.

Total receipts for 1904	
Balance in Treasurer's hands	\$125 17

Total assessment of Township, \$844,375.00 Tax rate nearly 6 mills without school rates. Collector's roll for 1904, \$9,033.38; paid on 27 June, \$8,987.72. Assets at close of year, \$485.40. Liabilities, \$200. Treasurer keeps books fairly well and has been in office 22 years. He receives a salary of \$65 per annum.

Township of Otonabee, County of Peterborough.

Total assessment of Township, \$1,970,429.00. Tax rate, 4 9/10 mills in dollar without school rates. Collector's roll for 1904, \$16,849.15; all paid except about \$200.

Total receipts for 1904		
Balance in Treasurer's hands	\$23 4	2

Total assets at close of year, \$11,851.76. Liabilities, \$6,293.64. Treasurer acts as Clerk also, and receives \$240 per annum for acting in the dual capacity. He is a good officer and accurate in his accounts.

Township of Smith, County of Peterborough.

Total receipts for 1904	\$14,545 52 13,181 46
Balance in Bank of Toronto, Peterborough	\$1,364 06

Total assessment of Township, \$1,479,055.00. Tax rate, 5 3/20 mills on the dollar without school rates. Collector's roll for 1904, \$12,996.37; paid in full except some \$33 for abatements. Total assets at close of year, \$3,296.60. Total liabilities at close of year, \$1,362.15. Treasurer acts as Clerk, also receives \$300. per annum for the work in both positions. He is an excellent officer and accurate.

Township of North Monaghun, County of Peterborough.

Total receipts for 1904	\$6,909 73 5,447 11
Balance, Ontario Bank, Peterborough	\$1.462 62

Total assessment about \$600,000. Roll not returned. Collector's roll, \$4,926.97; paid in full, \$94.36 allowed for deductions. Tax rate 3 4/5 mills without school rates or specials. Assets at close of year, \$4,644.62. Liabilities, \$1,762.06. Treasurer in office 5 years; salary, \$40 per annum; good officer; books well kept.

County of Peterborough.

This County has had three Treasurers within a few years. It is to be hoped that the present occupant of the office will be longer lived than his predecessors. Total assessment of municipality \$8,099,096.00. Tax rate, 2 4/5, yielding in County rate, \$22,677.45, which was paid in full. The assets of the County are placed at \$120,466.36, which includes \$93,355.00 for county property, and liabilities are \$70,168.87, which sum includes \$56,062.96 for debentures. The treasurer, as mentioned above, is a new appointment, and judging from appearance is likely to prove an improvement on the last. For years the books of this County have been badly kept, but this fact did not appear to worry the County Council at all. Treasurer's salary is \$1,200 per annum.

Village of Havelock, County of Peterborough.

Total receipts for 1904	\$6,845 \$6,510	
Balance in Treasurer's hands	\$ 334	56

Assessment of village, \$158,360. Tax rate, 2½c. in dollar, \$3,959.17, paid in full. Total assets at close of year, \$5,404.73. Liabilities, \$3,315.12. Treasurer's salary, \$35 per annum. In office 6 years; books well kept.

Village of Norwood, County of Peterborough.

Total assessment of municipality, \$230,560.00. Tax rate, 23 mills in dollar. Collector's roll, \$5,575.35; paid in full. Total receipts in \$7,285.14. Payments, \$7,037.20. Balance in Union Bank, Norwood, \$247.94. Assets at close of year, \$3,825.19. Liabilities, \$4,205.56. The village has a High School and a Public School, which are not included in above statement of assets. Treasurer keeps books correctly and has done so for 3 years. His salary is \$25 per annum, which seems too small, considering he has given \$3,000 security.

Township of Burleigh and Anstruther, County of Peterborough.

Total receipts for 1904, \$3,720. Payments, \$2,684.12. Balance, \$1,035.88, in Treasurer's hands. Total assessment of municipality, \$105.-885.00. Tax rate, 15 mills without school rates. No bank account books, otherwise fairly well kept. Collector's roll for 1904, \$2,730.83, of which \$185.29 was not collectable. Balance paid. Assets at close of year, \$3,135.88. Liabilities, \$2,200.33. Treasurer has been in office 6 years; salary, \$35 per annum.

Township of Douro, County of Peterborough.

Total receipts for 1904	\$ 12,945 11,672	84 79
Balance on hand and in bank	\$1.273	05

Assessment of Township, \$755,940.00. Tax rate, 5 mills on the dollar, without school rates or specials. Collector's roll for 1904, \$7,596.01; paid in full except \$3.15 remitted. No bank account kept in cash book. Total assets at close of year, \$1,997.83. Liabilities, \$7,402.51; mostly drainage and school debentures. Treasurer has been in office 5 years and receives \$60 per annum.

Township of Harvey, County of Peterborough.

Total assessment of municipality, \$198,625.00. Tax rate, 2½ cents in dollar; including school rates. Total receipts for 1904, \$4,226.08. Payments, \$4,422.45. This municipality has given large support to manufactories, which, so far, have not met with the success anticipated, and the ratepayers have a heavy load to carry. It is hoped that in the near future the burden will be lightened, but patience is required.

OCTOBER, 1905.

Balance due Treasurer	\$67 61

Total assessment of Township for 1904, \$713,446.00. Tax rate, 9 mills on dollar without school rates. Collector's roll for 1904, \$14,500.09, practically paid in full, only a few exemptions. Total assets at close of 1904, \$2,339.16. Liabilities, \$2,199.43. Treasurer has been in office 7 years and receives an annual salary of \$75. He keeps the Township books fairly well. A petition was laid before the Government for an official audit of this Township preparatory to a division of the two municipalities, but after a careful examination by myself, it was decided not to proceed with it for the present.

A careful examination of the work of the Department for the past year of 1905, shows a decided improvement in the keeping of municipal accounts throughout the Province, and although they are still very far from what they should be, there are good hopes of better things in the near future.

It is very discouraging, however, to see such small salaries paid to their officers by the municipalities. The salaries of \$15, \$20 and \$25 per annum are very frequent in their recurrence in the accounts. This should not be, unless in the case of a municipality whose revenue does not exceed \$2,000 per annum. A Treasurer's salary should not be less than \$100, and this is far from being the case at present. There is a small class of retired merchants, and occasionally farmers, who take pleasure in doing the Treasurer's work for next to nothing in the form of remuneration, and these are a great boom to the thrifty municipalities. But there are very many, whose cases

are a hardship and these should be considered, more especially at the present time when agricultural interests are so prosperous. No one who has had the opportunity of perusing the average collector's roll as it may be seen in any of the rural townships throughout the Province of Ontario, can doubt the solid wealth and comfort of which it forms the exponent.

I have the honor to be, Sir,

Your obedient servant,
J. B. Laing,
Provincial Municipal Auditor.

MARCH, 1905.

Township of Tilbury North.

Report of Special Inspection, Audit and Examination of the Books, Accounts, Vouchers and Moneys of the Municipal Corporation of the Township of Tilbury North in the County of Essex.

Upon the authority of an Order-in-Council, approved by His Honour, the Lieutenant-Governor of the Province of Ontario, the 7th day of Sept., 1904, Frank H. Macpherson, a Fellow of the Institute of Chartered Accountants, of the City of Windsor, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Township of Tilbury North, in the County of Essex, under the provisions of Chapter 228, R.S.O., 1897.

In pursuance of the said order and instructions, the said Frank H. Macpherson hereby reports that he has made an inspection, examination and audit of the various accounts of the said Corporation.

The audit is made upon the petition of certain ratepayers, addressed

to the Provincial Municipal Auditor.

No specific charges are made therein, the audit being asked for upon general grounds, with particular reference to obtaining the standing of the several drainage accounts.

Scope of Audit.

The examination covers the accounts of the Municipality from Jan. 1,

1892, to Dec. 31, 1903.

Upon the date first mentioned the Municipality of Tilbury North separated from the Municipality of Tilbury West, so that the present audit takes in the entire life of the Municipality. The separation of the townships was confirmed by special Act (Chap. 81, Vict. 54).

J. B. Chauvin, was Clerk from date of organization to Feb., 1894.

J. W. Carr succeeded him, holding office for one year.

J. A. Tremblay was appointed Clerk in Jan., 1895, and has held office continuously since that date.

Clement Mailloux was appointed Treasurer at the time of organization,

and retained office until Jan., 1895.

Eli Quonnville was appointed Treasurer in Jan., 1895, holding office until Jan., 1900.

J. T. Chauvin, the present Treasurer, was appointed in Jan., 1895.

4 M.A.

ACCOUNTS AT SEPARATION.

By virtue of an agreement entered into, and dated April 16, 1892, it was arranged that the liabilities and assets of the original Township should be divided in the following ratio:

I have looked into the figures used in arriving at the settlement, and note that certain items appear to have been overlooked. These omissions accrue to the benefit of Tilbury North.

On Dec. 31, 1891, the Treasurer of Tilbury North (Thomas Beattie), charged himself with the amount of an overdraft in the local private bank of Westland & Nicholl, in which bank the Township account was kept. The sum of this overdraft was \$389.41. Immediately following the close of the year, deposits were made to offset the amount of the overdraft, but the Treasurer neglected to take credit in his 1892 accounts for its payment, and the sum was not taken to account in the settlement.

Of this amount, Tilbury North should have borne 52 per cent., or \$202.50.

Again, the amount of Tilbury North's interest in the "Arrears of Taxes" in the County Treasurer's office was fully taken to account in the settlement.

In the years 1893 and 1894 the County Treasurer sent to the Township of Tilbury North, arrears of taxes amounting to \$363.12, which was placed upon the collector's rolls in Tilbury North, and then or subsequently collected in full. Of this amount Tilbury North accounted for \$189.81 in the settlement made in the latter part of 1894, or early in 1895. The balance yet remains unsettled, amounting to \$130.29, 48 per cent. of which should be accounted for to Tilbury West, or \$62.54.

Taking next the payments to be made annually by Tilbury North, on account of special drain assessments, I find that the amounts contributable and contributed were as follows:

				(Contrib	utable.	Contra	buted.	Difference	
1895					\$ 1,099	2 3	\$ 946	72	\$ 152 51	•
1896					946	72	946	72	*******	
1897					946	72	946	72	• • • • • • • • •	
					946	72	906	26	40 46	
1899	· · · : · ·	• • • • • •			;906	26	906	26	•••••	
						61	385	61		
1901	• • • • • •	• • • • • •	•••••		385	61	385	61	•••••	
	•									
					\$5,616	87	\$ 5,423	90	\$ 192 97	

The payments made in 1898 by Tilbury North applies to the levies of 1897, without this explanation it might be supposed that the table above was inaccurate, the Township accounts showing a payment of \$946.72 in 1898.

Tilbury North is therefore indebted to Tilbury West, on account of transactions relating to the separation of the Townships in the following sums:

Proportion of overdraft	\$ 202	50
bury North and entered upon roll Balance due re drains as above		
	\$458	01

Tilbury North is, however, entitled to a credit of \$341.36, being 52 per cent. of \$656.48 monies received by the Township Treasurer (Thomas Beattie) in 1891, on account of the 1890 collector's roll, and other items not entered in his accounts, of which Tilbuiy North's proportion was the above.

The balance due from Tilbury North to Tilbury West, in this connection, is \$116.65, which sum I have entered as a liability of the Township.

ASSESSMENT AND TAXATION.

Assessment Rolls.

The assessment rolls have been compared with the collector's rolls for the entire period covered by the audit and have been found correct.

Collector's Rolls.

The collector's rolls for each of the years since 1892 have been carefully examined, and all are found to be substantially accurate and correct, with the exceptions involved in the Mailloux deficiency, since settled, and with the undermentioned:

(a) The C. M. B. A. hall at Stoney Point (in which also are held meetings of Council), though entered upon the assessment roll each year, has been omitted from the collector's roll continuously. This has been done under the supposed authority of By-Law 57, passed Oct. 5, 1895.

"The properties owned by benevolent associations now existing, or to be in existence in the future in said township, be forever exempted of any

taxation whatever."

While the council may have been within its rights to exempt this property for general taxes, no authority existed for exempting from school and drainage taxes. The fact that the hall is rented for council purposes does not affect the matter.

(b) Although on the assessment roll (No. 135, of 1901), the property assessed to Xavier Marie, is omitted from the collector's roll, assessed value

\$50.00.

(c) The property assessed to Dolphice Chene (No. 126, roll of 1903),

assessed at \$50.00 is also omitted from the collector's roll.

The first omission was by inadvertance, and the second by understanding of the council, but without the formality of a resolution, as I am advised by the Clerk.

The names, in many instances where repetition was necessary, have been omitted, as also the post office addresses, the repetition being produced by use of the "Ditto." To produce a roll (and this applies with even more force to the assessors' roll) which will fully comply with the statutory requirements, each and every name must be written in full, and each post office address must be written, also in full, against its respective name.

Arrears of Taxes.

With one or two exceptions, the non-residents' rolls have been returned

to the County Treasurer within the time set by statute.

Similarly, the uncollected taxes upon the resident rolls, have been, with one or two exceptions, returned to the County Treasurer previous to the first of May in each year.

 $\mathsf{Digitized} \ \mathsf{by} \ Google$

The attention of the Municipality and the Township Treasurer is called to the fact that if the roll be not returned in accordance with the statutory requirements, a loss to the Municipality is entailed, of the percentage to be added by the County Treasurer against the arrears of taxes in his hands upon May 1st in each year.

All taxes returned to the County Treasurer have been accounted for to the Municipality, so far as the same have been realized upon, with the

following exceptions:

On Dec. 10th, 1897, Clark, Cowan, Bartlett and Bartlett paid to the then County Treasurer (Henry Morand), \$22.45. Of this amount, \$4.16 was accounted for. The remainder, \$18.29, was credited in the "Lot Book." to 6th part lot 8, con. 1, which sum was not entered in the cash book, nor was it credited to Tilbury North. An examination of the receipt book in the County Treasurer's office shows the manner in which the error occurred. There was no suggestion of wrongful intent on the part of the late County Treasurer, the error being purely clerical, and one which should have been detected by the County auditors. I have entered as an asset of the Township the amount in question, \$18.29, with interest from Jan. 1st, 1898, to Dec. 31st, 1904, \$7.63, making in all \$25.92, which sum the County should refund.

All taxes returned by the County Treasurer to the Township Clerk to be placed upon the collectors' rolls, have been so entered, or have otherwise

been properly accounted for.

In the Warrant Book in the office of the County Treasurer, in the year 1898. appears "Lots 15. 19, 20, 21 and 22, on 9, B. F." (Chas. Welsh) \$7.72 as being subject to sale for arrears of taxes in 1895-6-7. The property was not sold, however, having been withdrawn from sale, improperly described" as noted by the County Treasurer. The property was not re-charged in the Lot Book, and a loss to the Township is thus sustained.

The form of re-capitulation in the collectors' rolls as prepared by the Township Clerk is more nearly in compliance with the Statute than any I have yet seen. In one or two points, however, it may be improved upon. I have appended to this report a "pro forma" exhibit of a more satisfactory re-capitulation. The manner in which the Township Council finally audits the collectors' roll is commended. The Treasurer signs an acknowledgment in the roll of the receipt of the money reported by the collector as having been paid to him, and a statement is entered in the roll showing the final and complete settlement thereof. Upon receiving the roll in this condition, the Council, by resolution, accepts the roll from the collector and relieves the bondsmen.

While in principle the release of bondsmen at any time is not a good one, for the reason that if there be no default there can be no claim; yet with the acknowledgment in writing by the Treasurer, the council may reasonably assume that it is justified in releasing the collector and his bondsmen.

DRAINAGE ACCOUNTS.

In conformity with my usual custom, I notified the several petitioners and other ratepayers throughout the Township of my desire to hear from them such charges or receive such information relating to the conduct of the municipal affairs of the Township as they might desire to make.

For this purpose, I attended at Tilbury on Feb. 27th, 1905. Certain of the petitioners were of the opinion that surpluses existed in connection with a number of the drainage works, which should have been returned to the interested ratepayers, instead of which the council had transferred these sums to the credit of the general funds of the Township. This has particular reference to the following drains:

Garant Drain.

Little Creek Drain.

These I deal with in their proper order.

LITTLE CREEK DRAIN.

The work under By-law 143 upon this drain having been completed, there remained a balance of \$487.41 at credit of the account. The Clerk was requested to prepare a schedule for refund of the surplus to the persons or funds properly entitled to receive the same. In his report, dated August 28, 1903, is found the following statement:—

Surplus reported by Treasurer Less premium and accrued interest	••••		\$487 200	41 51
M1113 - 37 . 1 4 3	\$ 86 199	95		90
Tilbury North's share			\$ 199	95
Add premium and accrued interest			200	51
Less deductions made at Court of Revision from assessments, and charged to Roads, unless there were a surplus, in which case reductions were to			\$ 400	46
be charged against such surplus: Can. Pac. Ry.	41 0	00		
Gilbert Quennville	\$ 10	00		
Jas. Nussey		00		
Norbert Deschamps	30		1	
Peter Reynolds		00		
Pierre Oriet	_	00		
			\$102	00
Returned to ratepayers by reduction on assessment			298	46
on 1903 roll	••••	. :	\$181	16
m 1111		;	8 117	30
Township's share for roads, etc		. :	8117	

The only item in the above statement to which exception may be taken is the sum (\$102.00) transferred to the general funds, being deductions made by the Court of Revision, and charged over against the Roads. The contention of the petitioners is that the Court of Revision did not have the power to provide an alternative reduction; and that the reimbursing of the township out of the surplus was a recharging to them of the reduction to which the Court of Revision decided they were entitled. Such is, in effect, the result, but it is even more far-reaching, for it also deprives those rate-payers who did not appeal from participation in a surplus to which they were entitled.

In principle the whole proceeding is wrong. The applicants were entitled to the reductions made, or they were not. If entitled to the rebates given, then the sum of the reductions would be a charge against the roads (General Fund) or would be the subject of a re-assessment over the whole scheme. It has been pointed out by the Engineer that while the action of the court may not have been strictly in accordance with the provisions of the Drainage Act, it was, he thinks, "for the best interests of all concerned. This was a small drain, and to adjourn the court so as to enable the Clerk to notify all the parties and hold another court would cost a considerable amount of money, which would have to be paid by the same parties who would get the refund," and he is of opinion that "no injustice has been done to any of the parties interested."

While, as pointed out, the procedure is wrong, yet the facts would appear

to be that, in equity, no particular injustice has been done.

In this connection it is proper to point out that an item of \$59.76, accrued interest upon the debentures, was improperly credited to the drainage work, so that but \$42.00 of the \$102.00 is in dispute.

I find that it has been a common practice of the Treasurer to credit the drainage works with the accrued interest received from time to time on debenture sales. It happens, however, that the accounts in no case have been sufficiently large to work serious injustice to the municipality, and as the accounts interested have practically all been closed, I have not thought prudent to disturb them.

For the future guidance of the Council, however, it is pointed out that unless the drainage construction accounts have been charged with the interest upon advances made by the Township during the construction of the drain, and previous to the sale of the debentures, it is not proper to credit the construction account with the accrued interest. The interest has accrued by reason of the fact that the Township has been carrying the advances, and the Corporation is entitled to retain the accrued interest to offset the loss of interest which it otherwise sustains.

The proper procedure is as follows: The Township should charge the drainage works with whatever interest it is entitled to for advances made, and when the debentures are sold, the premium and accrued interest to be a

credit to the drainage account.

GARANT DRAIN.

The circumstances in connection with this work are identical in all particulars, with the preceding drain, excepting as to amounts. The reductions by Court of Revision were:—

S. 1 Lot 7, Con. 3	\$ 25	00
S. pt. of S. ½ of S. ½ Lot 7, Con. 3		
S. 1 Lot 8, Con. 3		
S. ½ of N. ½, S. ½ Lot 8, Con. 3		
E. ½ of S. ½ Lot 10, Con. 3		
W. ½ of S. ½ Lot 11, Con. 3		
N. ½ Lot 7, Con. 3		
1. 7 Lot 1, Con. 5	20	

\$126 25

The surplus at credit of the drainage account was \$82.40, and this was, by warrant, transferred to the general funds of the Township.

The remarks upon the Little Creek Drain apply equally well here.

TREMBLAY CREEK.

To the balance due the Township, \$140.03, I add \$127.56 accrued interest, improperly credited to the construction account, making a total debit of \$267.59.

BIG CREEK DRAINAGE SCHEME.

I have included in the liabilities of the Township the claim of Tilbury West of \$315.50 on account of the Big Creek drainage works, which sum was found to be due by the report of the Provincial Municipal Auditor, dated May 18th. 1903, copy of which was delivered to the Township at that date. The Township disputes its liability upon this transaction.

The sum of \$90.30, which has for some time been carried as an asset, have eliminated from the accounts. I have analyzed the drainage account thoroughly, and in view of the settlement of expenses with Tilbury West, I have concluded that this balance cannot be recovered from the ratepayers interested, by a supplementary assessment and that it must therefore be written off.

ROBB-DALES DRAIN.

Carried in the auditors' report for 1903 as an asset, \$267.00, and as a liability, \$203.00, has been eliminated from the accounts and an asset of \$62.00, being the actual advances by Tilbury North, entered instead. The liability to Tilbury West of \$203.00 is a liability of the drain and not of the Corporation.

OTHER DRAINAGE ACCOUNTS.

All drainage accounts have been carefully examined and found substantially correct. Refunds, where such have occurred, have been made either by cash, or by reduction of levy in some particular year. Where made in cash, we find proper schedules, receipted by the landowners entitled to receive the money, and when by a reduction of the levy, the reduction has been checked to the Collector's roll in each instance.

The statement showing the financial position of the Township sets forth the position of the several drainage accounts as of December 31st, 1903.

DITCHES AND WATER COURSES.

The examination of the awards, assessment and collections in connection with line fences, and ditches and water courses shows that all assessments made by the Engineer have been paid to the Township Treasurer, or they have been placed upon the Collector's roll in terms of sec. 27, chap. 285, R.S.O.

The Township of Tilbury North was assessed for certain expenses in connection with two awards under the Ditches and Water Courses Act by the Engineer for the Township of Tilbury West, and the amounts remained unsettled on December 31st, 1903, as follows:—

Share of expenses, Goulet award, as per Engineer's report,	
dated April, 1903	\$ 4 00
Share of expenses. Glasier award, as per Engineer's report,	
dated June 12th, 1903	5 00

GENERAL REMARKS.

In January, 1899, the Council entered into an agreement with the Township Clerk (J. A. Tremblay) whereby his annual salary was fixed at \$400.00, this to include all services, with the exception of fees as registrar of births, deaths and marriages. All fees collectable by the Clerk in connection with drainage accounts, Ditches and Water Courses Act, line fence awards, etc., to revert to the Township. The fees so collected have in every case been returned and credited to the general funds of the Township.

The Clerk keeps a copy of all correspondence on Township business, and at each meeting of Council reads all correspondence had upon matters affect-

ing the municipality. This is a very commendable procedure.

ARREARS OF TAXES.

No record of these has been maintained by the Township Treasurer. I have provided a proper book and had these written up to December 31st, 1903.

ACCOUNTS OF THE TREASURER.

The accounts of the several Treasurers have been carefully scrutinized

both as to receipts and expenditures.

The accounts of Clement Mailloux having been made the subject of a special audit in 1895, and a settlement arrived at based upon the audit then made, I therefore do not disturb the accounts of this Treasurer, as then reported upon.

The revenues of the Township during Eli Quennville's term of office,

1895-1899, are satisfactorily accounted for.

So, also, have the revenues of the municipality been fully and properly accounted for by the present Treasurer, J. T. Chauvin.

Interest earnings upon the funds of the Township in the hands of the

bank are regularly credited, as should be the case.

The proceeds of the sale of all debentures issued since 1892 (including premiums and accrued interest) have been checked, and in all cases the Treasurer has charged himself with the proper amounts.

The vouchers in many instances (and this is applicable to the several Treasurers) are not in proper form, being deficient in endorsement or not endorsed at all, and many of them are such as I should decline to accept in a regular audit; a recommendation is made upon this point.

The debenture register is not kept in approved form, although the

requisite information is available for the most part.

Payments in many cases have been made without an order of Council. These refer principally to payments under contracts respecting drainage works, bridges, etc. Where warrants of this character are issued in advance of meetings of Council, they should in every instance be the subject of a confirming resolution at first meeting of Council.

While, as stated, the revenues of the municipality have been accounted for, nevertheless, the books and accounts of the corporation are not kept in such manner as to enable the Treasurer to obtain a statement of the affairs

of the Township, which is in any sense accurate.

This can be done readily, with but little extra work, and the present Treasurer is quite competent to do so, with proper instructions. The contents of the Collector's roll should be entered in the Treasurer's books concurrent with its delivery to the Collector, so that the several funds receive the proper credits, the debit to the collector being as represented by the face of he roll.

FINANCIAL POSITION OF THE TOWNSHIP.

The present financial standing of the Township is shown in the appended statement. The available assets, \$12,256.95, exceed the current liabilities, \$9,108.79, by \$3,148.16.

Model Forms.

With a view to improving the methods and of supplying certain requisite and necessary information in better form, I have prepared "pro-forma exhibits," which accompany the report in the form of an appendix, "A," as follows:—

(1) By-law striking the annual rates.

(2) Form of recapitulation of Collector's roll, which should be entered

at the close of roll.

(3) Schedule showing analysis of Collector's roll to be prepared by the Clerk and forwarded to the Treasurer immediately upon the completion of the roll, and prior to its delivery to the Collector.

(4) Form of Journal-entry to be made by the Treasurer upon receipt of the schedule (3) from the Clerk, the details of which, when posted to the Ledger, would place the contents of the Collector's roll properly thereon.

The Township is being exceedingly well served by its present Clerk and Treasurer, and these officials will, I am sure, welcome the changes proposed, even though their work might be slightly increased thereby.

RECOMMENDATIONS.

As a result of the present examination, inspection and audit of the books, accounts and vouchers of the municipal corporation of the Township of Tilbury West, I make the following recommendations:

(1) That all funds of the Township shall be deposited in a chartered bank and that all payments thereout shall be made upon the warrant of the Reeve, counter signed by the Treasurer, excepting as noted in paragraph 2.

(2) That the present system of payments made by the Treasurer upon the order of the Commissioners or of Engineer be abolished, and that all accounts be passed by the Council in regular session, before payment, excepting fixed charges, as debentures, interest, payment of school accounts, and any other items fixed by by-law or by statute which are payable by the Treasurer without reference to the Council.

(3) That warrants, properly drawn by the Reeve, shall be countersigned by the Treasurer, as follows: "Merchants Bank of Canada, Tilbury, will pay when countersigned by, Treasurer," thus becoming operative as a check against the funds of the Township on deposit with the bank.

(4) That an official form of receipt, with stub properly numbered, shall be adopted, and that all monies received by the Treasurer, from whatever source, shall be acknowledged thereon.

(5) That expenditures on award drains shall be charged (as now) to individual accounts in the Treasurer's ledger, and the same shall be balanced by the cash received from the tax-payer, or through the Collector's roll.

(6) That the Treasurer shall decline to pay school warrants, unless the orders are properly signed by at least two Trustees, and sealed with the seal of the School Section.

(7) That the Treasurer shall decline to pay warrants when presented by other than the party to whom properly payable, unless, (a) properly endorsed. or (b) upon written order authorizing payment to another, which order shall

be attached to the warrant, after being endorsed by the person presenting it. That the practise of the Council in making warrants owing to others, in favor of its individual members, in order that the money may be obtained

at the Council meeting, shall be discontinued.

(8) That the by-law striking the rates shall show in detail the amount of taxes required to be levied for the several schools, and shall also show in detail the sum to be levied on account of the township contribution under the several drainage by-laws; that the Clerk shall be required to prepare and enter at the close of each Collector's roll a summary and recapiluation of the contents thereof, in conformity with the *pro-forma* exhibit accompanying this report.

(9) That where cash refunds are made by Reeve's warrant upon the Treasurer, a proper by-law should be passed, in which shall be included a schedule showing in detail the total amount of refund, and the distribution to the individuals. In this connection it may be said that the really equitable manner of dealing with refunds is to make a pro-rata reduction covering the balance of existing assessments, so that the rebate will be received by the

persons properly entitled thereto.

(10) Proper conveniences for the filing of Township documents should be

supplied to the Clerk and Treasurer.

(11) That the Collecter of taxes shall return his roll previous to the 8th day of April in each year, and he shall make his returns of the uncollected taxes in the form required by Statute, which includes a duplicate of the return, devilered to the Treasurer, sent to the Township Clerk.

(12) That proper books of account should be opened in accordance with the findings of this report, that these should be written up to date, and the

Treasurer instructed in the keeping thereof.

Conclusion.

My thanks are due to the Clerk and Treasurer for services rendered and information furnished, from time to time, during examination of accounts.

The attention of the Council is called to Section 14, Chap. 228, R.S.O. 1897, which requires that the recommendations made in this report shall be

carried into effect.

Any further explanations or advice, which the Council may desire with reference to any of the matters or things contained herein will be furnished with pleasure.

All of which is respectfully submitted.

F. H. MACPHERSON, Chartered Accountant.

WINDSOR, Ont., March 17th, 1905.

LIST OF SCHEDULES.

The following Schedules are included in, and form part of the Report pertaining to the Audit, Examination and Inspection of the Accounts of the Township of Tilbury North, which said Report is dated March 17th, 1905.

Schedule 1. Statement showing financial standing of the Township, as of Dec. 31, 1903.

Schedule 2. Statement of account with the Township of Tilbury West. Schedule 3. Statement showing arrears of taxes in the hands of the County Treasurer as of Dec. 31, 1903.

TILBURY NORTH.

١

JUNE, 1905.

TOWNSHIP OF TILBURY EAST.

Raport of Special Inspection, Audit and Examination of the Books, Accounts, Vouchers, and Moneys of the Municipal Corporation of the Township of Tilbury East, in the County of Kent.

Upon the authority of an Order-in-Council, approved by His Honour the Lieutenant-Governor of the Province of Ontario, the 22nd day of February, 1904, Frank H. Macpherson, a Fellow of the Institute of Chartered Accountants, of the City of Windsor, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Township of Tilbury East, in the County of Kent, under the provisions of Chapter 228, R.S.O. 1897

In pursuance of the said authority and instructions, the said Frank H. Macpherson hereby reports that he has made an inspection, examination and audit of the various accounts of the said Corporation.

The audit is made upon the petition of certain ratepayers, addressed to the Provincial Municipal Auditor.

The petition requests that the examination "shall extend over such period as may be necessary, in order that the same may be full, complete, correct and final, and shall embrace each particular and special account of and in said Municipality, including the standing of each special and other drain therein, as well as the general funds and finances of said Municipality."

Scope of Audit.

The inspection and examination under the authority of the Order-in-Council covers the accounts of the Municipality from 1891 down to Dec. 31st, 1903.

By authority of the Council of the Municipal Corporation of Tilbury East, the audit was extended and carried down to Dec. 31st, 1904.

D. R. Farquharson (now Collector of Customs at Chatham) was Clerk in 1891 and until January 12th, 1901.

Alex. Farquharson was appointed to succeed his brother in 1901, and has held office as Clerk continuously since.

W. F. Robertson has been Treasurer since 1891, and the audit covers his entire terms of office.

In conformity with my usual custom, the petitioners, members of Council, and other ratepayers, were invited to attend at the Township Hall, Valetta, upon the 7th day of October, 1904, then and there to furnish such information or make such statements and charges as to them might seem meet, respecting the conduct of the Municipal affairs of said Township.

No specific charges were preferred. Complaint was made, however, that the drainage accounts generally, had not been properly kept, and that a certain grant from the Ontario Legislature under the Drainage Act, had been improperly applied.

The present audit covers the various drainage accounts in full detail, and these are dealt with under the proper head.

With reference to the grant received by the Corporation under the provisions of the Drainage Aid Act, a careful and complete investigation of the records have been made, the facts appearing to be as set forth in the following:

By By-law No. 3 of 1900 of the said Township, provision is made for repairing, etc., Government Drain No. 2, and the outlot of Nos. 2 and 3 Government Drains and for borrowing the sum of \$30,231.86 for the pur-

pose of completing the same.

A resolution of November 26, 1900, of the said Township recites that a cerain area in the said Township is already over-burdened with taxation for drainage purposes, and empowered the Reeve and Clerk to execute a petition to the Lieutenant-Governor, under the Drainage Aid Act, praying for aid for its relief.

Pursuant to said resolution the petition was duly drawn, executed and presented to the Lieutenant-Governor asking for aid under the Drainage Aid Act. This petition prayed for aid for the Forbes and Dauphin Drainage Works, and for Government Drain No. 2, reconstruction work; but as the latter was the only one not completed, it alone came within and was entitled to the benefit of the Drainage Aid Act. The other works were therefore eliminated from the petition, leaving only Government Drain No. 2 which the Government could aid.

In May, 1902, the Government grant in question, \$3,020.00, was paid

over to the Township and placed in its general funds.

It is the complaint of certain of the petitioners praying for the audit now being made, that this sum, \$3,020.00, should have been credited to Government Drain No. 2, and not placed in the general funds of the Township, as has been done.

From the resolution aforesaid and the petition executed pursuant thereto, the intention would seem to be clear that only a certain area was to be relieved, and not all ratepayers. Otherwise the resolution and petition executed thereunder would have been general in their terms and not specific.

The Government having no power to grant aid for general purpose, and having such power for the specific purpose in question, it must be assumed (if not clear) that the grant was not for the illegal purpose of relieving all the ratepayers of the Municipality, but for a legal one, which was the relief

of those supporting this particular Drain, Government No. 2.

There was no grant or payment out of the general funds of the Municipality for this work as is often the case, when the cost is great, so that this grant of \$3,020.00 could not be regarded as a re-payment to the Municipality. The proceeds of the sale of debentures were, face \$30,281.36, premium \$155.00. These sums together with the contribution from the Township of Romney, \$674.20, and balance from the former drain account, \$710.16, paid for the construction of the drain, except a balance of \$54.00 which is still charged to the drain and which is more than offset by the interest accrued due, but not allowed by the Municipality for its use of monies belonging to the drain.

Those supporting the drain were assessed each year, 1900, 1901, 1902, 1903 and 1904 in the terms of the original assessment, and received no rebate.

The Provincial Treasurer's Department did not at any time, while the petition was under consideration or subsequently, so far as I can learn, formally state that the grant was to go into the general funds of the Township, or that it was to be applied for purposes other than those petitioned for, although it ought to be said that the officers of the Municipality and the Committee who attended at Toronto, assert that it was intimated to them

that this money should go into the general funds, although in what manner it was so intimated does not appear. The most reasonable conclusion therefore seems to be that this grant should be applied for the purpose specified in the petition, and for which the Government was empowered to grant aid, namely, the reconstruction of Government Drain No. 2.

For the purpose of obtaining an expression of opinion from the Government as to the disposition of the grant in question, I submitted "a stated case" embodying the facts above recited, under date November 12th, 1904, and in reply thereto received from the Attorney-General's Department, the

memorandum following:

"Referring to the matter of the Township of Tilbury East which is set out in the annexed memorandum of Mr. F. H. Macpherson, it appears by Order-in-Council of the 23rd May, 1902, it was directed that 'a warrant for \$3,020.00 be issued in favor of the Treasurer of the Municipality of Tilbury East to assist the Township in constructing an outlet drain under the provisions of 63 Vict., etc.' In view of this order, the money seems to have been properly paid over to the Township Treasurer, and there seems no authority reserved for this Department to direct how the money is to be applied."

TORONTO, 6th February, 1905.

Having regard to all the circumstances, my finding is that the grant received from the Ontario Government (\$3,020.00) should be applied by way of reduction of the assessments yet chargeable to the contributors under By-law 3 of 1900, and I therefore enter the sum of said grant as a liability of the Township in favor of the said drain.

If Municipalities were permitted to apply grants received under the Drainage Aid Act in the manner adopted by the Municipality of Tilbury East, an entirely new source of revenue would thus be developed, whereby the general funds of the Corporation would be augmented at the expense of

contributories to drainage works.

Having dealt with the specific items complained of, I now come to a consideration of the affairs of the Township in other particulars; and, as is generally the case, the examination has revealed discrepancies, and irregularities which were never suggested nor surmised by those instrumental in bringing about the audit.

Collectors' Rolls.

The Collectors' Rolls for the several years have been examined and have generally been found accurate.

The schedule or summary is in accordance with the statutory requirements, and properly shows the several rates placed upon the roll for drainage

and other special purposes.

Owing to the large number of drains in the Township the Clerk has been obliged to enter the assessments of a number of drains in the same column, with a symbol attached to each for distinguishing purposes. This entails much extra work upon that official in preparing the rolls, and with an inexperienced or less intelligent Clerk would probably cause serious loss to the Township, which could be avoided if special rolls were prepared having the proper number of columns.

As already stated, the manner of preparation of the Collector's Rolls during the entire period under review, reflects credit on the present Clerk

and also upon his predecessor in office.

The contents of the several Collectors' Rolls have been properly accounted for in the books of the Treasurer, or by returns of uncollectable taxes. The

prevailing custom of the Treasurer in certifying over his signature to the receipts by him, at the close of each Collector's Roll, is commended. It will be still more satisfactory, if a statement were entered, showing the complete settlement of the roll:

Face of Roll		\$10,000
(1) Cash paid Treasurer	\$9.500	420,000
(2) Arrears per statement	400	
(3) Allowances by resolution of Council	100	
		\$ 10.000

following which should be statements in detail showing how the items (2) and (3) are made up. In the statement (3) a reference to the pages in the minute book, where the allowances are passed upon should be given; and in statement (2) the Pro-number of the Collector's Roll should be entered against each piece of property returned for non-payment of taxes.

The rolls have ordinarily been returned within the time limit, as prescribed by statute, but the Collectors have failed to furnish the duplicate return required in Section 147, to the Clerk to enable him to forward the requisite notice.

Arrears of Taxes.

Until 1903 no proper record of arrears of taxes was maintained, and as a consequence some \$5,624.48 was practically lost to the Township through the defalcations of A. L. Shambleau, County Treasurer, until recovered as a result of the audit of the County of Kent accounts in that year. Since that date a Land Register has been in use, but it has not been properly kept.

The difference with the County Treasurer's books have been reconciled and the balance of \$469.01 arrears is carried as an asset. The County Treasurer's books will agree with this sum when he receives a copy of resolution of December 15th, 1904, striking off an item of \$10.51 referred to later on.

An account should be opened in the Township ledger for this balance. On May 1st, upon receipt from the County Treasurer of the statement showing the percentages added, the Treasurer should make an entry in his journal, debiting the County Treasurer's "Arrears of Taxes" with the sum and crediting General Fund. In the Land Register he will enter the 10 per cent. as a charge against each lot shown in the County Treasurer's return. If it be found that certain of the properties have not been charged with the percentage, it may be assumed that the County Treasurer has collected the arrears before May 1st and all such should be included in his return of cash received on the following 1st July.

Immediately upon receipt of the non-resident roll in each year, the Treasurer should put through a journal entry debiting the County Treasurer, with the face of the roll, and crediting General Funds. Turning then to the Land Register, he will enter therein the taxes against each separate property. Similarly, upon receipt of the Collector's return, a journal entry will be made, charging the County Treasurer's "Arrears of Taxes" with the amount, and crediting General Funds; next entering the arrears against the several properties in the Land Register.

Upon receipt from the County Treasurer, immediately following the first days of July and January in each year, of the statement of taxes collected during the preceding six months (accompanied by a cheque for the amount) the local Treasurer will enter the latter in his cash account to the credit of the County Treasurer's "Arrears of Taxes," and in the Land Register will credit against each property the amount paid thereon.

When for any reason taxes are written off by resolution of Council, the Clerk is to furnish the Township Treasurer with a duplicate of the resolution forwarded to the County Treasurer, and the local Treasurer will, in his Land Register, on the credit side, make the following entry: "Written off by resolution of Council dated —————, 190 ."

Annually the County Treasurer is to forward to the local Treasurer, a duplicate of his return to the Township Clerk of occupied lands to be placed upon the Collector's Roll; upon receipt of this the Township Treasurer will make an entry upon the credit side of the interested accounts in the Land

Register, viz.: "By returned to Clerk, Roll 190, \$---."

With each operation a proper journal entry should be made debiting or crediting the "Arrears of Taxes" account in the General Ledger, and in this way the balance at debit of this account, will equal, exactly, the sum of the arrears as found in the Land Register, and both should be in balance with the statement which the County Treasurer is to forward to the local Clerk at January 1st of each year.

All returns and resolutions received by the Township Treasurer are to

be filed for reference, and for the use of the auditors.

I have entered into considerable detail in the foregoing for the reason that the present Treasurer has not carried out the idea laid down by the Kent County Council, as the result of my investigation and of my recommendations in 1903.

The auditors of the 1903 accounts called attention to an alleged error made by A. F. Falls in the opening of the Land Register. The auditors were themselves in error in regard to the item in question (\$10.51) which was not entered in the books until after June 2nd, 1903, or some months after the Land Register was written up. The item was returned to the Township Clerk to be placed upon the Collector's Roll of 1902. It was so placed, but apparently against the wrong description. A resolution of Council May 4, 1903, instructs the County Treasurer to recharge the item to another lot and this was done upon receipt of the Clerk's letter of June 2, 1903.

Subsequently the Township Council passed a second resolution December 15th, 1904), instructing the County Treasurer to relieve the lot which

was charged with the item of \$10.51, which was done.

Drainage Accounts.

A careful examination of the Drainage Accounts has been made, and

reference to such as are necessary is made.

A very objectionable feature is the carrying in the drain accounts of the annual levies upon the one hand, and the payments of debentures and interest upon the other. Nothing should appear in these accounts excepting such transactions as have to do with the cost of construction of the several works, and the receipts on account of commutations and debenture sales. The levies and debenture payments should be treated entirely outside the drainage account. There is no necessity for carrying on individual account for each of these. One account to be known as "Debenture Levies Account"

should be opened in the ledger, and annually, all levies placed upon the roll for debenture purposes, should be entered therein in detail. This is done at the time of charging up the Collector's Roll. A pro-forma exhibit covering this entry is included an appendix to this report.

By reference to this exhibit, it will be observed that the appropriations entered for the several drians are even in amount with the equal annual payment of principal and interest, rather than with the exact amount of the levy as it may appear in the recapitulation of the Collector's Roll. It is not possible in all cases to make the levies exactly even in amount with the annual payment, and the slight differences must necessarily be adjusted through the General Drain Rate.

Should the proceeds and premium of the debenture sale exceed the amount necessary for construction purposes, and it is thought desirable to pay that first or a subsequent annual payment out of the proceeds of this debenture sale, there is no objection to so doing, but the transaction should be made a matter of record in the minutes of Council, and a resolution passed authorizing the Clerk to omit the assessment or assessments from the Collector's Roll; and instructing the Treasurer to transfer from the Construction Account of the Drain to the "Debentures Levies Account."

Accrued interest received upon debentures sold should not be placed to the credit of the Drainage Construction Account, unless the Township has charged interest upon all advances out of General Funds. As the General Funds have borne the interest charges upon the advances, the accrued interest should be credited there.

Drainage Construction.

The custom of Council is to provisionally adopt By-laws for drainage purposes, hold the Court of Revision, and then proceed with the construction of the drain, finally passing the By-law, and determining the amount of the annual assessment, after the drain has been fully completed. This method of procedure is to be condemned, upon the ground that it is (in my opinion) without legal authority, and might be the means of serious loss to the municipality. The only advantage of such procedure is that the Counis saved the necessity of passing supplementary By-laws, increasing or decreasing the assessment, depending upon whether the cost of construction has exceeded the estimate or otherwise.

Payments are made upon drainage works and contracts by the Treasurer, upon the order of the Commissioner, and further, the Council has authorized its bankers to pay orders of this character in favor of contractors without reference to the Treasurer, the first intimation received by that official, being the return to him by the bank at the end of each month of the orders which have been paid. The Treasurer is thus without any control over his funds, and the door is wide open for the practice of dishonesty, if a Commissioner were so minded. There is no check whatever upon the Commissioner, (who is not under bond) and he may issue such orders as he pleases, and to whom he pleases, without reference to any person. The practice cannot be too strongly condemned.

If it be thought necessary to the public convenience that the Commissioners be permitted to issue orders upon the Treasurer, (which orders are to be paid previous to being passed upon by the Council) then it must be made obligatory upon the person receiving such order to present same to the Treasurer, who will, if he has funds in hand, pay the order in cash. If not, he will countersign same, (using the rubber stamp provided for in the

recommendations) handing same to the payee who will present it for payment to the Township bankers.

All orders should be written in ink. Many of these are now written with pencil, and the opportunities for fraud and manipulation are alto-

gether too liberal.

When the Treasurer makes payment of Commissioners' orders, he should be required to prepare monthly, and forward to the Clerk, for presentation at the next regular meeting of Council, a statement setting forth in detail, the date issued, by what Commissioner, favor of whom, amount, and fund or account to which charged; this report to be approved of by resolution, and filed in Clerk's office.

Immediately upon completion of a drain, the Commissioner in charge should present a report in writing, showing the orders issued by him, and this statement should be referred to the Treasurer for confirmation, and for the addition of such other expenditures as have been made on account of the undertaking, and which would not come within the knowledge of the Commissioner. Report to be passed upon by the Council and filed with the Clerk.

The practice of carrying the levies and debenture payments in the Construction Account is responsible for a good deal of the dissatisfaction and unrest in the minds of the ratepayers. As levies are ordinarily placed upon the Collector's Roll, a year in advance of the maturity of the debentures, and as these levies are credited to the Drain Account, in the year in which levy is made, each of these accounts exhibits a fictitious credit in so far as the construction is concerned, and presents what appears to be a "surplus" which the interested ratepayers considers ought to be available for distribution, or should be used in reduction of assessments.

In municipalities where the Clerk's salary does not include recompense for extra services in the preparation of By-laws, these services are satisfied by a cheque upon the Drainage Account. In this Township all clerical service is presumed to be covered by a stated salary, and that individual drains thus escape a proper charge, and one provided in the Engineer's estimates. In each such instance, a warrant ought to be authorized against the drain, in favor of the Treasurer, which will be deposited by him to the credit of General Fund.

It has been the custom of the Engineer in charge of the preparing of pumping estimates to provide for a specific annual levy to meet the cost of pumping. As the expense of pumping varies greatly in different years, depending upon the season, cost of fuel, repairs, etc., the fixed assessment plan invariably results in a growing deficit. The better method is to provide in the By-law, that the Township shall advance from time to time out of General Fund, the sums requisite and necessary to cover the cost of pumping, such expenditure (up to say August 1st in each year), to be included as a special levy upon the next Collector's Roll, pro-ated according to the original assessment.

Upon my suggestion this has been done in the case of the Dauphin Drainage Scheme, which has recently been the subject of special legislation.

Graham Drain. A balance of \$15.24 at credit of the Graham Drain, December 31st, 1899, and omitted from the accounts of 1900, is credited.

Old Drain. The charges to the Old Drain in 1900, were \$48.00, not \$47.00 as stated. The difference is included in the balance as now shown.

Driver Drain. A balance of \$16.77 at credit in 1901, was carried to 1903, as \$16.17 and a refund of \$15.17 made.

Tremblay Drain. A balance of \$52.36 at credit in 1899, has since that date been omitted from the annual statements.

McIntosh Drain. A debit balance of \$39.00 in 1901, dropped from the

accounts, is re-charged.

Kelly Drain. In 1903, the sum of \$102.00 spent upon the Kelly Drain, was not carried forward to 1904. This has been done.

Campbell Drain. Expenditures of \$1.00 in 1898, and \$0.50 in 1901, are

carried forward to the 1904 accounts.

Hickey Drain. The amount charged in 1902 was \$261.49. The actual payments, \$256.49. A credit of \$5.00 is carried forward.

McGregor Drain. In 1902, an error of 30 cents occurs in the redemp-

tion of debentures.

Lewis Drain. In 1902, an error of 10 cents occurs in the redemption of debentures.

South Hunsberge, R. An over-credit of \$1.00 is 1898, is corrected. Davidson Drain. An under-credit of 6 cents in 1902, is corrected.

Government No. 2 and 3. In 1902 the sum of \$41.86 was charged to Government No. 3, instead of to the above account. The entry has been reversed.

Government No. 3. Government No. 2 and 3 is charged and Government

No. 3 credited with an improper charge to No. 3.

Forbes Pump No. 1. An overcharge of \$9.75 in 1898 has been corrected. In 1902, \$11.95 was improperly charged to this account; which has now been transferred to Dauphin, and \$37.90 and \$26.92 wrongly charged in 1903. has been transferred to Forbes Pump No. 2, and Forbes Drainage Works respectively.

Forbes' Pump No. 2. An overcharge of 50 cents in 1898, has been corrected; likewise an undercharge of 10 cents in 1903. An improper charge of \$26.70, has been transferred to Dauphin; and \$37.90 has been transferred

to this account from Forbe's Pump No. 1

McGregor Drainage Pump Account. An overcredit of 25 cents in carry-

ing forward the balance from 1893 to 1894, has been corrected.

Dauphin Drainage Works. A special report having been prepared, covering the Dauphin Drainage Scheme, for use in the recent application to the Local Legislature, no further reference need to be made to it, beyond the statement that the audit of the 1904 accounts, leaves a balance on December 31st, 1904, of \$4,454.41, which is carried as an asset of the Township.

Forbes' Drainage Works. The original Forbe's Drainage Works and Repairs are all included in the one account. Total cost of work to December 31st, 1903, \$57,885.87. Total receipts from sale of debentures, special levies, etc., \$57,327.54. Balance due Township, \$558.33. An error of \$26.92, improperly charged to Pump No. 1 is corrected in 1904. In 1899 a short credit of \$203.76 in levy occurred, and this also has been corrected in the 1904 accounts.

Forbes' Special. This account has been charged with the expenses of consolidation, redemption of debentures, express charges, etc., and credited with the taxes collected from time to time, and sale of debentures (special). On December 31st, 1903, there remained at credit of this account, \$2,958.56.

Powell Drain. By-law 37, 1903, levies were placed upon the roll in 1903 and 1904, whereas the first debentures does not mature till 1905. The extra assessment is included in the "Drainage Debenture Levies Account." The fifth assessment will not be necessary.

Big Creek Drainage Sscheme. In the books of Tilbury East, this scheme is known as the "Tremblay Creek Outlet." Tilbury West was the initiat-

ing Township. In March, 1898, the Treasurer paid to Tilbury West, \$1,549.84. The balance at credit of the Drain Account, December 31st, 1904 (deducting the levy of 1904), is \$128.33. The report of the Provincial Municipal Auditor (prepared by himself), shows a balance due Tilbury West of \$202.14, toward the liquidation of which Tilbury East has on hand, the sum above mentioned, viz., \$128.33. I am aware that Tilbury East disputes its liability to Tilbury West, principally upon the ground that the Township had no available funds against which to charge this amount, and did not think it could take same from the General Fund. Such argument does not hold good to the extent of the balance above.

DITCHES AND WATERCOURSES.

A separate account should be opened for each drain, in terms of the statutory provision in that behalf. In such accounts should be charged all expenditures chargeable to each, with a clear statement as source of collection, whether from Township or individual; if the latter, full particulars as to lot, concession, etc., and the certificate of the Engineer appointed under the D and W Act, to be filed with the Clerk. Each drain should be credited with the amount collected; for the Township's proportion a warrant should be issued as authority for the transfer of a sufficient sum from the General Fund to cover.

All accounts of this character have been examined and found practically correct.

GENERAL REMARKS.

Noxious Weeds. In the accounts of 1904, the sum of \$14.06 was paid for cutting noxious weeds. Sec. 2, of Chap. 27, (1904). Statutes provides for the collection of expenses for cutting noxious weeds, by addition to the tax levy against the land. It is important, therefore, that the resolution authorising payment of account for such services, should specify the property against which such expense is to be charged.

Obstructions to Drains. The remarks above are likewise applicable to payment of accounts for services for the removal of obstructions from drains, etc.

Cement Works. The accounts in connection with the manufacture of tile are so mixed up with the cost of building, plant, well, etc., that satisfactory information as to the cost of manufacture; and the profit or loss in connection with operation was not obtainable without an analysis of the entire account.

The works to December 3st, 1904, have been run at a loss to the municipality of about \$350.00.

Better methods should obtain, however, in the handling of the output. No tile should be allowed to leave the yard, except upon written order of the Reeve or a Commissioner. The person in charge of the Works ought to report monthly to the Council, all deliveries of tile, and the Clerk should render accounts for the same to the purchasers. When used within the Township, upon drains or road divisions, warrants should be issued against the proper funds, and turned into the Treasurer for credit of the Cement Works.

Small-Pox Expenditures. In 1902 considerable expense was incurred in connection with the epidemic of small-pox in the Township, much of which under the Act shall have been collected from the parties to whom the service was rendered. The sum now collectable, so far as we are able to ascertain is \$411.90, details of which are supplied. Details of the account

of Dr. Oliver, for services have been obtained, and are included in the amount. The Council should at once put forth a persistent effort to collect

· the sums due.

Dauphin Drainage Scheme. Acting under advice of solicitor, the assessment for Dauphin Drainage purposes was placed upon the Collector's Roll in 1904. The sum of \$24.25 was collected and turned over to the Treasurer. This amount we include as a charge to him, and as a liability of the Township. The sum should be returned to the persons contributing same.

Legal Expenses. Accounts for legal services, showing a balance of \$683.68, in favor of J. B. Rankin, K.C., in connection with litigation of a character apparently chargeable against the General Funds of the municipality, are standing unpaid since 1903, the services having been previously performed. This matter ought to be closed by a settlement forthwith.

Expenditures on Road Divisions.—The practice for some years has been to pass appropriations to the several road divisions, and to appoint Commissioners to make the expenditures. No check has been maintained on the Commissioners, however, and they have gone along doing such work and making such expenditures as they saw fit, regardless of keeping within the council appropriation. This should not be allowed to continue. A by-law should be passed (copy of which should be served to the Treasurer) providing that under no circumstances should he honor Commissioner's orders beyond the amount of the appropriation, official information as to the amount of which should be given him in writing by the Clerk.

MATTERS OF POLICY.

I have received a number of communications from ratepayers in which complaint has been made against the action of Council in matters of policy as to:

(a) Opening of roads,

(b) Maintaining of pumping plants,

(c) Improper and unequal assessments for drainage,

(d) Engineer's errors.

These are matters not within the scope of an audit of this character, and therefore have not been given consideration.

ACCOUNTS OF THE TREASURER.

The accounts of W. F. Robertson, Treasurer, have been carefully scrutinized, both as to receipts and expenditures from the date of his appointment in 1891 to Dec. 31st, 1904, and his cash account has been checked

down to April 29th, 1905, at which date a balance was struck.

I regret that I am obliged to report a very serious deficiency in his accounts, amounting to \$5,212.47, and with interest, \$5,920.90. I hold the Treasurer's written acknowledgment covering the items which go to make up the total, with a few exceptions. Statement No. 1 covers these emissions in detail. With the exception of the item of \$1,000.00 obtained by a manipulation of the accounts in 1894, and of the omissions to enter, in 1904 and 1905, certain items of receipt, the bulk of the deficit, \$3,610.66, i. in cash, which deficiency could have been detected at any time by the local auditors, had an effort been made to balance the cash. I have made such an examination of the cash and bank accounts, as satisfies me that the deficiency is not of sudden growth, but is the result of gradual absorption for personal use of the funds of the Municipality.

The Treasurer's vouchers are not, for the most part, in proper form, not being propely drawn or endorsed, or being written in lead pencil. The school orders particularly were in bad shape, necessitating the obtaining of statements from the various Secretary-Treasurers. Recommendations are made in this respect.

The Treasurer's bond is signed by himself and by William Robertson, George Robertson, Peter Robertson and David Laughton. I have not gone into the question of the sufficiency or otherwise of the bond, under the circumstances, but have turned the documents over to the Reeve for examination by the Township Solicitor.

Collector's Bond.—The collection of taxes on the roll for 1904, being completed, and full returns having been made by the collector, particulars

or this bond are not necessary.

Financial Position of the Corporation.—The present financial standing of the corporation is as shown in statement No. 6. The available assets (\$57,694.12) exceed the current liabilities (\$53,435.16) by \$4,258.96, a very satisfactory showing under all the circumstances.

Debenture Liability.—The unprovided debenture liability of the Muni-

cipality on Dec. 31st, 1904, was a follows:

Salaries.—I feel it incumbent upon me to point out that the salaries of the Clerk and Treasurer are in no sense commensurate with the services performed. The volume of the transactions in this Township are much greater and more intricate than in the average municipality, requiring a higher degree of intelligence than ordinary, yet the salaries paid are no greater (if as great) as in other places.

Interest.—I have not taken interest into consideration in connection with any of the drainage accounts, not being a custom in the Municipality,

although such should be done.

Township Bank Account.—The Treasurer has been permitted, with consent of Council, to keep two and sometimes three bank accounts, transferring monies from one to the other at pleasure. This gave opportunity of covering over the deficiency in the Treasurer's accounts. The Council of the present year has had this practice discontinued, and it should not again be allowed.

Township Books.—If the Council is desirous of obtaining substantial benefit as a result of the present audit, it is recommended that new books stould be obtained, and the accounts properly written up from Jan. 1st, 1905. While this is being done, the Treasurer could be instructed in the changes in methods.

Supplementary Levies and Refunds.—It would be well if the Council would go carefully over the several drainage accounts, make refunds where such should be made, and supplementary levies where the drains are indebted

to the Municipality.

RECOMMENDATIONS.

As a result of the present examination, inspection and audit of the books, acounts and vouchers of the Municipal Corporation of the Township of Tilbury East, I make the following recommendations.

(1) That all the funds of the Township shall be deposited in a chartered bank, and that all payments thereout shall be made upon a warrant of the Reeve, countersinged by the Treasurer, except as noted in subsequent paragraphs.

(2) That the Township bankers be notified that orders or warrants issued by the Commissioners, or the Reeve, are not to be payable unless

properly countersigned by the Treasurer.

- (3) That all accounts be passed by the Council in regular session, before payment, excepting fixed charges as debentures, interest payment of school accounts and any other items fixed by By-law or Statute, which may be payable by the Treasurer without reference to the Council; provided, that if the Commissioners' orders are paid by the Treasurer in advance of being passed upon by the Council, that the Treasurer be required to prepare on the first day of each month (or such other times as the Council may require) a statement (form 1) setting forth in detail, all Commissioner's orders paid by him during the preceding month, and that such statement be filed with the Clerk forthwith, for presentation at the next regular meeting of Council.
- (4) That the Treasurer shall not accept, or pay orders of Commissioners, unless the same be written in ink.
- (5) That a rubber stamp be furnished the Treasurer which he shall use on all orders or warrants of which he desires payment to be made by the bank (first entering the same in the cash book, as a charge against the proper fund or account, and giving it a serial voucher number) after the form following: "The Canaldian Bank of Commerce, Chatham, will please pay and charge to the account of Treasurer, Township of Tilbury East."

Treasurer.

(6) That all drainage by-laws be finally passed before the work of construction is proceeded with.

(7) That an official form of receipt with stub, properly numbered, shall be adopted and that all moneys received by the Treasurer, from whatever source, shall be acknowledged thereon.

(8) That expenditures on award drains shall be charged to individual accounts in the Treasurer's ledger, and shall be balanced by cash received from the tax-payer, or by charging the same upon the collector's roll.

(9) That the Treasurer shall decline to pay school warrants, unless the orders are properly signed by at least two trustees, and are sealed with the scal of the school section.

(10) That the Treasurer shall decline to pay warrants when presented by other than the party to whom payable, unless (a) properly endorsed, and (b) upon written order, authorizing payment to another, which order shall be attached to the warrant, after being endorsed by the person presenting it.

(11) That the several drainage by-laws which provide for fixed assessments for pumping purposes shall be so amended as to provide that the corporation may advance out of the general funds, from time to time, such sums as may be necessary to maintain and operate the several pumping plants; such expenditures up to August 1st of each year to be recovered by a special levy upon the next collector's roll, pro-rated according to the original assessment.

(12) That drainage Commissioners shall, immediately upon completion of a drain, prepare in writing a report showing the orders issued on account thereof, such report to be delivered to the Clerk for presentation at the next following most in a fo

following meeting of Council.

(13) That the by-law striking the annual rates, shall show in detail, the amount of taxes required to be levied for the several school sections, and shall also show in detail, the sum to be levied on account of the Township centribution under the several drainage by-laws, and D. and W. Courses Act. A pro-forma exhibit accompanies this report.

(14) That previous to settlement of the collector's roll, the collector will present to the Council a statement of all taxes which he has been unable to collect, other than those which may by law be returned to the County

ì

Treasurer; that all such statements shall be passed upon, and be confirmed by the Council before being finally accepted by the Treasurer in his settlement with the collector.

(15) That proper books of account be opened as of Jan. 1st, 1905, in accordance with the findings of this report, the said books to be written up

to date, and the Treasurer to be instructed in the keeping thereof.

(16) That a resolution or by-law of Council be passed forbidding the Treasurer to honor Commissioners' orders for work or materials supplied on road divisions, after the amount of the appropriations has been expended unless by special resolution of the Council, and that the Treasurer shall notify the Council in writing, when such appropriations have been exhausted.

(17) That the Clerk be instructed to officially notify the Treasurer of

the appropriations to the several road divisions.

(18) That the collector of taxes shall make his returns to the Treasurer (forwarding a duplicate to the Clerk) in accordance with the provisions of section No. 149 of the Assessment Act.

(19) That all contracts, agreements, order books, etc., in the hands of individual members of the Council, or others who may be acting as Commissioners on road divisions, bridges, drainage, pumping schemes, or other work, shall be returned to the Council together with a report in each specific case, and that these shall be filed with the Clerk for the use of the auditors.

(20) That the Treasurer be instructed to carry out the system pertaining

to the Land Register, as provided in the foregoing report.

(21) That where persons unable to write, have occasion to endorse warrants or orders, "his X mark" shall be witnessed by some person other than the Treasurer.

(22) That all acounts presented to the Council, shall be in writing, and shall be certified by a member, before being presented; and that these be properly numbered and kept on file in the Clerk's office for reference.

(23) That all proper conveniences for filing of Township documents

and records shall be supplied the Clerk and Treasurer.

(24) That the Treasurer shall notify the Council from time to time, in writing, of the amount received from sale of debentures, giving particulars as to the name of the drain, amount to distinguish as between principal, premium and accrued interest. And that receipts on all other sources should be reported at the next ensuing meeting of Council.

(25) That an account shall be opened in the ledger, to be known as "Debenture Levies Account." This account to be credited with the levies and general drain rates placed upon the roll in each year, and that all

debentures and interest paid, shall be charged against this account.

(26) That the Treasurer shall furnish the Council with a monthly abstract statement of receipts and expenditures, which statement shall show

cash in the office, cash in bank, and checks outstanding.

(27) That the Council shall pass the necessary by-law, making operative the system of reports between officials relative to the arrears of taxes, as recommended by this report.

CONCLUSION.

The Township is to be congratulated upon the efficient services rendered by its Clerk; I regret that I cannot say so much for the Treasurer. Both, however, have evinced the utmost willingness to assist in the examination and audit, and for this assistance, I desire to express my obligations.

By way of explanation for the delay, which has attended the present audit, I may say that during several months after my commission was

received from the Government, my time was so occupied with work previously in hand, that it was not possible to take up the audit until August or September. During the months of November and December, 1904, and January, 1905, the completion of the audit was retarded awaiting reply from the Government, in connection with the grant under the Drainage Aid Act. Since that time, and until May 13th, the delay has been wholly caused by the Township Treasurer not having his books written up. Two extra trips to Merlin were occasioned by reason of the tardiness of the Treasurer, and much extra work made necessary.

The attention of the Council is called to section 14 of chapter 228, R.S.O., 1897, which requires that the recomendations made in this report

shall be carried into effect.

I shall be pleased to furnish further explanations, or to advise with the Council, with reference to any of the matters, or any of the recommendations contained in this report. All of which is respectfully submitted.

F. H. MACPHERSON,

Chartered Accountant.

WINDSOR, ONT., June 10th, 1905.

LIST OF SCHEDULES.

The following Schedules and Appendices are included in and form part of the report pertaining to the audit examination and inspection of the accounts of the Township of Tilbury East, dated June 10th, 1905.

SCHEDULE 1—Statement of account with W. F. Robertson, Treasurer. SCHEDULE 2—Abstract of Receipts and Disbursements for year ending

December 31st, 1904.

SCHEDULE 3—Receipts and Disbursements in detail for year ending December 31st, 1904, with Appendices as follows:

Appendix "A": Statements of accounts with Schools to December 31st,

1904.

Appendix "B": Statements of accounts with Drains, etc., to December 31st, 1904.

Appendix "C": Statement of account re L. E. & D. R. Bonus to De-

cember 31st, 1904.

Appendix "D": Statement of account re Jeanettes Creek Bridge to December 31st, 1904.

Appendix "E": Statement of Manufacturing Account re Cement

Works to December 31st, 1904.

SCHEDULE 4—Outstanding Accounts against General Fund, December 31st, 1904.

Schedule 5-Statement of sums due from smallpox patients.

SCHEDULE 6—Statement showing the financial standing of the Township, December 31st, 1904.

Schedule 7—Statement of General Assets and Liabilities, December 31st, 1904.

Pro-Forma Exhibits.

Pro-Forma exhibits accompany this report covering:

(a) By-law striking the annual rates.

(b) Schedule showing analysis of Collector's Roll to be prepared by the Clerk and forwarded to the Treasurer immediately upon the completion of the preparation of the roll.

- (c) Skeleton of Journal-entry to be made by Treasurer upon receipt of the analysis (Schedule b).
- (d) Blank (form 1) of report to Township Council of orders paid by Treasurer in advance of passing by Council.

Pro-Forma Exhibits.

(a) By-law striking the Annual Rate.

(b) Schedule showing Analysis of Collector's Roll to be prepared by the Clerk and forwarded to the Treasurer immediately upon the completion of the preparation of the Roll.

(c) Skeleton of Journal-entry to be made by Treasurer upon receipt of

the Analysis (Schedule b).

(d) Blank (form 1) of report to Township Council of Orders paid by Treasurer in advance of passing by Council.

By-Law No.....

Being a By-law to fix rates for the levy and collection of taxes for the Township of for the year

Whereas the Municipal Council of the Township of

deems it necessary and expedient to pass a By-law for said purpose.

And whereas the total assessment of the Township of......liable for County Rate, Township Rate, General Debenture Rate and Special on Roads for Drainage Debenture Rate is the sum of \$....., and the total assessment of said Township liable for General School Rate is the sum of \$.....

Therefore the Municipal Council of the Township of in

the County of enacts as follows:

1. That for raising the sum of \$...... for County purposes, a rate of mills on dollar of the assessed value of the whole rateable property of the Township be levied and collected.

2. That for raising the sum of \$..... for Township purposes, a rate of mills on dollar of the assessed value of the whole rateable pro-

perty of the Township be levied and collected.

3. That for raising the sum of \$...... for General Debenture Rate a rate of mills of the whole rateable property of the Township be levied and collected.

SCHEDULE "A."

	i				
1	2	3	4	5	6
No. of By-law.	Name of drain.	No. of levy.	Total No. of levies.	Annual lands.	Annual roads.

^{5.} That the amounts specified in column 5, Schedule A, shall be levied in accordance with the several By-laws pertaining thereto.

6. That for public and separate school purposes a rate on dollar of the assessed value of the whole rateable property in each school section be levied and collected for the maintenance of the said schools for the year in accordance with the Statute of Ontario, Edw. 1, chap. 39, sec. 71, and that the rate in each section be the rate set opposite the number of the section in column 6 of Schedule B hereto:

SCHEDULE "B."

1	2	3	4	5	6	7
No. of school.	Trustees' requisition.	Assessment.	Township portion of school rate.	against school		Total rates for section.

- 7. That for raising the sum of \$..... required for General School Rate as enumerated in column 4, Schedule B, a rate of mills of dollar be levied on the whole rateable property liable therefor.
- 8. That for the payment of debentures and interest thereon issued on account of the several school sections, due in the year the following rates to be levied:
- (a) That a rate of mills on dollar be levied and collected upon and from the whole rateable property (\$......) liable therefor, in School Section No......
 - **(b)**
 - (c)
- 9. That the Clerk shall also enter in the Collector's roll for the year the following sums:

DITCHES AND WATERCOURSES.

Name of Drain Amount Where enumerated. a ь Line Fences. Amount. Where enumerated or specify. Tile, Stone and Timber Era. Amount. No. of By-laws. \boldsymbol{a} Arrears of Taxes. Amount. Enumerate lands. a

Days S. L. at \$1.00 each per Pathmaster Lists.

Dogs at \$..... each, see Assessment Roll.

10. That this By-law shall come into force upon and after the final passing thereof.

Reeve. Clerk.

TOWNSHIP OF TILBURY EAST.

AUGUST, 1905.

Town of Essex, County of Essex.

Report of Special Inspection, Audit and Examination of the Books, Accounts, Vouchers and Moneys of the Municipal Corporation, of the Town of Essex, in the County of Essex, and Province of Ontario.

Upon the authority of an Order-in-Council, approved by His Honour, the Lieutenant-Governor of the Province of Ontario, the seventh day of September, 1904, Frank H. Macpherson, a fellow of the Institute of Chart-

ered Accountants, of the City of Windsor, in the Province of Ontario, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Town Essex, in the County of Essex, under the provisions of Chap. 288, R.S.O., 1897.

In pursuance of the said authority and instructions, the said Frank H. Macpherson, hereby reports that he has made an inspection, examination and audit of the various accounts of the said Corporation. The audit is made upon the petition of certain ratepayers, addressed to the Provincial

Municipal Auditor.

No specific charges of mal-administration are set out, the petition merely resquesting that such an examination shall be made as will exhibit true conditions as to the financial standing of the municipality.

Scope of Audit.

The audit, inspection and examination, covers the accounts of the Municipality from January 1st, 1893, to December 31, 1904.

W. D. Beaman has been Treasurer during the whole period. John Walters has been Town Clerk during the entire period.

J. R. McEwan was Collector of Taxes from 1892 to 1900, inclusive.
C. M. Caughell was Collector of Taxes from 1901 to 1904, inclusive.

In conformity with the usual practice, notification was sent to petitioners, members of council and other ratepayers, to attend at the Town Hall, Essex, on the 20th day of July, 1905, then and there to furnish such information and present such statements and charges, as to them might seem meet, respecting the conduct of the affairs of the corporation.

Assessment and Taxation.

Assessment Rolls. It has been the practice heretofore, to make up the Assessment Roll, alphabetically by wards. The Assessment Act requires that an index shall be prepared, and apparently the alphabetical arrangement is an attempted compliance with the statute in this regard. It is found, however, that omissions from the Assessor's Roll are quite frequent and double the assessments are equally frequent, largely the result of this procedure. The Council should instruct the Assessor to prepare the Assessment Roll according to streets. If this be done, errors will not be so likely to occur. It will, of course, necessitate the making of an index (or the voter's list will supply this, and a copy should be permanently attached to each roll) and it would further necessitate the preparation of an individual tax demand for each piece of property, both of which are of little moment, if compared to the advantages which will accrue from the change.

Collector's Roll.

The Clerk should make a careful comparison of the Collector's Roll with the Assessment Roll to see that there have been no omissions or errors. If the columns headed "Total Assessed Value" in the Assessor's and Collector's Rolls agree, the Clerk may be fairly sure that there are no omissions.

In a number om instances, errors in additions and extensions have been observed, the result of an absence of check. The Clerk should add all columns in the Collector's Roll. entering the same at the foot of each column, and it should be seen that the sum of these in each column, and it should be seen that the sum of these in each instance, is made to agree with the sum of the total column.

We have checked the Collector's Rolls against the Assessor's Rolls for the years 1902-3-4, and have noted the discrepancies found therein under the proper head. Accompanying this report is an exhibit showing a proper form of schedule to be attached to the Collector's Roll.

The Clerk has been in the habit of carrying fractions in the preparation of his rolls. The suggestion is made, that one-half cent or over should be counted as one cent, and anything less should be omitted. The totals of the several pages should be recapitulated at the back of the roll, and the sum of the levies as shown in the schedule should agree therewith, subject to the small adjusting balance to cover fractions.

Exhibit "I" is a statement showing the total amount of taxes upon the roll in each year, the percentage added, and upon the other hand, payments made to the Treasurer, discount allowed, allowances made by Council and uncollected taxes. The balance due from J. A. McEwan, by years, is shown therein, the total defficiency being \$3,432.18. For this, we understand, the corporation received property, valued at some \$500.00. The balance is not included as an asset of the corporation for the reason that its collection is doubtful.

The greatest carelessness has existed in connection with the manner of collecting and handling arrears of taxes. The Collector, (previous to the appointment of Mr. Caughill) was permitted to retain two, and sometimes three, rolls in his hands at the one time, thus enabling him to cover over the deficiencies which have been determined as above.

No proper return, by the Collector to the Treasurer, has been made in any year, nor has the law been complied with, which requires the Collector to make a return in duplicate, one copy of which is to be delivered to the Clerk, who shall notify all these persons against whom arrears of taxes are charged, that the same have not been paid.

Speaking generally, the statute has not been complied with in the following respects:

The roll has not been prepared and delivered to the Collector by the date prescribed by statute.

There has been no proper schedule attached to the Collector's Roll.

The warrant of the Clerk, authorizing the Collector to proceed with the collection of the taxes, has not been inserted in the roll.

There has been no proper return of the roll by the Collector, under sections 144 and 147 of the Assessment Act. The duplicate of the said return, has not been delivered to the Clerk.

The Clerk has not therefore, been able to fulfill his duties under the statute.

The Treasurer has kept no record of arrears of taxes, the practice being to enter upon the roll of the following year, such taxes as may have been unpiad from the previous year.

Considerable sums of money appear to have been lost as a result of this carelessness. Exhibit "2" sets forth taxes which appear to have been dropped from sight altogether, or if collected, then not accounted for, as they yet remain upon the several Collector's Rolls as unpaid, amounting to \$640.14.

Since the Treasurer maintained no record of arrears of taxes, he has been unable to forward to the Clerk, the annual return required under Section 152 of the Assessment Act; the Clerk has been unable to notify the Assessor; the Assessor has not made the statutory return occupied properties to the Clerk; the Clerk has failed to send a statement of the occupied pro-

perties to the Treasurer; and the Treasurer has not, at any time, furnished the Clerk with a list of the occupied lands which should be placed upon the

Collector's Roll of the current year.

A special Land Registrar should be obtained forthwith and written up, showing the arrears of taxes as of December 31, 1904, and when the Collector's Roll of 1904, has been returned, such further taxes as appear to hands of the Town Treasurer for not less than three years (unless sooner remain unpaid should be entered therein. These arrears to remain in the paid), at which time the return (Sec. 152 of the Assessment Act) should be made to the Town Clerk and the procedure outlined above followed in every respect.

Complaint has been made that certain residents have sought to evade payment of their just share of taxes, by allowing their arrears to accumulate down to tax sale, at which time the properties are bid in by the owners (or their friends), and the Municipality thus sufferers serious loss. The simple remedy in cases of this kind would be, that the Council should authorize the Mayor or some other official, to bid in at the tax sale, all properties which would otherwise not realize the full amount of taxes and costs. This may be done under Sec. 184 of the Assessment Act, and will prove every effective in the direction described.

The loss to the Municipality, through the careless handling of the

arrears of taxes has been very large.

Non-Resident Collector's Roll. It has been the practice of the Clerk to enter the non-resident Collector's Roll at the back of the resident roll. This is an improper procedure. The non-resident Collector's Roll should be made up and forwarded to the Town Treasurer, who will, upon receipt thereof, enter the same against the several proporties in his land register, and will notify non-residents (where the addresses can be obtained) of the sums due, instructing that the same should be paid to him.

Further loss to the Municipality was entailed through neglect and carelessness in carrying forward the arreas from one roll to the next, and through neglect to add and collect the percentage for non-payment which should have been added. Exhibit "3" sets forth the omissions in carrying forward, resulting in an apparent loss to the Municipality of \$184.46.

Collector's Roll, 1903. A comparison of the Collector's Roll with the Assessment Roll shows the following omissions from the former in the year 1903:

	Assess n	nent.	Taxes.
No. 11. R. W. Anglin, Income tax No. 43. Norman Dean, \$450.00, entered as	· \$ 300	00	\$ 8 55
\$400.00	50	00	1 43
assessment of	2,500	00	71 25
	\$2,850	00	\$ 81 23

Had the total of the Assessment Roll been compared with the total of the Collector's Roll, the omissions would have been discovered as to the first items. The third item was entered in the Collector's Roll, and the details of the taxes were put down, but the sum was not extended in the total column. If the Collector's Rall had been properly completed by the addition of the several tax columns, and these proved against the total column, the last and most serious error would not have occurred. While the Clerk is primarily responsible for these errors, it must be stated that the Council is equally guilty of negligence, in that the striking of the rates (as shown by

the minutes) is delayed to such an extent as to make it impossible for the Clerk to complete and prove his roll before turning it over to the Collector.

The Collector has not made a sworn return of the roll of 1903, for the reason that certain taxes (for which there may possibly be goods that are distrainable) are in dispute as follows:

Roll No.		
108, 109, 527, J. McDougall	\$281	42
289 W. E. Allen		10
381 United Gas & Oil Co	35	63
217 Miss Brodie		83
	\$ 336	98

The Council should forthwith refer these disputed arrears to its solicitor, and be guided by his advice, either as to striking the amounts off the roll, in order to balance same and permit the Collector to make the proper declaration, or to instruct the Collector to proceed with the collection of the sums charged, the Council becoming responsible for costs, etc., incurred.

Collector's Roll, 1904. The following omissions are found upon comparing the Assessment Roll of 1904, with the Collector's Roll of the same year:

		\$23	33

The remarks regarding the 1903 roll, apply with equal force here. Information has already been furnished the Collector regarding these, and the prospects are that most of the items will be collected. It is to be said to the credit of Mr. C. M. Caughill, Collector of Taxes, that he had himself, (previous to my examination) discovered and collected several of the lapses in the 1904 roll.

The total value of the 1904 roll (including the above omissions), is \$13,032.23, of which \$7,059.49 was collected, and paid over to the Treasurer previous to December 31st, leaving the asset value of the Collector's Roll on that date \$5.972.74.

Waterworks.

The system of keeping the waterworks accounts was such, (and the books in which they were kept, were in so dilapidated a condition) that it has been difficult to obtain satisfactory information. We have checked the accounts so far as possible, and the collections appear to have been substantially accounted for.

A new form of waterworks book should be prepared, which would give necessary information not now available, and the book should be made self-

balancing, the arrears from one quarter being carried to the next.

The water-rates collector should be provided with a substantially bound book, in which he will enter under proper date and number all receipts, balancing same by payments to Treasurer.

Exhibit 4 gives the arrears of water rates as of December 31st, in detail,

so far as ascertainable from the books.

Public School.

An examination of the levies and payments from 1893 to December 31st, 1903, reveals the fact that the levies made on public school account exceed, very largely, the sums paid over to the Public School Board. The levies (according to the several by-laws, and including the balance on hand December 31st, 1892) down to December 31st, 1903, amount to \$31,314.27. The payments to the Public School Board (less government grants and contributions by Colchester and Gosfield) amount to \$23,815.87. The balance, \$7,498.40 represents the excess of levies over payments. The Public School tax being a general tax, no particular harm is done, (since the surplus has been used for general purposes), beyond the fact that the cost of maintaining the public schools is made to appear much larger than it in reality is. For the purpose of determining the balance due the Public School Board on December 31st, 1904, the balance as shown by the auditor's report, December 31st, 1903, \$1,877.05 has been taken. The levy for 1904 is \$2,663.43; a total of \$4530.48. The payments to the school board in 1904 were \$2,365.00. The balance, entered as a liability, is \$2,165.48.

High School.

The levies and payments on High School accounts have been checked for a number of years, and the amounts transferred to the High School Board. In 1904, the amount levied under By-law 379, was \$1,527.55. The Treasurer paid \$1,500.00 to the school board, leaving a balance of \$27.55, carried as a liability.

Local Improvements.

Drainage. The expenditure made on account of drains are so mixed up with the general accounts of the municipality as to resgult in considerable loss. In the case of the Hanlan drain (By-law 372), several of the items are charged in the aditor's report under the heading of "Streets", while the balance of the items are charged under "Miscellaneous."

An account should be opened in the ledger for each work undertaken by the Municipality, whether it be on account of drainage or of other local improvements. All expenditures on account thereof, should be charged thereto, and levies made or debentures sold should be credited thereto. The cost of publishing by-laws, Clerk's fees, and other incidental expenses should be charged to these special accounts by the issuing of a warrant upon the Treasurer, against the special account, which will be his authority for transferring from the special fund to the general fund, items of this character.

In the Puce drain improvement (1901), the full amount of the Town's proportion of the cost of the work, \$93.55, was paid over the Township of Maidstone, whereas, \$25.00 for publishing by-law, and \$10.00 Clerk's fees ought to have been deducted. The Township of Maidstone should be requested to refund this amount.

In case of the Hanlan drain (By-law 372), the expenditures to date,

appear to be as follows:

1904—June 10—J. S. Laird, survey July 20—Brett & Auld, printing Sept. 26—Wm. Campbell, work Oct. 18—Wm. Campbell, work Nov. 7—Wm. Campbell, work Nov. 9—John Water, Clerk Dec. 13—Wm. Campbell, work G. Thornton, assisting Engineer	27 65 80 120 20 57	00 00 00 00 00 60
G. Zhointon, wishing Engineer	\$ 401	

To cover the expenditures on this drain a special levy was made in 1904 for \$540.00, leaving a balance of \$138.40, which is carried as a liability of the Town. The Engineer's report provides for certain bridges, which do not appear to have been constructed, or if so, they have been merged into other accounts in such a way as not to be discernible. If these are still to be constructed, the cost thereof will be a charge against the balance shown above.

Sidewalks. The By-laws under which pine sidewalks are laid contain

the following clause:

"That any person or persons paying for the building of the sidewalk fronting on his or her property or building, the same in a manner which shall be satisfactory to the street commissioner, shall be exempt from the

frontage rates under this By-law.

It was the duty of the street commissioner to report to the Council, but no reference has been found to same in the minutes. No separate account was kept under each By-law, and it is therefore impossible to ascertain the actual cost of the work. A considerable number of assessments appear not to have been entered upon the Collector's Roll, and it is not possible to determine whether these omissions are regular or otherwise. advises that in many instances assessments were omitted, because of his personal knowledge of the building or payment of the walks by the owners. Following is a list of the omissions as ascertained from the By-laws. Such an investigation should be made as will determine whether or not, any of these sums are collectable.

A proper procedure would have been a report from the street commissioner to the Council; the Council then to amend the By-law, instructing the Clerk not to levy on certain lots named in the By-law, with the reasons therefor.

By-law 249, All omitted except, H. H. Fields. Lots 2 and 3, Plan 285.		
By-law 266, Lot 6, Plan 176, Chas. Noble	19 15	

By-law 175. Under this By-law which was for Local Improvements, and which covered a consolidation of By-laws 169, 170, 171, 172 and 174, provided for five levies of \$393.84 each, the debentures maturing on the first day of October, in the years 1892, 1893, 1894, 1895, 1896. It is found, however, that six levies were made, the first being placed upon the roll in 1891, and the last in 1896. Thus \$393.94 was collected more than was necessary. Of this sum \$71.33 was raised by general tax. The proportion contributed by individual ratepayers, \$322.51, is entered as a liability of the Town and this should be returned. Interest on this sum from 1896 has not been taken to account although it may properly be claimed.

By-law 133. Under this By-law which was for drainage, eight levies, \$95.33 each, were requisite, while seven only were placed upon the roll. The eighth levy should have been entered upon the roll of the year 1898.

It has been included amongst the assets.

TREASURER ACCOUNTS.

I have examined the accounts of the Treasurer carefully, and have satisfied myself of their accuracy. Receipts generally have been checked against their original source, and disbursements have been substantially vouched by warrant.

Town Town's accounts are kept in the cash book only, neither journal nor ledger being used. Proper books of account should be opened forthwith, and the Council should insist upon their being properly kept. The salary paid to the Treasurer is altogether inadequate, if the services are to be properly performed. The Treasurer is quite competent, if only he be furnished with the necessary information to enable him to keep the accounts.

An official receipt book is not used.

A proper debenture register is not kept.

The record of tax sales and of tax deeds issued is not kept as required

under Sec. 207, Chap. 224 of the Assessment Act.

The accounts of the Treasurer have been checked to December 31st, 1904, in order that the balance sheet shows a succession of

the Corporation as of that date.

Several of the Treasurer's vouchers are missing. These appear to have been passed upon by the local auditor and there is no reason to suppose that they have been mislaid intentionally. The Treasurer advises that it is the habit of members of the Council to take from his office, vouchers which are not returned.

Some of the warrants we find not properly endorsed, but where a check is issued in settlement thereof, the endorsation is found upon the check.

A recommendation is made that all moneys belonging to the Corporation should be deposited in the bank, and that payment should not be made other than by check. A form of warrant is supplied which when countersigned by the Mayor, gives it the effect of a check upon the bank.

Police Magistrate. The books of the Police Magistrate have been examined, and all fines to which the Town appears to have been entitled, have been properly accounted for, with the exception of two small items (\$3.00),

deposited in the current year's receipts.

In this connection we suggest that if the Treasurer were to prepare and file a list, in detail, of such moneys as he turns in to the treasury in his

capacity as Police Magistrate, it would be more satisfactory.

Bonds. The bonds of the several officers are as follows: W. D. Beaman, Treasurer, bond of Dominion of Canada, Guarantee and Accident Co., \$2,500.00(No. 02875), expires March 5th, 1906. Personal bond of W. D. Beaman, and Lizzie R. Beaman (his wife), \$3,000.00, (joint and several) dated March 17th, 1902, good during term of office as Treasurer.

Chas. M. Caughill, Collector of taxes, bond of Dominion Canada Guarantee and Accident Co., \$2,000.00, (No. 03152), expires December 1st, 1905. Personal bond of Chas. M. Caughill and Dina Caughill (his wife), \$2,000.00, dated March 16th, 1903, good so long as he shall remain Col-

lector.

Frank M. Brown, Collector, of water rates, bond of the Dominion of Canada Guarantee and Accident Co., \$500.00 (No. 02880). Personal bond of Frank M. Brown and Electy Brown (his wife), \$500.00, dated March 16th, 1903, good as long as he remains Collector of water rates.

James Douglas, present Collector of water rates has not given any

bonds up to this date. This matter should receive immediate attention.

It will be observed in the case of the private bonds of C. M. Caughill and Frank Brown, that these are not "joint and several" as should be the case.

Pound Keeper. The books of Thomas Irwin, pound-keeper, have been examined since 1895, down to 1905, and and any payments to which the Town was entitled have been made to the Treasurer and accounted for.

FINANCIAL POSITION.

The financial standing of the Corporation, on December 31st, 1904, is

shown in detail in Appendix A.

The current liabilities exceed the available assets by \$2,418.14. The assets are \$12,443.04. The current liabilities, which must be met from these assets amount to \$14,861.18, leaving a deficiency as noted. This showing is upon the assumption that the uncollected taxes as entered in the schedule, be realized in full, which is altogether doubtful. Included therein for purposes of the book-keeping records, is also the item of disputed taxes, \$336.98; the omitted levy under By-law 133, and the arrears of water rates at face value. Taking all these matters into consideration, a safe estimate of the present net available assets and unprovided liabilities is fully \$3,500.00, to which the expense of the present audit will require to be added.

DEBENTURES.

The debenture liability of the Corporation on December 31st, 1904, was as follows:

 General
 \$35,016 50

 Local Improvement
 12,032 11

\$47,048 61

All the above debentures are issued upon the annuity or installment plan, and there is consequently no sinking fund.

The Municipality is annually losing a very considerable sum of money in interest, by reason of the fact that, (with the exception of the High School debentures, which mature earlier, January 2nd of each year) all general debentures mature in June and July. The Local Improvement debentures mature October 1st in each year.

If the councils which had to do with the issuing of these debentures had fixed the date of payment of the annual installments in December and January, a saving of at least \$100.00 in interest, per year, would have been effected. The date of tax collections and of payment of debentures and interest would then have been practically concurrent, and six months to a year's interest (pending collection of the taxes) would have been saved annually.

Recommendations.

As a result of the examination, audit and inspection of the books, accounts and vouchers of the Municipal Corporation of the Town of Essex, I make the following recommendations:

- (1) That all funds of the Corporation shall be deposited in a chartered bank, and that payments thereout shall be made upon warrant of the Mayor, countersigned by the Treasurer, except as noted in paragraph 2.
- (2) That all accounts be passed by the Council in regular session before payment, excepting fixed charges, such as debentures, interest, payment of school accounts, and any other items fixed by by-law or statute, which may be payable by the Treasurer without reference to the Council.
- (3) That a rubber stamp be furnished the Treasurer (until such time as the present supply of warrants is exhausted) of the form following:

 "The Imperial Bank of Canada, Essex, will please pay and charge to the account of Treasurer, Town of Essex.

----- Treasurer."

- (4) That an official form of receipt with stub, properly numbered, shall be adopted, and that all moneys received by the Treasurer, from whatever source, shall be acknowledged thereon.
 - (5) That a special account shall be kept for all Local Improvements.
- (6) That previous to settlement of Collector's Roll, the Collector will present to the Council a statement of all taxes which he has been unable to collect, other than those which may by law be returned to the Town Treasurer as arrears; that all such claims shall be passed upon and allowed by the Council before being finally accepted by the Treasurer in his settlement with the Collector.
- (7) That proper books of account be opened as of January 1st, 1905, in accordance with the findings of this report; said books to be written up to date and the Treasurer to be instructed in the keeping thereof.
- (8) That proper conveniences for fiking the Corporation documents and records shall be supplied, both to the Clerk and Treasurer.

- (9) That the Treasurer be required to keep on file the following returns:
- (a) Collector's account for taxes remaining due on the roll.
- (b) List of lands liable to be sold.
- (c) List of occupied lands.
- (d) Return of taxes on occupied lands.
- (10) That a record of all arrears of taxes be kept as required by the Assessment Act, and that an account should be opened in the ledger for such arrears.
- (11) That a Land Register be provided, and the details of all arrears be entered therein.
 - (12) That a proper Debenture Register shall be kept.
- (13) That the provisions of the Assessment Act in reference to the sale of lands for arrears of taxes be observed.
- (14) That the Collector's Roll shall be finally completed and certified by the Clerk before the same be handed to the Collector.
- (15) That the statute requiring the Collector's Roll to be in the hands of the Collector by Oct. 1st in each year be complied with.
- (16) That the Collector shall make his returns of uncollected taxes to the Treasurer, in the form required by law, delivering a duplicate of the same to the Clerk.
- (17) That the Collector of Taxes shall make a final return of his roll in each year by the date set by statute (April 8th).
- (18) That under no circumstances shall a collector be allowed to retain two collector's rolls in hand at the one time.
- (19) That the details of the annual estimates as finally passed upon by the Council, shall be incorporated in and become part of the by-law striking the rate.
 - (20) That the Clerk be required to keep on file the following returns:
 - (a) List of lands liable to be sold.
 - (b) Assessor's occupied return.
 - (c) Return of taxes on occupied lands.
- (21) That the Collector of Water Rates shall comply strictly with the bylaw in reference to the imposition of the penalty for non-payment of water rates by the date specified.
 - (22) That a proper water rates register be opened and kept.
- (23) That a water rates cash book shall be opened, in which shall be entered all moneys received by the Collector from water-takers, in order of receipt upon the one side, and that the same be balanced as moneys are paid over to the Treasurer of the Corporation.

Conclusion.

Th Treasurer and Clerk and all others who have been called upon to assist in the present examination and audit, by the furnishing of information

or documents, have done so with the utmost willingness, for which I desire to express my obligations.

The attention of the Council is called to Sec. 14, Chap. 228, R.S.O., 1897, which requires that the recommendations made in this report shall be carried into effect.

Owing to the unsatisfactory condition of the Collector's Roll, and of the water rates books, much more time has been consumed in connection with this audit than would have otherwise been necessary.

I shall be pleased to furnish further explanations, or to advise with the Council in reference to any of the matters or any of the recommendations contained in this report.

All of which is respectfully submitted,

F. H. MACPHERSON.

Chartered Accountant.

WINDSOR, ONT., Aug. 19th; 1905.

List of Exhibits.

The following are included in and form part of the report pertaining to the audit, examination and inspection of the accounts of the Town of Essex, which said report is dated Aug. 19th, 1905.

Appendix A.—Balance Sheet, showing financial standing of Town as at Dec. 31st, 1904.

Exhibit 1.—Statement of Collectors' Rolls, years 1892 to 1904, inclusive.

Exhibit 2.—List of Arrears dropped from Collectors' Rolls.

Exhibit 3.—Irregularities in Arrears of Taxes.

Exhibit 4.—Arrears of Water Rates.

Exhibit 5 .- Accounts Payable.

Exhibit 6.—Form of recapitulation of Collector's Roll, which should be entered at close of Roll.

Exhibit 7.—Schedule showing analysis of Collector's Roll to be prepared by the Clerk, and forwarded to the Traesurer, imediately upon the completion of the roll, and prior to its delivery to the Collector.

Exhibit 8.—Forms of journal entry to be made by the Treasurer upon receipt of schedule (Exhibit 7) from the Clerk, also upon receipt of non-resident roll, the details of which, when posted to the ledger, would place the contents of the Collector's Rolls properly thereon.

Note.—Exhibits 6, 7 and 8 are included with a view to supplying certain requisite and necessary information in better form, these acting as guides to the Clerk and Treasurer.

PRO-FORMA EXHIBIT.

Journal Entries Covering the Roll of 1903.

C. M. Caughill (collector of 1903), Dr. \$11,566.19.	
General funds	\$3.160 03
Public school	2,821 00
High school	1,209 00
Arrears of taxes	358 83
Debentures levies account:	
By-law No. 36\$391 88	
By-law No. 91	
By-law No. 167 552 93	
By-law No. 165	
By-law No. 187	
By-law No. 265	
·	4,017 33

The item of \$53.60 is omitted from the above, being the amount of the non-resident roll, as this should have been sent to the treasurer instead of to the collector. If this were sent to the treasurer the proper journal entry therefor would be:

Arrears of taxes,	Dr	\$53 60	
General funds, Cr			\$53 60

As a percentage for non-payment of taxes is imposed, it will be necessary to make a further journal entry when the total percentage added has been ascertained, as follows:

C. M. Caughill	(collector of taxes), 1903, Dr	\$95 35	
General funds,	Cr		\$ 95 3 5

Cost of this audit, as per Mr. Macpherson's account, was \$455.62.

OCTOBER, 1905.

TOWNSHIP OF OSGOODE, COUNTY OF CARLETON.

To His Honor the Lieutenant-Governor in Council.

SIR,—Under authority of an Order-in-Council, dated April 19th, 1905, approved by His Honor the Lieutenant-Governor of Ontario, in pursuance of sub.-sec. 3, sec. 9, Cap. 228, R.S.O., 1897, I, George L. Blatch, Chartered Accountant, of the City of Ottawa, was instructed by the Provincial Municipal Auditor to make an examination and audit of the books, accounts and vouchers of the Township of Osgoode in the County of Carleton.

My instructions were to go back as far as January 1st, 1899, and make a thorough audit to Dec. 31st 1904. This I have done and herewith submit

the following statements:—

(1) Abstract statement of Receipts and Expenditures on general account for the years 1899, 1900, 1901, 1902, 1903 and 1904.

(2) Detailed statement of Receipts and Expenditures on general account,

1899 to 1904.

(3) Comparative statement of Receipts and Expenditure, 1899 to 1904.

(4) Statement of Assessment values on the assessment rolls and the collectors' rolls, total taxes on the rolls, amounts collected, remitted and in arrears, 1899 to 1904.

(5) Summary of Collectors' Rolls, 1899 to 1904.

(6) Statement of account with each Collector of Taxes, 1899 to 1904.

(7) Statement of County Rates paid the County Treasurer.

(8) Statement of the Drainage Construction Accounts and Debenture Accounts.

(9) Statement of Debenture Debt.

(10) Township Account Revenue and Expenditure.

(11) Statement of Assets and Liabilities.

Upon enquiry I find that the chief cause of complaint is that the annual statement presented to the ratepayers has not been made up in such form as to be understood even by accountants without considerable study, and the direct cause of this is that the Municipal cash book which has been in the possession of the Treasurer during the whole of the period under audit has never been used. If this cash book were used as it is intended, the items of receipts and expenditure would be properly grouped so that the preparation of the financial report in the correct form would be comparatively easy.

Generally speaking, the accounts of the Township are correct, but there are many things that require attention in order that the accounts may be

correctly kept.

Assessment Rolls.

These rolls are as a rule carefully kept. They are not, however, always sworn to by the assessors as in the case in the years 1901-2-3 and 1904. The separate pages of these rolls are added and the total amount on the roll shown at the end, but there is no summary of the various pages to enable the auditors to verify the grand totals. All changes authorized by the Court of Revision should be initialled by the Clerk of the Court and a list entered on a separate page of the roll with references to the page on the roll on which each item appears.

Collectors' Rolls.

If any alterations are made in the Assessment Roll by the Court of Revision after the collectors' rolls have been prepared, the Clerk shall alter the latter and initial each alteration, after which no alteration whatever should be made in the collector's rolls. Any allowances legally made by the Township Council should be entered in a list at the end of the roll and reference made to the authority for such allowances.

In most cases, a list of uncollected taxes, sworn to by the collector, has been attached to the roll, but there is none for the Western Division in the

1899 roll.

In the accounts with the collectors of taxes there is a discrepancy in most cases of something less than one dollar, sometimes short and sometimes over, which might be accounted for by the addition of the fractions of a cent. on the rolls.

The collector of taxes for the Western Division, Mr. Hugh J. Clelland,

has over-paid to the Treasurer thirty-six dollars and eighty cents.

There are errors in extension in the collectors' roll of the Eastern Division in the year 1903, one of \$4.00 opposite No. 564, and one of \$2.50 opposite No. 567. These two items are statute labor taxes, remitted by resolution of the Council which should have been included in the amount charged on the roll and also in the list of taxes remitted. The items appear in the statute labor column, but are not extended and there is no reference to the resolution by which they were remitted. This proves the necessity of adding the several columns on the collectors' rolls. If this were done,

the cross additions at the footings of the various columns should be equal to the footing of the total column on each page and be a check on the additions.

It is also necessary to add the several columns in order to arrive at the total amount charged on the roll under each separate rate. This summary should be entered on the roll and a copy of it sent to the Treasurer, who should then enter it in his journal and post to the various ledger accounts. None of the collectors' rolls were properly added, and in many cases it is difficult to determine under which drain the rates were levied on certain ratepayers as the same column is used for the levy of more than one drain. See sub.-sec. 3, sec. 94, Assessment Act, 1904. Otherwise the rolls are in very good order and the collections good although sometimes slow.

very good order and the collections good although sometimes slow.

The collectors' rolls for 1904 have been returned to the Treasurer, but the collectors are both short in their payments to the Treasurer. Robt. Waddell, Collector Eastern Division, is short \$71.99 and P. Dewan, Collector

Western Division, is short \$61.87.

The practice of retaining the amount of salary for collecting the taxes and not handing it over to the Treasurer should not, under any circumstances be allowed. The collector should hand over to the Treasurer every dollar of taxes collected, and when his roll is returned properly completed he should receive a cheque for his salary in the usual manner. The collector should, when returning his roll, present a statement of cash collected together with a list of taxes remitted by authority of the Council and finally a sworn statement of taxes uncollected by reason of there being no property to distrain. The last statement has always been provided by the collector.

Cash and Bank Accounts.

The Treasurer's cash book is fairly well kept, the receipts and payments being distinctly entered and the vouchers in regular order being produced for all payments made. A receipt book for all monies received is properly kept. There might be more care exercised in having all orders for payments signed by the Reeve and the Clerk. No payments should be made without authority of the Council, with the exception of fixed charges, such as debentures and coupons, interest, school levies or other items fixed by by-law or statute. Now that a bank account is kept, all monies received should be at once deposited in the bank and all payments made by cheque.

An account was opened in the Union Bank at Metcalfe in February, 1904, for the current revenue. Separate bank accounts are also kept in the

Union Bank of Canada for each drainage scheme.

It is rather surprising that no interest is credited on the balances at credit of the drainage accounts in the Union Bank. The Dunbar Drain account has a credit balance of \$364.86. The McGregor Drain account has a credit balance of \$1,696.50. The Allen Drain account has a credit balance of \$2,392.18. The McDiarmid Drain account has a credit balance of \$1,643.66. The Cassidy Drain has a credit balance of \$4,386.24. Although these are current accounts, the bank is having the use of all this money and should allow interest on the amounts at credit at stated times

Arrangements should be made with the bank to allow interest on the daily balance at credit in each of the township accounts at the regular rate

allowed on savings bank accounts.

The repayment of a loan of \$890 by the Castor Drain out of the general account was omitted from the cash book when the amount was deposited in the general account in the Union Bank. This entry has since been made.

The Treasurer also omitted to enter in his cash book in the year 1902 two payments for which he has furnished vouchers, namely, school section No. 3 and 1 Gloucester. \$123.52 paid to Virgil McKenna and \$8.00 paid to John McEvoy as road superintendent. These two items I have allowed.

Statute Labor Account.

On June 2nd, 1904, an account was opened with the Union Bank for Statute Labor. Cheques have been drawn on this account to the amount of \$1,310.04 to Dec. 31st, 1904, and stands as an overdrawn account until the taxes are collected, when a transfer is made to the general account. The first transfer was not made till February 28th, 1905, when the amount was \$1,334.64. This does not appear in the statement of expenditure for the year 1904, nor as a loan from the Union Bank.

Awards.

A separate account should be kept with each drain constructed under the Ditches and Watercourses Act which should be debited with the amount expended and credited with the cash received directly and the amount charged on the rolls. The townships portion of expense should then be credited to each account and charged to the general fund. All orders for payments authorized by Council should state clearly the land chargeable therewith, and the Clerk should have in his possession the engineer's certificate before payment is made.

In the Ditches and Watercourses book, where is kept a list of the lands chargeable under each award, there should be entered opposite each item the number on the roll where this item appears, and if not on the roll the date on which the cash was received.

Drainage Works.

A separate statement has been prepared shewing the amount realized on the sale of debentures and a detailed list of the expenditure on the various drainage schemes. Several payments have been made out of the general account which should be charged to these schemes, together with interest, from the date of such payments to the date on which a transfer is made back to the general account. In the case of the Bower and Saunders drains, the debentures have not yet been issued, consequently all payments on these drains have been made out of the general fund.

O'Connor, Saunders and Bower Drain.—The payments out of general fund of J. H. Moore, engineer, on account of the O'Connor, Saunders and Bower drains have been charged to one account under the above heading. The details of the expenditure on these drains have been furnished by Mr. Moore as follows:—

O'Connor drain Saunders drain Bower drain		83
-	\$4,975	23

Notes have been given in payment of this amount, but as they are not paid, they are not yet charged in the Treasurer's cash book to the drainage schemes. In addition to the above, Mr. Jas. Simpson received the proceeds of the note of \$500, which was disbursed as follows:—

O'Connor drain, disbursed by J. Simpson	147	90
Total amount	\$ 476	35
Proceeds of note	484 15	10 00
Amount of note	\$ 500	00

The note when due was paid by the Township Treasurer.

Interest should be charged the O'Connor, Saunders & Bower schemes on \$500 from February 1st, 1904, the date on which a note of that amount J. H. Moore was paid. I do not find that the Treasurer has given the township credit for the balance of seven dollars and seventy-five cents (\$7.75), handed over to him by Mr. Jas Simpson on April 5th, 1902.

Doyle Creek.—In the first six years in which a levy was made to provide for debentures for this drain, the amount levied on the rolls was less than the amount required to pay the debentures. Interest should be allowed on the difference between these amounts in favor of the general fund of the township. There remains a balance of \$11.66 unexpended in this fund. There are three debentures not yet due.

Grey Creek.—There still remains a balance of \$17.93 in this fund unexpended. The debentures are all due and paid.

School Section No. 13 Debentures.—The last of these debentures was paid in the year 1904.

Castor Drain.—There is an over-deposit of \$3.00 in the debenture account in the Quebec Bank on this account. This can be adjusted when the next deposit to provide for a debenture is made.

A list of notes discounted in the Union Bank to provide funds for this work and unpaid is given in the statement of receipts amounting to \$10,283.30. A loan from this account to the O'Connor, Saunders and Bower drainage schemes was refunded in 1905 by a transfer from the general fund of \$1,005.25, covering principal and interest.

Dunbar Drain.—There is still a large balance due from the Township of Russell on this account. On June 8th, 1904, the Township received \$2,095.00 on account.

Bower Drain.—The petition for this drain not having been sufficiently signed, the Council passed a resolution on Sept. 8th, 1904, to abandon the scheme and assess the petitioners to cover the expenses incurred. No further action has yet been taken.

General.

The reason that the amount borrowed from the bank in 1904 is much larger than the total amount borrowed in other years is that the bank has paid all cheques presented and charged them up to the Township when there

was no balance at the credt of the account. The payments made by the bank were considered as loans and the deposits in the bank account as repayments on these loans.

The balance of the cash account on Dec. 31st, 1904, shows that the township owes the Treasurer \$280.61.

In opening the bank account in the Union Bank of Canada in February, 1904, the Treasurer deposited an amount which he calculated was the correct balance of cash in his hands on general account and statute labor account. I have reason to believe that this deposit was in excess of the amount called for by the cash accounts, but as the statute labor cash book has been mislaid, I am unable at present to determine exactly how the balance was made up. I will have to make a supplementary report when this information is obtained.

Since the bank account was opened at Metcalfe it has been used for the accounts of the Township and the Police Village of Metcalfe together. These accounts should be separated, the amount of the Police Village levy being deposited to the credit of the Metcalfe P. V. bank account and cheques drawn on that account for the expenditure of Metcalfe Police Village.

It is noticeable that frequently the Council, without being constituted as a Court of Revision, passes resolutions that come under the authority of the Court of Revision.

In many cases I find in the minutes resolutions to borrow money for current expenses. These should in all cases be confirmed by by-laws as provided in sec. 435 of the Municipal Act.

It would save a lot of time, both of the Council and the Clerk, in entering the minutes of the meetings of Council if instead of a separate resolution being passed for the payment of each account, a list of accounts be prepared for presentation to the Council and passed as a whole, any item that it was not the will of the Council to pass being struck out and initialled by the Clerk.

I have written up a portion of the Municipal cash book authorized by the Provincial Municipal Auditor, so that the Treasurer will have no difficulty in following the entries in writing up the items for the year 1905. The keeping of this book will be of great assistance to the auditors in making up their annual report.

I have to express my thanks to the Reeve, the Clerk and the Treasurer for the valuable assistance they have given me in the way of explanations and looking up information in the course of my audit. The Clerk is well versed in municipal affairs, but is too busy a man to devote the necessary time to the township work for the small consideration which he receives. If his remuneration were sufficient to pay an assistant to do the clerical work the benefit would be felt by the township. As is the case in a large number of the townships of the Province, the remuneration of the Treasurer of Osgoode is quite inadequate to reimburse him for the time spent on the work of the township. Both these officials should receive larger salaries.

I have the honor to be, Sir,

Your obedient servant,

GEO. L. BLATCH, Chartered Accountant.

OTTAWA, Oct. 20th, 1905.

Supplementary Report.

. Through another source I have been enabled to determine the balance of the statute labor account and thus complete the summary of the cash balance of the 20th of February, 1904, the date on which the bank account was opened in the Union Bank of Canada at Metcalfe, viz.:—

Current account February 20th, 1904 \$1,638 89		
Metcalfe Police Village 250 33		
Statute Labor		
Grey Creek fund		
Doyle Creek fund		
	\$2,14 0	82
Deposited in Union Bank Feby. 20th, 1904 \$2,091 00		
Deposited in Union Bank Feby. 27th, 1904 20 00		
Deposited in Union Bank Feby. 29th, 1904 52		
Deposited in Union Bank March 4th, 1904 300 00		
•	\$ 2,411	52
Over-deposited by Treasurer	\$270	70

This balance is due to the Treasurer in addition to the balance of the general account, \$280.61. The amount expended on Statute Labor account in 1904 was \$1,638.24.

GEO. L. BLATCH,

Chartered Accountant.

The cost of this audit, per Mr. Blutch's account, was \$476.90.

REPORT OF SPECIAL AUDIT, OF THE ACCOUNTS OF THE TOWNSHIP OF CAMBRIDGE, IN THE COUNTY OF RUSSELL.

Under authority of an order in Council, approved by His Honor, the Lieutenant-Governor, of the Province of Ontario, the 22nd day of July, 1905, I, George L. Blatch, Chartered Accountant, of the City of Ottawa, was instructed by the Provincial Municipal Auditor, of the Province of Ontario,, to make an inspection, examination, and audit of the books, Accounts, Vouchers and Moneys of the Municipal Corporation of the Township of Cambridge, in the County of Russell, under the provisions of subsec. 3, sec. 9, Cap. R.S.O., 1897.

My attention was first directed to the Collector's Roll of 1903, in connection with which the local Auditors reported a shortage by the Collector, of four hundred dollars (\$400.00). Having examined the roll and the cash book of the Treasurers, I found that the amount of the shortage was four

hundred and eleven dollars and sixty cents (\$411.60).

On account of the change in Treasurers during the period in which the Collector's Roll for that year was in his hands, I deemed it advisable to place the Clerk and each of the Treasurers on oath, before making my report to the Council on my findings. Accordingly, on the 26th day of August, I took the oath of the Clerk, to the total amount on the Collector's Roll and the Treasurer's, to the amount of cash received by each on account of the roll of 1903, the papers in connection with which I will forward with this report. On the same date I reported by findings to the Council of the Town-

ship and I am informed that the Collector has since paid over to the Town-

ship the amount due.

I have made an examination of the assessment and Collector's Rolls for 1901, 1902 and 1903; the cash book and Vouchers and the Drainage and Debenture accounts of the Township for the years 1902, 1903 and 1904, and a general view of the cash book for the year 1905 to October 31st.

The Clerk, Mr. J. B. Sanche, although a man well up in years, does excellent work, and is well versed in the duties of his office. The Collector's Roll, written up by the Clerk, is well and carefully prepared, properly added and certified. A summary of the amounts levied is attached to each roll, and the dates on which the roll is handed to the Collector, returned by the Collector to the Treasurer, and the arrears sent in to the County Treasurer are entered at the end of each roll.

The salary paid to the Clerk is not, by any means, commessurate with

the services rendered.

In the Collector's Roll for 1901, there is an error in addition, on page 30, of one dollar (\$1.00), making the amount that the Collector should hand over to the Treasurer one dollar (\$1.00) more.

In the Collector's Roll for 1902, on page 44, there are two items, three dollars and twenty cents (\$3.20), and three dollars (3.00), amounting to six dollars and twenty cents (\$6.20), entered after the roll was added. This amount is marked paid on the Collector's Roll, but it has not been handed over to the Treasurer.

With these exceptions, I find the taxes charged on the rolls properly accounted for. A statement of the amount paid over by the Collectors to the Treasurer, is entered at the back of each Collector's Roll, and correspondents with the amounts entered in the cash book.

A copy of the summary of the amounts levied on the Collector's Roll, each year should be handed to the Treasurer as his authority for making an entry in his ledger for the various amounts levied. The entry, which should be made when the roll is handed to the Collector, is as follows:

Collector of Taxes, 1903, Dr.	\$12,688 01
To County Rate	`
To Township Rate	4,433 29
To St. Albert Bridge, Debentures	1,109 93
To Schools, per demand	3,544 <b>42</b>

To Whissel Creek Debenture	127 74
To Moose Creek Debenture	225 29
To Ditches and Watercourses, 1902	274 42
To Ditches and Watercourses, 1903	199 79

#### Cash Book.

The Municipal Cash Book, if properly and correctly kept, will save a lot of time and trouble and will enable the Auditors to draw up their financial statement after the close of the year, in a most comprehensive form, but, if not kept as it should be, is liable to be misleading and cause the Auditors endless trouble, if they really audit.

The Treasurer of the years 1902 and 1903, kept his Cash Book neatly and fairly correct. The items of receipts and expenditure are distributed in the proper columns, under the various headings, with but few exceptions. The principal one being that payment on Awards, chargeable to Ratepayers, have been charged to "Roads and Bridges," whereas, they should be charged to "Ditches and Watercourses."

The work of the Treasurer of 1904 and 1905, is neither neat nor correct. He seems to have no idea, whatever, of the distribution of the items of expenditure. Some of of entries, which have been made wrongly in the

cash book, and overlooked by the Auditors, I will here enumerate.

Under the heading of "Stationery and Printing", is an item of eight dollars (\$8.00) for cleaning hall, which should have been put in the "Miscellaneous" column, or charged to a special account for "Town Hall Maintenance."

The account of Harkness and Mulligan, for three hundred dollars (\$300.00), services in connection with the O'Byrne Creek Drain, to which

it should have been charged, was put in the "Law Costs" column.

In the abstract of expenditure in the Auditor's report, the amount of "School and Drain Debentures" is nine hundred and twelve dollars and ten cents (\$912.10), whereas, the amount in the cash book is eight hundred and twelve dollars and ten cents (\$812.10).

Another item of interest on a note, which should have been charged to the O'Byrne Creek Drain, was charged to "Interest", which makes the total charge to that account four hundred and twelve dollars and sixty-five cents (\$412.65), instead of one hundred dollars and seventy cents (\$100.70).

"Roads and Bridges", account is charged with a number of payments on account of award drains, which are paid by the Municipality and charged to the Ratepayers on the Collector's Roll. These items, together with the Municipality share of the cost, should be charged to "Ditches and Watercourses" or, more properly, to the individual drains under which the award is made; then, if the same account is credited with the amount charged on the roll, the balance will indicate the cost to the Municipality.

Several items, chargeable to the "Board of Health," have been entered in the "Salaries" column, making the total forty-six dollars (46.00) for the

former, when it should be sixty-seven dollars and forty cents (\$67.40).

Two items amounting to three hundred and fifty dollars and seventy-five cents (\$350.75), for the repayment of loans, were charged to "Roads and Bridges," and one hundred and eight dollars and forty-three cents (\$108.43), which should have been entered under the heading of "Coupons" was charged to "Interest."

There is no abstract of receipts for the year 1904.

I have made corrections in the cash book for the year 1905, so that when the annual statement is being prepared, the items will be found in their proper places and will materially assist the Auditors in making their report.

Great care should be taken in making out the orders on the Treasurer, that they should state clearly, in detail, the work that was performed, and the account to which the item should be charged, especially if the amount

should be divided and charged to more than one account.

There is an item in the Auditor's report of 1902, received from W. D. Heron, nine dollars and forty-five cents (\$9.45), which is not on the cash book. This will not affect the balance of cash in the hands of the Treasurer for that year.

It would facilitate matters for the Council, as well as the Treasurer, if, before each Council meeting, a list of accounts to be paid, be made out by

the Clerk, and the whole list passed by one resolution, after striking out such items as the Council decides, should not be paid. Then the orders on the Treasurer could be made out by the Clerk, and signed by the Reeve at the same time. Although these orders are usually signed by the Reeve, they are, in many cases, not signed by the Clerk. The cause of this is apparent. The Reeve lives in one part of the Township, and the Clerk in another, and many times it is not convenient to get an order signed by the Clerk, when the Reeve issues the order. These orders are afterwards authorized by the Council.

The general principal that should be observed by Municipalities, is that all payments of cash should be previously authorized by the Council and that the Treasurer should pay no orders that are not signed by the Reeve, and the Clerk as representatives of the Council. Exceptions to this rule would be made in the case of Debentures and Coupons due, and all

payments authorized by Statute.

In the absence of a bank, in the Village of Casselman, where the Treasurer resides, payments are more conveniently made in cash. In the event of a branch being opened in the village, I would recommend the Council to authorize the Treasurer to open an account and deposit all monies received from whatsoever source and pay all orders by cheque.

### St. Albert Bridge Sinking Fund.

The amount raised to provide a sinking fund for St. Albert Bridge debentures, viz: ten hundred and sixty-six dollars and sixty-six cents (\$1,066.66), has been deposited in the Ontario Bank each year, with the exception of the year 1904. This deposit was not made till February 28th, 1905. A deposit of this amount should be made before the end of the present year, to bring the balance up to the required amount. The balance at debit of the sinking fund, on February 28th, 1905, was two thousand eight hundred and six dollars and sixty-four cents \$(2,806.64).

## School Section No. 12, Sinking Fund.

As in the case of the sinking fund for St. Albert Bridge, the amount of sinking fund for School section No. 12 Debentures, 1904, seventy-one dollars and twenty-five cents (\$71.25), was not deposited in the bank till February 28th, 1905. The balance at debit of this sinking fund, on February 28th, 1905, was five hundred and five dollars and fifty-seven cents (\$505.57).

In the statement of assets and liabilities, the amount of these sinking funds should appear as assets or be deducted from the debenture liability. The liabilities should include, not only one debenture each year, but all debentures unpaid at date of statement, whether due or not due. These assets and liabilities should not, however, be mixed up with the general assets and liabilities of the Township. They should be set out in a separate column as pertaining to special works. These liabilities will be reduced each year by the amount of debentures paid.

It has been the custom in this Township to combine the County and Township rates under one heading in the Collector's roll, which is quite irregular as the Assessment Act, provides that the County rates shall be

set out in a separate column.

There is no Debenture Register as provided by the Municipality Act, and, as the Township has a number of debentures, which should be recorded, a book should be provided for this purpose.

The statements contained herein consist of the following: -

- 1. Abstract statement of receipts and expenditure for the years 1902, 1903 and 1904.
- 2. Detailed statement of receipts and expenditure for the years 1902, 1903 and 1904.
- 3. Statement of assets and liabilities, December 31st, 1904; also liabilities on special accounts.
  - 4. Statement of Albert Bridge sinking fund.
  - 5. Statement of school section No. 12, sinking fund.
  - 6. Statement of County Rates.

All of which is respectfully submitted,

GEO. L. BLATCH,

Chartered Accountant.

Ottawa, December 13th, 1905.

Total cost of this audit, as per Mr. Blatch's account, was \$159.00.

#### Township of Nipissing.

TORONTO, 5th September, 1905.

His Honor, The Lieutenant-Governor of Ontario in Council.

SIR,—By authority of an Order-in-Council, dated 28th day of July last, and under instructions from the Provincial Auditor, I proceeded on the 7th ultimo to Nipissing Post Office, for the purpose of making an Inspection Examination and Audit of the books, accounts vouchers and moneys of the Township of Nipissing.

The audit is made upon the petition of certain ratepayers, addressed to

the Hon. The Provincial Secretary.

In accordance therewith, I have the honor to report as follows:—

I have gone over the period from 1st of January, 1900, to the 31st of December, 1904.

The Treasurer's Cash Book, I find to have been well kept, and I append abstracts of receipts and disbursements for each of the years covered.

#### In the Year 1900.

The Treasurer shows receipts from Collector, on account of roll 1899 of \$881.04. Mr. M. Simpson produced in addition to receipts for the above amount, a receipt dated 28th of June, 1900, and signed by J. M. Macdonald, Treasurer for \$5.31, which receipt stated it was in full of money collected on roll of 1899. I cannot find that this amount of \$5.31 was credited to Township funds.

The vouchers covering payments were kept in only fair shape, and were not complete, but by reference to the stubs of orders issued on the Treasurer, I satisfied myself as to the authorization of such disbursement entries for which vouchers were not to be found.

#### Roll.

Rolls 1899 (collected in 1900).

The Assessment Roll was not to be found.

The Collector's Roll, bearing the signature of William Maltby, Clerk, certifying to its correctness, shows a total of \$991.64, and was audited under date of 15th of February, 1900, when it was noted that same should be about \$1,000.00. The ledger shows settlement was made with the Collector on the basis of \$1,003.72, as follows:—

Roll of 1899. M. Simpson, Collector		<b>\$1,003 72</b>
Receipts of Treasurer, as shown in cash book.	881 04	
Uncollected	117 21	
Error	47	
Charged back through Journal	5 00	
	<del></del>	<b>\$1</b> ,003 72

As I have stated above, this does not include the sum of \$5.31, shown to have been received by the Treasurer on account of this roll.

Rolls 1900 (Collected in 1901).

The Assessment Roll shows a total value of \$101,392.

The Collector's Roll, showing a total of \$1,086.48, bears the certificate of William Maltby, Clerk, but does not appear to have been audited. Settlement was made with the Collector as follows:—

Roll 1900. M. Simpson, Collector		\$1,085 46
Receipts of Treasurer, as shown in cash book.	920 25	
Uncollected taxes	107 87	
Errors in roll	48 65	
Extension by Council	8 49	
Short returns		
-		<b>\$1,085 46</b>

Rolls 1901, (Collected in 1902).

The Assessment Roll was not to be found.

The Collector's Roll, as first made out, shows a total of \$1,375.98, but a new rate having been struck for certain school sections, these latter were re-written, the other remaining, and no totals to show how the final amount of \$1,096.51 was arrived at, and owing to the number of changes, alterations in figures and cancellations, it was impossible to even approximately determine the correctness of the said total of \$1,096.51, which carries alongside the signatures of Edward Fisher and J. Sieman, who presumably audited the roll. The roll also bears certificate of correctness signed by William Maltby, Clerk. The settlement with the Collector, as shown in ledger, is as follows:—

Roll of 1901. D. McConnell, Collector Receipts of Treasurer, as shown in Cash	•••••	<b>\$1,096</b> 51
Book Errors and deductions Uncollectable	23 07	•
		<b>\$</b> 1,096 51

Rolls 1902.

The Assessment Roll, (D. McConnell, Assessor), was well made out, and shows a total of \$106,452.

The amounts carried into the Collector's Roll, show a total assessed value of \$105,308, agreeing with Assessment Roll, subject to an omission of \$795, and errors of \$166, and \$183, and summary, as certified to by William Maltby, shows as follows:—

Municipal tax	<b>\$</b> 361	63
General School tax		
Special School tax	456	83
Debenture School tax	247	18
Statute Labor	61	00

**\$1.534 65** 

The Collector's Roll, however, completing additions not made, shows as nearly as I could arrive at, as follows:—

Municipal tax	<b>\$</b> 347	26
General School tax	557	80
Special School tax	505	31
Debenture School tax	263	51
Statute Labor		

\$1,735 88

The Collector's Roll, according to the Treasurer's boolector responsible for	<b>\$1,534</b>		Col-
the over-payments by the Collector on above basis	72	24	
For this the Collector made returns as follows:—	<b>\$1,606</b>	89	•
In 1902	\$321 1,285		
	<b>\$</b> 1.606	89	

In addition, the Collector, Mr. D. McConnell, produced an acknow-ledgement from the Treasurer, showing the amount of uncollectable taxes as \$115.50, which, added to the payments made, would make the roll at least \$1,722.39.

The roll does not appear to have been audited.

Rolls 1903.

The Assessment Roll shows a total of \$106,323.

The Collector's Roll shows a total assessed value of \$106,158, and agrees with Assessment Roll, subject to an error of \$35 too much, and an omission of \$200.

Owing to errors, the Clerk re-vote the roll, showing a total of \$2,328.02, and which only was audited, but as the new roll was found to be in parts based on wrong rate, and as the Collector had already collected in part on the roll as first made out, he continued its use, and so completed his work.

The Collector was debited through the Journal with \$2,215, with the following explanation: "This is the amount of the 1903 roll, as returned by the Collector. It is in excess of the amount certified to by the Clerk, but the roll has not yet been audited."

Settlement was made with the Collector on this basis, and so far as the roll could be availed of to determine it, I believe it to be correct.

No Statute Labor is included, for what reason I do not know.

Speaking in a general way, the Assessment Rolls produced, were made out in good shape. The Collector's Rolls, on the contrary were almost useless as a means of determining with accuracy, the amount for which the Collector was responsible. This must always be the case where the roll is not completed in every particular by the Clerk, before it is handled to the Collector.

#### School Sections.

I procured and inspected the Treasurer's books of the several sections, and found them to agree with the Township books, as to the amount received from the Township Treasurer.

The S. S. Treasurer's books were as well kept as they should be, with the exceptions of S. S. No. 1, since Mr. F. Solman has acted as Treasurer, and S. S. No. 3, Nipissing, of which Mr. Wm. Mechefske in Treasurer, and in view of the importance to the Treasurer of being able to show at any time a clear record of the amounts received by him as also of the disbursements made, it is to be hoped that an improvement will be had. The Treasurer's book for S. S. No. 1, shows a shortage during the year 1902, as follows:—

Digitized by Google

**\$1,041 51** 

By disbursements, January to June	340	00 35	<b>\$</b> 975	39	
Shortage	,		<b>\$</b> 66	12	

During this period Mr. George Simms was Treasurer, and as he is not now a resident of the District, I was unable to communicate with him. In view of the fact that the amounts received from the Township Treasurer were not entered, it may be that through a similar lack of entry certain disbursements are not shown, and in this opinion Mr. F. Sloman, the present Reeve, concurs.

#### School Section Adjustment Special School Tax.

I give the following adjustment as between the Township and the several sections, but in doing so I desire to emphasize the difficulty of determining the amount received by the Township on account of Special Tax, owing to the condition in which I found the Collector's Rolls, and the amounts so shown can only be regarded as approximately correct.

\$1,101 73 \$1,092 60

	S. S. No.	<b>5</b> .	Paie	d by Freas	Towns	hip
1902	Special Tax		•	,		0.0
1903	Special TaxGrant	32 03 150 00	\$207		<b>\$197</b>	
1904	Special TaxGrant	74 81 150 00	182	03	141	00
			224	81	224	81
			\$614	52	<b>\$</b> 562	81

Showing a short payment of \$51.71.

No authority was produced, showing how the amount of the several grants was established. It would appear that the amount of \$56.25, as grant to S. S. No. 3, N. and G., in 1901, represents the payment made.

If the grant for this year should have been \$32, the amount shown in above adjustment as due this section would be \$37.15 in place of \$61.40.

#### Debentures.

The amount due on principal of debentures stands in the ledger at \$1,152.50. I recommend that separate accounts be opened in the ledger, which would show as on the 31st of December, 1904, as follows:—

Debenture By-law No. 86  Debenture By-law No. 88  Debenture By-law No. 95	526	75
-	<b>\$</b> 1 152	50

As each instalment of principal is paid, the amount should be debited to its own debenture account, and the balance should show the amount still to be paid on that account.

The only properties of insurable value are the three new schools, for the erection of which debentures were issued, and I was informed by the several Treasurers that same were insured. They had not brought the policies with them, and I did not consider it necessary to require their return for that purpose.

The Township holds a bond for \$500.00, dated 15th May, 1905 as surety for the Treasurer, signed by Christian Gerber, jointly with F. Baechler.

The matter of rents received on account of town hall, was adjusted by

payment to the Treasurer previous to my departure.

The great difficulty I experienced was in connection with the Collector's rolls, and I recommend that these be made out according to school sections, and show assessment, rate of tax for each purpose, and amount of same, and all totalled, including in proper columns, the statute labor and arrears of taxes. With the school section so shown, the total tax collectable for each purpose could be checked by taking the total of assessment column and the rate.

At the end a summary should be made of the several school sections, showing all particulars of totals, that is, total assessed value, Township Tax, General School Tax, Special School Tax, Debenture Tax, Statute Labor Tax, and Arrears; and these added and brought to a total would show the amount

for which the Collector was responsible. The Treasurer enters in the cash book, the particulars of payments made by the Collector, (showing the amount received on account of each tax, and from which school section), and when collection of the roll is completed, he makes a statement from such entries, showing total received on account of each tax from the different sections and these, with the uncollected taxes and any errors (both of which should be duly shown), would balance the Collector's Roll. This statement should then be transcribed into back of roll for future reference.

The roll₃ did not as a rule show Arrears of Taxes, and while such are probably unlikely to produce much revenue, greater care should be exercised in order that the Township receive a proper return from this source.

Every facility was afforded me in carrying out the audit, and I desire to acknowledge the services rendered by the Reeve, Treasurer and Township Clerk.

> I have the honor to be, Sir, Your obedient servant.

To His Honour WILLIAM MORTIMER CLARK, K.C.,

Lieutenant-Governor of Ontario:

#### MAY IT PLEASE YOUR HONOUR: --

I herewith beg to present for your consideration the fourth annual report of the Temiskaming and Northern Ontario Railway Commission, to December 31st, 1905.

J. O. REAUME,
Minister of Public Works.

TORONTO, February 15th, 1906.

HON. J. O. REAUME, M.D., M.P.P.,

Minister of Public Works, Ontario, Toronto:

SIR,—I have the honor by direction, to submit to you for presentation to the Legislature, the fourth annual report of the Temiskaming and Northern Ontario Railway Commission, which deals with the work done and moneys expended on construction and with the operation of the railway during the year ended December 31st, 1905.

I have the honor to be, Sir,

Your obedient servant,

H. W. PEARSON, Secretary-Treasurer.

### The Temiskaming and Northern Ontario Railway Commission.

#### FOURTH ANNUAL REPORT.

#### INTRODUCTORY.

The operations of this Commission are carried on under the Act of the Legislature of Ontario, 2 Edward VII., chapter 9, as amended by the Act 3 Edward VII., chapter 4, 4 Edward VII., chapter 7, and 5 Edward VII.,

chapter 10.

As foreshadowed in the agreement between the Commission and contractor, dated 19th November, 1904, the Commission commenced operating its trains on the division between North Bay and New Liskeard on January 16th, 1905, and a detailed statement dealing with operation is given in this report.

Early in the year the then Commissioners resigned from office and the present Commission was appointed. At the first meeting of this Commission, held March 15, Mr. Smith was elected Chairman. At this meeting also it was resolved to retain the services of all the then employees of the Commis-

sion.

On account of increased accommodation being required, it became necessary to secure new offices in Toronto, and on September 12th the present quarters at 25 Toronto street were taken possession of.

For the purpose of clearness this report will be subdivided under the fol-

lowing headings, viz.:-

Staff Appointments,
Surveys and Exploration,
Construction,
Operation, including Rolling Stock,
Townsites,
Finances, including Insurances,
Reports, Contracts and Agreements.

#### STAFF APPOINTMENTS.

The amendment to the T. and N. O. Railway Act last session provided that one of the Commissioners might act in the capacity of Consulting Engineer to the Commission, and Mr. Smith, the Chairman of the Commission, acts as such.

Local Solicitor at North Bay: On March 29th it was decided to dispense with the services of the then Local Solicitor at North Bay, Mr. E. S. Senkler, and Mr. J. M. MacNamara was appointed in his stead.

Assistant Chief Engineer: On April 1st the services of Mr. R. A. Galbraith, Divisional Engineer, were dispensed with, and the position abolished,

and in order to enable the Chief Engineer, Mr. Russel, greater freedom to attend to construction matters on Division 2, Mr. Geo. A. McCarthy was appointed Engineer of Way, and Assistant Chief Engineer on Division 1.

Medical Attendant to Operating Staff: A medical attendant to the operating staff becoming necessary, Dr. A. McMurchy, who was already attending the contractor's employees, was appointed by resolution dated April 12th, and his fee fixed at 50c. per month for each married man, and 25c. for each single man.

General Accountant: The organization of the Accounting Department was completed on May 5th, by the appointment of Mr. A. J. McGee as General Accountant, with headquarters at Toronto.

Master Mechanic: On May 5th Mr. Arthur Allan was appointed Master Mechanic and the construction of repair shops and organization of a motive power and car department was immediately proceeded with.

Roadmaster—Division 1: The Commisson not having in its employ any person with the proper qualifications, appointed Mr. Wm. Young as Roadmaster, Division 1, by circular dated May 5th.

Chief Engineer: Owing to the resignation of Mr. W. B. Russel, Chief Engineer, by letter dated April 21st, effective May 15th, Mr. Geo. A. Mc-Carthy, Assistant Chief Engineer, was appointed by the Commission in his stead, said appointment to take effect May 15.

Divisional Engineer: It being considered advisable that Chief Engineer McCarthy's duties should include those of Engineer of Way, Division 1, the re-appointment of a Divisional Engineer of Construction, Division 2, became necessary. On June 17th, Mr. J. K. Macdonald was appointed to fill this position, but resigned, September 30th, and the position was filled October 7th, by the promotion of Mr. A. McGougan, who had been Section Engineer for the Commission for the past three years.

Electrical Engineer: On July 1st the services of Mr. W. G. Chace were secured, in order to study and report to the Commission upon the question of operating Division 1 by electric traction, which is fully dealt with elsewhere in this report.

During the year 1905 the operation of the Commission's trains was carried on under peculiar conditions, owing to the contractor being still on Division 1, completing the ballasting, trestle-filling, etc., and owing to the frequent occurrence of sink-holes, all of which disorganized traffic and necessitated the employment of a train-master. The roadbed of this division now being in fair condition, this position has been abolished.

#### SURVEYS AND EXPLORATION.

#### Division 1.

During the year various minor surveys have been made on this division. These include a six-mile branch at mileage 40, for the Cleveland-Sarnia Lumber Co., a traverse of Montreal River from the railway line some ten or fifteen miles down stream to determine water power possibilities with reference to electric traction, a spur line from Cobalt to Kerr Lake, a spur line at Haileybury to Lake Temiskaming, and a spur line at New Liskeard to the harbor front at this point.

Digitized by Google

#### Division 2.

During 1904, the location of this division had been made to mileage 65, and during the present year some additional work has been done in revising the location between the 32nd and 56th miles, and preliminary surveys have been made, and the location completed under considerable hardships from fire and otherwise, to mileage 105, which is five miles beyond the present contracts and reaching to the junction of the Black and Abitibi Rivers.

#### Extension Northward.

In view of the likelihood of it being considered advisable to construct still farther northward in the near future to a junction with the proposed Trans-continental railway, preliminary surveys have been made and location is now under way for some thirty to thirty-five miles along the plateau lying between the Abitibi and Frederick House Rivers, and it is expected that the two survey parties now in the field will complete this work by April, 1906.

#### Exploration.

In order to ascertain, from a railway point of view, the class of country lying between the present proposed northern terminus and James Bay, to study the geological and other natural conditions along and adjacent to a probable railway route, and the horbor possibilities on the James Bay coast, the Commissioners asked for a special vote at the last session of the Legislature and the sum of \$7,500 was placed in the estimates of the Department of Public Works for this purpose.

Acting under this appropriation, the Chief Engineer was instructed to send out a party composed of an engineer, a geologist, a timberman, etc., and he despatched this party in July via the Quinze route and Lake Abitibi owing to the shorter route via Blanche River being impassable on account of low water. This party returned in October and a report of their findings is given

in the appended reports of the engineer and the geologist.

Further details in connection with surveys will be found in the Chief Engineer's report.

#### CONSTRUCTION.

#### Division 1.

Although the Commission under their agreement with the contractor dated November 19th, 1904, commenced operation in January, 1905, a large amount of construction work still remained to be done, about one and onehalf miles of temporary trestles were to be filled, and only eighteen miles of ballasting had been completed in 1904, the remainder of the division having only a light lift of ballast and a great proportion of the embankments were low and narrow, in addition to which a number of sink-holes developed which had to be fought under great disadvantage owing to the necessity of keeping up operation in conjunction with construction trains. At the expiration of the agreement above referred to it was found that the contractor had still a large amount of work to do, which condition was partly due to lack of preparation on the part of the contractor, but partly also owing to the fact that ballasting cannot be commenced in this district until May and that the amount of work to be done considerably exceeded anticipations and upon application of the contractor a still further extension of four months was granted him. but at the same time it was considered that certain clauses both in this and the same contractor's second contract should be greatly modified,

the general tenor of which modifications was to the effect that the contractor should pay full rates for any construction materials which he might require the Commission to haul over Division 1, that he was required to consign all his construction materials via the Commission's railway, and that on Division 2 he was constituted a common carrier with obligation to haul any consignee's goods as far north as his construction trains were operating at rates similar to those in force on Division 1, which rates are to be fixed by the Commission's Traffic Manager.

The construction work on the division is practically completed, the last and most difficult temporary trestle at mileage 68 across Summit Lake being

nearly filled.

For the development of traffic a large number of private sidings have been constructed under the ordinary siding agreement of the Commission, by which the party requiring a siding supplies everything except the track, which is laid by the Commission and six per cent. interest charged on the cost of same. Outside of those built for mines and lumbering, extensive sidings have been provided for two saw mills at Latchford and a six-mile siding laid running eastward from mileage 40, by which a large special traffic is being obtained in logs.

For these sidings several hundred tons of 60-lb. relayers have been

obtained.

The various station buildings contracted for in December, 1904, have been completed; additional shelters built by day labor at Trout Mills and Moose Lake; a small station has also been authorized at Woodland, and an extensive addition to the present station building at Cobalt, in addition to which the Commission propose to construct a new depot at Temagami, devoting the present station entirely to the purposes of a restaurant. It is also probable that an extension to the Haileybury depot will be required. All sations have been equipped with suitable furniture, safes, trucks, scales and Nunn signals, and fire appliances are now being provided.

Freight sheds with stone foundations have been constructed during the year by day labor at Temagami, Latchford, Cobalt, Haileybury and Liskeard.

During the year twelve section houses have been built by contract and two by day labor; those contracted costing \$1,078.20 each and those by day labor \$1.145.39 each.

Various tool houses, movable agents' shelters for operators, road crossing signs, yard limit and snowplow boards, cattle guards, etc., have been constructed and erected by day labor and the division may now be considered in fair operating condition.

The necessary water tanks for the operations of the division have been completed and are in operation. One is also being constructed at the North Bay terminals in connection with the repair shops situated at this point.

At the North Bay yards, situated just east of the town, various buildings have been constructed, including at present time a machine shop for locomotive and car repairs, a carpenter shop, storehouses, offices, etc., etc. Full equipments of machinery have been provided and complete locomotive and car repairs are now being made in these shops.

With a view to possible future requirements, a right of way has been obtained along the north side of the Canadian Pacific Railway right of way from the present yards to Nipissing Junction, and also in order to establish a local freight terminal in the town of North Bay considerable additional land has been obtained at this point.

Reference to the Chief Engineer's report will show that owing to inferior original construction a large amount of work was necessary in order to put

the telegraph line in proper condition and to provide for safe operation of

trains, it was found advisable to add a second wire.

In order to put all employees closely in touch with the head office and to avoid any danger in connection with operation in case of a breakdown, the Commission considered it advisable to contract for a first-class telephone system over the whole division, and this is now being installed on the telegraph pole line. The telephone system will also be at the disposal of the public at ordinary tolls.

During the season fencing was extended three miles further south in the vicinity of Cobalt, there being now 18 miles of fencing on the south end of

the division and 12 miles on the north end.

#### Division 2.

At the end of 1904 the grading on the first twenty-five miles north of New Liskeard had been completed with the exception of two or three heavy cuttings, also some light grading between the twenty-fifth and thirty-third miles had been partly done, and track had been laid over it for twenty-two but at the twenty-fifth and thirty-third miles crossings of the Blanche River, requiring expensive steel viaducts. this has occasioned protracted delay in extending further northward. As, however, the grading between the thirty-fifth and fifty-sixth miles was very heavy and was barely completed at the end of the present year, the delay would have occurred in either case.

On February 20th a contract was entered into with the Dominion Bridge Co. for the construction of these two viaducts and they were erected in September and October, allowing track laying to proceed. North of these viaducts it has been found necessary, owing to the rugged nature of the country, to construct several large permanent and also several temporary wooden trestles in order to avoid borrowing rock, and at the end of the year track-laying had passed over a couple of these, and the Boston Creek trestle was being erected at the 41st mile. It is expected that the remainder of these trestles, the timber for which must be obtained further south, and brought in by train, will be constructed during the present winter and that track-laying will proceed rapidly northward and should reach the Black River (mileage seventy-five) June 1st.

From mileage seventy-five to the end of the present contract the grading, which will be chiefly earth, is being commenced and should be completed in time not to delay track laying, which should proceed to the vicinity of the

junction of the Black and Abitibi Rivers by next fall.

Owing to the contractor having all his ballasting equipment engaged on Division 1, very little ballasting has been done, but several ballast pits have been secured and one of them is developed ready for immediate work next spring. A small amount of ballast has been placed under the worst spots as far north as the thirty-third mile.

Between New Liskeard and Blanche River in the vicinity of the line there is considerable settlement and preparation is being made to take this portion over from the contractor as soon as possible, and establish train service. The telegraph line with two wires is built. Two thousand additional poles are in hand for extension northward, and two stations are partially constructed by day labor.

The contractor having found it impossible to complete his contract within the time specified. namely, December 31st, 1905, applied in December to the Chief Engineer for an extension of time, and the latter has recommended that the Commission grant an extension of one year, subject, however, to certain modifications in the original terms of the contract which it appeared

advisable to make. This matter is now under consideration.

During the winter of 1904-05 the ties for this division were being supplied and delivered partly on Division 1 and partly on Division 2 by Contractor Wallace, but owing to the inferior quality of these ties, nearly one-half of them were rejected and it then appeared necessary to provide additional ties for the next season's use. Fortunately the Commission were able to place an order for 40,000 additional ties with Contractor Benoit at a lower price than that which was being paid to Contractor Wallace and a satisfactory class of ties has been delivered on this order.

The extreme variation in the thickness and width of the ties delivered under the former contract made it necessary to sort them into classes or grades in order to obtain a good surfacing track laid on ties of reasonably uniform dimensions. The expense incurred by the Commission in culling and sorting these ties (of which there were some 250,000) amounted to \$3,125.24.

To supplement the order for steel rails placed with the Algoma Steel Company in 1904, an additional order for 5,000 tons of open hearth rails was placed in April with the Dominion Iron and Steel Company and the inspection was given to C. P. Sandberg & Sons of London, Eng., under an arrangement by which, for a nominal sum, their improved process for toughening and hardening the rail heads was applied to the manufacture thereof. Considerable importance is attached to the use of a tough low phosphorus rail in the extreme climate of Northern Ontario.

Additional orders for fastenings and spikes for laying track on this divi-

sion were also placed during the year.

Orders were also placed with the Dominion Bridge Co. in September and November for two 30-foot and one 80-foot plate girders. These constitute the only additional steel structures required on the division with the exception of one short span yet to be ordered for the third crossing of the White Clay River at mileage seventy-one.

#### OPERATION, INCLUDING ROLLING STOCK.

#### Service.

The operation of the Commission's trains between North Bay and New Liskeard commenced January 16th; the service consisting of a tri-weekly mixed train with such extra freight trains as the traffic warranted. On June 1st a regular daily passenger service was commenced and continued throughout the year. During the period between July 1st and November 15th a Sunday service was added and a Pullman taken as far north as Temagami, returning the same day. The freight service since June 1st consisted of a daily local freight with such extra freights as traffic warranted and in order to accommodate local traffic between Latchford and New Liskeard a passenger coach has been added to the local freight train between these two points.

Owing to the incomplete condition of the track, the frequent occurrence of sink-holes, and the presence of the contractor's construction trains, operation has been carried on under great disadvantages and in spite of the best efforts on the part of the operating department considerable delay has frequently occurred in the delivery of freight. It is not anticipated that such

will be the case in the future.

Another course of delay and annoyance was the condition of the telegraph line, frequent interruptions taking place, but this has now been remedied by a complete reconstruction and addition of second wire. A large number of incipient fires occurred during the dry season, but an efficient fire ranging service provided by the Department of Lands and Mines kept them in check so that little damage resulted. The cost of this service is shared equally by the Commission and the Department, and the Commission at the request of Messrs. Gillies Bros. allowed them to string a private telephone line through their timber limit along the railway telegraph poles. This has enabled this firm to control their fire rangers more efficiently.

The Commission, through its station agents, furnishes the public with a telegraph service at ordinary rates and connection is made at North Bay with the Great North-Western and Canadian Pacific Railway Telegraph Companies. Since September 1st the Canadian Pacific Railway Company and the Commission have operated a joint office at North Bay, but the interchange of busi-

ness still continues with the G. N. W. Telegraph Company.

Early in the season negotiations were entered into with the Canadian and Dominion Express Companies, the latter of which had carried on an express business on the Commission's trains under a temporary arrangement, which had already been in effect during the period when the contractor had been providing a passenger service, and on April 12th similar offers were made to both companies for a working arrangement, the desire being that each should share in the business. The Dominion Express Company accepted the offer and are now carrying on an express service as set forth in the agreement embodied in this report.

At the commencement of operation permission had been given to supply refreshments and furnish a news service, but upon the establishment of the restaurant at Temagami this arrangement was cancelled, and a news service privilege granted instead. It has been found necessary, however, in order to give an improved news service, to enter into an agreement with the Canada

Railway News Company, which is now in effect.

The Commission has purchased right of way to Nipissing Junction and

additional lands at North Bay.

As previously indicated, a tri-weekly mixed service is given by the contractor northward from New Liskeard to the end of steel.

At the commencement of the tourist season an extension was made to the Temagami station and a restaurant established for the convenience of the travelling public, and north and south trains each stopping twenty minutes. The Commission propose to extend and improve this service.

#### Maintenance of Way.

To accommodate section gangs for track maintenance, 14 section houses have been provided on the division between North Bay and New Liskeard, and the ordinary section gangs employed. A portion of the cost of track maintenance being charged against the contractor during the period that his trains were in operation. The usual bridge and repair gangs have been employed. The trestle work and piling had not been well executed and although the more extensive ones have since been filled, those remaining require constant repair. It is proposed to eliminate in the near future as many as possible of those still remaining.

#### Traffic.

Until the commencement of tourist traffic very little business offered except the outward movement of timber, but during the latter half of the year the outward movement of pulpwood and ore and the inward movement

of tourists for Temagami and passenger traffic and general merchandise for the Cobalt mining district has been considerable as also general business for the rapidly growing farming district around and north of New Liskeard. Special traffic arrangements have been made with the Cleveland-Sarnia Lumber Co., to transport from ten to twelve million feet of logs per year from their limits lying immediately east of Diver, (mileage 40) with the Empire Lumber Company of Latchford for handling logs and lumber for their large saw mill, located at that point and also with Salmon Brothers at the same place; and with several lumber firms for moving logs from points on our line. Large quantities of pulpwood are moving southward, and much more extensive similar movements will take place in 1906 from the district immediately north of New Liskeard.

High grade ore movements from Cobalt outward to the extent of 2,200 tons have been made during the year, and in addition to this negotiations are now under way for handling much greater quantities of low grade ore from Cobalt, mileage 82, Grey and Temagami.

The tourist traffic, largely encouraged by the Grand Trunk Railway has been taken care of at Temagami by two steamboat companies and two hotels, and has reached considerable proportions.

For the coming season extensive preparations in the way of additional hotels, increased steamer service, boat liveries, etc., are now being made by

these and other parties to give increased accommodation.

At the commencement of operations no special interchange or through arrangements had been made with connecting railways and local freight rates from North Bay were the only ones in effect, but the Commission have since that time completed negotiations by which through tariffs are now in force from all points on the Grand Trunk Railway and the Canadian Pacific Railway, east of Port Arthur, which give a 20 per cent. reduction on local rates and also special rates for settlers effects from all points in old Ontario have been secured, and at the request of the Grand Trunk Railway special reduced rates on hotel construction material have been granted. The same railway has also joined in a reasonable rate for the outward movement of pulpwood. Every effort is being made to encourage special traffic and the movement of settlers to the clay country around and north of New Liskeard.

#### Rolling Stock.

The equipment on hand at the beginning of the year consisted of 4 engines, 3 first class coaches, 4 second class coaches, 3 baggage-mail and express cars, 197 flat cars, 50 box cars, 10 stock cars, 2 flangers, 2 snow-plows, 2 vans, and two boarding cars. Of these a large proportion of the flats and boxes were being used, under agreement, by the contractor, but it became necessary to withdraw them gradually from his service in order to put them in proper repair and give them a systematic renumbering. It was found that the first and second class coaches were equipped with improperly balanced springs, and new ones have been supplied by the makers and substituted coach by coach, whenever it was possible to withdraw a coach from service, but owing to shortage of coaches this has been a tedious process and is not yet completed.

During the year a private car has been purchased for the use of the Commission and it became necessary in September to purchase two light passenger locomotives to take care of increased traffic. An order had been placed with the Canadian Locomotive Company for four additional engines on February 27th, delivery to be made in July and August, but this company failed to make delivery within the specified time, and it is not expected

Digitized by GOOGIC

that they will be obtained before February, 1906. The contract did not

provide for penalty for non-delivery within time specified.

In anticipation of increased traffic orders were placed in August for 3 first class coaches, 3 second class coaches, 1 baggage and express car and 1 van. Delivery will be made on these in February or March, 1906. The purchase of cafe-parlor cars is under consideration.

Preparatory to the Commission's organization doing future ballasting on Division 1, prices are being obtained on a steam shovel, steam unloader and ballast plow, and to supplement and complete the partial wrecking out-fit already on hand, the Commission is also negotiating for the purchase of a

75-ton wrecking crane.

The Commission owned originally 200 flat cars but of those being used by the contractor two were lost in sink holes, etc. during 1904, and one in 1905, in each case the contractor being required to refund the value of the lost cars.

#### Electric Traction.

In March, the question of operating Division 1 by electric traction was taken into consideration, the underlying motive being economy, the traffic of the road being the criterion of the economy which can be so effected.

An eminent Electrical Engineer was consulted as to the best system to adopt and the detail studies were placed in the hands of a local firm and at the same time the Department of Lands and Mines was petitioned to withdraw all water power adjacent to the line and which were not already under lease and a survey party was sent out to examine the water powers of the Montreal River. In June a preliminary report was prepared, setting forth the most suitable water power for development, the cost of a development sufficient to supply electric power for operation of Division 1 and an estimate of the cost of equipping the division and supplying electric locomotives sufficient to handle the traffic then in sight. Upon presentation of this report to the Government authority was given to continue investigations, and an electrical engineer was employed to carry on the necessary detail studies, to draw up necessary specifications and to prepare a second and more complete report, in connection with which the Commission considered it advisable that the Chairman, in his capacity as Consulting Engineer, should examine personally the operation of those United States and European roads which were already operating by high tension alternating current. A second report has been completed, based upon tenders and other further information received and this report has been laid before the Government for final consideration.

In conjunction with the development of water power, the Commission would be able to meet a cosiderable local demand for power and applications have already been made by several responsible parties looking to the purchase of any surplus power which might be available.

#### TOWN SITES.

Following along the general lines of a report made to the Commission in June, 1904, by the Special Committee formed for this purpose, and being composed of Aubrey White, Chairman, T. W. Gibson, Thos, Southworth, W. B. Russel and R. A. Galbraith, four town sites situate on Crown Lands at Osborne, Temagami, Latchford and Cobalt have been surveyed and applications to the Department of Lands and Mines for the transfer of the desired areas to the Commission have been made, and the transfer of the town site

of Cobalt has just been effected, along with the mineral rights of certain portions thereof. It is expected that the remaining town sites will be transferred to the Commission at an early date, and in the meantime, in order to satisfy a growing demand for lots, a portion of each of the town sites at Temagami, Latchford and Cobalt has been subdivided into lots and agreements for sale entered into to the extent of \$2,000.00 for Temagami, \$11,-400.00 for Latchford and \$34,600.00 for Cobalt. The general method adopted for disposing of these lots in the case of the first two mentioned places has been to place upset values upon them combined with a building clause, the values being arrived at by a joint report of the Chief Engineerand Superintendent. In the case of Cobalt upset values were fixed in a similar manner, but owing to an urgent demand it was considered advisable to hold an auction sale of lots, which took place on August 18th. Since the date of the sale, Cobalt lots are being sold in the same manner as that of the aforementioned places except that it is not considered advisable to insert a building clause. The subdivision plans are on view at the respective stations and purchase of lots are made through the Superintendent's office at North Bay. At each of the places a considerable number of hotels, business places and dwellings have been erected and there is every promise of prosperous communities being formed at an early date.

The Commission has received numerous requests on behalf of school and church organizations for building lots at a reduction in price, and such requests have been uniformly met as it was considered proper to assist in

this way in the construction of schools and churches.

It has also been considered advisable to clear the streets and at Cobalt to give some additional assistance in street grading adjacent to the depot, and in order to give the Commission information as to the probable mineral values on the Cobalt town site, a mining engineer and laborers were employed for several months, making a careful examination and doing systematic trenching; this course of action being necessary to enable the Commission to select for placing on the market first those portions of the town site which were least likely to be disturbed by subsequent mining operations.

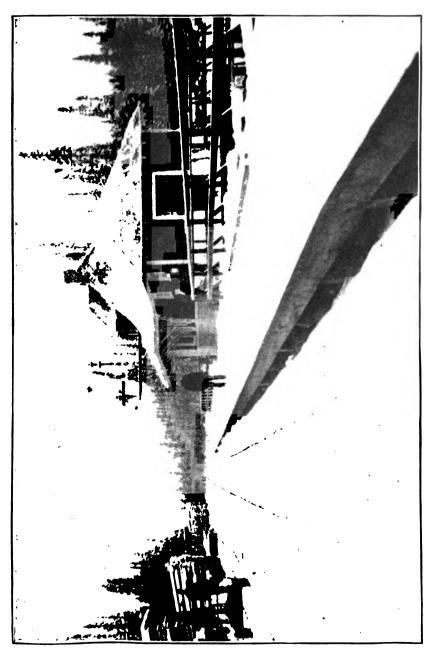

#### FINANCES AND INSURANCE.

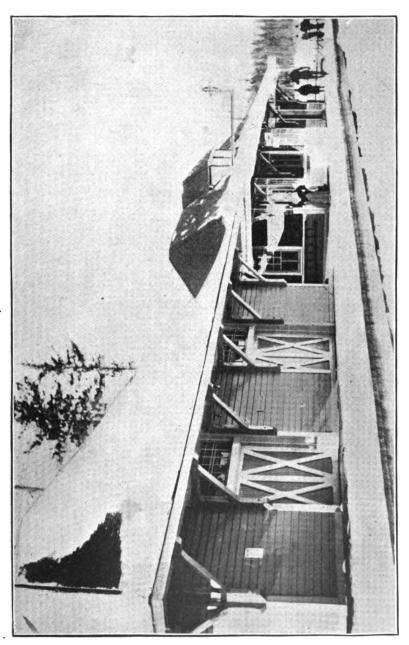

The statement of receipts and expenditures to the end of December, 1904, shewed a balance of \$1,354,686.02 available for the completion of the work then under contract and for properly equipping the railway. As this amount, however, would not be sufficient to meet the required expenditure during the year and as under the amendment of the Temiskaming and Northern Ontario Railway Act, at last session the Lieutenant-Governor in Council was authorized to advance from the Consolidated Revenue Fund of the Province such monies as might be required for the construction of said railway, it became necessary to take advantage of this legislation in the month of August and monthly advances amounting in all to \$1,636,164.27 were made to the Commission to meet expenditure to the end of the year, said expenditure including interest and expenses in connection with renewal of original £1,200,000 loan to May 15th, 1906.

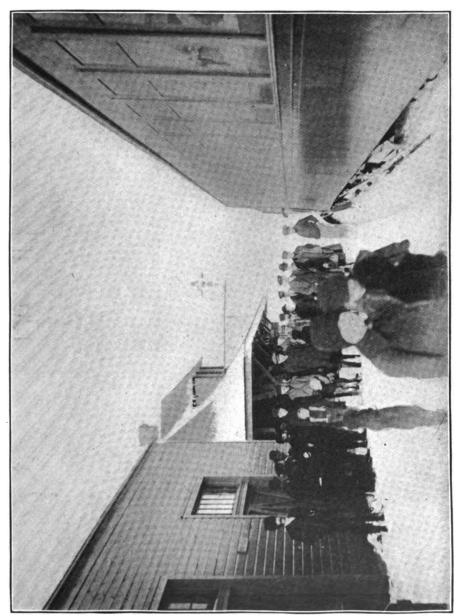

The agreement with the contractor, dated November 19th, 1904, provided for the payment to him under certain conditions, of the sum of \$200,000 on account of the drawback held by the Commission under the terms of his contract. This special payment was made in January.

A detailed expenditure of expensiture for the year, tabulated statements of expenditure on the first and second divisions and a total expenditure to

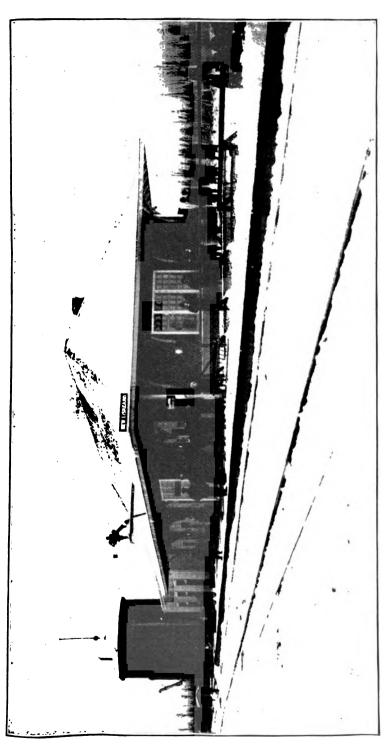

Station at Cobalt.

Station at Haileybury.

the end of the year, on account of construction, together with a balance sheet of same, are herewith given and the following statements in connection with operation are also submitted, viz.: Earnings and expenditure, Division 1, to December 31st, 1905, detailed statement of expenses, balance sheet shewing assets and liabilities, statement of train traffic statistics, statement shewing description of freight carried and quarterly statement or receipts and expenditure.

### INSURANCE.

The question of insurance is fully covered in the following letter from the Secretary-Treasurer to the Chairman under date of January 1st, 1906, viz.:

Toronto, January 1st, 1906.

## C. B. SMITH, Esq., Chairman.

DEAR SIR,—The following is a statement of the insurance in force on the property of the Commission, December 31st, 1905, viz.:

On	rolling stock	\$289,600 00
	station buildings and shelter stations	
	section houses	
	water tanks and supports	
	freight sheds	
	storehouses and contents, carpenter shop, machine shop and machinery, shafting, gearing, belting,	·
	tools and utensils in same	18,500 00
	•	<del></del>
	Total	\$352,750 00

The rate of insurance is 40 cents per \$100.00 on rolling stock; 1 per cent. on station buildings, tanks, section houses and machine shop and contents, and 2½ per cent. on carpenter shop.

Guarantee bonds to the extent of \$30,000.00 are also in force in connection with the general construction and operating staffs.

Employers' liability insurance to the extent of \$70,000.00 is carried on the Commissioners and executive staff and the civil engineers engaged in office and field work. In addition \$120,000 is carried on the operating staff.

## Yours truly,

H. W. PEARSON,

Secretary-Treasurer.

# DETAILED STATEMENT OF EXPENDITURE, FOR YEAR ENDING DECEMBER 31ST, 1905.

### CHIEF ENGINEER'S REPORT.

North Bay, Jan. 24th, 1906.

H. W. PEARSON, Esq., Secretary-Treasurer, Toronto.

DEAR SIR,—I beg to present herewith my annual report for the year ending December 31st. 1905.

## Division No. 1.

Roadbed Construction.—A. R. Macdonnell, Contractor.

Trestle Filling.—As soon as the frost left the ground the contractor began filling in the temporary trestles of which there were a great number. This work has been completed with the exception of the trestle at the 68th mile, which is at present being proceeded with.

A short permanent trestle at mileage 833 will, on account of the poor

holding bottom, be filled in before the contractors finish their work.

Ballasting.—Ballasting was started about July 1st and completed about the middle of November. This took more material than was anticipated on account of sink holes developing through the muskeg country south of Redwater, and the necessity of widening many narrow banks.

All sink holes were filled without accident and with slight delay to

traffic.

This whole division has now received two lifts of ballast and the road-

bed is of a solid, durable nature.

A large amount of filling was necessary around the stations at Haileybury and Cobalt to provide suitable unloading facilities. This was done by the contractors.

Fencing.—Fencing was built from mile 104 to mile 101 through the Cobalt region, and the fencing previously built was put in thorough repair.

Building Construction .- O'Boyle Bros., Contractors.

The following stations were completed and opened for traffic during the season: Haileybury, Cobalt, Latchford, Temagami.

Section houses were built at the following points: Widdifield, Bushnell, Mulock, Redwater (2), Moose Lake, Doherty, Riddle, Temagami, Otter, Lutchford, Cobalt.

Telephone Construction.—Wyse & Middlemist, Contractors.

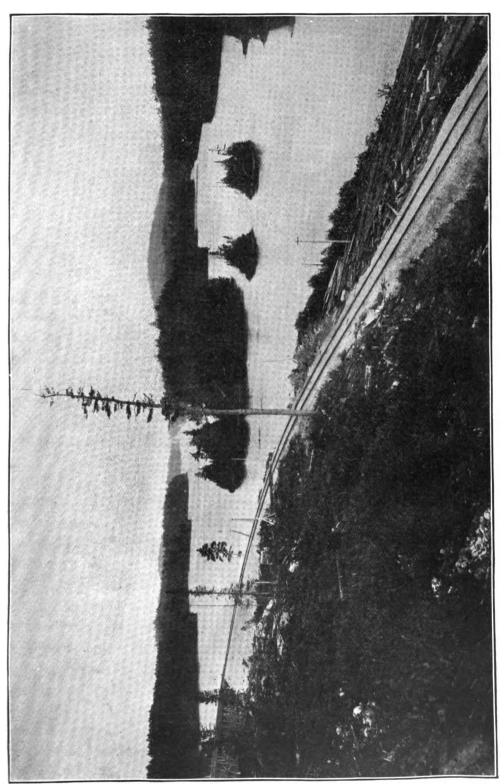

Under contract with Wyse & Middlemist, of Toronto, to construct a four copper wire telephone line from North Bay to Temagami, and one of two wires from this point to New Liskeard. The line has been built to the 20th mile from North Bay, and the cross arms have been placed as far as the 47th mile. Telephones have been installed in the stations at North Bay Junction and Widdifield.

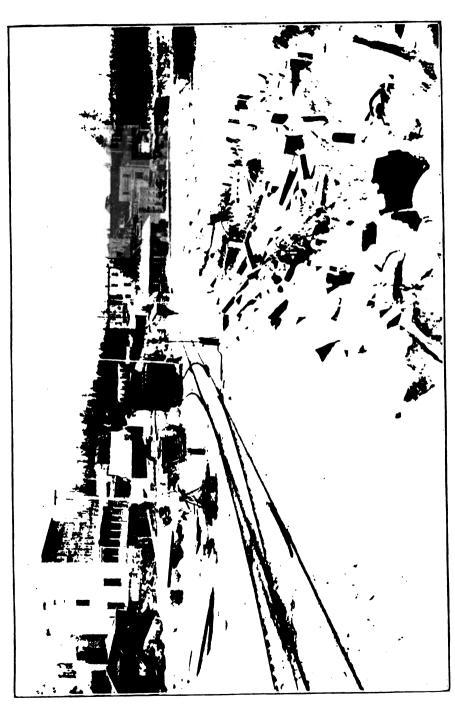

Construction by Employees of the Commission.—Buildings and sidings.

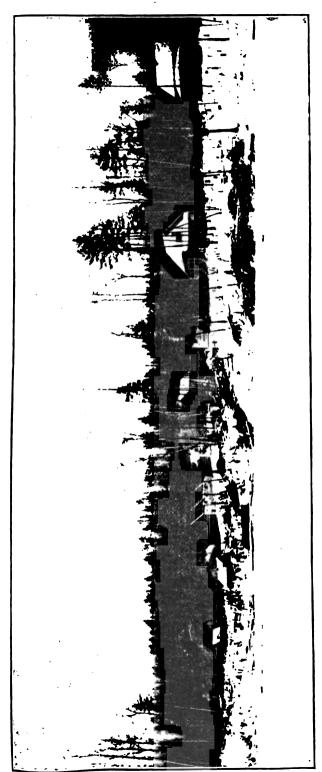

Haileybury.—At Haileybury a through siding was laid behind the station to give unloading accommodation to the people of that town. This siding is capable of holding twenty-six (26) cars.

A freight shed 30 ft. x 40 ft. was built, and a station signal put in

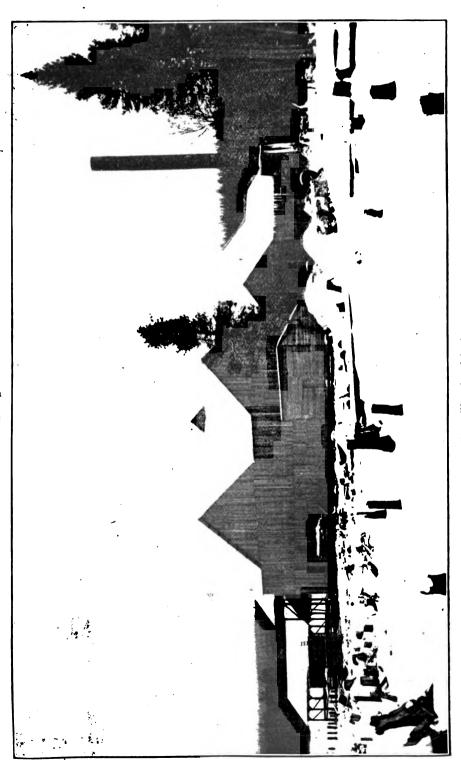

position.

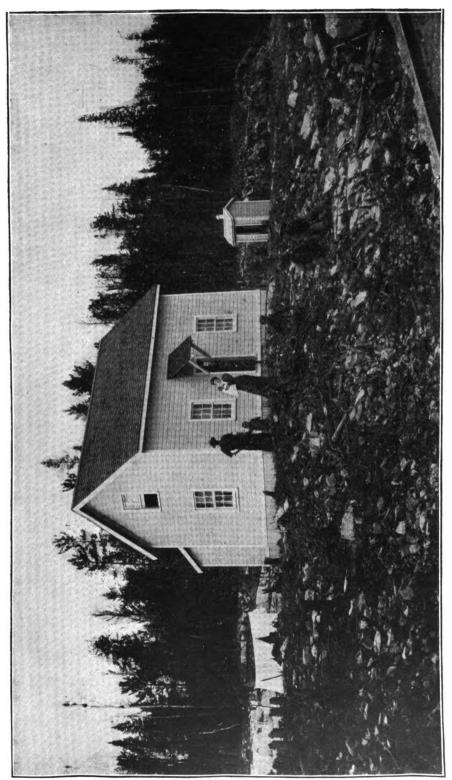

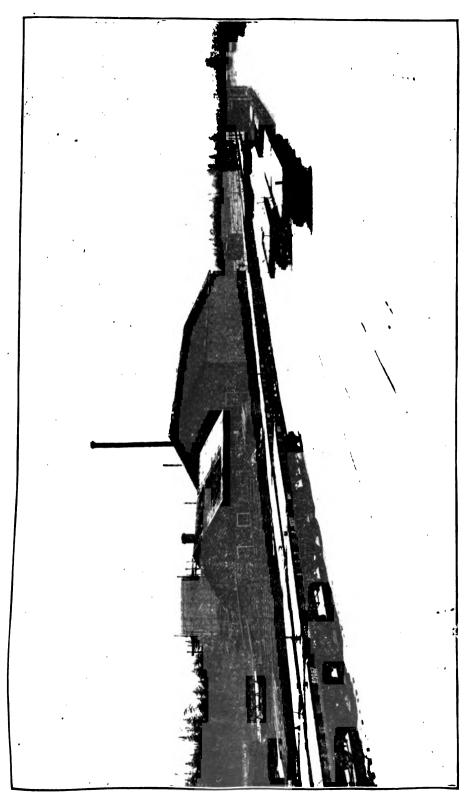

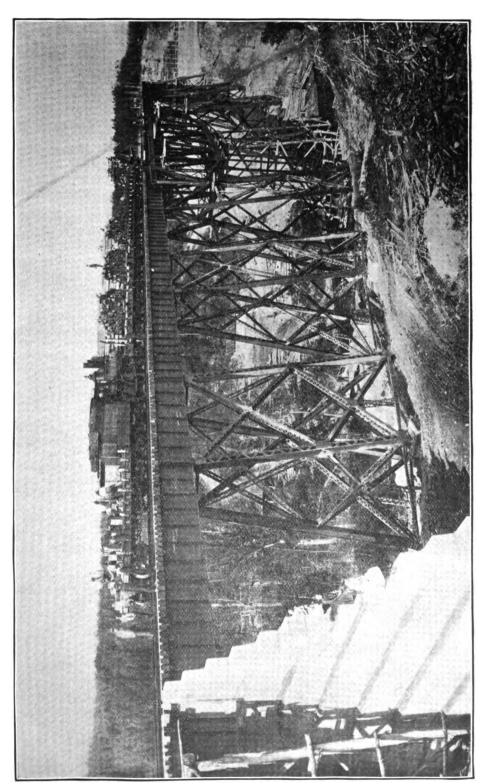

View of La-Rose and O'Brien's Mines.

Digitized by Google

When the heating system of the station was used early in the season some slight changes were found necessary in order to make it work satisfactorily.

Argentite.—At Argentite, mile 105½, a through siding to hold ten cars (10) was built on the east side of the track to accommodate the mine owners

in the Kerr Lake district.

Cobalt.—At Cobalt a freight shed with the necessary platforms was pro-

vided, 30 ft.  $\times$  60 ft.

A through siding was built behind the station and freight shed to accommodate local traffic. This gives siding room for about eighteen cars (18). The building of this siding necessitated considerable rock excavation, but the congested state of traffic at this point made this construction absolutely necessarv.

Some slight alterations in the interior arrangements of the station was

made to provide additional office room.

A furnace room was provided below the floor so as to give more waiting room accommodation.

A station signal was provided and erected.

Gillies.—At Gillies Depot sidings to hold twenty-eight (28) cars have

been built on the usual siding agreement.

Latchford.—At Latchford a freight shed 30 ft. x 40 ft., with necessary platforms was provided. A coal bin 12 ft. x 24 ft. was built.

A station signal was erected.

The water service was put into operation, the water being pumped from

the Montreal River about 250 feet distant.

Sidings to the total length of 3,658 feet have been built on the usual siding agreement to accommodate the large saw mill of the Empire Lumber Company.

A siding was also put in just south of the Montreal River crossing for Salmon Brothers saw mill. It is 803 feet long, and was also built under the

usual siding agreement.

Johnson.—At Johnson a section house similar to those built by the contractors was provided.

Rib Lake.—At Rib Lake a section house similar to that at Johnson was put up.

Smallman. At Smallman, mile 81½, a siding to hold six cars was put in to accommodate mine owners in the neighborhood. This was built on the usual siding agreement.

Temagami.—At Temagami the station was extended twenty feet northward to enlarge the restaurant, and the necessary changes made in the heating apparatus.

A station signal was placed in position.

A freight shed 30 ft. x 40 ft. was provided and a coal bin 12 ft. x 24 ft. built.

The water service was put in working order, pumping from Lake Temagami.

A cross over was put in between the through siding and the main line.

Redwater.—At Redwater a coal bin 12 ft. x 24 ft. was provided.

Diver.—At Diver, 40th mile, a through siding was built to hold fifty-six At this place, under agreement with the Commission, the Cleveland and Sarnia Lumber Co. built about six miles of track into their lumber limits, and at the main line built a "Y" connecting with our through siding. Jocko.—At Jocko a freight platform 12 ft. x 40 ft. was provided.

Sidings to hold sixteen (16) cars were built for Mason and Gordon, and

one to hold thirty (30) cars built for Munro and Coxford.

Mile 28.—At Mile 28 a siding to hold 19 cars was built under the usual siding agreement for Ferguson and McFadden.

Moose Lake.—At Moose Lake a combined open and closed shelter station was built and the tank pumping apparatus put in first-class order. A coal bin 12 ft.  $\times$  24 ft. was provided.

Mile 20 1-2.—At mile 20½ a siding to hold twenty-three (23) cars was built under the usual siding agreement for Messrs. Graham and Ferguson.

Widdifield.—At Widdifield some slight alterations were made in the station and heating apparatus.

A coal bin 12 ft. x 24 ft. was built, and the station signal placed in

position.

Trout Mills.—At Trout Mills a shelter station with platforms was built.

Mile 2 1-2.—At mile 2½ a siding to hold eight (8) cars was built under the usual siding agreement to accommodate McLean's saw mill.

North Bay Junction.—At North Bay Junction the following building

operations were completed:

Station and store-house, a building 30 ft. x 60 ft. was raised one storey to give increased store room and office accommodation; roadmaster's store-house, 20 ft. x 40 ft.; coal shed, 20 ft. x 120 ft.; coal bins (under platform), 35 ft. x 40 ft.; oil house, 18 ft. x 30 ft.; lime and cement storehouse, 12 ft. x 30 ft.; lumber shed, 20 ft. x 30 ft.; locomotive shop, 52 ft. x 152 ft.; boiler house, 15 ft. x 38 ft.; blacksmith shop, 18 ft. x 27 ft.; carpenter shop, 60 ft. x 75 ft.; carpenter shop, addition, 16 ft. x ft.

The following are in course of erection: Standard water tank, with

40,000 gals. Tub.; 2 coal docks, each 16 ft. x 112 ft.

The following equipment has been installed in connection with the locomotive shop: 60 h.p. boiler, 50 h.p. engine, planer, drill, shaper, 2 lathes, grind stone, emery wheels, small dynamo for lighting purposes.

Heating coils have been installed in the machine shop end, and two

blacksmith's forges in the blacksmith shop.

A foundation has been built for the large wheel lathe recently purchased. The following wood working machinery has been installed in the carpenter shop: Buzz planer, band saw, matcher, boring machine, saw machine.

1,287 feet of additional sidings were laid in connection with yard im-

provements.

To supply water to the tank a 12x12 well has been sunk.

Below will be found a summary of the work done in the shops here in connection with general road and equipment.

15 section tool houses, 10 ft. x 14 ft. were built, shipped out in knock-

down condition and erected on the different sections.

Outhouses to the number of 24 were finished, loaded on cars and placed along the line in connection with the different stations and section houses.

41 yard limit boards were made and placed where required.

215 signals for snow-plows and flangers were also made and distributed.

Many articles of station furniture, such as tables, cupboards, etc., were manufactured for the different stations.

Rebuilding Telegraph Line.—The telegraph line was found to be of such poor character that it had to be completely rebuilt. New poles were put in where required, and the whole line well braced. In addition to this a second telegraph wire was strung. It required two gangs the best part of the season to complete this work. In connection with this much slashing of trees liable to fall upon the wires was done. Up to the present about 22 miles of slashing has been completed, and the worst trees cut down over the division.

Clearing.—The bush near all stations, section houses, tanks, etc., was cut down and the ground well burned to prevent the possibility of forest fires

spreading and damaging the buildings.

Rock Cuttings.—Considerable work has been done taking down loose rock from rock cuts, and where necessary knocking off small points to give a clearance from the nearest rail of 6 feet. This work has been completed over 60 miles of the division.

Public Road Crossings.—21 public road crossings at rail level were properly guarded and the necessary cattle guards, signs, fences and drains pro-

vided. The following is a list of the mileages:

t North Bay Jct.	Through the Yard.
k mile	18 <del>2</del>
1st "	$103\frac{1}{2}$
21 "	106‡
• 31 "	$107\frac{1}{2}$
41 "	$110\frac{7}{2}$
21 " 31 " 41 " 61 " 81 "	111
8Î "	$\frac{1}{1}$
$10\frac{1}{2}$ "	112
123 "	1121
141 "	1123

Private Road Crossings.—31 private crossings were properly guarded. gates being placed and the necessary drainage provided along the railway ditches.

The work of properly grading and draining these road crossings has been in many cases very heavy. Few were properly formed at the time of construction. Through the clay country south of New Liskeard long approaches were in some cases needed, and proper fences had to be erected on each side of these approaches.

Bridges.—On account of the pile driving done on this division being of a very inferior character a large bridge gang was constantly employed this summer shimming up and making repairs, which should have been unneces-

sary so soon after construction.

At mile 45½ the long low pile trestle was cut down, and the bank is now

carried by a light gravel bank on heavy cross laying.

At mile 351 an additional 8 feet opening was provided, and a top of

white pine put on the whole structure.

At mile 301 where at the time of construction a solid bank was built across a small creek, an opening is now being made to permit the floating of logs from Moose Lake into Jocko Lake.

Culverts.—Solid concrete steel tops were put on four of the small open culverts in the track; the steel for the balance is on hand and the tops will be put on next season. Those completed are at mileages 41. 44, 461 and 47.

On account of the bank sliding at Dickson's Creek the large culvert had to be extended in both directions in wood. To the east 84 feet and to the

west 53 feet.

The following openings were provided under the track at the points named: Mile 1, 10 inch vitrified pipe; mile 7, 12 inch vitrified pipe; mile 39½, 3x4 cedar culvert; mile 111¾, 3x3 cedar culvert.

At mile  $110\frac{1}{2}$  a culvert 3 ft. x 4 ft. x 200 ft. long was built along the

west side of track to prevent ditch becoming closed by sliding banks.

Track.—The following work has been done in addition to the general track maintenance, ditching, etc. Digitized by Google All switch stands, targets and connecting rods have been straightened and painted.

All main line switches have been supplied with lamps.

When the track was laid the guard rails were merely spiked. These have been strengthened by the insertion of three cast iron blocks and the whole securely bolted.

All curves over 4 degrees have been strengthened by the use of pressed steel rail braces.

Surveys, etc.—At New Liskeard two lines were located to the water front in the town, one started just north of the station and curved to the right, following the valley of the Wabis River to the docks on the south shore below the bridge. The other started south of the station and ran down through the south part of the town coming to the river side near its mouth.

Mile Post 109.—A line was located from this point to the shore of Lake Temiskaming near the stone wharf. This line gave heavier grades and more expensive work.

Cobalt.—At Cobalt a branch about three miles long was surveyed into the Kerr Lake mining region.

Mile Post 88.—From mile post 88 a line was surveyed to the Fountain Falls on the Montreal River. This was rather an expensive line, about 6 miles long with heavy grades.

Diver.—At Diver some time was spent by a Locating Party getting the best line into the timber limits of the Cleveland and Sarnia Lumber Co. The total length of this line as built is about 6 miles.

Mile 98.—From mile 98 a complete traverse was made of the Montreal River to a point about three miles below the Fountain Falls. The river was gauged to determine the flow, and the water powers at Hound Chute, Ragged Chute and Fountain Falls carefully investigated.

Townsites.—A party was employed almost constantly during the season at townsite work, principally at Cobalt. A complete contour survey of this place was first made to enable the town to be laid out in the proper manner, so that the streets could be placed to suit the topography. On account of the limited space at our disposal this method had later to be abandoned and the streets made parallel and at right angles to the mining location boundaries.

Track Centres, etc.—During the summer months a large engineering force was employed giving track centres and grades, cross-sectioning, ballast pits, etc., etc.

### SECOND DIVISION.

Roadbed Construction.—A. R. MacDonnell, Contractor.

The grading is practically completed to the 75th mile from New Liskeard, with the exception of the clay cutting known as Swanson's Cutting about the 37th mile, and that cutting about the 17th mile which, during the past season, was largely removed by steam shovel. Swanson's Cutting is of such a soft nature that it was found advisable to lay the track around it, and the work of removing it by steam shovel will be started at once. A few other cuts not yet quite completed will be finished before the rails reach them. A good many banks that were originally built narrow will require to be widened next season.

The last 25 miles on this 100 mile contract is being cleared, some grading started and preparations being made to push it to completion next season.

Ballast.—A ballast pit purchased by the Commission from J. M. Wallace was opened at Earlton and the worst spots in the track between New Lis-

keard and mile 33 were picked up.

The ballasting of the one and one-half mile branch into this pit is completed and all necessary plant in position, so that the ballasting can be continued as soon as the frost leaves the ground, and rapidly pushed to completion.

Track Laying.—The rails are laid to Boston Creek about mile 41, and a large timber trestle at this point is being built. A forest fire in July consumed the timber that had been gotten out for this structure, so that this present delay in building the trestle is unavoidable.

Sidings.—Sidings have been put in at the following points: Uno Parks, Thornloe, Earlton, Heaslip, Blanche River, 1st crossing, Charlton, Blanche River, 2nd crossing.

Fencing.—The right of way has been fenced from New Liskeard to the 33rd mile at the second crossing of the Blanche River.

Blanche River Bridges.—Dominion Bridge Co., Contractors.

The Blanche River bridges, one at the 25th mile and the other at the 33rd mile, have been erected and completed, except painting, which was left over until next season.

Building Construction.—O'Boyle Bros, Contractors.

The station at New Liskeard was completed early in the season and turned over to the Traffic Department on the first division.

Construction Work by Employees of the Commission:

New Liskeard.—At New Liskeard the station was sheeted over the plaster with hard pine and the heating apparatus put into working order.

A freight shed 30 ft. x 60 ft. was built.

A siding to hold nineteen (19) cars was built behind the station to accommodate local traffic.

A well 12 ft. x 15 ft. was sunk near the tank, and the tank put in proper

working order.

A temporary engine shelter 32 ft. x 150 ft. was built to afford protection to engines in bad weather, and 1,371 feet of sidings laid in connection therewith.

Uno Park.—At Uno Park a foundation has been built for the station:

Earlton.—At Earlton a station foundation has been built similar to that at Uno Park.

Telegraph Line.—Some repairs were made on the telegraph line and a second wire strung, so that we now have direct connection from North Bay to White River.

Tie Inspection.—A complete re-inspection was made of all the ties supplied by T. Wallace & Son, on their last contract. The result showed that many tics were originally taken that did not conform to the specification. The contractors were paid on the basis of the second inspection. brought action in the courts, but were non-suited at North Bay on November 21st.

Location.—The line is located to a point on the Black River, about 105 miles from New Liskeard. The maximum grade is .4 rising coming south, and .5 rising going north. The maximum curve is 4 degrees.

A trial line following the general course of the Abitibi River has been run 35 miles farther. One party is now locating from the south end of this line, and a second party has gone to the region where the Trans-continental location crosses the country between the Frederick House and Abitibi Rivers.

They will locate south on the best route to be found. This part of the line will be nearly all in clay, and of fairly light construction. Forest fires burned out our location party twice during the season, the last time in July, the cache at McDougall's chute containing provisions valued at about \$2,000.00 was consumed, and the men escaped only with their instruments and the clothes they wore.

Exploration to James Bay.—Starting about July 1st an exploration party in charge of Mr. E. A. E. Sullivan, of Ottawa, as engineer, and accompanied by a geologist and timberman, went to James Bay by the Abitibi River, and made an exploration to get a general idea of the country, as well as to ascer-

tain the probable facility with which a railway could be built.

I enclose herewith reports from the engineer and geologist.

The plans that were made of the estuaries of the Moose and Albany Rivers show water varying in depth from 5 to 20 feet, but the depths are so irregular that a very large amount of dredging would be required to make

a satisfactory channel for vessels.

The timber through the country traversed by the party was as a rule small. From the junction of the Black and Abitibi Rivers to within one-half mile of Iroquois Falls it consisted chiefly of spruce and balsam, averaging 7 inches in diameter and giving about 9 cords of pulpwood per acre. This runs from the river only about 300 feet. It then becomes smaller and would only average about 50 per cent. of that next the river.

From Iroquois Falls 4 miles north the timber is larger with more poplar. This would average 13 inches diameter, giving 16 cords pulpwood per acre. This continues about three-quarter mile wide. It is small and scrubby farther inland. From this point to the foot of Limestone Falls the timber is practically all spruce and poplar mixed with small balsam. It would average about 9 cords of pulpwood per acre. This is from 300 to 100 feet wide along the river bank.

From Limestone Falls to the coast the timber becomes smaller, with some poplar, and averages about 5 cords of pulpwood per acre, and extends

only from the river inland from 200 to 500 feet.

Some small white birch was seen along the route, but no other hard wood.

Any tamarac in the country is worm killed.

The party returned by way of Missanabie on the 19th of October. Coming across the height of land there was a snow fall of 5 inches.

Yours truly.

G. A. McCarthy, Chief Engineer.

## ENGINEER'S REPORT OF EXPLORATION SURVEY TO JAMES BAY.

SIR,—I have the honour to submit the following report on the exploration for a line of railway in the vicinity of the Abitibi River, from its junction with the Black River down to the Moose River, and thence to James Bay, and also the Harbour facilities to be had at the Moose and Albany Rivers. From instructions received by wire from the Commission in Toronto, I reported to you at North Bay on July 3rd, and after being delayed there for a week in order to procure men I went by way of New Liskeard to North Temiskaming and then across the long portage known as the Quinze to Klocks Depot, where I found my supplies and outfit awaiting me, having previously sent them under the charge of Mr. Wilson, the Geologist of the

party, Mr. Dillon, the expert timberman and my assistant, Mr. Rogers. Here I was also delayed owing to the canoes being rather small, but after looking around I managed to procure one (birch bark) at the North Temiskaming, and on July 15th at noon, left by way of the old Hudson Bay Route for the Abitibi River, arriving at my starting point July 28th. The season being so far advanced it gave me very little time to examine the country at any great distance from the river. From what I could see and from information received, I think the river valley affords the most feasible route. From the junction of the Black River, the Abitibi bends in a north-westerly direction for 4½ miles to Iroquois Falls. The west bank is from 6 to 8 feet high and continues level for a few hundred feet back, where a few points of low clay ridges come in from the south west. The soil is clay and a line would average about 15,000 cubic yards per mile. Small spring creeks come in about three to the mile and also one small river about half a mile from the Ealls, which is 25 feet wide and 8 feet deep. From here the river bends to the north-east and falls 24 feet perpendicular over a rocky bluff. Rock side-hill continues for a mile below falls, this work will average about 25,000 cubic yards per mile, 50 per cent. rock. The river then bends back in a north-westerly direction and holds this course for 33 miles with the exception of four places where there are short bends to the north-east, this reaches the head of the Long Sault Rapids. The bank is from 8 to 10 feet high with low points of ridges coming in from the south west, which reach the bank of the river, but these disappear on approaching the head of the rapids, the soil is clay with a percentage of boulders and will average about 20,000 c.y. per mile, 30 per cent. rock. Small spring creeks come in three per mile and one 6 feet wide. From a point 3 to 4 miles from the head of the rapids, the line could be run in a more westerly direction towards the mouth of the Frederick House River, cutting off what is known as the big bend and shortening the distance considerably. The Long Sault Rapids are about 6 miles long with a fall of 75 feet, two decided drops—one at the head, 3 feet -and another at the foot 6 feet 6 inches. Along this part of the river the banks are from 25 to 30 feet high, the ridges follow the river, some of the cuttings will be rock with a stripping and will average about 25,000 cubic yards per mile, 40 per cent. rock.

For the next 8 miles, which reaches 1 mile below Island Portage, fall 5 feet, the work will be similar but curvature around big bend will be sharp as the river bends back to the south-west, making an angle of 120 degrees. From 3 miles above the junction of the Frederick House and Abitibi Rivers, the country is level and continues so for 19 miles to the head of Falls known as the Three Carrying Places—6 mile from the junction Driftwood river comes in; it is 75 feet wide and 14 feet deep for 300 feet, then comes up to 6 feet deep. Soil is clay and will average about 18,000 c.y. per mile, rock 10 per cent. The Frederick House is about 250 feet wide at the mouth and continues so for about half a mile, then widens out to from 400 to 500 feet to a small rapid about 5 miles above where a good crossing could be had, rock foundation.

The soundings at mouth of river are from 10 to 17 feet clay bottom. From the head of the Three Carrying Places, the River bends to the west for 2,000 feet and then turns south 10 w. into a deep bay where a creek about 10 feet wide comes in, then turns sharply to the north, some sharp curvature will be necessary owing to a high rock bluff at the head of the Falls. The fall here is 20 feet and the water is very rapid as far as Island Portage, which falls another 20 feet. Rock shows up all along this part, the work

will average about 25,000 c.y. per mile, 50 per cent. rock. The next 22 miles which reaches to within one mile of Lopstick Portage, the country becomes more flat in parts with moderately steep sidehills about half the distance, the soil is clay and will average about 18,000 cubic yards per mile. no signs of rock. The next 81 miles taken in Lopstick Falls, 33 feet, Burntwood, 21 feet 3 inches; Clay, 18 ft. 2 in.; Birch, 42 ft.; Oilcan, 15 ft.; and the Abitibi Canyon which is about 21 miles long with a fall of about 90 ft. or a total fall or 219 ft. 6 in. This is mostly all sidehill work with broken ridges in place. Though the Canyon, the river narrows down to 100 feet and goes through a solid rock gorge about 90 feet high, the ledge then runs level for from 100 feet 200 feet tn another ridge about 100 feet high. This work will be the heaviest along the line, considerable curvature and short pieces of steep grade not exceeding 1 per cent. will be required to keep the cost of construction within reasonable bounds. Work will average about 38,000 cubic vards per mile, 50 per cent. rock. The next 17 miles reaches to the head of the Otter Falls, moderately sloping sidehill from 25 to 80 feet high with stretches of level ground in between to make up this part, and will average about 20,000 c.y. per mile, no rock and slight current in river. From the head of the Otters, there are four falls; the Otters, 25 ft. and 30 ft.; Sextant, 15 ft.; and Limestone, 12 ft., or a total fall of 82 feet. This work will consist of sidehills and broken ridges from 40 to 100 feet high and will average about 25,000 cubic yards per mile, 40 per cent. rock. here to the Moose River, the country is practically flat, falling 2 to 4 feet per mile, soil is a formation of clay, sand, gravel and boulders, and will average about 18,000 cubic yards per mile. Spring creeks coming in about 3 per mile—a good crossing at the Moose River can be had one mile above the junction of it and the Abitibi. The crossing will be over an island about 400 feet wide, situated near the centre of the river, total length of crossing will be about 1,800 feet, water 2 to 6 feet deep, running over clay, sand, gravel and boulders, or an open crossing of the same length could be had 2 miles above with a similar foundation—banks, 10 to 12 feet high. The north side of the Moose River is similar to the south side, close to the river, but on going further north or away from the river, open muskegs, made up the interior of the country continuing as far as the Albany river, except along small creeks which empty into James Bay, along these the formation is the same as along the river bank.

Arriving at Moose Factory, August 15th, I thought it advisable to proceed to the Albany River owing to fine weather, and so procured a Mackinaw boat from the Hudson Bay Company and reached there August 18th. On arriving I found it necessary to make a traverse of the river as it was the better way of getting information in regard to a harbour, as I also did at Moose River on my return. With reference to a site for a harbour, my opinion is that the Moose River is the better of the two and would refer you to the plans I have already forwarded. If dredging were resorted to for deepening the channel, I have no doubt that satisfactory work could be done owing to the soil in the bottom of the river being a mixture of clay, sand, gravel and boulders, which would easily stand without any danger of slipping at a slope of 1½ to 1, the prevailing winds are south-east, north-west and north. Leaving Moose Factory on September 23rd, I started on my return trip by way of the Moose River, and thence up the Missinaibi to Missinaibi Station on the main line of the C. P. Railway, reaching there October 18th, then on to North Bay, reaching there the following day.

I am pleased to say the entire trip was devoid of accidents, which was largely due to the members of the party, who performed their duties in a

creditable way, and willingly helped at all times to make the trip a success. I would also like to mention that while at Moose Factory and Albany, the factors, Mr. Mowat and Mr. Patterson, offered us every courtesy.

I have the honor to be,

Sir.

Your obedient servant,

(Signed) E. A. E. SULLIVAN, Engineer in charge.

### JAMES BAY EXPLORATION 1905.

## REPORT OF THE GEOLOGIST.

The writer was detailed as Geologist to the exploration party and was instructed to report on the economic prospects of the district passed through. He was also instructed to make certain general notes on the physiography of the area explored and to return via the Frederick House River, reporting on the topography of the district in the vicinity of this river and more particularly with respect to the area lying between the valley of this stream and that of the Abitibi.

Economic Geology.—Except in two relatively small areas the bed rock along the entire distance traversed is buried beneath a soil cover whose depth varies from twenty to over one hundred feet. Except in the small area between the Lopstick Portage and the Long Portage on the Abitibi river (mileage 105-115 below Black River), and in the second area at the Otter's Portage (mileage 131-132), the few outcrops that occur are very small in size and are found only in the bed of the river and close to its sides. Inland a few rods the soil cover obscures the bed rock. There are many sections of the river on which, for five or ten miles at a stretch, not a single outcrop occurs. The last belt of rocks which is known to be mineral bearing lies south of the district through which our party passed.

The outcrops in the vicinity of the Lopstick and Long Portages indicate that a second belt of rocks which are usually classed as Huronian (but on very imperfect evidence) exists in the district. So far as known, however, no minerals of economic importance have been found in these rocks and the writer does not consider that there is any great possibility of such being found because of the occurrence of the heavy drift cover which prevents prospecting. The rocks of this belt are largely augite syenites, gabbros and some related types. Between the Black river and the Lopstock Portage, the few outcrops that occur are all of the types of rock classed as Laurentian (chiefly gneisses and schists) and no occurrence of minerals of economic importance is known or has been reported by other exploration parties, so far as the writer is aware. At Iroquois falls, the obstruction which forms the barrier across the river is a diabase rock, presumably in the form of a

massive dike. While on the return trip the writer was informed that a prospector claimed to have found some copper ore at this point. The accur-

acy of this information has not been determined.

A belt of Laurentian rocks also occurs between the Long Portage and the head of the Sextant rapids (mileage 134). Northward from the Sextant rapids, the rocks are all of sedimentary origin; the lower beds which outcrop at the rapids are either grits and sandstones or shales. Further north

a number of different types of limestones occur in several places.

Gypsum.—Associated with the limestones important beds of gypsum are known to occur on the Moose river to the west of the junction with the Abitibi and also at mileage 276 on the Algoma-Nipissing boundary, about thirteen miles east of the Abitibi (mileage 168). No outcrops of these gypsum beds are actually known to occur on the Abitibi, but the rocks with which the gypsum is associated undoubtedly cross it and could easily be located, so that it is not improbable that the gypsum also might be found nearer to the river. The gypsum deposits of the Moose river basin were examined for the Mines Department in some detail by Dr. J. M. Bell and Dr. W. A. Parks in 1903,* and have been reported to be of considerable value.

Lignite.—Included within the drift (soil and other loose debris) deposits along the Abitibi (mileage 166) in the vicinity of the Blacksmith rapids, a rather extensive bed of lignite exists and outcrops on both sides of the river channel. This lignite deposit was also examined by Dr. Bell and Dr. Parks, who were provided with a prospecting and boring outfit. Their exploration was not sufficient to prove the extent of the deposit as they found it impossible to bore through the overlying cap of glacial till. They showed, however, that there is a considerable body of lignite present. Further exploration with an adequate mining equipment would be necessary before any reliable report as to its possible value could be made.

In the basin of the Moose river and its tributary streams a number of other deposits of lignite occur. Some of these were examined and reported on in 1903. The general conclusion that the writer draws from this report is that it has yet to be proved that lignites of good quality occur in sufficient quantity anywhere in the region to be important sources of fuel supply for other than very local consumption. Even in the latter case they will for a long time to come have to compete with a very cheap wood supply. There is little likelihood of there being any special demand, at least for some time, that could not be satisfied more cheaply by the more readily accessible

and larger deposits of similar coals in the west.

Petroleum.—Many years ago one of the officers of the Geological Survey Department at Ottawa found that some of the limestones of the Abitibi contained small amounts of included petroleum.† Bituminous shales are also found associated with these limestones. In his report for 1903, Dr. J. M. Bell states that he and Dr. Parks were unable to find anything indicative of the presence of petroleum. While it is true that no petroleum or gas in quantity has been found on the ground, it may be noted that the fossils indicate that the strata are of an age (Devonian) known to be oil-bearing elsewhere (in the Erie Peninsula, Ontario, in New York State, etc.), so that it is not impossible that these strata may prove to be of importance here. Exploratory work to determine as accurately as possible the geology of the

^{*} Economic Resources of the Moose River Basin, Bureau of Mines Report. 1903. pp. 156-158.

[†]C. G. S. Report, 1877-78, Part C., p. 34.

district in necessary before drilling for prospecting purposes could be undertaken.

In the valley of the Frederick House river, the geological conditions are similar to those found in the corresponding portion of the valley of the Abitibi. At one locality (mileage 38) north of the junction with the Abitibi, a serpentine-magnetite bearing rock occurs. In the field this seemed to the writer to much resemble some of the asbestos bearing serpentines of Quebec, but a comparison with typical specimens from the last mentioned locality shows that the rocks are not the same. On the ground not the slightest trace of asbestos was found.

Materials for use in construction work.—In the matter of stone, suitable for use in construction work, the limestone which outcrop at several places in the valley of the Abitibi will probably supply material suitable for the masonry in bridge construction for the portion of the line north of Sextant rapids. The crystalline rocks which occur south of this would also supply some excellent material for this purpose were it not for the expense of quarrying and cutting this type of rock.

Materials for grading can be obtained practically everywhere along the

line, no matter what route is followed.

Materials for ballast will apparently be difficult to obtain. section south of the Trans-continental line, deposits of sand and gravel in any quantity were not noted along the lines traversed. In the interior between the Abitibi and the Frederickq House rivers there are a few low ridges whose general contours suggest that they are gravel ridges. A closer investigation was not possible with my equipment. For the section below the Trans-continental junction there will also be difficulty in obtaining good material close at hand. At the Pudding rapids on the east side is a bed of coarse gravel, between fifteen and twenty feet in thickness, overlaid by about twenty feet or stratified clay. These beds dip gently towards the north and materials suitable for this purpose. No other similar beds were noticed rise southward. It is quite possible that this gravel bed may come to the surface some miles south of these rapids. If so it is a possible source of along the river and it does not seem probable that many such gravel beds will be found.

#### SUMMARY.

In conclusion it may be stated that the only minerals of economic importance known to occur in the district are two, Gypsum and Lignite, and that the value of the latter is extremely doubtful. The occurrence of petroleum and natural gas in paying quantities is not improbable but has yet to be proved. Exploratory work will be very expensive because of the heavy drift cover. It should perhaps be mentioned that peat occurs in almost limitless amount.

#### TOPOGRAPHY.

Preliminary Statement.—With regard to the general topography of the district its distinctive character may perhaps be best understood by the following introductory description. Considering Hudson Bay as a centre, the land area immediately to the south-east, south, and south-west may be described as a broad, lightly inclined, amphitheatre-like plain, the coastal plain, with a partially dissected surface sloping gently baywards with gradients that in the vicinity of the bay probably are not over one foot per mile, but which further away (100 miles) probably reach as much as two feet per

mile. Rimming in this coastal plain on the land side is a broad plateaulike area underlain by old rocks. In the valley of the Abitibi, the edge of this old land plain is found at the Otter's Portage and in that vicinity:

from there it extends southward beyond the height of land.

The surface material of this plateau-like area is composed chiefly of glacial clay which contains varying amounts of sand. As a whole, the surface of the plateau is plain-like and it has a gentle slope bayward from the height of land. Here and there a few of the stronger ridges of bed rock project above the surface of this secondary glacial plain superposed on an old bed-rock plain. The materials which compose the modern coastal plain stratified sands and clays, have been deposited upon an area underlain by sedimentary rocks. These rocks have eroded faster than the crystalline rocks of the adjacent old land area to the south. Consequently we find the belt of land which marks the boundary between the two recent plains—the coastal plain and the glacial plain on the old land—is a well defined topographic feature, the north areas of this being at a level distinctly lower than the level of the region to the south. Where the present streams pass from the upper to the lower plain they have everywhere developed a series of rapids and falls over the old rock rim. A line joining this series of rapids and falls on the different streams—the so-called fall line—is thus the boundary not only between the two types of earlier basement rocks but also between the two plains.

The streams which descend these gently sloping plains from the height of land to the bay have everywhere cut trenches in the soft deposits of both plains. The streams with the larger water supply naturally cut the deeper and wider trenches. In cutting down they have here and there cut through the soft soil cover of the plain on which they were running and have partly uncovered ridges of the buried rocks. These uncovered ridges form the majority of the rapids and all of the falls of the different streams of the region. The tributary streams have also cut trenches appropriate to their drainage areas and to the depth of the valley of the main stream to which they are tributary. On the whole it is found that the dissection of the interstream areas between the larger streams has been very slight, so that the plain character is well preserved almost everywhere inland a short distance from the main stream.

The Abitibi river has a very large drainage area and consequently has cut a deep wide valley which it is even now widening. The tributary streams, also, because of the depth to which the main valley is cut, have made deep trenches in the valley sides. Through the upper part of its course above the fall line, the Abitibi has also developed at many points a low narrow flood plain, at other points it still has steep banks. Just below the fall line the entrenchment is great and the flood plains are less well developed. At Iroquois falls, the depth of the Abitibi valley below the surface of the adjacent plain is about 125 feet. In the vicinity of the junction with the Frederick House river, the depth of the dissection is about 60 feet. Just northward from the falls, the trenches of the tributary streams are deep (60-90) feet) close to the main river, and the sides are very steep, but so far as my present information goes they do not extend very far inland, in most cases less than five miles, and the deeply entrenched portion of their valleys will not extend so far.

The volume of water discharged by the Abitibi varies enormously at different times of the year. Being a north-flowing stream, the lower parts of the river are still ice-bound when at the spring break-up floods from the height of land start northward. As a consequence ice jams are frequent and

the spring water level exceeds the summer level almost everywhere by over twelve feet and in some places by as much as twenty-five feet or even more. Where the river has not developed a flood-plain it is undercutting its valley sides and as a consequence the slopes which are not always even wooded are steep and landslips are very frequent.

In the valley of the Frederick House river, on the other hand, the conditions are somewhat different. The drainage area is very much less, the depth of the soil cover above the ded rock seems also to be less than in the Abitibi valley. As a consequence we find that the depth of the Frederick House valley is only about sixty feet as a maximum. Not having been able to cut so deeply as the Abitibi it has developed a relatively broader flood plain along its course, and low flat areas close to the streams are thus more frequent than on corresponding parts of the Abitibi. The height of the spring flood line does not seem to be more than seven feet above summer The tributary streams have trenched the valley sides as on The lengths of the streams which enter the Frederick House river from the east are often much more than double that of the corresponding streams which drain the eastern part of the land area between the With very few exceptions these tributary streams have only trenched the interstream area between the two rivers to a very slight extent. at least on that portion which lies south of mile post 168 on the Nipissing-Algoma boundary.

The interstream area between the two rivers may be described as almost flat (except for its gentle descent bayward). The relief south of mile post 168 (boundary) rarely exceeds twenty-five feet in most cases is less than this. Occasionally a few small ridges of what is probably sand are found overlying the clay plain, but all of those seen trend a little west of north. A section eastward across the plain between the two rivers in the vicinity of the 168th mile post shows that the eastern portion of this land area between the two streams is much more dissected than elsewhere. Here the relief reaches a maximum of between eighty and ninety feet, some creek valleys being over two miles wide, but these valleys trend in a northwesterly direction. west end of the line near the Frederick House river is nearly level for about three miles back from the river. North of this exploratory line, which is the trial line of the Trans-continental railway, the dissection of the inter-stream area is considerable and an east and west railway line would encounter some wide and deep valleys, and any one of which offers very easy grades to a north running line. South of this exploratory line the little dissected plain area widens considerably, extending at the 162nd mile to more than eight miles east of the Frederick House, and further south to practically within a mile or so of the Abitibi river (excepting where it is cut on the margin by the short streams tributary to the Abitibi.)

The accompanying profile of the bed of the Frederick House river shows that the total fall between the Frederick House lake and the junction with the Abitibi is 191 feet in a distance of 51½ miles, scaling along the bed of the river. In a direct line the distance is 42½ miles. Allowing for the difference in the depth of the dissection of the plain at the lake and at the junction of the two rivers, the average grade along the bed will be about 3.8 feet per mile, and over the plain, about 3.6 feet per mile. A location across the plain would thus be several miles shorter.

Location.—In the valley of the Abitibi easy grades, all less than 3/10 per cent. can be obtained close to the stream, running the line along the flood plain where possible, and elsewhere resorting to sidehill work, either cuts or fills; at some few points sharp curves can be avoided only at considerable expense locally. The sidehill work would be considerable and

would be chiefly fills, because of the danger of cutting into steep clay banks where landslips are possible. Along the valley of the Abitibi, the steep character of the valley sides and the nature of the present dissection means that after construction the danger of landslips would be considerable and maintenance expenses would be greater than where this danger was not so imminent. The profile of the bed of the Abitibi is not available at this writing and the average grade is not known, but it is probably less than that of the Frederick House river. Neither, however, is large enough to be of any great significance.

In the valley of the Frederick House river, on the other hand, comparing it with the corresponding section of the Abitibi, the depth of dissection is not so great, there seems to be a much larger percentage of food plain developed in the bottom of the valley, the height to which the spring floods rise is not so great, steep banks occur in a number of places but only in two places did the writer note the occurrence of freshly undercut cliffs. In comparison with the valley of the Abitibi, for an equivalent distance, then, it would appear that this valley would offer the best route so far as initial expenses are concerned in the construction costs, because of the less amount of sidehill work in cuts and fills. Maintenance expenses would also be less because, the number of sidehill cuts being less and the river being less active than the Abitibi in undercutting its banks, the danger from landslips would be very much reduced. In construction along the valley of the Frederick House there are two points where there is a rapid descent in the bed of the stream, at the High Falls, 81 miles below Frederick House lake (52 feet), and at the next falls below this, 13½ miles from the lake. At both these points, however, there is favourable ground and if desired the obstructions could be passed at one tenth per cent. grades for north bound traffic, and that with little rock work.

So far as the writer is able to judge from the information he has been able to gather, there will practically be no difference in average grades offered by either of these river routes or by the third route which is referred to below. Locally there will be steeper grades for south bound traffic on both these river routes, but the conditions of the country are such that this difference is a negligible quantity.

The third route to be considered is that offered by the plain lying between the two streams. The general course to be followed would be along a line which runs approximately from north of the Black river to the 168th mile post on the Nipissing-Algoma boundary. On the surface of the plain the grades will all be very low, practically flat. By running inland, westward from the Abitibi a short distance before turning north, heavy fills in crossing some of the smaller streams tributary to the Abitibi can be avoided. On this interstream plain the construction costs, so far as cuts, fills and bridges are concerned, will be very low, probably there will be no rock cuts whatever, and they will not much exceed, in fact they may not equal, that of construction work on the prairies of the west except that ballast materials will be difficult to obtain.

The surface of the interstream plain is practically all muskeg. A few sand ridges occur which will probably supply materials for such fills as are necessary, for grading, and possibly even for ballast. It was not possible to investigate the nature of the materials of these ridges. The muskeg varies in depth from one to four feet, but most of it is less than two feet thick. Under the muskeg everywhere will be found a clay bottom and the surface may be cut practically anywhere without danger to the road bed. The conditions which exist in the muskeg area of the southern portion of the line do not exist here. Material for grading can be obtained right along

the line of construction for most of the distance.* The creeks to be crossed, such as they are, are, with very few exceptions, very small; even in spring they apparently are not very much larger and practically all of them can

be crossed by culverts.

The writer considers that so far as construction costs are concerned, the route indicated along the plain is distinctly the best of the three. construction there is no question but that the maintenance expenses will be very much less than if the valley of either river is followed, the danger from landslides, which is great on the Abitibi and less on the Frederick House. being completely removed. Another factor that may tend to reduce the maintenance cost is that the accumulation of snow in the winter will probably be less than on a line in either valley, and in the spring the line would be free from the snow much earlier than if in a valley.

Water Supply.—It would be inadvisable to use the water of the Abitibi river for the engine boilers on account of the very large amount of clay matter which it carries in suspension, so much that the water is distinctly white. The water of the Frederick House river is much clearer and very much less objectionable. It happens, however, that the water supply of the plain is apparently better than that of either of the rivers, although a little more difficult to obtain. Along the route suggested there are a few muskeg lakes, of no great depth it is true, but large enough to furnish the necessary water supply. These lakes have clay bottoms and could easily be crossed if they happened to lie on the line. Where they do not exist no difficulty should be experienced in forming artificial ponds by damming one of the small valley depressions that are occasionally found. Nearly the whole district is covered with wet muskeg and the water supply to fill such reservoirs in abundant. As regards the character of the salts which these waters and those of the rivers hold in solution, there is no available in formation. One would expect normally to find that the waters of the Abitibi contained the largest percentage of lime salts and that the muskeg waters contained the least and were therefore the best.

Trans-continental Junction.—The trial line of the Trans-continental Railway runs from near the head of the Long Sault rapids on the Abitibi (mileage 40, approximately) to the head of Carter's rapids on the Frederick House, 121 miles above the junction with the Abitibi river. The junction of the two lines, if the line of construction here recommended is followed, would be at or near the 168th mile post on the Nipissing-Algoma boundary.

North Extension from the Trans-continental Junction.—For the continuation of the Temiskaming and Northern Ontario Railway, northward the same plain could be followed north and a crossing made at the rapids about nine miles south of the mouth of the Frederick House river, where rock shews in the river bottom. Further north bridge piers would probably have to be built on a piled base. The best crossing point seems to be at the chute, a few miles north of Carter's rapids. The stream here has a breadth of only about twenty feet and there would be a bed rock base for bridge piers, all of which is now above water level. The stream could be crossed by a single span bridge about two hundred feet in length, possibly less. If the level of the plain is maintained, the bridge would be about fifty-five feet above water level and the approaches to the bridge would require fills of considerable length.

With regard to the district below the junction with the Frederick House river, the writer did not have the opportunity to examine it in the same detail as that north of the same point. The following notes are, however.

^{*} This is also true for each of the other two routes discussed.

given, as they may supplement the report of Mr. Sullivan, the engineer in

charge.

Below the Frederick House, the dissection along the Abitibi is not so great as above it in that section which lies north of the fall line. The choice of two routes is offered, as in the upper section, either to continue along the river valley or to leave the river as soon as the Frederick House is crossed and run inland on the plain some miles back. The country immediately west of the Abitibi, near the junction, is somewhat dissected, and at present there is no available information as to the distance inland that it would be necessary to run to avoid these small stream valleys in building on the plain. The depth of the dissection near the river is nearly fifty feet. At the fall line on the section between the Long Portage and the Otters, the depth of dissection in the Abitibi valley is probably as much as 150 feet. The surface portion of the soil seems to be chiefly sand and the tributary streams have dissected the valley sides considerably.

Construction work along the river not far from the water will not be very expensive, but sidehill work will be frequent. The danger from land-slides will be great in several places. Below the Otters, along the coastal plain, the river valley offers a very easy and feasible route, with, however, a very considerable amount of sidehill work. The depth of dissection decreases baywards and varies from about 150 feet to about 40 feet in the vicinity of the Moose river. In the upper portion landslips will, at some points, be a

constant danger if the line is constructed on the valley sides.

There are two places where expensive work will be found if the Abitibi valley is followed, both of which occur at the fall line. The first of these is on the section between the Lopstick Portage and the north end of the Long portage. Here the fall in the river is approximately 250 feet in a distance of approximately 10 miles. The greater portion of the work will be in rock cuts on side slopes and at one point in the canyon (two mile long) of the Abitibi, past which the Long Portage runs, there is a rock spur with a sheer cliff over 100 feet high and very steep slopes, up to 200 feet above the river level. It will probably be necessary to run a tunnel at least 300 yards in length through this spur. Some bridge work and some heavy fills across small bays and bends in the river will also be necessary to avoid sharp curves and to maintain the grades.

From the brief study the writer made when on the return trip, he is inclined to think that a less expensive route can be found but detailed exploration will be necessary. It is certain that for the first five miles a much easier route exists approximately along the line marked on the plan as "The Little Lakes Route." It was, however, not possible to investigate the country to the west nor to look into the matter of passing the rock ridge through which the canyon runs. To the north of the canyon the ground is high and it is unlikely that any difficulty will be experienced in maintaining the grades. Near the river it is considerably dissected and the alternative will be either to go further back from the river or to construct heavy

trestle work.

The second point where serious difficulty will be encountered is at the Otter's portage where a small mass of Laurentian rock has been uncovered, showing the typical hummocky topography. Detailed exploration in this

district is also necessary.

From the general character of the country, the writer is inclined to think that a much easier route, with lower construction costs and decidedly lower maintenance expenses, can be found by keeping inland from the river, and running over the plain either on the east or west sides. The depth of the fills and the amount of bridge work in crossing the tributary streams

will depend party upon the distance inland at which the line is located. There is no doubt but that close to the river there would be a number of rather heavy fills in crossing the deep tributary valleys in the district close to the fall line. As in the upper section of the line, the mileage would be nearly 12 per cent. less than if the river itself is followed. Further investigation is needed as to the character of the present dissection. It may also be suggested that unless there are certain specific reasons, such as the location of settlements, mines, mill sites, etc., why the line should in general follow the course of some large river, it would seem quite advisable to determine if it is not quite feasible to leave the river altogether and to run down the plain in a nearly straight line to the bay. There is at present no information available as to the character of the country east of the Abitibi through which such a line would run, but the general character of the whole Hudson Bay basin to the south of the bay is such that it is reasonably certain that the plain which exists along the Abitibi and has been dissected by it extends far to the east of that stream.

(Signed) ALFRED W. G. WILSON.

# APPENDIX I.

Notes on Some Features of the James Bay Shore.

James Bay has long been noted for its low flat-lying shores and broad tidal flats. So shallow is the water off most of the shore and so difficult are the approaches that it is only within the last few years that the shore line itself has been accurately mapped. Mr. Henry O'Sullivan, working for the Quebec Government between the years 1897 and 1904, has prepared plans and obtained some valuable information with respect to the Quebec side of the James Bay.* In 1904 Mr. Owen O'Sullivan, of the Geological Survey Department, Ottawa, made a micrometer survey of the west coast of the bay as far north as Cape Henrietta Maria, and I understand that during the season of 1905 this exploration was to be continued to Fort Churchill.† The reports of these two gentlemen (father and son) confirm the previous reports as to the general character of the shore, and give more detailed and accurate information than was before accessible.

Besides drawing attention to these reports and the matter which they contain, information that is very pertinent to the question of where to locate the harbor of the northern terminus of the James Bay line, the writer wishes to draw the attention of the Commissioners to several items of importance in

this connection.

In locating a harbor it seems almost certain that extensive dredging operations will be necessary, first in its construction and afterwards in keeping it open. With reference to this latter, if advantage is taken of the existing river channel to lessen the amount of dredging work necessary, there are at least two factors that must be considered, concerning which there are not available data of value. Firstly, all the rivers which enter the southern part of the Bay take their rise far to the south; hence, the spring floods generally reach the Bay before the ice at the northern end of the rivers has broken up. These floods are often very heavy. On the Abitibi the flood water-level is often over twelve feet above normal and in some places over thirty. On the Moose River above Moose Factory the scored and scarred banks show well the effects of floating ice action to the height of at least 15 feet above the summer water level. The thickness of the ice is probably about three feet or over, varying with the character of the season. The ice from up stream also comes down with these floods and often is loaded with debris. The river waters themselves are also heavily loaded with silt and sand. Under ordinary circumstances, then. the ice-laden spring flood would be a serious menace to any docks which would be constructed unless special precautions were taken to ensure their safety.

Observations are necessary to determine exactly how the ice leaves the river mouth and to determine if there exist some small nocket bays or areas otherwise protected along the river side near its mouth, where the docks. storehouses and elevators would be free from the dangers of the spring ice.

A second problem to be considered is the possibility of any artificial basin being filled up each spring by the load brought down and deposited by the

[†] Survey of the south and west coast of James Bav. Summary Report of the Acting Director of the Geological Survey for 1904, Ottawa, 1995, pp. 173-179.

^{*}Report to the Hon. Adelard Turgeon, Minister of Lands, Mines and Fisheries. Quebec, 1905, (MSS).

river. The amount of debris transported is enormous. Most of the material which constitutes the sand flats of the James Bay basin, including many of the boulders strewn over their surface, was brought to the Bay by the different rivers and is being spread along the shore by the waves and currents. Floating ice may have carried some of the boulders from the east coast of the Bay to their present resting places on the sand flats. No positive information as to the relative percentages of each is available, but it seems probable that the number from the latter place is very limited. The question to be considered is whether the shifting of the beach materials is of such a nature that any dredged channel would be filled. That it goes on to a great extent there can be no doubt whatever, but no information is available as to the nature of this shifting. So far as the Moose River is concerned it seems probable that the river has been and is strong enough to keep its channel open. That the channel has remained open is not in itself evidence that there is no shifting of the beach sands, since in many other places they are known to cross channels of a depth greater than that of the Moose. Whether the Moose would be able to keep an artificial channel of greater depth scoured out is a matter for further investigation. With regard to the probable permanency of the Moose River channel, Mr. A. P. Low, Director of the Geological Survey Department, Ottawa, has drawn my attention to the fact that the sailing directions of Capt. W. Coats, an officer of the Hudson Bay Company, who navigated the Bay between the years 1727 and 1751, are still applicable in making Moose Factory. I append herewith extracts from Capt. Coats' papers.

Another factor to be taken into consideration is the seiche oscillation of the waters of the bay. Where a strong wind is blowing for a long interval in a nearly constant direction it is well known that it tends to pile the water up in front of it, particularly on low flat lying shores. The oscillations of a body of water as a whole which are set up in this way while the water is regaining its natural position of equilibrium and which continue for some time after the wind ceases, constitute a movement of the water which is called a seiche. On James Bay the normal tidal range is about seven feet. Mr. Henry O'Sullivan states* that on the south-east side of the bay the effect of a strong north-west wind is to occasionally give the tides a range of twenty feet. On the Moose River side a height of about eighteen feet under the influence of a north-east wind has been known; Capt. Coats mentions twenty feet at York Fort, sixteen feet at Churchill. The unusual tidal range is of course due to the fact that at certain intervals the crest of the tidal wave coincides more or less accurately with the crest of the seiche oscillation, the two combining to produce abnormal high water. On low flat-lying shores movements of the water of this character mean the temporary submergence of large tracts that are normally above water level. On more than one occasion the employees at some of the posts of the Hudson Bay Company have lost all or nearly all their cattle by unexpected floods of this kind.

Any danger which may arise from the abnormal tidal range is easily guarded against. The problem of where to locate a harbor depends more on the question of maintaining an open channel where the docks shall be reasonably safe from the action of the ice and the spring freshets. If investigation shows that the movements of the ice in spring and the spring floods themselves are a serious menace, and if, as seems almost certain, extensive dredging operations are necessary in any case, it would then seem advisable to consider the desirability of locating a harbor somewhere on the shore away from the mouth of any existing stream of large size. In this connection I beg to draw the attention of the Commission to the following statements in

Mr. Henry O'Sullivan's report: "Crossing from Black Bear Point to Point Comfort, a distance of 15 miles, I took soundings over the greater part of it, and was pleased to find about midway a depth of 43 feet at low water; and this depth seemed to hold good as far as I went at right angles to our lines on either side." Scaling off from Mr. O'Sullivan's plan, the distance between these two points is only 9 miles, and the distance from the middle point to the nearest land about 3½ miles. The bay between these two points, Cabbage Willows Bay, is not entered by any large stream. Mr. O'Sullivan also draws attention to the fact that the roadstead offering this deep water is fairly well protected from the north winds by the high capes of Point Comfort, Sawayan and Meskanon.

Extracts from the Geography of Hudson's Bay: being the remarks of Captain W. Coats, in many voyages to that locality, between the years 1727 and 1751; Hakluyt Society, London, 1852.

Page 27: "At Moose River Road, S. ½ E., moon makes full sea, and rises seven foot at an ordinary tide. (This) time and (this) height (is) to be understood when the tides are unincumbered by ice, uninfluenced by high winds, both which make some alteration; but down James Bay, where the tides are languid, the northerly and westerly winds will bring twelve and fourteen foot water. At York Fort I have known it rise twenty foot; at Churchill sixteen foot, which demonstrate that angular position of the land and coast and high winds, have a prodigious influence on the natureall course of the tides."

Page 47: "From the Gaskitt, fifty-eight miles S. by W., you come to Moose River Road; eight mile north from Sand Heads, North Point, W.N.W., six mile, in latitude 51° 34' N., where you wate for the tide to go into that wide mouthed river, which is not less than twelve miles over, from the North Point to the opposite shore, which opens with three channels; but the north and eastern are so choked with banks and shoalds, and there is no using those; the midle chanile will admit a ship of twelve foot. Observing the tide over a bar one mile broad, and one mile within the Sand Heads, is a little place affords water for a ship to ly afloat, caled the Lower Ship Hole, to distinguish it from another four mile above Sand Heads, caled Ship Hole, in three fathom, low water, where we moor and do our business. Eight mile below the factory on Roberson's Islands from Midlebrough, another island runs a shoald within half a mile of the ship, which cuts the river and prevents the ship going to the factory, which has water plenty all above that place."

Page 54: "Fifty-eight miles south from the Gaskitt, you come into Moose River Road, in five fatham, soft but good anchor ground, E. by S.; seven miles from the North Point, the North Bluff, in going into Moose River, the coast from Albany to Moose River, nearer than five fatham, is all banks and broken ground, the land is low and covered with woods and winds like a bow."

Pages 97 and 98: "I went from the ship in Moose River Road and rowed into the mouth of that river as follows: North Bluff W.N.W. at 6 hrs. 27', past the outer boy in four fathams: 6 hrs. 56' past the second buoy, three and three-quarters fathams; 6 hrs. 58' past the third buoy, three and a quarter fathams; 7 hrs. .08 ditto fourth buoy in three fathams; 7 hrs. 15' ditto fifth buoy; three, one foot less: 7 hrs. 22' ditto sixth buoy; two and a half fatham; becons, two and a half fathams.

"We returned on board by 9 h. 47' and rowed four mile an hour.

"At the North Sand Becon, three and a quarter fatham best water: second ditto, three ditto; third ditto, three and quarter ditto; fourth ditto, three ditto; fifth ditto, three and quarter ditto; sixth ditto, three and a half ditto, becon; seventh ditto, four and a half ditto, buoy at Ship Hole."
Pages 102, 103: "The Lower Hole in Moose River is one-third of a mile

W. 1 N. from the South Sand Becon, thirteen foot at low water: we came

over the bar in twelve foot water."

# APPENDIX II.

Notes on the Water Powers of the Frederick House River.

By means of floats the flowage of the Frederick House River, determined at a point about one mile from the High Falls, was found to be about 27.000 cubic feet per minute, on the 8th of September. At the time of lowest water it probably does not fall much below 20,000 cubic feet. At the High Falls an effective head of about 50 feet can readily be obtained under present conditions. It would be a very easy matter to construct a dam across the river at this point, utilizing the several islands around which the river cascades. If desired, the level of the water could be raised between five and ten feet without much difficulty. For levels above five feet it would be necessary to reserve the fore-shore of Frederick House Lake to the height of about six feet above the present spring level.

Below the High Falls, about 134 miles from Frederick House Lake, there is a series of falls and cascades with a total descent of 30 feet in about one mile, all of which could be used under certain conditions. The upper twenty feet of this fall could be easily utilized and by means of a dam the head could be raised twenty feet more without serious damage to the adjoining country since the river banks are high. Raising the head at this point would of course

diminish the effective head at the High Falls.

There are a number of minor rapids and falls below this which would give low heads of between five and ten feet. At a point about 42 miles between Frederick House Lake, at the chute on the Carter's Rapids, is a very favorable location for a dam. Here the channel is narrowed by a rocky spur and the slope of the river bed is very steep, so that the water could be held back without affecting a large area up stream. The actual fall in the river at this point is about 12 feet. For three miles above the fall is about 45 feet.

### MEDICAL REPORTS.

NEW LISKEARD, January 7th, 1906.

H. W. Pearson, Esq., Secretary-Treasurer T. & N. O. Railway, Toronto, Ont.

DEAR SIR,—I beg to submit to you my report on medical attendance to the employees of the T. & N. O. R. R. from January 1, 1905, to January 1st, 1906.

There was an epidemic of typhoid fever which broke out in September. Although there were quite a number of cases, few were fatal, but for the last month or so no new cases have developed.

There were also a number of cases received into the hospital suffering from tuberculosis, pneumonia, rheumatism, also minor ailments such as bronchitis, tonsillitis and diarrhoea during this period.

The following is a tabulated list of diseases treated in the hospital:

Months.			No.		No.	Total.
January,	1905	Pneumonia	1			1
February,	"•	AppendicitisAmputation of toe	1	Injury to eye	1	2
March,	"	Rheumatism Eye injury	3 1	Dyspepsia	1 3	4
April,	"	Pneumonia	2 1	Injured legBronchitis		3
May,	"	Lagrippe	1 1 1	Injured leg	1	2 2 1
June,	"	Sprained ankle	1	Eczema	1,	2
July,	"	Colic	1 1 1	Eczema	1 1 1	2 2 2
August,	"	Injured hand	1	Vaccination wound	1	2
September,	<b>"</b>	TyphoidFractured legs	1 2 1	Sprain	1 1 1	2 3 2
October	"	TyphoidInjured shoulderTuberculosis	15 1 1	Injured hand	1 1 1	16 2 2
November,	"	TyphoidEuterliaAlcoholism	11 1 1	Injured knee	1 2	12 3 1
December,	"	Abdomenal injury Intestine abstruction Injured leg	1 1 2	TyphoidLagrippe	1	3 2 2
Total cas	ses			.	1	85

Total number of deaths—	Cases.
Tuberculosis	. 2
Typhoid	. 5
Kick in abdomen received from horse	. 1
Pneumonia	
Septicemia	. 1
Burns and internal injuries	. 1
	_
Total deaths	. 11

Considering the severe epidemic of typhoid, also the number who received injuries during the past year, the number of fatal cases were comparatively few, and in the large majority of cases made good recoveries.

Yours respectfully,

BYRON FIELD.

NORTH BAY, February 14th, 1906. H. W. Pearson, Esq., Secretary T. & N. O. Railway Commission:

DEAR SIR,—I have to report that during the year 1905 the following cases of employees on the North Bay Division received hospital treatment at North Bay:

		<del></del>	Recovered.	Died.
,	Case	s Ischio Rectal Abscess	2	•
	44	Simple fracture of Tibia	ī

	••	Arm crushed at elbow (amputated)	1	

One section man was killed while trying to remove hand car from track to let train pass.

Cases of illness in the families of section men were attended to at their

homes.

Yours sincerely,

A. McMurchy.

# CONTRACTS, AGREEMENTS, ETC.

# STEEL VIADUCTS.

Articles of agreement made in duplicate this twentieth day of February, in the year of our Lord, 1905, between Dominion Bridge Company, Limited, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

#### Witnesseth:

- 1. In this contract the word "Inspector" shall mean the Inspector for the time being apointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the work herein contracted for, and the word "Engineer" shall mean the Chief Engineer for the time being of the Commission and having control of the work of construction of the railway line of the Commission north of New Liskeard.
- 2. The Contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever necessary for the due construction and erection, and will well and duly built, erect and complete in a perfect workmanlike manner two steel trestles for the south and north Blanche River crossings of the said line of railway situate approximately 139 miles and 146 miles respectively, north of North Bay on the said line of railway with all necessary appliances ready to receive the rails, in strict compliance with the latest Dominion Government specifications as to material and workmanship and class one loading of same specifications as to strength and in strict compliance with the plans hereto annexed and to the complete

satisfaction of the Inspector as to material and workmanship of the structure, and to the complete satisfaction of the Engineer as to erection and completion thereof, it being agreed that the said work shall include the placing of ties and guard rails and the painting of the structure after erection, and will deliver the same complete to the Commission on or before the 30th day of September, 1905, or on or before such later date as on the written application of the Contractor for an extension of time the Engineer may, in writing, substitute, and further will have both said trestles so far constructed on or before the first day of September, 1905, as that on said date and continuously thereafter construction trains may from time to time safely cross and recross the same as may be necessary in the work of construction of the said line of railway, time being deemed to be material and of the essence of this contract, and in case of default by the Contractor in having both of said trestles so far constructed as to permit of same being safely crossed and recrossed as aforesaid by construction trains on and continuously after the said first day of September, 1905, the Contractor shall pay to the Commission, by way of ascertained and liquidated damages for such breach, the sum of one hundred dollars for each day which shall or may elapse after said date until the construction of both of said trestles is so far advanced as to permit of the crossing re-crossing thereof by construction trains as aforesaid; provided, however, that such payment of one hundred dollars per day shall not be exacted in respect of any absolutely necessary delays due to loss of material during ocean transit or to other causes entirely beyond the control of the Contractor.

- 3. The Inspector shall be the sole judge of the material and workmanship used in the said structures, and his decision on all questions in dispute with regard to such material and workmanship shall be final, and the same shall be executed to his satisfaction as evidenced by his certificates in writing, and the Engineer shall be the sole judge of the erection and completion of the said work, and his decision on all questions in dispute with regard to the same shall be final, and the same shall be executed to his satisfaction as evidenced by his certificate in writing, which certificates by the Inspector and Engineer shall be condition precedent to the right of the Contractor to be paid for said work.
- 4. The Inspector and all persons from time to time authorized by him on that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.
- 5. All materials, plant and tools required for or in connection with the said work shall be delivered by the Contractor on the track of the Commission at North Bay f.o.b cars, but same and the Engineers and other workmen of the Contractor necessary for the erection of said structures shall be transported and conveyed by the Commission from North Bay to said respective sites free of charge to the Contractor, and the Commission shall further transport and convey such engineers, workmen, tools and erection plant back from the said sites to North Bay free of charge to the Contractor.
- 6. The Commission, in consideration of the premises, covenants with the Contractor that the Contractor from time to time in all respects having fulfilled and performed the provisions of this contract on the contractor's part intended to be fulfilled and performed, will be paid for and in respect of the said work the sum of \$87,460, payable as follows: 60 per cent. of the vaue of any shipment of material upon delivery of same on board cars at the

works of the Contractor in Montreal; 20 per cent. additional upon delivery of same on the track of the Commission at North Bay f.o.b. cars, and the balance on monthly progress estimates certified by the Engineer as the erection of the work proceeds. the final payment to be made within forty days after the final certificate of the Engineer.

In witness whereof, the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the

proper officers in that behalf.

Signed, sealed and delivered in the presence of B. E. CHADWICK.

R. N. Аввотт,
as to signature of Robert
Jaffray and H. W. Pearson.

DOMINION BRIDGE Co., Ltd.,

(Seal.)

By Wm. A. W. McIntyre,

2nd Vice-President.

A. W. Sharwood,

Secretary.

Temiskaming & Northern Ontario

Railway Commission,

Robert Jaffray.

Chairman,

(Seal.)

H. W. Pearson,

Sec.-Treasurer.

## TELEGRAPH POLES.

Memorandum of agreement made in duplicate this 24th day of February, 1905, between W. A. Houser, of Earlton, in the Temiskaming District, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

#### Witnesseth:

That in consideration of the mutual covenants and agreements herein-

after contained the parties hereby agree as follows:

1. The Contractor will deliver to the Commission at such points on the right of way of the Commission north of New Liskeard as may from time to time be directed and approved by the Engineer or his agent duly authorized in that behalf, two thousand telegraph poles to be made from good sound cedar of good merchantable quality from twenty-five to thirty feet in length and peeled to within four feet of the butt and not less than five inches in diameter at the top, said poles to be piled as directed by the Engineer or his agent, and to be delivered and piled completely ready for inspection on or before the first day of June, 1905, time being agreed to be material and of the essence of this contract.

2. The Contractor will pay in cash for all poles purchased by him from other parties, and will not directly or indirectly contract for poles for said work the price of which shall be payable either wholly or partly in goods

or otherwise than in actual cash.

3. The Contractor will furnish satisfactory evidence to the Engineer from time to time as requested by the Engineer of his having complied with the provisions of the last preceding clause hereof, and as to the land upon which all poles delivered from time to time have been cut, and that the Contractor or other party cutting same had the legal right to cut such poles and dispose of them as the same are free from all liens and attachments, and until such evidence to the satisfaction of the Engineer is furnished and

until poles from time to time are actually accepted and marked by the Engineer or his agent in that behalf as aforesaid, the same shall be at the risk of the Contractor.

- 4. The decision of the Engineer or of his agent in that behalf as to whether the poles conform to and are delivered in accordance with the terms of this contract shall be final and conclusive. The rejected poles must be promptly removed by the Contractor from the Railway right of way, failing which same may be removed by the Engineer and the expense of such removal as fixed by the Engineer charged against the Contractor.
  - 5. Government dues, if any, shall be paid by the Commission.
- 6. If the Contractor shall become bankrupt or insolvent or shall make an assignment for the benefit of his creditors, or shall compound with his creditors or propose any composition to his creditors for the settlement of his debts, or shall attempt to transfer, sublet or assign this contract or any part thereof without the consent in writing of the Engineer, or if by the report of the Engineer it shall appear that the rate of progress of the said work, in the opinion of the Engineer, is not sufficient to ensure completion of same within the time prescribed, or if the Contractor shall, in the opinion of the Engineer (who shall be the sole and absolute judge in that behalf), persist in any course violating the conditions of this contract, the Commission shall have the power and right in its discretion without previous notice and without process of law to take the work or any part thereof out of the hands of the Contractor, and either re-let the same to some other person or persons with or without previous advertisement or employ workmen and provide materials, tools and other necessary things at the expense of the Contractor, to take such other steps as the said Commission deems necessary in order to secure the completion of said work, and in any such case the Contractor shall have no claim to any payment in respect of the work performed, but all things done and means employed under this clause by the Commission shall be as binding on the Contractor as if the things done and means employed had been done and employed by him under this contract, but the Contractor shall nevertheless remain liable for all loss and damages which may be suffered by the Commission by reason of the non-completion by the Contractor of the work, or by reason of any of the matters aforesaid which damages shall be deemed to include all salaries or wages which shall be payable to the person or persons superintending the work on behalf of the Commission, and no action or claim shall be raised or made by the Contractor by reason or on account of the ultimate cost of the work so taken over proving greater than in the opinion of the Contractor it should be, and the amount of all such loss and damages shall be computed and ascertained by the Engineer, whose certificate certifying to the amount thereof shall be final and binding upon all parties, but notwithstanding any of the matters aforesaid, the Contractor shall receive credit for all amounts owing to him for the part of the work which he shall have performed, subject, however, to the right of the Commission to deduct therefrom all such loss and damages as aforesaid so certified by the Engineer.
- 7. Cash payments equal to about ninety per cent. in value of the poles so delivered and accepted shall be made to the Contractor monthly on the written certificate of the Engineer that such poles have been so delivered and accepted, and such evidence furnished as aforesaid and the said certificate shall be a condition precedent to the right of the Contractor to be paid the said ninety per cent. or any part thereof. The remaining ten per cent. shall be retained until the final completion of the whole work to the satis-

faction of the Engineer, and until the Engineer shall be satisfied that all wages of all laborers, workmen and servants of the said Contractor and of all sub-cotractors under him as well as the price of all poles purchased by the Contractor from other parties have been duly paid, whereupon the Engineer shall give his final certificate accordingly and such remaining ten per cent. or the balance payable to the Contractor as found by the Engineer shall be paid to him by the Commission within forty days after the granting of such final certificate; and it is hereby declared that the written certificate of the Engineer certifying to the final completion of this contrat as aforesaid shall be a condition precedent to the right of the Contractor to receive or to be paid the remaining ten per cent. or any part thereof, and as security for the due performance of said contract the Commission shall be entitled to retain the deposit of \$100 made by the Contractor with his tender for said work, which sum without interest shall be repayable to the Contractor with the final payment as aforesaid.

8. The Commission, in consideration of the premises, hereby covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled the covenants and agreements herein contained on the Contractor's part intended to be fulfilled, will be paid on the terms aforesaid for the said poles the sum of eighty-four cents. for each pole of twenty-five feet in length with a proportionate advance for poles of greater

length up to thirty feet.

9. The word "Contractor" wherever it appears in this contract shall be held to mean and include the Contractor, his heirs, executors and administrators, and the word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control of the work of construction of the said line of railway.

In witness whereof this contract has been duly signed, sealed and executed by the Contractor and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

Signed, sealed and delivered in the presence of H. D. GRAHAM, as to W. A. HOUSER, R. N. ABBOTT, as to signature of Robert Jaffray and H. W. Pearson.

W. A. Houser,

Temiskaming & Northern Ontario
Railway Commission,
Robert Jaffray,
Chairman,
(Seal.)
H. W. Pearson,
Secretary.

## LOCOMOTIVES.

Articles of agreement made in duplicate this twenty-seventh day of February, in the year of our Lord one thousand nine hundred and five, between The Canadian Locomotive Company, Limited, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

### Witnesseth:

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the locomotive engines hereinafter referred to.

- 2. The contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever necessary for the due construction and completion, and will well and duly build and complete in a perfect and workmanlike manner four ten-wheeled locomotive engines with all necessary appliances for use on the line of railway of the Commission, two of same to be in strict compliance with the specifications and drawings annexed to a certain agreement between the parties hereto, dated the fourteenth day of April, one thousand nine hundred and three, the remaining two in strict compliance with the specifications and drawing hereunto annexed. all to be to the complete satisfaction of the Inspector, and will deliver the same completed to the Commission free on the railway tracks of the Commission at North Bay, Ontario, as follows: Two of the said locomotive engines being in accordance with said specifications attached to said contract of the fourteenth day of April, one thousand nine hundred and three, on or before the twenty-second day of July, one thousand nine hundred and five, and the remaining two locomotive engines hereby contracted for being in accordance with the specifications hereto annexed on or before the twenty-second day of August, one thousand nine hundred and five, time being agreed to be material and of the essence of this contract.
- 3. The Inspector shall be the sole judge of all work and material done and supplied under this contract, and his decision on all questions in dispute with regard to any such work or material shall be final, and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the contractor to be paid therefor; provided, however, that in case the contractor shall be dissatisfied with the decision of the Inspector on any question in dispute the contractor shall, on giving written notice to the Secretary of the Commission within ten days from notice to the contractor of such decision have the right to appeal therefrom to the Superintendent for the time being of motive power of the Canadian Northern Railway Company, and, in case of any such appeal, the decision of such Superintendent thereon shall be final and binding upon both parties.
- 4. The Inspector and all persons, from time to time, authorized by him in that behalf shall have free entry and access to the works of the contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.
- 5. The acceptance and payment for any of the said engines by the Commission shall not be considered as any waiver of the obligations of the contractor with reference to the others.
- 6. The contractor guarantees all main parts, such as boiler, frames, wheels, axles, rods, crank pins, axle boxes, eccentrics, cylinders and connections not to show signs of defect or weakness within two years' average service under fair usage, it being, however, understood and agreed between the parties that for the purposes of this contract construction service is not to be considered fair usage. The books kept in the office of the Mechanical Superintendent of the Commission shall be taken as final and conclusive evidence of the time said wheels, springs, axles, etc., have lasted in service.
- 7. The Commission in consideration of the premises covenants with the contractor that the contractor, from time to time, and in all respects having fulfilled and performed the provisions of this contract (except the fulfilment of the guarantee which is to continue for two years) on the contractor's part

intended to be fulfilled and performed shall be paid for said four locomotive engines so delivered as aforesaid the sum of fifty-seven thousand three hundred and five dollars and twenty cents, one-half thereof within thirty days after delivery of the first two egines, as aforesaid, and the balance within thirty days after delivery of the remaining two as aforesaid.

In witness whereof the said parties have caused these presents to be executed under their respective corporate seals, and under the hands of the

proper officers in that behalf.

### STEEL RAILS.

Memorandum of agreement made this fourteenth day of April, 1905, between The Dominion Iron and Steel Company, Limited, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

1. The contractor agrees to furnish and deliver to the Commission, free of all charges, on cars at North Bay, as hereinafter specified, five thousand tons of steel rails in strict compliance with the specifications hereto attached for the price of \$33.50 per gross ton of 2,240 pounds, f.o.b. cars at North Bay.

2. Said rails shall be so delivered, one-half thereof during the month of October and the balance during the month of November, 1905, time being

agreed to be strictly of the essence of this contract.

3. In the event of stoppage or partial stoppage of the works of the contractor, or shipments being delayed through strikes, accidents, breakage of machinery or other cause beyond the contractor's control, of which the Commission shall be promptly notified, or, in case any shipment or any part there-of shall be lost in transit, the contractor shall be entitled to such additional time in respect of the whole or part of such deliveries or either of them as the Chief Engineer of the Commission, for the time being, shall decide and certify in writing to be fair and reasonable, having reference to the character and duration of such stoppage, delay or loss, and such Engineer shall be the sole and final judge as to the additional time to be allowed, and as to what part of such deliveries or any of them shall extend to, and his decision in every such case shall be absolutely final and binding upon both parties. The last preceding clause of these presents shall be construed so far as relates to any portion of such deliveries or any of them affected by such extension of time as if the time fixed by the Engineer were the time fixed in said clause.

4. The contractor shall give written notice to the Commission by letter addressed to the Secretary of the Commission at the office of the Commission in Toronto of the commencement of rolling at least fifteen days in advance of such commencement, and due notice of the resuming of rolling, from time

to time, after the same shall have ceased.

- 5. The written certificate of the Inspector of the Commission provided for by said specifications certifying that the rails have been manufactured to his satisfaction in accordance with this contract, and the said specifications shall be a condition precedent to the right of the contractor to receive and be paid the price herein agreed to be paid for the same.
- 6. In case default shall be made by the contractor in the delivery of any of the said rails in accordance with the terms of this contract and the continuance of such default for thirty days the Commission may cancel this contract, but the contractor shall, nevertheless, remain liable for all loss which may be suffered by the Commission by reason of the non-completion by the contractor of this contract. Provided, however, that credit shall be given to the contractor notwithstanding such cancellation for the price of all rails which shall have been delivered by the contractor in accordance with this contract and the said specifications.
- 7. The cost of inspection provided for by the specifications shall be borne by the Commission.
- 8. The contractor will, from time to time, replace free of charge any rails supplied under this contract which shall break in use within a period of five years from the first day of October, 1905, provided such breakages are due to defective workmanship or materials of which the Chief Engineer of the Commission shall be sole judge, and his decision final and binding, the rails to replace such breakages to be delivered by the contractor to the Commission f.o.b. cars at North Bay yearly within sixty days from the mailing to the contractor of the Superintendent's certificate hereinafter referred to, on the certificate of the Superintendent for the time being of the railway of the Commission certifying to the fact of such breakages and the number of rails broken, which certificate shall be final and binding on both parties in the premises.
- 9. The Commission in consideration of the premises promises to pay in Toronto funds for each shipment of said rails upon the arrival thereof in North Bay on presentation of invoices and the certificate of the Inspector of the Commission attached to each draft, provided this shall not require the Commission to pay for any rails at any earlier dates than the dates of delivery thereof required as aforesaid.

In witness whereof the said parties have caused these presents to be executed under their respective corporate seals and the hands of the proper officers in that behalf.

Signed, sealed and delivered in the presence of

#### TIES.

Memorandum of agreement made in duplicate this twentieth day of May, in the year of our Lord, 1905, between Edward Benoit, of the Town of North Bay, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

Witnesseth that in consideration of the mutual covenants and agreements herein contained the parties agree as follows:

1. The contractor will deliver to the Commission at such points on the right of way of the Commission at or near the fiftieth mile of the said line of railway as may, from time to time, be directed or approved by the Tie Inspector, twenty thousand tamarac railway ties, and will further deliver to the. Commission at such points on the said right of way south of New Liskeard as may be convenient to the contractor and approved by the Tie Inspector, five thousand tamarac railway ties, and will further deliver to the Commission at such points on the said right of way north of New Liskeard as may be convenient to the contractor and approved by the Tie Inspector, fifteen thousand tamarac railway ties, all of the said ties to be made from sound timber of good merchantable quality, and in strict compliance in all respects with the specifications hereto annexed, which specifications are hereby made part of this contract, it being, however, agreed that should there in any respect be any discrepancy between the said specifications and these presents then the terms of these presents shall govern, said twenty thousand ties for delivery at or near the fiftieth mile to be delivered and piled completely ready for inspection on or before the first day of June, 1905, and the remaining lots of five thousand and fifteen thousand, respectively, to be delivered and piled completely ready for inspection on or before the first day of October, 1905, time being agreed to be material and of the essence of this contract.

2. The contractor shall pay in each for all ties purchased by him from other parties, and shall not directly or indirectly contract for ties for said work, the price of which shall be payable either wholly or partly in goods or

otherwise than in actual cash.

3. The contractor shall furnish satisfactory evidence to the Engineer, from time to time, as requested by the Engineer, of his having complied with the provisions of the last preceding clause hereof, and as to the land upon which all ties delivered, from time to time, have been cut, and that the contractor or other party cutting same has the legal right to cut such ties and dispose of them, and that the same are free from all liens and attachments, and until such evidence to the satisfaction of the Engineer is furnished, and until ties, from time to time, are actually accepted and marked by the Tie Inspector, as aforesaid, same shall be at the risk of the contractor.

4. Culled ties must be promptly removed by the contractor from the railway right of way, unless same shall be accepted under clause 5 of the

specifications, in which case they should be paid for at half price.

5. If the contractor shall become bankrupt, or insolvent, or shall make an assignment for the benefit of his creditors, or shall compound with his creditors, or propose any composition to his creditors for the settlement of his debts, or shall attempt to transfer, sub-let or assign this contract, or any part thereof without the consent in writing of the Engineer, or, if by the report of the Engineer it shall appear that the rate of progress of the said work in the opinion of the Engineer is not such as to ensure the completion of the same within the time prescribed, or if the contractor shall, in the opinion of the Engineer (who shall be the sole and absolute judge in that

behalf) persist in any course violating the provisions of this contract, or any of them, the Commission shall have the power and right at its discretion, without previous notice, and with process of law, to take the work, or any part thereof, out of the hands of the contractor, and either re-let the same to any other person or persons with or without previous advertisement, or to employ workmen and provide material, tools and other necessary things at the expense of the contractor, or to take such other steps as the Commission may consider necessary in order to secure completion of the said work, and in any such case the contractor shall have no claim to any payment in respect of work performed, but all things done and means employed under this clause by the Commission shall be as binding on the contractor as if the things done and means employed had been done and employed by him under this contract; but the contractor shall, nevertheless, remain liable for all loss and damages which may be suffered by the Commission by reason of the noncompletion by the contractor of the work, or by reason of any matters aforesaid, which damages shall be deemed to include all salaries or wages which shall be payable to the person or persons superintending the work on behalf of the Commission, and no action or claim shall be raised or made by the contractor by reason or on account of the ultimate cost of the work so taken over proving greater than the opinion of the contractor it should be, and the amount of all such loss and damages shall be computed and ascertained by the Engineer, whose certificate certifying any amount hereof shall be final and binding upon all parties; but notwithstanding any of the matters aforesaid, the contractor shall receive credit for all amounts owing to him for the part of the work which he shall have performed, subject, however, to the right of the Commission to deduct therefrom all such loss and damages as aforesaid so certified by the Engineer.

- 6. The Commission in consideration of the premises hereby covenants with the contractor that the contractor, from time to time, and in all respects having fulfilled the covenants and agreements herein contained, and on the contractor's part intended to be fulfilled with, be paid for each and every tie delivered and accepted as above, as follows: For the said twenty thousand ties to be delivered at or near the fiftieth mile, as aforesaid, twenty-five cents; and for the remaining lots of five thousand and fifteen thousand ties, respectively, twenty-seven cents, as follows: Cash payments equal to about ninety per cent. of the value of the ties so delivered and accepted shall be made to the contractor monthly on the written certificate of the Engineer that such ties have been so delivered and accepted, and such evidence furnished, as aforesaid, and the said certificate shall be a condition precedent to the right of the contractor to be paid the said ninety per cent., or any part thereof. The remaining ten per cent. shall be retained until the final completion of the whole work to the satisfaction of the Engineer, and until the Engineer shall be satisfied that all wages of all workmen, laborers and servants of the said contractor, and of all sub-contractors under him, as well as the price of all ties purchased by the contractor from other parties have been duly paid. whereupon the Engineer shall give his final certificate accordingly, and such remaining ten per cent, or the balance payable to the contractor as for is by the Engineer shall be paid to him by the Commission within forty days after the granting of such final certificate; and it is hereby declared that the written certificate of the Engineer certifying to the final completion of this contract as aforesaid shall be a condition precedent to the right of the contractor to receive or to be paid the said remaining ten per cent. or any part thereof.
- 7. The word "contractor" wherever it appears in this contract shall be held to mean and include the contractor, his heirs, executors and administra-

tors, and the word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control of the work of construction of the said line of railway.

In witness whereof this agreement has been duly signed, sealed and executed by the said contractor, and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

Signed, sealed and delivered in the presence of

J. M. McNamara, as to signature of Edward Benoit.

### ERECTION OF TELEPHONE LINE.

Articles of Agreement made in duplicate this eleventh day of July, 1905,. between John F. H. Wyse and Henry W. Middlemist, both of the City of Toronto in the County of York, Engineers, hereinafter called the "Contractors," of the first part, and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission," of the second part.

### Witnesseth:

- 1. In this contract the word "work" or "works" shall, unless the context requires a different meaning, mean the whole of the work and materials, matters and things required to be done, finished and performed under this contract. The word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control over the work.
- 2. The contractors will at their own expense provide all and every kind of work, labor, materials and things whatsoever for the due construction and completion, and will duly and sufficiently build, execute and perform in a true, perfect and thoroughly workmanlike manner all the work required in the erection and completion of a telephone line along the Commission's line of railway between North Bay and New Liskeard, with all necessary or proper appliances for use by the Commission in connection with said railway in strict accordance with the tender, specifications and plan hereto attached and any further plans and drawings prepared for said works by the Engineer. and to the satisfaction and under the direction and personal supervision of the said Engineer, and will give possession thereof to the Commission, complete and ready for use, within the period of three months after receiving notice from the Commission to commence work under this contract. agreed that the Commission requires the cross-arms to be of Southern vellow pine and the top pins one-half inch iron with wooden insulation, in which case the price per cross-arm. including cross-arm, top pins, braces, bolts, etc... shall be two dollars instead of one dollar and sixty cents as set out in the tender hereto annexed. Transposition to be approximately once every mile on sin le pins.
- 3. The contractors upon receiving such notice to proceed shall forthwith comme ce work and shall proceed diligently therewith at the rate required by the name and shall complete the work within the time above limited.

- provided that if any extras and alterations are ordered or any delay or hindrance is caused by the ordering of Southern yellow pine for cross-arms, or if any other delay or hindrance is caused for which the contractors are not responsible, the contractors may apply to the Engineer to extend the time for the completion, and the work shall thereupon be completed within the time fixed in writing by the Engineer, and in default the contractors hall pay the Commission, by way of liquidated damages, the sum of five dollars for each day that may elapse after the time for completion has expired until the whole work shall be completed and delivered to the Commission.
- 4. The Engineer shall be at liberty at any time either before the commencement or during the construction of the works or any portion thereof, to order any extra work to be done and to make any changes which he may deem expedient in the dimensions, character, nature, location or position of the works or any part or parts thereof, or in any other things connected with the works, whether or not such changes increase or diminish the work to be done or the cost of doing the same, and the contractors shall immediately comply with all requisitions of the Engineer in that behalf and shall commence and complete the work so ordered to be done within the times specified by the Engineer, but the contractors shall not make any change in or addition to or omission or deviation from the work, and shall not be entitled to any payment for any change, addition or deviation or any extra work unless such change, addition, deviation or extra work shall have been first directed in writing by the Engineer and notified to the contractors, and the decision of the Engineer as to whether any such change or deviation increases or diminishes the work or as to the allowance to be made to the contractors or deducted from the contractors in respect of any such increase or diminution shall be final, and all the provisions of this contract shall apply to any changes, additions, deviations or extra work in like manner, and to the same extent as to the work tendered for, and no changes, additions, deviations, omissions, or extra work shall annul or invalidate this contract, and no compensation shall be claimable by the contractors for any loss of anticipated profits in respect of or in consequence of any change or deviation in or omission from the works.
- 5. The Engineer shall be the sole judge of the work and material in respect of both quantity and quality and his decision on all questions in dispute in regard to work and material shall be final and no works or extra or additional works or changes shall be deemed to have been executed nor shall the contractors be entitled to payment for the same unless the same shall have been directed in writing as hereinbefore provided, and executed to the satisfaction of the Engineer as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the contractors to be paid therefor.
- 6. The contractors shall be at the risk of and shall bear all loss or damage whatsoever which may occur to the works or any of them until the same be fully and finally completed and delivered up to and accepted by the Commission, and if any such loss or damage occur before such final completion, delivery and acceptance, the contractors shall immediately, at their own expense, repair, restore, and re-execute the work so damaged so that the whole works or the respective parts thereof may be completed within the time hereby limited, but the Commission shall, when requested by the contractors, provide two competent flagmen to protect the contractors from accidents from engines and trains upon the said railway while the contractors are engaged upon the contract, the contractors to pay the Commission five dollars for each day of ten hours in which the said flagmen will be so employed.

- 7. Neither the acceptance nor use by the Commission of the whole or any portion of said works, nor the payment of any sums for or on account of said works, nor the giving of any certificate by the Engineer, shall in any way lessen the total and final responsibility of the contractors, neither shall it exempt the contractors from liability to replace work if it be afterwards discovered to have been improperly or badly done.
- 8. Cash payments equal to about ninety per cent. of the work done and materials delivered, computed at the prices agreed upon under this contract, shall be made to the contractors monthly on the written certificate of the Engineer that the work for or on account of which the certificate is granted has been done and stating the value of such work computed as above mentioned and the said certificate shall be a condition precedent to the right of the contractors to be paid said ninety per cent. or any part thereof. The remaining ten per cent. shall be retained until the final completion of the whole work to the satisfaction of the Engineer, whereupon the Engineer shall give his final certificate accordingly, and the balance payable to the contractors as found by the Engineer shall be paid to them by the Commission within forty days after the granting of such final certificate. The written certificate of the said Engineer certfying to the final completion of the said works to his satisfaction shall be a condition precedent to the right of the contractors to receive or to be paid the said remaining ten per cent. or any part thereof. The Commission shall transport over its railway from North Bay to any of its stations all material to be used by the contractors on said works free of charge, and will supply the contractors with a box car for use of their workmen at a rental of twenty-five cents per day and an additional hand car free of charge, which said box car and workmen and hand car shall be moved from any one of the Commission's stations to another from time to time at the request of the contractors free of charge, but not so as in any way to interfere with the operation of the Commission's railway.
- 9. It is distinctly agreed that no implied contract of any kind whatsoever by or on behalf of the Commission shall arise or be implied from anything contained in this contract, including the said specifications, and the
  plans and drawings or the tender of the said contractors for said work or
  from any position or situation of the parties at any time, it being clearly
  understood and agreed that the express contracts covenants, agreements and
  stipulations contained in these presents and in the said specifications, plans
  and drawings are and shall be the only contracts, covenants, agreements and
  stipulations upon which any right against the Commission is to be founded,
  it being further expressly agreed that the said specifications and these presents are to be read together and that in case of any discrepancy between
  these presents and anything contained in such specifications the provisions
  of these presents shall govern. In case of any discrepancy appearing at any
  time between the specifications, plans and drawings or any of them, the contractors shall follow such one of them as the Engineer shall in writing direct.

In witness whereof this agreement has been duly signed, sealed and executed by the said contractors and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

#### PASSENGER COACHES.

Articles of Agreement made in duplicate this thirty-first day of July, 1905, between The Crossen Car Manufacturing Company, Limited, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

#### Witnesseth:

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and

certification of the workmen's cars hereinafter referred to.

2. The contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion and will well and sufficiently build and complete in a thorough, perfect and workmanlike manner three workmen's cars with all necessary appliances for use on the Commission's line of railway in strict compliance with the specifications hereto annexed and with the plans and drawings relating thereto to the complete satisfaction of the Inspector, and the said contractor will deliver one of said cars duly completed and ready for use to the Commission free on the Commission's railway tracks at the Town of North Bay in each of the months of January, February and March, 1906, time being agreed to be material and of the essence of this contract.

3. The Inspector shall be the sole judge of all work and material done and supplied under this contract, and his decision on all questions in dispute with regard to any such work or material shall be final and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the contractor

to be paid therefor.

4. The Inspector and all persons from time to time authorized by him in that behalf shall have free entry and access to the works of the contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.

5. The acceptance and payment for any of the said cars by the Commission shall not be considered as any waiver of the obligations of the contractor

with references to the others.

6. The contractor hereby guarantees all springs and axles for three years' service after coming into actual use, and the contractor will furnish a new spring or axle as the case may be promptly and free of cost f.o.b. North Bay to replace each and every such article which fails to last for three years after being put into actual use. If the springs or axles so furnished to replace others fail to run the balance of the three years, the contractor will furnish promptly and free of cost f.o.b. North Bay other new springs or axles to take their place and so on until the three years' guarantee for these articles shall have expired. All wheels, centres and ties are guaranteed by the contractor to run three hundred thousand miles without failure under fair usage and without more than one and one-half inches tire wear. The records of the T. & N. O. Railway shall be taken as final and conclusive evidence of the length of time such springs or axles have been in service, or mileage made by wheels, and the contract shall not be considered as finally completed until the above mentioned time has expired and this guarantee has been fully complied with. All journal bearings and journals are guaranteed by the contractor to run cool under ordinary loads for two months' service, after deliv-

ery of car to the Railway by the contractor and its coming into actual use, and all axles or journal bearings removed on account of heated bearings during the period of two months shall be replaced at the contractor's expense.

7. The Commission, in consideration of the premises, covenants with the contractor that the contractor from time to time and in all respects having fulfilled and performed the provisions of this contract (except the fulfillment of the guarantee, which is to continue as above provided,) on the contractor's part intended to be fulfilled and performed, will be paid for and in respect of each of the said workmen's cars so delivered as aforesaid the sum of five thousand four hundred and fifty dollars (\$5,450.00), payments to be made within thirty days after the delivery of each car.

In witness whereof the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the proper officers in that behalf.

Signed, sealed and delivered in the presence of HERBERT BOGGS.

# ANGLE BARS.

- Agreement made in duplicate this fifteenth day of August, 1905, between The Nova Scotia Steel and Coal Company, Limited, hereinafter called the Contractor, of the first part, and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the second part.
- 1. The Contractor agrees to furnish to the Commission free of all charges on cars at North Bay, Ontario, as hereinafter specified, six hundred and seventy-two tons of angle bars in strict compliance with the specifications and drawing hereto annexed for the price of one dollar and ninety cents per one hundred pounds f.o.b. cars at North Bay.
- 2. The said angle bars shall be so delivered one-half thereof in September and the balance in the month of October of the year 1905, time being agreed to be strictly of the essence of the contract.
- 3. The Contractor shall give written notice to the Commission by letter addressed to the Commission at its office in Toronto of the commencement of manufacture at least fifteen days in advance of such commencement and due notice of the resuming of manufacture from time to time after the same shall have ceased.
- 4. The written certificate of the Inspector appointed by the Commission's Engineer as provided for by said specifications certifying that the angle bars have been manufactured to his satisfaction in accordance with this contract, and the said specifications and drawing shall be a condition precedent to the

right of the Contractor to receive and be paid the price herein agreed to be paid for the same.

5. In case default shall be made by the Contractor in delivery of any of the said angle bars in accordance with the terms of this contract the Commission may without notice cancel the contract, but the Contractor shall nevertheless remain liable for all loss which may be suffered by the Commission by reason of the non-completion by the Contractor of this contract.

6. Cost of inspection provided for by the specifications shall be borne

by the Commission.

7. The Commission agrees to pay for said angle bars in Toronto funds for each shipment of the said angle bars within thirty days after the delivery thereof to the Commission at North Bay, and after presentation of invoice and the certificate of the Inspector that said angle bars have been manufactured to his satisfaction in accordance with this contract and specifications and drawing hereto annexed.

In witness whereof the said parties have caused these presents to be executed under their respective corporate seals and the hands of the proper

officers in that behalf.

## PASSENGER COACHES.

Articles of agreement made in duplicate this thirty-first day of August, one thousand nine hundred and five, between The Crossen Car Manufacturing Company, Limited, hereinafter called the "Contractor," and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission."

#### Witnesseth:

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the first-class coaches and baggage and mail car hereinafter referred to.

2. The Contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion and will well and duly build and complete in a perfect and workmanlike manner three first-class coaches and one baggage and mail car with all necessary appliances for use on the line of railway of the Commission in strict compliance with the specifications relating to the said first-class coaches and baggage and mail car respectively hereunto annexed and with the plans and drawings relating thereto (save and except that the Westinghouse Automatic Quick Action air brake apparatus in said specifications mentioned shall be furnished by the Commission subject to the said coaches and car being

properly equipped therewith by the Contractor) to the complete satisfaction of the Inspector and the Contractor will deliver the said first-class coaches and baggage and mail car duly completed to the Commission free on the railway tracks of the Commission at the Town of North Bay, such first-class coaches to be so delivered one in each of the months of January, March and April, 1906, and the said baggage and mail car in the month of January, 1906, time being agreed to be material and of the essence of this contract.

- 3. The Inspector shall be the sole judge of all work and material done and supplied under this contract and his decision on all questions in dispute with regard to any such work or material shall be final and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing which certificate shall be a condition precedent to the right of the Contractor to be paid therefor.
- 4. The Inspector and all persons from time to time authorized by him on that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy him that the same is being carried out and performed in accordance with this contract.
- 5. The acceptance and payment for any of the said coaches or cars by the Commission shall not be considered as any waiver of the obligations of the Contractor with reference to the others.
- 6. This contract shall not be considered as fully completed until the guarantee clause in the attached specifications respecting wheels, springs, axles, centres, tires, etc., has been fully complied with. The books or other records of the Commission shall be taken as final and conclusive evidence in respect of all matters mentioned in said guarantee.
- 7. The Commission in consideration of the premises covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled and performed the provisions of this contract (except the fulfillment of the guarantee which is to continue as aforesaid) on the Contractor's part intended to be fulfilled and performed will be paid for and in respect of each of the said first-class coaches the sum of eight thousand three hundred and fifty dollars and for and in respect of the said baggage and mail car the sum of four thousand nine hundred and eighty-five dollars, payments to be made within thirty days after the delivery of each coach and car.

In witness whereof the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the proper officers in that behalf.

# EXPRESS AGREEMENT.

Agreement made this thirty-first day of May, 1905, between The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, and The Dominion Express Company, incorporated by Special Act of the Parliament of Canada, 36 Victoria, Chapter 113, hereinafter called the "Express Company."

Whereas the Commission owns and operate a certain line of railway in the Province of Ontario extending at present from the Town of North Bay to the Town of New Liskeard.

And whereas the Commission in order to afford the public all reasonable express service upon passenger trains has agreed with the Express Company as hereinafter set forth.

Now therefore these presents witness that in consideration of the premises and of the mutual covenants and stipulations herein contained the parties have agreed with each other as follows:

The Commission on its part agrees:

- 1. To transport upon its passenger trains between all points on said line of railway all express matter in charge of the Express Company with as much promptness and despatch as is usual and reasonable and as the facilities of the Commission permit.
- 2. To furnish to the Express Company sufficient space upon all passenger trains for such transportation and for the convenient transaction of its express business to assign to the Express Company the usual separate room in its baggage car to be used jointly with the Canadian Express Company and when such space shall not be sufficient for the proper transportation and transaction of such express business to furnish separate cars for the Express Company's use, to keep such cars in good order and repair and to light and warm them when needed.
- 3. To carry upon it passenger trains the messengers of the Express Company with their safes, trunks and articles needed in doing the Express Company's business, the Express Company's officers and employees when travelling upon the Express Company's business, and express matter covered by the Express Company's franks (so far as such franks are lawful).

4. To provide and allow the Express Company free approach and access to its depots, stations, premises and trains and reasonable time to load and

unload express matter upon and from the trains.

5. To provide and allow the Express Company to use and occupy such rooms in its depots, stations and premises as may be necessary for the loading, unloading and transfer and storage of express matter, provided such occupancy shall not be detrimental to the business of the Commission and provided further that as to this and the next preceding paragraph it is agreed that unless and until the Commission shall have a station of its own at North Bay the Express Company shall make its own arrangements with the Canadian Pacific Railway Company for facilities for the transaction of the business of the Express Company with the Commission at North Bay, the intention being that the Commission shall not be under any obligation to the Express Company for such facilities at North Bay unless and until it shall have a station of its own at said point.

6. To allow the Express Company if it so desires to employ as its agents any of the station agents of the Commission at their respective stations, but on condition that the Express Company will at any time discharge any such agent from its employment at the request of the Commission. The Express Company is to be solely liable for the acts of such agents done by them within

the scope of their employment as employees of the Express Company, but not otherwise.

- 7. To assume all liability if any for the death of or personal injury to the agents or employees of the Commission when acting jointly for the Commission, and the Express Company as well as all liability if any for loss and for damage to shipments of express matter, money, bonds or valuables shipped by or on account of the Commission occasioned by accidents to trains on the railroad of the Commission.
- 8. To advance the interests of the Express Company and aid it to do a successful express business as far as consistent with its own interests and to provide and allow no express facilities of any kind upon its passenger trains either through or local upon the whole or any part of its lines of railway to any other person or company on more favorable terms than those granted to the Express Company.

The Express Company on its part agrees:

- 1. To carry on an express business over the line of the Commission and at the points reached thereby, to furnish to the public at such points as efficient an express service as may be reasonably required and to receive and forward all such express matter as may be offered to it by the public except such as of a dangerous nature; to extend and increase its express business as much as it can and to do all in its power consistent with its own interests to advance the interests of the Commission.
- 2. That it will not knowingly receive or put on board of any train any parcels, boxes or packages containing nitro-glycerine, dualine, gun powder or other dangerous combinations or explosive substances either solid or liquid.
- 3. To carry upon the lines of the Commission and upon all other lines operated by the Express Company so far as it is permitted to do so free of cost to the Commission the ordinary express matter of the Commission, including remittances of money to or from the agents of the Commission and any other shipments of money, bonds or valuables made by or on account of the Commission.
- 4. To hold and keep indemnified the Commission against any payments, charges or expenses for death of or personal injury to any of the officers, agents or employees of the Express Company while engaged in the discharge of their duties upon the trains or in the stations or otherwise on the premises of the Commission, except agents and employees of the Commission acting jointly for the Commission and the Express Company, and to assume all responsibility if any for the loss of or damage to the express matter in its charge, and to hold and keep indemnified and harmless the Commission from such loss or damage except loss of or damage to express matter shipped by or on account of the Commission and occasioned by accident to the trains on the railway of the Commission.
- 5. To render monthly accounts to the Commission of the gross revenue received by the Express Company from the transportation of and other services connected with the express business done by it upon the Commission's line of railway. For the purpose of this agreement such gross revenue shall be ascertained thus: The gross revenue for matter carried wholly upon the Commission's line of railway shall be deemed to be the whole amount received by or on account of the Express Company for such matter not including the charges of other express lines. The gross revenue derived from express matter carried partly upon the Commission's line and partly upon other lines shall be deemed to be that proportion of the whole amount received by or on account of the Express Company which the number of miles

which the matter is carried over the line of the Commission bears to the whole number of miles which the express matter is carried. Before such prorating is done there shall be deducted from the whole amount received all charges of other express lines and of all bridge and ferry tolls.

- 6. To pay to the Commission forty-five per cent. of the gross revenue received by the Express Company from the transportation of and other services connected with the express business done by it on the Commission's line as above defined, such payment to be made at the office of the Commission in Toronto on or before the fifteenth day of each month in respect of the preceding calendar month. During the pleasure of the Commissioners the Express Company may have as its messenger or messengers any of the conductors or baggagemen of the Commission whenever such employment shall not, in the judgment of the Commissioners, conflict with the duties of the Commission or messenger.
- 7. To afford the Commission or its representatives from time to time in that behalf every opportunity at any time upon reasonable notice to examine the books, papers, records and weigh bills pertaining to the business done under this contract and the manner in which the Express Company prepares the statement of gross earnings under this contract, and shall give the Commission all reasonable safeguards and checks upon the correctness of said accounts.
- 8. That 'all freight and express matter taken by the Express Company shall be loaded and unloaded by its employees and at all times handled by its employees in such a manner as to avoid unnecessary delay to the passenger trains of the Commission.

It is specially agreed between the parties hereto as follows:

- 1. The delivery by the joint agent of the parties hereto to the exprss messenger of the Express Company on the train of money packages belonging to or consigned to the Commission shall constitute delivery thereof to the Express Company and the delivery by the express messenger on the train to such joint agent of money packages addressed to the Commission shall constitute delivery thereof to the Commission.
- 2. That if the said line of railway shall be extended beyond New Liskeard or if any other lines of railway shall be operated by the Commission during the continuance of this agreement the Express Company shall be given the same privileges and facilities for the transportation of its business thereon as are herein granted on the present line of railway of the Commission in so far as the Commission can legally grant the same.
- 3. The employees of the Express Company while engaged in the transaction of the business herein provided for on the trains and at the stations of the Commission or otherwise on the premises of the Commission shall be subject to all the rules and regulations that may from time to time be made by the Commission or its representatives in that behalf for the safe conduct and management of its business.
- 4. That although the Express Company may employ and use the Commission's agents as above specified as agents of the Express Company and may pay such agents by commission or otherwise, and although the Commission may to a greater or less extent be benefited thereby the Commission is in no way liable to the Express Company or to the public for any loss of any money or any other packages for the charges thereon nor for any damage sustained by the Express Company of any kind whatsoever by reason of the negligence or otherwise of the agents or messengers so employed.

5. This contract shall take effect on the first day of June, 1905, and remain in force for a period of two years from that date and thereafter until ninety days after either party shall give notice in writing to the other of its desire to terminate the same.

As witness the corporate seals of the said parties and the hands of their

respective officers in that behalf.

Signed, sealed and delivered in the presence of A. J. McGee, as to signature of C. B. Smith and H. W. Pearson.

# GILLIES AGREEMENT RE TELEPHONE LINE.

Agreement made in duplicate this fifth day of August, 1905, between Gillies Brothes, Limited, herein called "Gillies Bros." of the first part, and The Temiskaming and Northern Ontario Railway Commission, herein called the "Commission," of the second part.

Whereas Gillies Bros. have requested the Commission to permit them to run a telephone wire along the telegraph poles belonging to the Commission on its line of railway passing through the timber limits of Gillies Bros. for use by their fire rangers, which the Commission has agreed to do upon the following terms and conditions which are hereby agreed to by said Gillies Bros.:—

1. The said wire shall be placed low enough on said telegraph poles so as not to interfere with the copper telephone system when the Commission is about to install. Should it be discovered at any time after said telephone line has been erected by said Gillies Bros., that it in any way interferes with the Commission's telegraph or telephone lines, said Gillies Bro. shall make such alterations and changes therein as the Commission's Chief Engineer may direct.

2. Said Gillies Bros. agree not to connect said telephone line with any other telephone system except the Commission's telephone system when

completed.

3. Gillies Bros. shall not extend the use of the instrument or connecting lines erected by them to other individuals except their servants upon their business, nor shall they be used for any tolls or consideration to be

paid by any person.

4. The Commission may any time without previous notice or other formality terminate Gillies Bros.' rights to use the Commission's telegraph poles for their line of wire and may without notice cut the said wire so as to prevent said Gillies Bros. using the same and may remove the wire from its telegraph poles.

5. Said Gillies Bros. shall have no claim whatsoever against said Commission for any injury to said telephone line or any loss sustained by reason

of the acts or neglect of the Commission its servants, agents or workmen, whether wilfully or negligently done or otherwise howsoever.

Witness the corporate seals of the parties hereto under the hands of their proper officers.

## TELEGRAPH AGREEMENT.

Memorandum of Agreement made this thirty-first day of August, 1905, between The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission of the first part, and The Canadian Pacific Railway Company, hereinafter called the Company of the second part.

1. Whereas the Commission own and operate a system of telegraph lines for the public as well as for its own business and the Commission propose to operate telegraph lines on its line of railway for similar purposes. It is mutually agreed between the Commission and the Company that in consideration of the interchange of telegraph business one with the other that through rates shall be made between points on the one system and points on the other which through rates shall in no case be less for the combined distance of transmission on the two lines than the Company's telegraph rates for corresponding on its own lines without the consent of both parties.

2. It is further agreed that the through rates between stations on the Commission's railway and all points on the company telegraph system and its connections shall be twenty-five cents per ten words and one cent for each additional word more than the rate to and from North Bay, Ontario,

except as per the following two paragraphs.

3. The rate between the Commission's officers and offices in sections two and three on the Company's telegraph lines will be fifty cents per ten words and three cents for each additional word. Said section two comprises all offices on the main line west of North Bay to and including Nipigon, Ontario, section 3 comprises all offices on the branch line from Sudbury, Ontario, to Sault Ste. Marie, Michigan. Little Current, Manitoulin Island, although shewn in section 3 in the Company's tariff book, is not one of the Company's offices.

4. The rate between points on the Commission's railway and points on the Company's railway will be twenty-five cents per ten words and two cents for each additional word if the railway mileage between said offices is one

hundred miles or less.

5. Tolls on telegrams referred to in the last preceding paragraph to be divided equally between the Commission and the Company. On all other telegrams not covered by this exception the Commission's proportion of the tolls will be twenty-five cents per ten words and one cent for each additional word.

5. The rate on newspapers, special despatches will be twenty-five cents per one hundred words more than the press rate from North Bay, these additional tolls to be the Commission's proportion. Rate on cablegrams to be the same as from North Bay, the Commission to receive one cent per word as it's proportion. The Company will deliver all telegrams received at North Bay from points on the Commission's railway. The Commission will allow the Company twenty per cent. of their tolls on all business handled at North Bay that is not transferred to the Company's lines.

7. The Company will supply the Commission with battery power at North Bay free of charge and furnish the required number of tariff books and circulars relative to tariffs at cost price. Message and other telegraph forms for use on the Commission's railway will be supplied by the Com-

mission.

8. The Commission will put its wire or wires into the Company's office at North Bay and provide the necessary instruments for the same. The Company will provide operator and messenger.

9. The Commission will maintain its own lines and instruments.

10. The Commission shall have the right to erect its own telephone wires on the Canadian Pacific Railway Company's poles between Nipissing

Junction and the Commission's offices at North Bay.

11. In consideration of the foregoing reduced rates and concessions the Commission agrees that all paid telegrams will be handled by the Company's telegraph agent at North Bay, who will transfer business for points not reached by the Company's telegraph lines or connections to any telegraph or telephone company reaching such points.

12. The joint earnings shall be divided monthly between the parties hereto, each reporting to the other in the manner usual between connecting

telegraph companies.

13. Each party shall be responsible to the other for any error, delays, non-delivery, or any act or omission resulting in claims for damage3 that may occur in its lines in the case of messages received by the other for transmission over the joint lines, and each party shall be responsible for any delays, errors or omissions in the case of joint business received by it for points on the lines of the other which delays, errors, or omissions, have resulted before delivery to the other.

14. This agreement shall remain in force for ten years from the date

hereof.

Witness the corporate seals of the parties hereto under the hands of their proper officers.

### EXTENSION OF TIME TO CONTRACTOR.

This Indenture, made the fourteenth day of September, one thousand nine hundred and five, between Allan Ranald Macdonnell of the City of Montreal, hereinafter called the Contractor, of the first part; the Hon. William Harty of the City of Kingston, Manufacturer, and Thomas Long of the City of Toronto, Merchant, hereinafter called the Sureties, of the second part, and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the third part.

Whereas the contractor has applied to the Commission for a further extension of time in addition to the extension granted under the terms of the agreement of the 19th day of November, 1904, to complete the work called for by a certain contract between him and the said Commission dated the 3rd day of October, 1902, for the construction of the Commission's line of railway from North Bay' to New Liskeard.

And whereas the said sureties and one John J. Long (since deceased) were the sureties for the contractor for the due completion of said contract on the terms of their bond to the said Commission attached to said contract and are also the sureties for the said contractor for the due completion of a certain other contract between him and the said Commission dated 7th June, 1904, for the construction of an extension of the said line of railway from New Liskeard northwesterly, a distance of eighty to one hundred miles, on the terms of their bond to the said Commission attached to said last mentioned contract and the said sureties have joined the contractor in such request for an extension of time.

And whereas the Commission has agreed to extend the time for the completion of said work subject to the terms hereof.

Now these presents witness that the agreement between the parties in the premises is as follows:

- 1. The 15th day of December, 1905, is hereby substituted for the 15th day of August, 1905 (the time fixed by said first extension agreement of the 19th day of November, 1904) as the time for the completion of the work called for by the said contract of the said 3rd day of October, 1902.
- 2. The operation of the said road by the Commission meantime shall not be deemed to be or constitute any acceptance of the same or any part thereof as being complete as required by said contract of the 3rd day of October, 1902.
- 3. The contractor shall be bound to carry on and complete his work without interfering with the operation of said line of railway and he and his servants and employees and his trains, engines, and other equipment and also all sub-contractors and their servants and employees and their trains and other equipment, shall in all respects be subject to the orders and directions of the officers, agents and servants of the Commission engaged in or connected with the operation of the said road, and shall be bound to comply with and conform to all the orders, regulations and directions of the Commission and of its officers, agents and servants engaged in or connected with the operation of the said road, the true intent and meaning of these presents being that in consideration of such extension of time and of the other terms hereof the contractor shall complete, finish and fully do and execute the work called for by the said contract subject to the operation of the said road by the Commission and without interference with the operation thereof except such as shall be permitted or authorized by the Commission through its officers duly designated and accredited in that behalf.

- 4. The contractor shall be charged with and shall pay such proportion of the cost of maintenance of the right of way, track, and equipment of any portion of the said road over which the trains, engines and workmen of the contractor or of any sub-contractor shall pass or be employed or engaged until the final completion of the said work and until the acceptance thereof as complete by the Chief Engineer of the Commission as the said Chief Engineer shall determine to be fair and reasonable, having due regard to the use of said right of way, track and equipment for operation and for purposes of construction respectively, and the decision of the Chief Engineer as to such proportion of the cost of maintenance payable by the contractor as aforesaid shall be absolutely final, binding and conclusive upon the parties, and the amount so adjudged to be due by the contractor may be deducted from time to time by the Commission from any moneys payable by the Commission to the said contractor.
- 5. While the said contractor is engaged in completing his work under said contract of the 3rd day of October, 1902, within the time hereby limited in that behalf and under the said contract of the 7th day of June, 1904, within the time limited in that behalf by the said last mentioned contract, the Commission will transport and carry for the contractor all coal in car loads required by him or any of his sub-contractors in connection with the work of construction under said contracts respectively at the rates fixed by said first agreement of extension of the 19th day of November, 1904, and will also, until the 15th day of September, 1905, allow the said contractor and all subcontractors under him the special rates for men, material and supplies provided for by said agreement of the 19th day of November, 1904, and all unpaid accounts of the contractor against the Commission for transportation over portions of the said line of railway north of New Liskeard still in the hands of the contractor shall be rectified so as that the Commission shall pay and allow for such transportation the same rates as are under said agreement of the 19th day of November, 1904, payable by the contractor to the Commission in respect of transportation over portions of said lines south of New Liskeard and the said accounts shall thereupon be passed by the Chief Engineer for payment.
- 6. From and after the 15th day of September, 1905, the Commission shall handle the contractor's traffic (other than coal in car loads) and the contractor shall handle the Commission's traffic at rates quoted by the Commission's Traffic Manager's standard or special tariffc governing similar traffic on part of the road being operated by the Commission, which tariffs are the tolls charges to the general public.
- 7. The Commission shall at all times during construction be entitled to free transportation from the contractor over portions of the road not operated by the Commission, for the special car of the Commission's Chief Engineer, and for all officials and employees of the Commission travelling over any portion of the line under the control of the contractor on the business of the Commission, and the contractor shall keep the Commission's Chief Engineer supplied with a book of passes so that the Engineer shall be able to grant such passes as occasion may require.
- 8. The contractor shall from time to time, so long as any portion of the said line of railway on which the rails have been laid shall be under his control, promptly transport all traffic which shall be offered to him irrespective of what the ownership, destination or origin of such traffic may be, and the rate of tolls which shall or may be charged or collected by the contractor for the transportation and delivery of such traffic or otherwise connected

therewith shall be such as shall from time to time be authorized and approved of in writing by the Traffic Manager of the Commission.

- 9. The contractor shall until the final completion of all work under both of said contracts route over the railway of the Commission via North Bay all his own traffic from outside points and procure all sub-contractors under him to similarly route all their traffic from outside points whether of men, materials, supplies or otherwise.
- 10. The contractor shall settle and pay weekly to the local agents of the Commission all charges on freight delivered by the Commission to the contractor.
- 11. The provisions of this agreement shall continue binding upon the said parties in respect of all matters arising out of or connected with the said contract of the 7th day of June, 1904, after as well as before final completion of the work under said contract of the 3rd day of October, 1902, and subject to the amendments made by the said agreement of the 19th day of November, 1904, and by these presents the said contracts of the 3rd day of May, 1902, and the 7th day of June, 1904, and the bonds of the said sureties for securing due performance of said contracts respectively shall be and remain in full force, virtue and effect and the sureties shall be and continue liable on said bonds for the due performance of the said respective contracts as hereby amended, and all rights, remedies and powers of the said Commission and of the Chief Engineer thereof conferred, given or reserved in and by said contracts and bonds are hereby expressly reserved subject only to the amendments aforesaid.

In witness whereof this agreement has been duly executed by the Commission under its corporate seal and the hands of its Chairman and Secretary and duly signed, sealed and executed by the other parties thereto. Signed, sealed and delivered.

## News Service.

This Agreement, made this thirtieth day of December, A.D. 1905, between The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the one part, and The Canada Railway News Company, hereinafter called the Contractor, of the other part.

Witnesseth that the said parties have and they do hereby covenant, promise and agree each with the other in manner following, that is to say:

1. In these presents the words "Commission" and "Contractor" shall include the parties and their respective successors and assigns. The word "Superintendent" shall mean the Superintendent having jurisdiction over the railway of the Commission, and the word "Secretary" shall mean the Secretary of the said Commission.

- 2. The Commission hereby grants to the contractor for the period of one year, to be computed from the first day of January, 1906, the exclusive right to license and privilege (except as otherwise hereinafter provided) of selling upon the passenger trains operated by the Commission on its line of railway between North Bay and New Liskeard newspapers, books, periodicals and publications, nuts, fruits, and confections of all kinds, cigars, stationery and fancy goods, and such other articles as are usually sold on railway trains.
- 3. The contractor shall in no case allow or suffer to be exhibited, sold or offered for sale or distribution on any of the trains of the Commission any book, paper, publication or other article which may be objectionable to the Superintendent, who shall be the sole judge as to what books, papers, publications or other articles infringe this provision and any book, publication or article so infringing shall be at once removed from off the trains of the Commission.
- 4. All papers, books, periodicals, and other articles offered for sale under this agreement shall be sold at reasonable prices, which shall be subject from time to time to the approval and revision of the Superintendent, and it shall be deemed a violation of this agreement for any agent of the contractor to demand or receive a higher price than so approved for a like or similar article.
- 5. The Commission shall provide for the contractor at such points on its line of railway as the Superintendent may designate suitable and necessary room for the storage of the current stock of goods to be sold by the contractor's agent on the Commission's trains, but such goods shall during the time they are in or about any of the Commission's stations or premises be at the sole and exclusive risk of the contractor as to damage by fire or otherwise howsoever no matter how caused.
- 6. The contractor shall not employ as its agent any person who is not of good moral character, and no agent who, in the opinion of the Superintendent, is guilty of any breach of propriety, courtesy or good conduct towards any passenger, officer or employee of the Commission shall be retained in the contractor's service. Should any such agent or employee of the contractor so conduct himself as in the opinion of the train conductor to be offensive to or annoy passengers, or be guilty of conduct which would justify the removal of a passenger, the train conductor may at once terminate his services for the trip and remove him from the train. Any agent or employee of the contractor engaged in its service under this agreement shall be promptly dismissed from such service on the request of the Superintendent.
- 7. All train agents of the contractor shall while on duty wear a neat uniform of blue cloth, including cap and badge, which shall be furnished by the contractor at its own cost. The badge shall be worn in such a manner as to be conspicuously exposed to view at all times and shall display the name of the contractor and also in distinct figures large enough to be readily seen the number by which the particular agent is designated.
- 8. It shall not be permissible for any train agent of the contractor to pass through any sleeping, parlor or dining car on the train on which he may be engaged in such a manner or at such time as to disturb or annoy the occupants, neither shall he sit or loiter therein. The train conductor shall in each case decide when any such agent may or may not pass through any such car.
- 9. No agent of the contractor shall deposit or leave packages of books, papers, or other articles carried by him for sale upon any of the seats of coaches in which passengers are carried, nor shall he at any time occupy a

seat in any coach to the exclusion or inconvenience of any passenger, nor importune passengers to purchase, nor in trying to make sales annoy passengers by obtrusive persistence.

- 10. The necessary passes with the usual conditions endorsed thereon for the proper officers and for the train agents of the contractor engaged in selling articles on trains (one agent only to be allowed on each train) shall be provided by the Commission during the continuance of this agreement.
- 11. The train supplies of goods for sale by the contractor's train agents upon trains of the Commission will be transported by the Commission at the sole risk of the contractor upon the respective trains upon which they are being offered for sale in baggage cars in packages not exceeding two hundred pounds in weight free of charge, but the contractor shall in no case suffer or allow to be included therein any articles or supplies for agents engaged upon other railways nor any other articles or materials whatever except such as are properly contractor's supplies for sale on the Commission's trains, nor shall the contractor nor any of its train agents be allowed to carry on any of the trains of the Commission parcels or any articles whatever for the accommodation of any person or persons whomsoever.
- 12. The contractor shall not use the right, license, or privilege hereby granted or any train privileges incident thereto for any other business or purpose than those herein specified, nor shall the granting of the same to the contractor be construed as restricting the Commission from selling in its dining cars, buffet or café-parlor cars in connection with its dining car service, if any, all articles which it is customary to sell in connection with such service.
- 13. The contractor hereby covenants to and with the Commission that it shall and will fully protect, indemnify, save harmless and defend the Commission from and against all loss, costs, charges, damages and expenses which the Commission may at any time hereafter bear, sustain, suffer or be put to for or by reason or on account of any injury, loss or damage to the person or property of any of the officers, agents or employees of the contractor which may occur upon or about any train, station, or premises of the Commission, whether resulting in death or otherwise, and also of and from all liability for any injury, loss or damage to stock, materials, effects or supplies of the contractor while in the course of transportation on any trains of the Commission or while on the premises or in the custody of the Commission, whether such injury, death, loss or damage shall be the result of the negligence of the Commission or any of its servants, agents or employees.
- 14. The contractor hereby authorizes and empowers the Commission or its solicitors to defend, settle or compromise as it may deem expedient any claim, suit or action or proceeding of any nature or description which may be brought against the Commission for or on account of any such injury, death, loss or damage to persons or property mentioned in the next preceding paragraph, and the contractor hereby agrees to ratify and confirm all the acts of the Commission or its Solicitors in that behalf and to pay to the Commission on demand any costs or disbursements incurred in defending settlement or compromising any such claim, suit or proceeding, and that the same, with any damage to settled, or agreed upon by the Commission or its Solicitors, and any claimant, or the amount of any judgment recovered against the Commission in the premises, will be paid by the contractor to the Commission forthwith on demand and in default of payment of the amount thereof the Commission may at once sue for and recover the same from the contractor as money paid for its use.

- 15. In consideration of the premises and of the rights, licenses and privileges hereby granted, the contractor covenants and agrees to pay to the Commission for the year covered by this agreement the sum of six hundred dollars, payable in equal monthly instalments in advance on the first day of each month, beginning with the first day of January, 1906, to the Treasurer of the Commission at the office of the Commission in the City of Toronto.
- 16. Should the contractor at any time make default in payment of any such instalments hereby agreed to be paid or fail to fully carry out and perform in all respects any of the covenants and agreements on its part agreed to be kept observed and performed, this agreement may, at the option of the Commission, be declared at an end and after five days' notice in writing under the hand of the Secretary to the contractor of the intention to terminate this agreement, all the rights, licenses and privileges hereby granted shall cease, determine and be at an end, and thereupon the Commission may, at the expense of the contractor, and without incurring any liability for damages thereby sustained, cause all advertising matter and property of the contractor of every nature or kind whatsoever to be removed from all the stations, buildings, premises and trains of the Commission, or take such other or further action for the enforcement of the provisions of this agreement as to the Commission may seem advisable, and all passes granted to the contractor or its agents shall forthwith become cancelled; provided, however, that no such act on the part of the Commission shall entitle the contractor to a return of any moneys theretofore paid under this agreement nor impair the right of action of the Commission for recovery of any and all damages on account of the non-payment by the contractor of any instalment herein agreed to be paid or on account of the non-performance or breach of any of the terms and covenants of this agreement. Failure on the part of the Commission to exercise any of the rights and privileges based upon any default under the terms hereof or waiver of any such default shall not debar or preclude the exercise by the Commission of any of the rights or privileges based upon any subsequent default under the terms hereof.
- 17. None of the rights and privileges hereby granted shall be sublet, transferred or assigned by the contractor without consent in writing of the Secretary being first had and obtained, and the exercise and enjoyment hereof by the contractor shall be subject at all times to the supervision, direction and control of the Superintendent and Secretary as herein provided.
- 18. Each of the parties hereby covenants with the other to observe, abide by, perform and keep the terms and provisions of this agreement in all respects according to the spirit, true intent and meaning thereof.

In witness whereof the parties have caused these presents to be executed under their respective corporate seals and the hands of the proper officers in that behalf the day and year first above written.

Signed, sealed and delivered in presence of Witness:

# FIRST REPORT

# NIAGARA DISTRICT

To His Honour,

The Lieutenant-Governor of Ontario:-

The undersigned Commissioners appointed by your Honour by Commission bearing date the 26th day of January, 1906, beg leave to submit the following report, as their first report upon the matters authorized and directed to be enquired into.

By the said Commission your Commissioners were authorized to adopt the work of the Commissioners appointed by your Honour by Commission bearing date the 5th day of July, 1905, which was not completed on account of the indisposition and resignation of one of your Commissioners, the consequence of which was that, as the powers thereby given were joint, the remaining Commissioners were not authorized to act further in the premises. Your Commissioners accordingly adopted the work of the former Commissioners, and have embodied the results in this report.

Your Commissioners made enquiries and obtained information of from various sources. Although they sat formally on several occasions, they did not find it necessary to take evidence upon oath, inasmuch as the information which they received was afforded to them freely from original and authentic sources, without the necessity of putting the parties on oath, whereby a great deal of time and a large amount of expense were saved.

Your Commissioners, also, bearing in mind that the details of business matters of the several persons and corporations who supplied information should not be made public, have forborne to give in detail the names of their informants, or the particulars of the information acquired from them, but have used the knowledge and facts so acquired for the purpose of computation and comparison, and for the production of the results which they now have the honour to report.

The details, and scientific and technical information obtained. have been tabulated and arranged by the Engineer employed by your Commissioners, and are contained in his report which is submitted as an appendix hereto.

The following are the matters upon which your Commissioners were authorized and directed to report, with the report upon each subjoined:—

#### DEMAND FOR ELECTRIC POWER.

(1) "The present and probable demand for hydraulic and electrical power in the various districts capable of being supplied from the different water-powers within the jurisdiction of the Province of Ontario."

In this first report your Commissioners deal only with that part of South-Western Ontario which, roughly speaking, lies south of the latitude of Toronto, but including Toronto, and which, for the purposes of this report, may be called the Niagara District

The demand for electrical power will in almost all cases, under present conditions, be limited or regulated by the cost of electricity as compared with that of steam, gas or other local source of power. The cost of electricity is dependent upon the distance transmitted and the quantity transmitted. As it is only feasible to transmit the power in large quantities, trunk transmission lines capable of carrying large quantities must be constructed at the outset, and, therefore, the cost increases with the distance, and a point is eventually reached at such a distance from the generating station that electrical power can no longer compete with steam or other local power.

Again, the exhaust steam, and heat, from the steam plant of some factories is used in the process of manufacture, and it could not be expected that electricity would be adopted by manufacturers of this class for power only, as their production of steam and heat for manufacturing purposes, apart from power, would increase rather than diminish their expenses; and in many instances waste material is used in the production of steam; such industries have been excluded from a consideration of the extent of the market at present in sight.

The capital cost of abandoning steam plants would also in many cases be considerable, and the ability of small users of power to bear this loss must always be a factor in the finding of a market.

In order to ascertain the probable market, however, your Commissioners caused enquiries to be made in the various manufacturing centres in the district, with the following results: they are satisfied that a market for at least 50,000 horse-power could be obtained within 'a reasonable radius of Niagara Falls, as soon as transmission lines can be constructed, and this could be increased to at least 100,000 H.P. within five years thereafter. This will mean that power can be distributed at the lowest rates shown in Part VI. of the report of the Engineer employed by your Commissioners, which is submitted as an appendix hereto; and it can be quite reasonably expected that beyond that a still greater amount of power can be ultimately distributed, thereby still further decreasing the cost of power to every consumer, provided that this distribution is made upon the basis of a return upon the cost of operating and distributing. But experience shows that, where the distribution is controlled by private corporations the distribution area remains restricted.

From the information obtained by your Commissioners they are able to say that the trend of affairs with private corporations in other localities has been, not to compete for business, and thus keep down the prices to consumers, but to amalgamate or otherwise destroy competition, and then to fix the prices according to the slight saving which they may be able to induce particular customers to make. The natural result of this has been to force individual consumers, where the circumstances justified it, to instal generating plants of their own, or to adhere to existing methods, rather than to place themselves at the mercy of large combinations formed for the purpose of preventing competition and keeping up the price of electrical power; and the same result, of course, occurs where there has never been a competing company. Specific illustrations of this are found in the cities of Montreal, Buffalo and Hamilton.

On the other hand, in the City of Ottawa, where the municipality secured a distributing plant, in anticipation of an attempt to throttle competition by a combination of companies, lower prices prevail, which are based on the cost of production.

### UNDEVELOPED LOCATIONS.

(2) "The location, capacity, and capital cost of development of the various water-powers within the legislative jurisdiction of the Pro-

vince of Ontario at present undeveloped but whose development we required to supply the present and probable needs of the surrounding districts, and to ascertain the probable cost of the attendant transmission plant necessary to the utilization of electrical and hydraulic powers to be provided from the aforesaid water-powers within the respective surrounding districts."

A systematic tabulation of the various water-powers of the Province of Ontario based upon surveys, gaugings, and meterings made by your Commissioners' engineers, supplemented by information derived from other sources is still in progress, but is not sufficiently advanced to make it useful and accurate in its present state; nor is it needed in considering the Niagara District; and your Commissioners did not deem it necessary to delay making a report on that account, inasmuch as the information obtained from partly developed sources is used for this district, and does not depend upon the results of surveys of the undeveloped sources of the Province.

In the developed and partly developed Niagara District, however, they have ascertained the cost of transmission lines, and this information is given in the report on Clause 5, below.

## RATES AND PRICES.

(3) "To ascertain the rates or prices that would require to be charged the various classes of consumers of hydraulic or electric power within the respective districts in order to meet all expenditure of maintenance and operation."

The ascertainment of the rates that would require to be charged, in order to meet expenditure of maintenance and operation, is based upon the cost of necessary plant for future calls upon it, original cost of construction, cost of maintenance and operation and the probable market for electrical power ascertained from local enquiries.

In order to ascertain the cost of delivering electrical power in large quantities at particular distances, your Commissioners have made computations with respect to all the municipalities (as localities and not as corporate bodies) which could be conveniently supplied from Niagara Falls, numbering in all thirty-nine. These are included in several divisions set out in Part I. of the Engineer's report; and the rates or prices for such delivery are shown in Part VI. of the Engineer's report.

Your Commissioners call attention to the fact, however, that when electricity is delivered at a municipal sub-station as above, the cost of distribution amongst the consumers within such municipality must be added to this price in order to determine the cost to the individual consumer.

In Part VI. of the Engineer's report, Table XXX., will be found estimates of the cost of supplying consumers in the neighbourhood of such sub-stations computed according to quantity and distance.

In order to ascertain the cost to the consumers themselves your Commissioners have ascertained the prices at which electricity could be delivered to consumers at four typical points, namely: St. Thomas, Berlin, Galt and Toronto. These rates are set out in Part VII. of the Engineer's report.

## SAVINGS.

(4) "To enquire into and ascertain the annual savings accruing to the consumers in the various districts aforesaid by the substitution of the rates or prices in the next preceding paragraph for the rates paid at present in the said districts so far as the Commissioners may be able to ascertain or estimate them."

The estimated savings in the purchase of power that would result from the charging of prices or rates based on actual cost, as ascertained and shown in the next preceding part of this report, has been worked out for the City of Toronto, as typical of the other cities affected, and are shown in Part XIII. of the Engineer's report.

# CAPITAL COST OF UNDERTAKING.

(5) "To enquire into and ascertain the cash capital cost of the hydraulic and electrical power undertakings of existing companies located within the Province of Ontario; the capacity and state of development thereof."

While your Commissioners obtained the present cash capital cost of several existing undertakings, they found these undertakings in such an undeveloped or partially developed state, that a statement of the capital cost at the present time would serve no useful purpose, inasmuch as the progress made in a short time towards completion of the works would render the figures quite useless.

From the information obtained, however, and allowing a reasonable estimate for completion, your Commissioners were able to ascertain with considerable accuracy the respective costs of construction of generating plants situate at Niagara Falls, having the respective capacities of 50,000, 75,000 and 100,000 horse-power.

The detailed report upon this will be found in Part V. of the Engineer's report.

# POWER SUPPLIED AND UNDER CONTRACT BY THE EXISTING COMPANIES.

(a) "The quantities supplied and contracted for and the rates charged and to be charged under such contracts by these companies for hydraulic and electrical power."

The quantities of power supplied and contracted for cannot at present be ascertained with accuracy.

By the agreements made between the Commissioners of the Queen Victoria Niagara Falls Park and the several power companies which are constructing or operating in the Park, the companies are bound to make half-yearly to the Park Commissioners a verified statement of the electrical horse-power generated, used, and sold or disposed of during the preceding half-year. Upon application to the Park Commissioners for the information to be derived from such returns, it was discovered that no such returns had ever been made to the Park Commissioners. Your Commissioners would recommend that the performance of the obligation to make returns, required by these agreements, should be insisted on, as they would furnish an excellent record of the progress of development, and as they are absolutely necessary for the purpose of enabling the Canadian consumer or prospective consumer to ascertain whether there is power available for him, and whether the power companies are adhering to, or are in a condition to adhere to, their agreement to dispose of at least one-half of their output amongst Canadian consumers.

The information required by your Commissioners was partly supplied as follows: The Hamilton Cataract Power, Light and Traction Company, and the Canadian Niagara Power Company, stated to your Commissioners the amounts of power generated and used or disposed of by them.

The Electrical Development Company of Ontario is not yet generating power, but they have made contracts for the delivery of power in the City of Toronto. Through one of their chief officers they declined to give any information respecting the same, without offering any reason for their refusal, which your Commissioners deemed a valid or even a plausable one. Your Commissioners recommend that the delivery of the verified statement of the amount so disposed of, which the company is obliged to make to the Park Commissioners under their agreement should be insisted upon. This information, which was, in your Commissioners' opinion, intended to be kept on record in the office of the Park Commissioners, would then be available to the public at any time.

The Ontario Power Company is developing electrical power, and is disposing of it in the United States of America. This company, through its solicitor and counsel, refused, without any valid reason, to afford any information to the Commission. This company is bound to make the same verified returns of the quantities generated and disposed of to the Queen Victoria Niagara Falls Park Commissioners; and your Commissioners make the same recommendations with respect to action to be taken as in the case of the Electrical Development Company.

The quantities actually supplied and contracted for by other companies are set out in the Appendix, Part IV. of the Engineer's report.

By the same agreements all the power companies constructing and operating in Queen Victoria Niagara Falls Park are bound, whenever required by your Honour in Council, to make a return of the prices charged for electricity or power, verified under oath by a chief officer of the company.

Your Commissioners ascertained that no requisition had been made by Order-in-Council; and, although they are of the opinion that the prices should be disclosed in the returns to the Park Commissioners, they verbally recommended to your Honour, and now recommend that the companies should also be required to make the returns to your Honour which they have agreed to make on demand.

The Ontario Power Company through their solicitor and counsel, and the Electrical Development Company through one of their chief

officers, refused to inform your Commissioners of the prices charged by them, and your Commissioners would recommend that the returns required to be made should be insisted upon.

Prices or rates charged in various cities in the Niagara District are set forth in the Engineer's report, Part X. For the purposes of comparison, your Commissioners have also set out in the same tables prices charged in Montreal, Ottawa and Buffalo, which are believed to be accurate.

## APPRAISEMENT OF UNDERTAKING.

(b) "The actual present value of the said undertakings, or such of them as may be required, after making such fair and reasonable allowance for existing conditions as in the judgment of the Commissioners seems necessary or expedient."

Your Commissioners found it impracticable to make a fair appraisement at the present time of the undertakings in question, namely, the various Niagara generating plants, because they are in different stages of development, and their appraisement in the conditions in which they are at the present moment would not be useful. But, as before mentioned under clause (5), an estimate has been set forth in Part V. of the Engineer's report giving the estimated cost of similar developments completed and ready for delivering 50,000, 75,000 and 100,000 horse-power, respectively.

(c) "The estimated capital outlay, if any, necessary to complete these undertakings."

Your Commissioners, for the same reason, have not stated the estimated expenditure necessary to finish the undertakings now in course of construction at or near Niagara Falls; but they have included these estimates in the estimate of complete generating plants under the first part of this branch of the report.

All of which is respectfully submitted.

(Sgd.) ADAM BECK,

Chairman.

(Sgd.) GEO. PATTINSON.

(Sgd.) John Milne.

Toronto, April 4, 1906.

# FNGINEER'S REPORT

ON

THE GENERATION, TRANSMISSION AND DISTRIBUTION OF ELECTRIC POWER

# HONORABLE ADAM BECK,

CHAIRMAN OF THE HYDRO-ELECTRIC POWER COMMISSION:

DEAR SIR,-

Herewith find my report on the Niagara District. The report deals with the present demand for power within economical transmission distance of Niagara Falls and the cost of generating, transmitting and distributing electric energy within this area.

Yours respectfully,

CECIL B. SMITH,
Chief Engineer.

TORONTO, CANADA, MARCH 30TH, 1906.

# PART I.

## GEOGRAPHICAL SUBDIVISIONS. .

In studying the question of the distribution of Niagara Power throughout Southwestern Ontario, due weight has been given to schemes outlined for the same during recent years by power companies and various individuals interested in the matter, and the accompanying map indicates what is considered to be the most suitable distribution system, and the one adopted for the purposes of this report.

In order to give proper regulation it has been found necessary to select certain groups of power centres, as being independent of other groups, the transmission being distinct throughout the entire route from Niagara, except as regards right of way and telephone line, provision, however, being made, by interswitching stations at Hamilton and St. George, for interchanging loads, for night repairs between these points and Niagara Falls.

The groups decided upon are as follows:

Division i. Hamilton and Dundas.

DIVISION II. Toronto, Milton, Brampton, Georgetown and Orangeville.

DIVISION III. Brantford, St. George, Galt, Preston, Hespeler, Guelph, Berlin, Waterloo, Baden, New Hamburg, Tavistock, Stratford and St. Mary's.

DIVISION IV. Paris, Woodstock, Ingersoll, Tillsonburg, London and St. Thomas.

DIVISION v. Windsor, Walkerville, Wallaceburg, Dresden, Chatham, Thamesville, Bothwell, Glencoe, Strathroy, Alvinston, Oil Springs, Petrolia and Sarnia.

It is not considered, however, that Division V. offers the same inducement as the other Divisions, the small amount of power re-

quired at present and the great distance of transmission combining to make the cost of power at the municipal sub-stations rather high, and it is doubtful whether electric distribution in this division would be fully justified commercially at the present time.

## PART II.

#### DEMANDS FOR POWER.

As a basis for estimates, a full canvass was made by expert assistants in each town and city, with the exception of the seven municipalities already covered by the Ontario Municipal Power Commission. For these seven municipalities the figures furnished by that Commission have been adopted.

In the personal canvass which was made, great care was taken to determine whether or not the consumer would be likely to adopt electric power if it were available, and a distinction was made in the case of those users who required steam for other purposes than that of power or who had refuse material as a source of fuel, and who, consequently would not be apt to make a change in their source of power.

The amounts of power used in the subsequent calculations are considered to be those amounts which it would be expected could be sold within a year or two after electric power was made available. For the amounts of power estimated upon in the various towns and cities, see table immediately following, or columns (3) and (4) of various summation sheets.

In estimating the total amounts of power to be distributed in each municipality, it has been assumed arbitrarily that, by the time transmission lines could be completed and with power for sale at reasonable figures, the total demand which should be provided for would be 25 per cent. greater than the estimated requirements at the present moment, and this has been the basis upon which the weight of copper has been calculated. In the transformer stations, how-

ever, separate estimates have been made for these total amounts as just mentioned, and also three-quarters and one-half of the same, and all calculations leading up to the cost of delivered power at substations have been made for these three conditions, always maintaining the full weight of copper in the transmission wires.

Note—The figures for municipalities marked (*) were furnished by the Municipal Power Commission.

## TABLE II.-A.

Table showing power demands for municipalities in Niagara District, canvassed by the Commission's engineers, but not included in transmission scheme.

MUNICIALITY.	Total power now used. H.P.	Present power available for electric installation.	Future demand 25 per cent. increase. H.P.
Aylmer	530	200	250
Blenheim		160	200
Burlington		100	125
	(-	with incandescent lightin	(g)
Elora	305	100	125
Norwich	190	100	125
Oakville	340	150	187
Port Dover	200	50	62
Ridgetown	645	350	437
Wa ter ord	130	150	187
		(with electric lighting	·)
Watford	275	125	156
Simcoe	330	200	250

The above municipalities are so far distant from the main transmission lines, or the available load is so small, that, with the possible exception of Ridgetown, it is not practicable to provide transmitted electric power.

# PART III.

### SOURCES OF HYDRO-ELECTRIC POWER.

In the district which may be described as Southwestern Ontario south of the latitude of Toronto, there are a large number of rivers possessing small water-powers, most of which are already developed; but owing to the small heads obtainable and the extreme low-water conditions they are usually of small capacity and suitable only for the most local uses: for small mills, village electric light stations, etc., and are not suitable for the supply of any great quantities of power, which might be available for transmission or even extensive local use.

The following is a partial list of these water-powers-

STREAM.	DEVELOPMENTS.				
Lynn	Port Dover.				
Grand	Dunville, York, Caledonia, Brantford, Paris, Galt and Elora.				
Nith	Paris, Ayr and New Hamburg.				
Speed	Preston, Hespeler and Guelph.				
Credit	Georgetown, Norval and Erindale.				
Thames	London and Springbank.				
and vario	us smaller streams.				

The only source of hydro-electric power requiring to be considered in this report, therefore, is the water of Lake Erie, utilized at the Niagara escarpment, which is feasible at various points extending from, and including, Niagara Falls westward some twenty miles. Further west than this the backbone between the escarpment and Lake Erie becomes too pronounced. For power development in this locality there are in existence various charters, and under four of these extensive investments have been made, and still greater investments are contemplated.

The developments now partially completed are capable of more than meeting any demand for electric power likely to arise in Ontario in the near future, having some 150,000 H.P. capacity immediately in sight with permanent works designed for 425,000 H.P. 24-hour power, in which, from time to time, machinery can be installed to meet requirements as they arise.

# PART IV.

#### PRESENT NIAGARA COMPANIES.

At the present time there are four power companies in process of development, one drawing water from the Welland Canal and three from the Niagara River at Niagara Falls.

- (A) Hamilton Cataract Power, Light and Traction Company. This company, with a power plant eleven miles west of Niagara Falls, has a water capacity by agreement with the Dominion Government of 700 c.f.s, capable of developing 16,000 H.P. of 24-hour power, or 40,000 H.P. of 10-hour power, having a large reservoir at the headworks. At the present time it has complete headworks and a partial installation of machinery, there being 16,000 H.P. now available, 12,000 H.P. of which is transformed and delivered to St. Catharines, Hamilton, Dundas and other smaller places. Additional machinery is now being installed, which will give the station 29,000 H.P. of 10-hour capacity.
- (B) Canadian Niagara Power Company. This plant has all its permanent works constructed for a capacity of 100,000 H.P. net,

and the following partial installations: power-house, 50,000 H.P.; machinery, 30,000 H.P.; transformer station, 20,000 H.P. It is now delivering some 15,000 H.P., chiefly in New York State, as a supplement to the Niagara Falls Power Company, the demand on the Canadian side (1,500 to 2,500 H.P.) being also supplied; 20,000 H.P. additional generating machinery is now being installed, which will give it in the near future an installation of 50,000 H.P., 24-hour power.

- (C) Ontario Power Company. The headworks for this Company are constructed for 180,000 H.P.; pipe-line and power-house, 60,000 H.P.; machinery at present installed, 30,000 H.P. It is probable that 30,000 H.P. additional machinery will be installed in the near future. The transformer station is of 60,000 H.P. capacity, with machinery partially installed. It has contracted for the sale of a large amount of power to be delivered in New York State, the delivery being made by means of a transmission line crossing the Niagara River near Queenston.
- (D) The Toronto-Niagara Power Company. Its allied company, the Electrical Development Company of Ontario is constructing a power plant of 125,000 H.P. capacity; the headworks and wheelpit are nearly complete and a power-house of 50,000 H.P. capacity is being constructed. The installation of 50,000 H.P. of generating machinery has been commenced, but delivery of power cannot be expected from this plant till 1907. The transformer station at Niagara Falls, the sub-station at Toronto, and the transmission lines of the Toronto-Niagara Power Company are nearly complete, the present lay-out being for the delivery of 30,000 H.P. in Toronto. mission of power can be undertaken by the Toronto-Niagara Power Company at an earlier date than it will be able to obtain power from the Electrical Development Company's plant, and it is understood that an arrangement has been made by which power can temporarily be obtained from the Canadian Niagara Power Company.

Particular attention is called to the fact that in any generating station one spare machine is absolutely necessary, for the purpose of making repairs, etc., and the net effective capacities of the above-mentioned companies as at present being installed will be as follows:—Hamilton Cataract Power, Light & Traction Company, 22,500 H.P., 10-hour. Canadian Niagara Power Company, 40,000 horse-power, 24-hour power. Ontario Power Company, 50,000 horse-power, 24-hour power. Electrical Development Company of Ontario, Ltd., 37,500 horse-power, 24-hour power.

# PART V.

## GENERATION OF POWER.

In dealing with this feature it has been studied from two points of view: First, the purchase of power; second, the construction of a new generating plant.

For the reasons that there are already, as set forth, three power companies partially or nearly completed on the Canadian side of the Niagara River, and a fourth company in operation near St. Catharines, and several other charters in existence on which considerable preliminary work has been done, and that transmission systems can be constructed in a shorter period of time than generating plants, and that the distribution of power will naturally commence with a modest demand, and increase year by year, it is considered the better course of action would be for a Transmission Company to purchase its power, and all the calculations leading up to the cost of delivered power at municipal sub-stations have been based on an arbitrary price of \$12.00 per 24-hour H.P. per annum at the high-tension bus-bars of the generating station, the price being determined upon a knowledge of recent sales of large blocks of power at Niagara. Should it, however, be considered advisable to construct a generating plant, which would take approximately four years to complete, the following estimate is made of the capital cost and annual charges—based upon the construction of a plant similar to those of the Electric Development Company of Ontario and the Canadian Niagara Power Company, but situated immediately above the intake of the Ontario Power Company. (See plan.) Such a plant would have a tunnel tail-race about 5,000 feet long, and may be considered the cheapest and most suitable power site now available on the Canadian side of the Niagara River. the only others possible being either one between the Canadian Niagara Power Company's plant and that of the Electrical Development Company, and which would not be looked upon favorably, as its supply of water is shut out by the latter works; or else at a site between the Canadian Niagara Power Company's Plant and that of the Interna-This site is out of the question for two tional Railway Company. reasons: because of the extreme shallowness of the Niagara River adjacent, and because the gradual recession of the Falls would soon

completely ruin even its present impracticable position, and there would be no remedy available, as the construction of a wing dam at this point would completely put out of business the plant of the International Railway Company.

Should an additional electric power plant development be, for any reason, required, it need not necessarily be constructed at Niagara Falls. In fact there are strong reasons why a plant located about 18 miles west of Niagara Falls would be a more favorable one, as the water can there be used under 300 feet head, requiring thereby only about one-half the amount of water, per H.P., which is used at Niagara Falls. The construction necessary would not disfigure the vicinity of Niagara Falls, and as the power would be generated at a point 18 miles nearer the Canadian market, this advantage would accrue to the consumer by lessening the cost of transmission. Sufficient studies and estimates have been made to show that a development can be made at this point at a cost per H.P. not exceeding the cost of the Niagara Developments.

# ESTIMATE OF GENERATING PLANT AT NIAGARA FALLS. (See Plan.)

## TABLE III.

### CAPITAL COST.

ITEMS.	50,000 H.P.	75,000 H P.	100,000 H.P.
	Development.	Development.	Development.
	——24-	hour power capac	ity——
Tunnel tail-race	\$1,250,000	\$1,250,000	\$1,250,000
	450,000	450,000	450,000
	500,000	700,000	700,000
Power house Hydraulic equipment Electric equipment Transformer station and equipment	300,000	450,000	600,000
	1,080,000	1,440,000	1,9×0,000
	,760,000	910,000	1,400,000
	350,000	525,000	700,000
Office building and machine shop	100,000	100,000	100,000
	75,000	75,000	75,000
	4,865,000	5,900,000	7,255,000
Engineering and contingencies 10 per cent	485,000 5,350 000	6,490,000	7,980,000
Total capital cost	\$5,786,560	\$7,019,584	\$8,631,168
Per horse-power	\$116	\$94	<b>\$</b> 86

The above estimate is based on the best class of construction in keeping with the surroundings; the machinery of the generating plant to be 10,000 H.P. units, with one spare machine in each case.

#### TABLE IV.

# GENERATING PLANT. ESTIMATE OF YEARLY OPERATING CHARGES.

items.	50,000 H.P, Development.	75,000 H.P. Development.	D	0 H.P pment
Operating Expenses, including administration	\$57,900	\$70,200		\$86,300
Maintenance and Repairs	115,700	140,400		172,600
Replacement Fund	86 800	105,800		129,500
Interest at 4 per cent	281 400	280,800		845,200
Rental of Water	52,500	65,000		77,500
Total yearly charges	\$544,800	\$661,700		\$811,100

In order to determine the cost per horse-power per year at the high-tension bus-bars of the transformer station, an allowance must be made for transforming losses, which, taken at 2 1-2 per cent., will give net amounts of power as follows:

## TABLE V.

Net amounts of power. Yearly cost of 24-hour power.	<b>\$</b> 11.16	73,125 H.P. \$9.05	97,500 H.P. \$8.32
Percentage of capital cost	9,62	9.63	9.67

The above estimate of yearly charges is based upon setting aside a sinking fund for replacements sufficient to renew various portions of the plant when worn out or obsolete. It has also been assumed that the rate of rental charged would be similar to that already in force in contracts between the Queen Victoria Niagara Falls Park Commissioners and existing power companies.

# PART VI.

#### TRANSMISSION OF POWER.

The estimates are based upon the purchase of a private right of way over the entire district; 100 feet wide between Niagara and Hamilton, 66 feet wide between Hamilton and Toronto and 33 feet wide alongside of highways or railways for the remainder. The class of construction adopted is that of steel towers; those from Niagara through Hamilton to Toronto being double, similar to those already erected by the Toronto-Niagara Power Company; for the remainder of the trunk lines, either double or single towers according to the number of lines; while branch lines are estimated on the basis

of first-class cedar pole construction. On the plan accompanying this report is stated the portions over which towers or cedar poles are to be used.

The TRANSMISSION TABLES are divided into three classes:

(A) TRANSMISSION DETAIL SHEETS, (B) TRANSFORMATION DETAIL SHEETS, (C) SUMMATION SHEETS, the information given for the different districts being similar.

A study of the first class of tables will show that the capital costs have been worked out in detail, and also the yearly capital charges, including depreciation, and taxes on right of way. The item called "Engineering and Contingencies" includes interest during construc-The second class of tables is worked out on a triple basis, the buildings for full capacity, but equipment being calculated for three ser es of loads, namely 125 yer cent., 93 3-4 per cent., and 62 1-2 per cent. of the estimated present available market; these sheets provide for municipal taxes, insurance, depreciation and 20 per cent. for engineering, contingencies and interest during construction. mation sheets, using the first and second classes of tables as a basis. and also making provision for the necessary amount of interswitching, and for administration, show the cost of 24-hour power at the lowtension bus-bars of various sub-stations situated in the suburbs of each town or city. It will be noted that in the column showing cost of Niagara Power, a provision has been made for the losses between the generating plant transformer station and the various sub-stations. The basis of the cost of Niagara Power, as before mentioned, is \$12.00 per H.P. at the generating station high-tension bus-bars.

As might have been expected, the cost of delivered power decreases with the amount of power disposed of because there are so many items of expenditure included from the beginning. The chief cause of the variation, however, lies in the fact that it is not feasible to put up copper for the amount of business in sight only, with the expectation of adding to it from time to time. Practically speaking, the whole investment for copper, looking forward at least five years beyond the time of commencing sales must be at once provided for except Division II., in which the weight of copper varies with the loads calculated on.

It must be understood that the calculations for the amounts shown are interdependent so far as each group is concerned, and the omission of any of the towns mentioned would increase the cost of

power to the other towns in the same group. On the other hand, if there are any towns or special demands existing of large enough capacity to warrant an installation, the cost of power for the district affected would be reduced in price below that shown in the tables. It is believed, however, that all of the market at present in sight has been estimated upon, although possibly in the near future there may be some additional inter-urban railways to be supplied with power.

Separate calculations have been made considering that Divisions III. and IV. only were undertaken, and that Divisions I. and II. (Toronto, Hamilton and vicinities) were not supplied. understood that this will affect such items as right of way, fencing etc.; in order to show the difference the following table is given :-

DIVISIONS III. and IV., instead of each paying one-seventh of the following, namely:-

Capital cost per mile, Hamilton to Niagara. \$2,298 00 equals \$328 29 Annual charges per mile, Hamilton to Niagara .... .... .... .... 263 44 equals 37 63 would each pay one-half of the following:-Capital cost per mile, Hamilton to Niagara. \$1,338 00 equals \$669 00 Annual charges per mile, Hamilton to Ni-181 69 equals 90 85

a difference of \$340.71 in capital cost per mile, and a difference of \$53.22 in annual charges, which would add to the cost of power per horse-power per year, as tabulated for the Divisions, the following amounts, including interswitching:-

agara .... .... .... ..... .....

	Full Load.	Three-quarter Load.	Half Load.
Division III	<b>\$</b> 0 20	<b>\$</b> 0 <b>26</b>	\$ 0 40
Division IV	0 26	0 35	0 53

In order to show the necessary investments, annual charges, and cost of low-tension power at municipal sub-stations in a simple form the three classes of tables just given are reproduced in the following condensed forms:-

#### TABLE XXII.

### NIAGARA DISTRICT, DIVISION I.

Totals	•	\$5,988,742	82,056	\$5,367 235	54,704	\$4,566,192

The preceding calculations are based on the current being generated three-phase, 25-cycle, at 11,000 volts, being carried thence to a transformer station adjacent and raised to a voltage which would maintain a potential of about 60,000 volts at the centres of distribution of the various Divisions and which, depending on the load, would vary between 60,000 and 66,000 volts, this being the limiting voltage of present practice in high-tension transmission.

The various sub-stations have been estimated on the basis of transformation down to 2,200 volts, with the exception of Toronto, where the distribution voltage has been taken as 12,000, and further transformation provided for in the distribution estimates following.

It will be understood that transmission summations include the capital and operating charges for the various sub-stations, and the prices of power given are for this power ready for local distribution.

TABLE XXX.

Showing cost of distribution from municipal sub-station to an individual consumer, not covered by local distribution.

12	18.76	14,08	11.12	10,12	8.42	7,96	7,22	) <u>8</u> 5
15	22,74	17.08	13,48	10.89	9.35	8,84	8.32	98

etermine the total yearly charge for electric power under of this table, combine it with prices shown in Tables XXII. I. The charges for a branch transmission do not include any for right of way or telephone, it being assumed that the would be available for such low-voltage lines.

### PART VII.

#### DISTRIBUTION OF POWER.

g determined the cost of 24-hour power at the various mustations, its distribution must be considered separately for or city, but owing to the great amount of detail which been necessary for a complete working out of each place, it considered sufficient to take certain typical cases, and the were selected, namely: St. Thomas, Berlin, Galt and

l be found that there is not much variation in the cost of n in places of moderate size, where underground distribunecessary.

HOMAS. Taking the specific distribution necessary for presmers, with an allowance of 25 per cent. for future growth, ling for service transformers where considered necessary in leliver power suitable for use in each case, including the ht and street railway stations, the capital investment necess,000, with annual charges, including operation, repairs, refund and interest at 4 1-2 per cent. of \$8,275; this also proment for power lost on lines and in transformers.

on the proportionate loads previously estimated upon, the tributed 24-hour power would be as follows:

#### TABLE XXXI.

	Cost of 24-hour power per H.P. per annum.				
unt of lelivered.	At Niagara Falls, including line and step-down sub-station losses.	At Sub-station.	At Customer.		
) H.P. H.P. I.P.	\$13,54 13,18 12,85	\$21,89 23,54 27,21	\$26.03 29.06 35,48		

ould be explained that owing to the large proportion of ower demanded in this city no attempt has been made to vance for increased total sales over sub-station maximum. Without doubt this could be done to a limited extent, say 10 per cent., which would proportionately decrease the cost to consumer as given above.

Berlin. The sub-station at this point was estimated upon as serving Waterloo also, but the detailed distribution studies have been made for Berlin only, at which place there are a large number of small consumers. Thirty-six prospective customers, including the electric light plant and the street railway, have been considered as demanding service.

The capital investment necessary is \$52,000, with annual charges, including operation, repairs, replacement fund and interest at 4 1-2 per cent. of \$8,010, the service provided being the same as in the case of St. Thomas.

After a careful study of the probable load factors of the various customers, it is believed that from a sub-station capacity of 2,864 H.P. sales of power in this place could be made for 10 per cent. in excess of this amount, or 3,150 H.P., giving the following costs of 24-hour power delivered:

П	n A	BI	T.	XXXII	٠
		n n	101		

	Cost of 24-hour power per H.P. per annum.				
Amount of power deliverea.	At Niagara Falls, includ- ing line and step-down sub-station losses.	Sub- station.	Customers' neglecting overlapping.	Customers' considering overlapping.	
Full Load, 3,150 H.P. ½ Load, 2,362 H.P. ½ Load, 1,575 H.P.	\$18,15 12,75 12,48	\$17.36 17.82 19.27	\$20.33 21.58 25.20	\$18.48 19.52 22.91	

In the above table the fourth column is given merely to indicate the price per horse-power which the average customer would pay for his service based on motor capacity, the third column giving the actual price per horse-power which he would pay for his power based on the most approved method of sale, which is a combination of a fixed charge per year based on the maximum demand and an additional charge based on the actual amount of current used as measured by meter.

GALT. The load conditions at present exiting here are not attractive; the number of customers is small and widely scattered. Each, however, uses a considerable amount of power, and several of the industries consider it necessary to the success of their business that they should have their maximum power available between four

and six P. M. This evidently interferes seriously with the winter lighting load, and makes the load peak very pronounced. It is possible that considerable adjustment of hours could be made with respect to load demands, but the table following is based on conditions as at present existing. Estimates are based on the same conditions as at St. Thomas and Berlin, and show a capital investment of \$75,000, with annual charges (interest at 4 1-2 per cent.) of \$10,275 based on the proportionate loads previously estimated upon.

The cost of distributed 24-hour power would be as follows:

#### TABLE XXXIII.

	Cost of 24-hour power per H.P. per annum.				
power denvered.	At Niagara Falls, including line and step-down sub-station losses.	At Sub-station.	At Customer.		
Full Load, 1,750 H,P. ½ Load, 1812 H.P. ½ Load, 875 H.P.	\$13.10 12.75 12.52	\$17.35 17.29 19.13	\$22.56 24.74 29.56		

With electric power available, however, a considerable number of smaller industries would doubtless spring up, and, with proper arrangements made for the sale of winter power—shutting off at, say, four o'clock P. M., thereby improving the load factor of the town sub-station, a considerable reduction would be made below the prices shown in column (3) of the preceding table.

The figures given with reference to the three municipalities just dealt with illustrate the various conditions which combine to affect the cost of delivered power. St. Thomas, being at a distance from the generating station, the cost of transmitted power is relatively high, to which has necessarily been added a fairly expensive distribution owing to the large proportion of steady power demanded. To Berlin, transmission is less expensive and distribution is satisfactory owing to the large number of consumers, well concentrated, with varying requirements, the result being a low price for power. In Galt the conditions are difficult to meet as just explained, owing to simultaneous maximum demands, the result being that the price of delivered power is relatively much higher than with either of the other two municipalities.

CITY OF TORONTO (not including suburbs). Two studies have been made. First: considering one Distribution Management receiving and distributing all the power and light required. Second: considering the delivery of sufficient power to operate the City pumping station, to supply the amount of power necessary to meet the demand in the immediate future for arc and incandescent lighting, and to carry a corresponding day load of small motors drawing current from the lighting circuits.

The first scheme includes the taking of all the required power at the present Northern city limits, transmitting it by cables in underground ducts at 12,000 volts, 25-cycle, three-phase, to the following secondary sub-stations, namely:—

- (1) A Western station near Shaw Street, for railway, 25-cycle power, and 60-cycle arc and incandescent lighting; chiefly overhead distribution.
- (2) John Street pumping station; from which also to be distributed 25-cycle power, overhead.
- (3) Scott Street; distributing, underground, D.C. lighting and power; underground and overhead, 25-cycle power; underground and overhead, 60-cycle street lighting; and overhead 60-cycle incandescent lighting; the underground district being considerably more extensive than that at present in existence.
- (4) Frederick Street; distributing, overhead, street railway power only.
- (5) Teraulay Street; distributing D.C. lighting and power, underground; 25-cycle power, underground; and 60-cycle street lighting overhead and underground.
- (6) Yorkville Avenue; distributing the same classes of power and lighting as would be distributed from Shaw Street.

In the tables following the points of delivery estimated upon are: for street lighting, at the lamps; for ordinary power consumers, and incandescent lighting, at the street line; but for the city pumping station, and street railway stations, delivery is assumed to be made at 12,000 volts.

#### TABLE XXXIV.

#### CAPITAL INVESTMENT. TORONTO DISTRIBUTION.

12,000-volt distribution \$ Secondary substations, buildings and equipment   Distributions, power and light, except street railway 1 Meters 1	,080,751
Total capital investment\$2	,463,441

#### TABLE XXXV.

#### ANNUAL CHARGES, TORONTO DISTRIBUTION.

83,772 H.P. at \$17.00 (See Table XXIII) Operating and administration expenses, repairs, replacement fund and	\$574,124
Operating and administration expenses, repairs, replacement fund and interest at 4½ per cent	365,107 18,243
Total annual charges	\$957,474

In order to obtain the necessary revenue to meet these annual charges the following scale of prices might be made:—

#### TABLE XXXVI.

#### SCALE OF PRICES. TORONTO.

Class of Service.	Maximum Station Input, H.P.	Metered Output per annum. K.W. Hours.	Rate per K.W. Hour without lamps.	Flat Rates per annum.	Revenue per annum.
60-cycle lighting and power	5,156	5,800,000	5.0 light. 1.5 power.		\$166,388
D.C. lighting and power	5,833	6,750,000	6.0 light. 1.5 power.		215,220
25-cycle power underground	3,250	6,465,300	1.8 power.		84,049
25-cycle power overhead	5,750	12,900,000	1 0 power.		129,000
Pumping \ 24-hour \	1,500		•	\$20.00	30,000
Railway (power)	13,333			20.00	266,667
Street Arc Lighting, 1,400 lamps,	1,450	All night, every	night	. 47.25 es	. 66,150
	36,272	Total			\$957,474

The charges for street railway and pumping, although 24-hour power, all-year, are placed at a lower figure than the remainder of the power because delivered without transformation and in larger blocks. For the remaining power, 1c per K. W. hour equals \$22.50 per H.P. per year for 10-hour, 300-day, power. The rates for lighting, which are average ones, do not include lamp renewals, amounting to from 1-2c to 3-4c per K.W. hour, but do include free meters.

It will be noted that the purchase of 33,772 H.P. of power at the main sub-station will provide for 36,272 H.P. of maximum demands it being found possible in such electric power centres as Montreal, Buffalo, and Hamilton, to arrange with certain classes of customers to throw off their loads during the hours of maximum demand, namely from 4.30 P. M. to 6.30 P. M. during the winter season.

The second scheme involves the transmission of about 12,500 H.P. from the receiving station under the same conditions as in the first scheme to the following sub-stations and for the following services:

- (1) A Western Station near Shaw Street for 60-cycle arc and incandescent lighting, and power, chiefly overhead distribution.
  - (2) John Street pumping station.
- (3) Scott Street. For D.C. incandescent lighting and power; underground and overhead 60-cycle street lighting, and overhead 60-cycle incandescent lighting; the underground district being considerably more extensive than that at present in existence.
- (4) Teraulay Street. D.C. lighting and power, underground; 60-cycle street lighting, overhead and underground; and 60-cycle incandescent lighting, overhead.
- (5) Yorkville Avenue. For the same services as from Shaw Street.

In the following tables the conditions of delivery estimated upon are the same as in the first scheme.

#### TABLE XXXVII.

#### CAPITAL INVESTMENT;

Toronto City Lighting and Pumping Services.

12,000-volt distribution Secondary substations, buildings and equipment Distribution system Meters	788,415
Total Capital Investment	

#### TABLE XXXVIII.

#### ANNUAL CHARGES.

Toronto City Lighting and Pumping Services.	
12,489 H.P. at \$20.00 (estimated purchase rate) Operating and administration expenses, repairs, interest at 4½per cent, and re-	\$248,780
placement fund Taxes as now paid by the Toronto Electric Light Company	279,658 18,243
Total annual charges	\$546,681

The revenue necessary to meet these annual charges could be raised by the following rates:—

TABLE XXXIX.

#### SCALE OF PRICES; TORONTO.

Class of Service.	Maxium station input H.P.		Rate per K.W. hour without lamps.	Flat rates per annum.	Revenue per class.
60-cycle lighting and power	5156	5,800,000	5.0 light 2.0 power		\$188 054
D.C. ligh ing and power	5833	6,750,000	6.0 light 2.0 power		250,881
Pumping (22-hr.)	1500			<b>\$22</b> ,00-1	83,000
Street lighting (1,400 lamps)	1450	All night,	every night	53 39 ea.	74,746
		Total Revenue			\$546,6×1

The charge for pumping is based on a 22-hour service during the winter season in order to provide against an excessive maximum demand, due to the overlapping of the lighting and commercial power loads during this time. If a 24-hour pumping service were to be provided for, all the rates given in Table XXXIX. would be increased considerably. It will be noted that the cost of power to small consumers under the second scheme is practically one-third greater than that of a similar service for the first power scheme, and amounts to \$45.00 per H.P. per year for 10-hour, 300-day power.

#### PART VIII.

#### MOTOR INSTALLATIONS.

To complete the information regarding the cost of electric power to the consumer, the following table is given, showing the cost of induction motor service per H.P. per year.

TABLE XL.

# CAPITAL COST AND ANNUAL CHARGES ON MOTOR INSTALLATIONS. POLYCHASE 25-CYCLE, INDUCTION MOTORS.

Capacity	Capital cost per		ANNUAI	CHARGES.	
Н.Р.	H.P. installed.	Interest 5%	Depreciation and Repairs, 6%.	Oil, Care and Operation.	Total per H.P. per Annum.
5	\$41.00	<b>\$2.0</b> 5	<b>\$</b> 2.46	\$4.00	\$8,51
10	39,00	1.95	2 34	3.00	7,29
15	35.00	1.75	2.10	2,50	6.35
25	28,00	1,40	1.88	2,00	5.28
35	25,00	1.25	1,50	1,75	4,50
50	24,00	1.20	1,44	1,50	4,14
75	21,00	1,05	1,26	1.25	3.56
100	20,00	1.00	1,20	1,00	3 20
150	17.00	.85	1 02	.80	2 67
200	16.00	.80	.96	.70	2.46

By combining the results given in this table with the previously worked out cost of power as obtained for St. Thomas, Berlin. Galt, and Toronto (or for any other town or city, making an allowance for distribution from the municipal sub-station to the customer of from \$3.00 to \$7.00 per H.P. per year), a total charge per H.P. per year will be obtained, which represents to any customer the entire yearly charge for electric power, including (as shown in tables) interest, repairs, replacement fund and operating charges.

#### PART IX.

#### SINKING FUND.

The view may be taken that although the previous studies have provided for a replacement fund sufficient to replace worn out or obsolete machinery, etc., from time to time, in addition to repair charges sufficient to meet ordinary running repairs, no provision has been made for such a condition as that in, say, forty years from the present time the present method of making and distributing electrical power may have become obsolete, and that it is necessary to provide a sinking fund sufficient to wipe out those portions of the investment which otherwise might be spoken of as permanent.

If such a forty-year sinking fund were created it would require to be sufficient to replace the so-called permanent portions of the capital investment from, and including, the generating station to the eustomer's motor, of \$50.00 per H.P., and this at 3% amounts to \$0.68 per H.P. per year which would be an additional charge to the consumer.

#### PART X.

#### PRESENT RATES.

For comparison a Table giving the comparative rates for light and power at present in force in the Niagara District follows, and along with it are shown the estimated rates for Toronto, the generation, transmission and distribution being considered on a cost basis. In the Brantford column is given the rates made to the City recently by the Western Counties Electric Company for a franchise. It is understood that the power for this company is to be supplied by the Hamilton Cataract Power, Light and Traction Company.

#### TABLE XLI.

Comparison of rates for power and light in various municipalities in Niagara District.

1000	44.80	12:00	56.80	22:47	41.11			

Note: Annual costs include interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel, (coal at \$4.00 per ton) Brake horse-power is the mechanical power at engine shaft.

In order to institute a comparison between the cost of electric power as has just been set forth and the cost of power generated by steam or producer gas, the following tables have been compiled after a careful study of data available in technical journals and also from data collected by the Commission's engineers in various towns within the district under consideration. The capital costs have been compiled from information supplied by various makers of engines and other machinery. The tables represent average working conditions and assume a high class installation.

It will be noted that for a consumer requiring a large installation, operating for ten hours only, there appears to be little advantage to be derived from the use of transmitted electric power, provided the power is not to be distributed throughout a consumer's buildings by a complicated system of shafting, belts, etc. But in the majority of cases this condition obtains, and herein lies one of the specific advan-Motors can be installed on each floor of a tages of electric power. factory, or even on each machine, with but little loss in efficiency, and only such motors as are required to drive the machinery in use from time to time need to be operated. In many cases due to this fact the total electric power consumption of a large factory would be reduced from 25 per cent. to 50 per cent. below that which is required under steam operation, working from a central station.

Again where electric power is available throughout the 24 hours many industries will work night and day thereby effecting a great economy, as is evidenced by a comparison of the cost of 24-hour steam or producer gas power with 24-hour electric power.

Perhaps the most striking advantage to be derived from the use of electric power as compared with other power is that the small consumer can obtain power at a rate which should not be appreciably greater than that made to the large consumer, although the present practice in selling electric power is to discriminate against the small consumer for the reason that electric power prices made by private companies are not based on cost of service, but are merely made with a view to displacing steam.

#### PART XII.

# PRODUCER GAS POWER.

#### TABLE XLIV.

SHOWING CAPITAL COSTS OF PRODUCER GAS PLANTS INSTALLED AND ANNUAL

COSTS OF POWER PER BRAKE HORSE-POWER.

	Capital Cost	Capital Cost of Plant per H.P. Installed.			Annual Cost	
Size of Plant, H.P.	Machinery, etc.	Buildings.	Total.	Annual Cost of 10-hour Power per B.H.P.	of 24-hour Power per 3 B.H.P.	
10	\$137 00	\$40 00	\$177 00	<b>\$</b> 53 <b>4</b> 8	\$90 02	
20 30 40 50 60 80	110 00	36 00	146 00	44 47	75 22	
30	93 00	33 00	126 00	38 78	65 99	
40	84 50	29 00	113 50	35 05	59 85	
50	80 00	26 00	106 00	32 27	55 22	
60	79 00	24 00	103 00	30 49	52 03	
	78 20	22 00	100 20	28 70	48 95	
100	77 50	20 00	97 50	27 05	45 40	
150	76 00	19 00	95 00	25 87	43 17	
200	74 00	17 00	91 00	24 95	41 78	
800	78 00	16 00	89 00	24 24	40 40	
400	71 50	14 00	85 50	23 41	39 03	
500	70 00	12 00	<b>82 00</b>	22 54	37 54	
750	67 50	10 00	77 50	21 55	35 99	
1000	65 00	800	73 00	20 46	34 66	

Note: Annual costs include: interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel (Bituminous coal at \$4.00 and Anthracite coal at \$5.00 per ton).

A reference to Table XLIV. will show that the cost of power developed by producer-gas plants and gas engines is less than that produced by steam plants of the same capacity. It may be said, however, that up to the present no very large installations of suction producers have been made, 250 to 300 horse-power being about the maximum. But this has been provided for in the Table by assuming that the larger plants will be made up of several units, each unit being not greater than 350 H.P. capacity. While operation of producer-gas plants has not been going on many years, and complete knowledge on the subject is not available, with the information at hand it is believed that in many situations this form of power producer will be found

more economical than a steam plant, and therefore a closer competitor of hydro-electric power. It must be remembered that the same objections hold against the producer-gas plant as those which have been mentioned in reference to steam plants, namely, that 24-hour power costs proportionately more than 10-hour power; that the small consumer does not have the great advantage obtainable by the use of electric power; and also that a central installation in a factory is all that is possible if electric motors are required in various parts of the factory, and the only prime mover available is steam or gas. will make the cost of electric factory operation very expensive, and considerably higher than the power costs shown in Table XLIV. Speaking generally, however, it may be said that producer-gas plants have a bright future, and as the design and construction is perfected undoubtedly the capital cost will be reduced and the cost of power lessened.

TABLE XLV.

Showing the effect on the cost of power of a variation in the price of coal of one-half dollar per ton.

# PART XIII SAVINGS.

From the figures which have been arrived at in this report, it is evident that considerable economy to the users of power and light can be effected by the distribution of electrical energy from Niagara Falls, if done on a cost basis, this result being in sharp distinction to the

present condition obtaining, whereby private companies distribute electric power and light, the charges made by these companies being such as will barely enable them to displace steam, the consumer not reaping any appreciable benefit.

As an illustration of the possible savings to be accrued by the distribution of light and power at cost, the following estimate is given for the City of Toronto.

- (a) City Pumping. At the present time the operating cost of pumping is \$105,000 per year. By adopting electric motors and assuming installation costs (in accordance with Table XL., with an extra allowance for turbine pumps) of 200 H.P. High Level Station at \$6.00 per year annual charge, and 1,500 H.P. Main Station at add\$4.50 annual charge, to which 1,700 H.P. energy at \$20.00 per H.P. the total annual charge becomes \$42,000, showing a saving of \$63,000. Allowing \$10,000 for care of the present steam plant, and for operation of high-pressure steam fire service, apart from the regular pumping service, leaves a net saving of \$53,000.
- (b) Street Railway. It is understood that the price which the Toronto-Niagara Power Company is to receive from the Toronto Railway Company is about \$35.00 per H.P. per year for stepped-down power at the receiving station, as compared with a cost as per Table XXIII. of \$16.90. With a demand of 12,000 H.P. at (\$35. minus \$16.90 equals \$18.10), \$217,200 is the saving in the cost of power to the Toronto Railway Company.
- (c) Electric Light. At the present time the Toronto Electric Light Company distribute in light and power about 8,000 H.P. It is understood that the price which they are to pay the Toronto-Niagara Power Company for power delivered and stepped down at the receiving station is also to be \$35.00 per H.P. per year continuous power, as compared with a cost as per Table XXIII. of \$16.90 per H.P. The saving to the Toronto Electric Light Company is 8,000 x (\$35 minus \$16.90, equals \$18.10) equals \$144,800.
- (d) By distributing electric power on a cost basis it is considered that 20,000 H.P. additional of steam power can be displaced and supplied with electric power at an economy of at least \$5.00 per H.P. per year. Considering motor installation on the one hand and the saving in the amount of power required on the other hand, this may be considered a modest estimate, and amounts to \$100,000 per year.

#### TABLE XLVI.

Summary showing annual savings to be made in Toronto by the distribution of electrical energy from Niagara Falls on a cost basis.

(a)	City pumping	\$ 53,000
(b)	Toronto Railway Company	217,200
(c)	Toronto Electric Light Company	144,800
(d)	Other power users	100,000
	Total annual transmission savings.	\$515.000

The above estimate is based on the Toronto Electric Light Company operating its present plant; however, should the City of Toronto decide to take over this plant and operate it on behalf of the Municipality, a large additional saving would be obtained.

A fair valuation of the present plant, including the distribution system is less than \$2,000,000. The last yearly statement of the Toronto Electric Light Company shows a revenue of ......\$780,000 Operating expenses, less debenture interest, 421,000 Showing a net revenue of \$359,000

Against this should be charged 4 1-2 per cent. interest and 5 per cent. sinking and replacement fund, that is 9 1-2 per cent. on, say, \$2,000,000 equals \$190,000, leaving a balance of \$169,000 which could be applied to the reduction of rates.

This amount added to the savings shown in Table XLVI. gives a total annual savings to be obtained from a cost distribution, at 4 per cent. for transmission and 4 1-2 per cent. for municipal distribution of:

Annual transmission savings	515,000
Saving to be made with municipal lighting	169,000
Total Annual Savings	694 000

### ADDENDUM.

#### EASTERN EXTENSION OF DIVISION II.

The towns of Bowmanville, Oshawa and Whitby are geographically attached to the Trent District, and in the Commission's report on that district the cost of furnishing them with power will be dealt with in detail. These towns could, however, be supplied with Niagara power by an extension of the Toronto-Niagara transmission lines. The capital cost of the required extra conductor capacity from Niagara Falls to Toronto, extra high-tension switching facilities in Toronto sub-station, transmission line extension to Bowmanville and step-down substations for full load conditions amounts to \$225,000.

The following table shows the relative cost of 24-hour low-tension power to these three towns from the alternative sources.

MUNICIPALITY.	LOAD.	Niagara Falls.	TRENT RIVER.
Bowman ville	Full Load	26.10	21 .52
	§ Load	28.42	22 .86
	§ Load	32.76	26 .48
Oshawa	Full Load	21.75	. 21.52
	§ Load	22.89	23.16
	§ Load	24.98	27.29
Whitby	Full Load  Load Load Load	23.80 25.12 27.34	27.33 30.32 37.15

It should be stated that in case these towns were not supplied from the Trent system the costs of power to Port Hope and Cobourg would be considerably increased.

# SECOND REPORT.

#### TRENT DISTRICT.

To his Honour,

The Lieutenant-Governor of Ontario:

The undersigned Commissioners appointed by your Honour by Commission bearing date the 26th day of January, 1906, beg leave to submit the following report, as their second report upon the matters authorized and directed to be enquired into.

By the said Commission your Commissioners were authorized to adopt the work of the Commissioners appointed by your Honour by Commission bearing date the 5th day of July, 1905, which was not completed on account of the indisposition and resignation of one of your Commissioners, the consequence of which was that as the powers thereby given were joint, the remaining Commissioners were not authorized to act further in the premises. Your Commissioners accordingly adopted the work of the former Commissioners, and have embodied the results in this report.

Your Commissioners made enquiries and obtained information from various sources, but did not find it necessary to hold formal sittings in this district, as the information which they have obtained has been given freely to members of their engineering staff, who have thoroughly canvassed this district both as to its hydraulic possibilities and its present industrial demands.

Your Commissioners have forborne to give in detail the names of their informants or the particulars of the information acquired from them, but have used the knowledge and facts so acquired for the purposes of computation, comparison, etc., and for the production of the result which they have now the honour to report.

The details, and scientific and technical information obtained have been tabulated and arranged by the Engineer employed by your Commissioners, and are contained in his report which is submitted as an appendix hereto.

The following are the matters on which your Commissioners were authorized and directed to report, with the report upon each subjoined

#### DEMAND FOR ELECTRIC POWER.

(1) "The present and probable demand for hydraulic and electrical power in the various districts capable of being supplied from the different water-powers within the jurisdiction of the Province of Ontario."

In this second report your Commissioners deal only with that part of Ontario which, roughly speaking, lies north of Lake Ontario, but not including Toronto, and which, for the purposes of this report, may be called the Trent District. This district may be divided into three portions each of which illustrates a special condition.

- (a) The upper Trent valley, due to the construction of the Trent Valley Canal, afforded opportunities for local development, and these have been taken advantage of, so that such municipalities as Peterborough, Lakefield, Lindsay and Fenelon Falls are well supplied with hydraulic and electric power. Owing, however, to the low heads under which these developments were possible, the total amount of power is not very large and it appears evident that in the near future it will all be utilized for local consumption, at which time a combination of private interests would tend to raise rates.
- (b) In the lower Trent valley far more valuable water-powers exist and they have only been developed to a very slight extent, and as there are no industrial centres of importance in their immediate vicinity, they are natural sources of transmitted power for supplying the needs of the industrial centres along the north shore of Lake Ontario.
- (c) In the Moira river valley a large number of comparatively small water-powers exist and few are developed, but in time they will be needed to meet local requirements.

Part II. of the Engineer's report on this district affords the necessary details in respect to the preceding remarks.

The demand for electrical power will, in almost all cases, depend upon the relative cost of electricity as compared with that of steam, gas or other local source of power. The cost of electricity is dependent upon the distance transmitted and the quantity transmitted. As it is only feasible to transmit the power in large quantities, trunk transmission lines capable of carrying large quantities must be constructed at the outset, therefore the cost increases with the distance,

and a point is eventually reached at such a distance from the generating station that electrical can no longer compete with steam or other

local power.

Again the exhaust steam and heat from the steam plant of some factories is used in the process of manufacture, and it could not be expected that electricity would be adopted by manufacturers of this class for power only, as their production of steam and heat for manufacturing purposes apart from power would increase rather than diminish their expenses; and in many instances waste material is used in the production of steam; such industries have been excluded from the consideration of the extent of the market at present in sight. The capital cost of abandoning steam plants would also, in many cases, be considerable, and the ability of small users of power to bear this loss must always be a factor in the finding of a market.

In order to ascertain the probable market, however, your Commissioners caused enquiries to be made in the various manufacturing centres in the district with the following results: They are satisfied that an immediate market for at least 10,000 H.P. of electric power can be obtained within a reasonable radius of Healey's, Middle or Rauney's Falls of the Trent river, including the local consumption which would arise, and the power to be supplied to interurban railways. They are also satisfied that this would be increased to at least 15,000 H.P. within five years after electric power was available. This means that power can be distributed as soon as the necessary works are constructed at the medium rates shown in Part V. of the report of the Engineer employed by your Commissioners, and that within five years thereafter the power would doubtless be delivered at a price equal to or even slightly less than the lowest rates shown in the same part of the Engineer's report, which has been computed upon the basis of a return of 4 per cent. interest, a sinking fund and the cost of operating and distributing. Experience shows that where the distribution is controlled by private corporations, the distribution area remains restricted, and from the information obtained by your Commissioners they are able to say that the trend of affairs with private corporations has been not to compete for business, and thus keep down prices to consumers, but to amalgamate or otherwise destroy competition, and then to fix the prices according to the slight saving which they may be able to induce particular cutomers to make. The natural result of this has been to force individual consumers, where the circumstances justified it, to instal generating plants of their own, or

to adhere to existing methods, rather than to place themselves at the mercy of large combinations formed for the purpose of preventing competition and keeping up the price of electrical power.

Owing to the moderate amount of power required in this district at present and to the fact that there are numerous claimants to, or owners of the three water-powers referred to, but on which there is only one development of 500 H.P., made by the Northumberland Paper Company at Rauney's Falls, and also owing to the fact that the Dominion Government will probably construct their Trent Valley Canal along this route, it would appear advisable that a unified development should take place in this district which would simplify matters and cheapen the cost of power provided such is carried out on the basis of a return upon the cost of operating. If, however, development takes place on behalf of various interests and distribution is carried out by these interests, it can be confidently predicted that not only will the cost of power be greater but the consumption of electrical power be very much restricted in area and quantity, so that the consumer will not receive any appreciable benefits therefrom.

#### UNDEVELOPED LOCATIONS.

(2) "The location, capacity, and capital cost of development of the various water-powers within the legislative jurisdiction of the Province of Ontario at present undeveloped, but whose development is required to supply the present and probable needs of the surrounding districts; and to ascertain the cost of the attendant transmission plant necessary to the utilization of electrical and hydraulic powers to be provided from the aforesaid water-powers within the respective surrounding districts."

A systematic tabulation of the water-powers of the Trent and Moira rivers based upon guagings and meterings, supplemented by information derived from other sources, has been carried out during the past six months, and although more minute information, particularly with reference to dry weather flow, could be obtained by continuing the work, it is felt that a fairly accurate hydraulic knowledge of the district has been obtained.

On the upper Trent most of the water-powers have been developed and of the four undeveloped powers, two have the dams already provided by the Trent Valley Canal, while Burleigh Falls and Buckhorn Rapids must naturally look for their market in Peter-

borough and other neighboring towns. These developments are known to be economical and will doubtless be made as soon as the neighboring market demands it. Your Commissioners did not deem it necessary to make specific studies of these comparatively small water-powers.

The Moira does not possess water-powers of sufficient importance to warrant their being made use of for transmission purposes and their development can safely be left to the united efforts of those parties on the Moira river water-shed who are interested, and who could, by forming a water-power association and incurring a moderate expenditure for storage in Loon Lake and other natural reservoirs, considerably improve the water-powers of the water-shed. Similar action has already been taken by the water-power users on a small river at Gananoque.

Coming, however, to the lower Trent river, your Commissioners find several very important water-powers, which have been previously referred to as the proper source of electrical power to be transmitted to the Lake Ontario industrial centres. In Part V. of the Engineer's report on this district will be found an approximate estimate of the cost of development of five of the more important powers. It should be particularly noted that these estimates do not include vested rights or land damages, which we are unable to estimate, as the Dominion Government, the Provincial Government, the municipality of Campbellford and private owners are all interested.

#### RATES AND PRICES.

(3) "To ascertain the rates or prices that would require to be charged the various classes of consumers of hydraulic or electrical power within the respective districts in order to meet all expenditure of maintenance and operation."

The ascertainment of the rates that would require to be charged for electrical power in order to meet expenditure of maintenance and operation is based upon the cost of necessary plant for future calls upon it, original cost of construction, cost of maintenance and operation, and the probable market for electrical power, ascertained from local enquiries.

In order to ascertain the cost of delivering electrical power in large quantities at particular distances, your Commissioners have made computations with respect to all the municipalities (as localities and not as corporate bodies) which could be conveniently and

economically supplied from Healey's Falls, numbering only nine at the present time (although Campbellford and other towns would be supplied to the extent of their needs as soon as electrical power was available) and the rates or prices for such delivery are shown in Part V. of the Engineer's report.

Your Commissioners call attention to the fact, however, that when electricity is delivered at a municipal sub-station as above, the cost of distribution among the consumers within such municipality must be added to this price in order to determine the cost to the individual municipal consumer.

In order to determine the cost to municipalities using power your Commissioners have ascertained the prices at which electricity could be delivered to consumers at two typical points, namely, Kingston and Oshawa. These rates are set out in Part IV. of the Engineer's report. Also in Part V. of the Engineer's report, Table XII., will be found estimates of the cost of supplying individual large consumers at from two to fifteen miles from a municipal sub-station, computed according to distance transmitted and quantity used.

#### SAVINGS.

(4) "To enquire into and ascertain the annual savings accruing to the consumers in the various districts aforesaid by the substitution of the rates or prices in the next preceding paragraph for the rates paid at present in the said district so far as the Commissioners may be able to ascertain or estimate them."

The estimated savings in the purchase of power that would result from the charging of prices or rates based on actual cost as ascertained and shown in the next preceding part of this report has been worked out for Oshawa and Kingston, as typical of the other municipalities affected and are shown in Part XII. of the Engineer's report on this district.

The annual amount of savings which might accrue is very difficult to estimate because each town has its peculiarities. If some industries could be encouraged sufficiently by cheap power they might operate 24 hours per day; others might be willing to give limited hour contracts for the winter season; and the town pumping if done by the municipality and where reservoir capacity is available might also be done chiefly by night. All these factors have such an intimate bear-

ing on the solution that any estimate can only be considered approximate. However, the estimates given in Part XII. of the Engineer's report are considered to be conservative.

#### CAPITAL COST OF UNDERTAKINGS.

(5) "To enquire into and ascertain the cast capital cost of the hydraulic and electrical power undertakings of existing companies located within the Province of Ontario; the capacity and state of development thereof."

Your Commissioners have not yet taken steps to ascertain the cash capital cost of the present developments on the upper Trent river; to do so would not appear to serve any useful purpose at the present time, owing to the fact that in most cases the dams and reservoirs have been provided by the Dominion Government, and therefore the cost would not be fairly comparable with hydraulic developments made in ordinary unimproved locations. The present developments are known to be very economical, and enable power to be sold at fairly reasonable rates.

# POWER SUPPLIED AND UNDER CONTRACT BY THE EXISTING COMPANIES.

(a) "The quantities supplied and contracted for and the rates charged and to be charged under such contracts by these companies for hydraulic and electrical power.".

In Part II. of the Engineer's report, Tables I., II. and III. will be found the amounts of hydraulic and electrical power at present developed, and which are seen to be quite extensive in the upper Trent valley, while in the lower Trent valley considerable hydraulic development exists at Campbellford and Frankford.

The prices or rates charged for power and light in various municipalities in the Trent District are set forth in Part IX. It will be noted that the charges for street-and house-lighting are not appreciably less in the upper Trent valley where water-power developments have already been made than in the Lake Ontario towns where light is supplied by steam plants, and that all of the hydraulic developments referred to are made by private companies. There is practically no electrical power for sale in the Lake Ontario district, while a large amount is sold in the upper Trent district at moderate rates.

#### APPRAISEMENT OF UNDERTAKINGS.

(b) The actual present value of the said undertakings, or such of them as may be required, after making such fair and reasonable allowances for existing conditions as in the judgment of the Commissioners seems necessary or expedient."

As previously mentioned in Clause 5 above, your Commissioners did not consider it necessary at the present time to make an estimate of the value of the hydro-electric plants at present in operation in the upper Trent district, as, owing to the dams and headworks being supplied by the Dominion Government, no useful comparison can be made between the estimates of these plants and the cost of ordinary complete undertakings.

(c) "To estimate the capital outlay, if any, necessary to complete these undertakings."

Your Commissioners are not aware of any undertakings, which at the present time, are being constructed, or increased materially in capacity, although doubtless additional machinery is being installed in various plants from time to time sufficient to meet increased demands.

Your Commissioners respectfully submit that the conditions in this district are not only peculiar but important.

In the upper Trent district numerous water-powers exist, and these have been developed and doubtless will be still further developed as local demands require until all of the water-power available will be fully in use, but, owing to the location of these water-powers they do not require concerted action on a large scale and can be safely left to local enterprise, safeguarded as to rates by such regulations with respect to the selling price as your Honour-in-Council may deem advisable to enact.

In the lower Trent district, however, and along the north shore of Lake Ontario, the condition exists that there is an industrial demand which can be supplied from undeveloped water-powers of considerable capacity located considerable distances from the industrial centres referred to. Concerted action appears to be vital to the success of any undertaking aiming at the development of these water-powers and the supplying of the electrical energy generated to the industrial centres requiring it. The water-powers are held, as already mentioned, by varied interests, but should several development and distribution systems, each of smaller size, be undertaken, the total

cost will be increased, and the larger unified transmission scheme outlined by your Commissioners will be rendered more expensive and possibly prevent it ever being carried into effect.

By combining several of these water-powers in one undertaking, connecting them in parallel to one transmission system, and operating under one administration, only such expenditure need be made as the demand from year to year warranted; and only such power-houses and machinery in each power-house be operated from hour to hour as the total demand required. The economy and certainty resultant from such a method of operation is evident. It is also evident that any hydraulic development along the route of the Trent Valley Canal would have to be constructed in a manner satisfactory to the Dominion Government, and located in such a position as would be consistent with the construction and operation of the canal. On the other hand the construction of this canal will still further improve the already excellent storage capacity and uniformity of flow of the Trent river, and if the power developments are carried out along with canal construction, considerable economy in first cost will result.

All of which is respectfully submitted.

(Sgd.) ADAM BECK.

Chairman.

(Sgd.) GEORGE PATTINSON,

(Sgd.) JOHN MILNE.

Toronto, April 17th, 1906.

# ENGINEER'S REPORT

ON

THE GENERATION, TRANSMISSION AND DISTRIBUTION OF ELECTRIC POWER

#### HONORABLE ADAM BECK,

CHAIRMAN OF THE HYDRO-ELECTRIC POWER COMMISSION:

DEAR SIR,-

Herewith find my report on the Trent District. The report deals with the present demand for power within economical transmission distance of the Trent River water-powers and the cost of generating, transmitting and distributing electric energy within this area.

Yours respectfully,

CECIL B. SMITH,
Chief Engineer.

TORONTO, CANADA, APRIL 17TH, 1906.

#### PART I.

#### GEOGRAPHICAL SUBDIVISIONS.

The Trent and Moira Rivers afford a source of hydro-electric power which can be made available over a district extending from Pickering on the west to Kingston on the east, and from Lake Ontario as far northward as industrial centres now exist, representing, roughly speaking, the water-sheds of these two rivers.

Investigation shows that the water-powers of the upper Trent, although numerous, do not total much more than is at the present time being made use of ,and it is evident that all of the water-powers available in the upper Trent waters will be required locally in the near future.

Along the lower Trent, southward from Hastings, and along the Moira river, the industrial development is not so great, and the waterpowers, and particularly those of the Trent, are more important, and offer an opportunity to develop a large amount of power for transmission to the present industrial market existing in the towns along the north shore of Lake Ontario.

The water-powers of the Moira river and its tributaries are numerous and a considerable number of them can be economically developed, but none of them are of sufficient importance to justify their being developed for the purpose of long-distance transmission of electricity. They will doubtless be all utilized in time for local purposes—in mining, generating electricity for local use, also for direct hydraulic use in paper and flour mills.

On the other hand the towns along the north shore of Lake Ontario must for all time depend for their hydro-electric power on the water-powers above referred to, as, outside of these two rivers the small streams flowing into Lake Ontario are not of sufficient importance to consider as sources of any considerable amounts of power.

#### PART II.

#### DEMANDS FOR HYDRAULIC AND ELECTRIC POWER.

As a basis for estimates a full canvass was made by expert assistants in each town and city of this district. In this canvass, care was taken to determine whether or not the consumer would be likely to adopt electric power if it were available at reasonable rates, the canvass including also present users of hydraulic and electric power. In the tables following these various classes of consumers are tabulated so that an estimate can be arrived at of the available market for future electric power, and in tables I., II. and III. this information is set forth in detail.

The map accompanying this report indicates the location of the chief water-powers of the lower Trent river, and a specific scheme has been worked out, by which certain of the present available markets might be supplied from certain of these water-powers. It will be noted that several smaller towns have not been taken into consideration; in some cases because the consumption would not warrant the necessary expenditure, and in other cases because the towns are already supplied locally. The latter remarks apply particularly to Trenton, Tweed, Marmora, etc.

## PART III.

#### SOURCES OF HYDRO-ELECTRIC POWER.

Aside from some smaller streams which flow into Lake Ontario, which have not been taken into consideration, the sources of hydroelectric power for this district are, as before-mentioned, the Trent and Moira rivers.

The water-powers of the Trent river may be divided into those of the upper Trent valley lying west of Hastings, and those of the lower Trent valley to the south of this point, and those of the Moira river and its tributaries. The last-mentioned are shown in Table IV.; it will be seen that although numerous, no one of them is large enough to be considered as a source of electric power to be transmitted to any distance, and local use will in time be found for all the power available on this river.

On the upper Trent there are a large number of moderate-sized water-powers, as shown in Table V., but comparing Table V. with Table I., it will be noted that large developments have already taken place, and all that remains will be needed in the near future within the immediate district itself.

#### PART IV.

#### GENERATION OF POWER.

On the lower Trent river, however, the water-powers are much more extensive and are practically undeveloped, the only ones used so far being small developments for paper mills, etc.

Of the various water-powers shown in Table VI. at least five are worthy of being fully developed for long distance transmission, namely: Healey's Falls, Middle Falls, Rauney's Falls, Rapids one and one-half miles above Glen Miller, and Rapids three-quarters of a mile above Trenton. Table VI. shows that the total dry weather capacity of these five developments would be 25,600 H.P., more than sufficient to supply for the present at least, all industrial demands of the Lake Ontario towns.

At the present time it would not be necessary to develop all these water-powers, but as the demands for electric power increase these water-powers could be developed one by one, all being worked in unison and under one management. This district would appear to be one in which united management with one set of transmission lines to the various towns would be far more economical than would be the case if several Companies were to take up the various water-powers and develop and transmit the power independently.

Table VII. gives an approximate estimate of the cost of the five water-power developments as previously enumerated, but these estimates must be considered quite approximate, owing to the likelihood of the Trent Valley Canal modifying designs which would be otherwise proper for a power plant; and also because the field engineering work for these estimates has necessarily been very meagre. However, it is probable, that these estimates are correct within 10 per cent.

#### TABLE VII.

#### SHOWING CAPITAL COST OF POWER DEVELOPMENTS.

#### LOWER TRENT RIVER.

Location of Water-power. Healey's Falls	Amount of Power Developed. H.P. 8,000	Total Capital Cost. \$ 675,000	Cost per H.P. \$ 84.38
Middle Falls Rauney's Falls Rapids above Glen Miller	6,000 3,200	475,000 425,000 350,000	91.37 69.67 109.38
Rapids above Trenton  Totals	-	\$70,000 	115.68

Note.—Capital costs cover hydraulic development (such as dams, weirs, pipe-lines), power-house, hydraulic and electrical equipment, with one spare unit, and step-up transformer station with electrical equipment, but do not include cost of vested rights and land damages.

#### TABLE VII.A.

# ESTIMATE OF YEARLY OPERATING EXPENSES OF GENERATING PLANTS.

ITEMS.	Middle Falls. 5,200 H.P.	Healey's Falls. 8,000 H.P.	Combined 18,200 H.P.
Operating expenses including administration Maintenance and repairs Replacement fund Interest at 4 per cent	9,500	\$16,875 13,500 13,500 27,000	\$23,000 23,000 23,000 46,000
Total yearly charges	\$49,875	<b>\$</b> 70,875	\$115,000

It will be noted that the operating expenses on the combined plants are estimated as less than on the two individual plants due to the reduced administration costs.

In order to determine the cost per H.P. per year allowance must

be made for transformer losses in the step-up station which, with units of such size as would be installed might be taken at 4 per cent. The net amount of power and costs per H.P. would be as follows:

#### TABLE VII.B.

Net amount of power Yearly cost of 24-hour power transformed ready	4,990 H.P.	7,680 H.P.	12,670 H.P.
for transmission	<b>\$10.00</b>	<b>\$9.1</b> 0	<b>29</b> .08

#### PART V.

#### TRANSMISSION OF POWER.

Taking as a present source of power Healey's Falls, with an auxiliary development at Middle or Rauney's Falls, or both, a development and transmission scheme has been worked out, supplying power to all of the Lake towns from Whitby to Kingston, inclusive.

A private right of way is provided for in the estimates, 66 feet wide from Healey's Falls to Brighton, and of a varying width along the Grand Trunk Railway from this point to Whitby on the west and to Kingston on the east. The following line construction is provided for: double-circuit steel towers from the power-house to Brighton; single-circuit steel towers from Brighton to Deseronto Junction (the name given to the point where the Deseronto and Marlbank lines branch off) and high-class wood pole construction from Deseronto Junction to Kingston, and from Brighton to Whitby.

The transmission detail sheet will be found to contain in tabular form the detailed capital cost of, and annual charges on, the transmission lines from the step-up transformer station to the step-down sub-stations. It also shows the distribution of these charges and the loss of power between the various municipalities, according to a given estimated distribution of demand among them. These charges could be readily adjusted to other proportionate demands on the part of the municipalities participating. The capital charges include depreciation, and taxes on the right of way, and the item called "Engineering and Contingencies" includes interest during construction. It is assumed that the transmission lines would be erected at the outset with a full future load capacity, and therefore the total charges would remain fixed.

The transmission detail sheet shows that buildings would be

erected for full future load conditions, but with equipment installed as required; therefore, the total fixed charge for transformation varies with the load. The full future load capacity has been placed 25 per cent. in advance of the estimated present demand and the relative three-quarter-and half-loads are taken on this future demand, and are therefore respectively 93 3-4 per cent. and 62 1-2 per cent. of the estimated present available market. The transformation charges provide for municipal taxes on site and building, insurance, depreciation, and 20 per cent. for engineering, contingencies and interest during construction.

In the summation sheet will be found the charges for transmission and transformation chargeable to each municipality with the necessary charges for an interswitching station at Brighton, and for administration; and the summation shows the cost of 24-hour power at the low-tension bus-bars of the sub-stations located in the outskirts of the municipalities. The column showing cost of power at Healey's Falls includes line and sub-station transformer losses and is based on a cost of \$12.00 per 24-hour H.P. per annum at the high-tension bus-bars of the generating station.

The cost of power is largely influenced by the amount transmitted, the explanation of which will be found in the fact that the charges on transmission are fixed for a given line irrespective of the amount of power transmitted. The resultant cost to each municipality will also be found to be dependent upon all the other municipalities providing their relative estimated market.

In the following table is shown in condensed form the total investment, annual charges, and cost of low-tension power at the municipal sub-stations (sub-stations included).

#### TABLE XI.

mart vv to distributed	Full Load 13 608	3/ Load	Load
Total H.P. distributed	13,000	10,206	6,504
and inter-switching	<b>\$878,885</b>	\$823,216	767,725
Investment per H.P. delivered	64.58	80.66	111.36
Total annual repairs, depreciation, patrolling, and	53.343	40 000	44.004
operation and administration	35,155	48,838 32,929	44, <b>2</b> 84 30,709
Annual Interest, 4 per cent. on investment		32,323	30,709
Total annual charges	\$88,498	\$81,767	\$74.993
Total annual charges Cost of 24-hour power, including line and step-down		•	- '
sub-station transformer losses : -			
Kingston	21.43	22.89	26.85
Marlbank	21.88	23.59	27.52
Deseronto	20.82	22.17	25.52
Belleville	16.66	17.16	18.56
Whitby	27.33	30.32	37.15
Ochowa	21.52	23.16	27.29
Oshawa			
Bowmanville	21.52	22.86	26.48
Port Hope	19.49	20.41	22.77
Cobourg	18.30	19.06	20.95

The general scheme on which the estimates are based involves three-phase, 25-cycle generation, and transformation to and transmission at 55,000 to 60,000 volts. The step-down transformer station estimates have been made on the basis of 2,200 volts as a municipal distributing voltage, and the entire capital and operating charges of these stations are included in the prices of power as given in the summation sheet.

Applications may arise from municipalities or individuals for power at points distant from the transmission line, and the additional charges for an individual branch line from any municipal sub-station and sufficient transformer capacity is given in the following table.

TABLE XII.

Showing cost of distribution from municipal sub-station to ar individual consumer, not covered by local distribution.

Distance in	Cost per	horse-powe	r per annum	for the del	ivery of var	ious amount	s of powe	r,
miles from Municipal substation	50 HP	75 HP	100 HP	50 HP	200 HP	250 HP	300 HF	•
2	<b>\$5</b> ,58	\$4.20	<b>\$3</b> ,53	\$2,92	\$2.74	<b>\$2</b> .60	\$2.51	1
3	6.89	5,20	4,41	3.60	3,25	3,10	3.03	
4	7.92	6.18	5,20	4.27	3.93	3,72	3.86	2,200 Volts
5	8.87	7,18	5,98	4.96	4,55	4.32	4.17	122
6	10,20	8.24	` 6.77	5.38	5.13	4.60	4.43	)
8	14.10	10,14	8,40	69.7	6.24	5,79	5.58	۱۰.
10	16.12	12.13	9.54	8.31	7.68	6.96	6.17	} <u>8</u> ;
12	18.76	14.03	11.12	10.12	8.42	7,96	7.22	) 3:
15	22.74	17.08	13.48	10,89	9.35	8.84	8.32	} 2 2 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5

The total cost of power to such a consumer is ascertained by adding the rate per H.P. from this table to the cost of power at the nearest municipal sub-station. The charges for a branch transmission do not include any allowance for right of way or telephone, it being assumed that the highways would be available for such low voltage lines.

#### PART VI

#### DISTRIBUTION OF POWER.

The next step required to be taken is the determination of the additional cost of the distribution of power from a given municipal sub-station to the consumers' premises, and of the installation of service transformers where these are necessary. To arrive at this cost accurately necessitates the complete design of a distributing system for the given municipality, but it has been considered sufficient to take two places, namely, Oshawa and Kingston and consider them as typical of the remaining municipalities.

Oshawa.—Distribution to the present probable consumers in Oshawa, with an allowance of 25 per cent. additional for future growth, and with service transformers where necessary, requires a capital investment of \$48,900, with total annual charges, including operation, repairs, replacement fund and interest at 41-2 per cent. of \$8,910. This amount also includes the cost of the power lost in distribution and transformation.

The following table, on the basis of the proportionate loads shown in the summation sheet, gives the cost of 24-hour power distributed to the consumers' premises in Oshawa:

#### TABLE XIII.

	Cost of 24-hour power per H.P. per annum.					
power delivered.	At Healey's Falls, including line and step-down sub-station losses.	At Sub-station.	At Customers'			
Full Load, 1,825 H.P. ½ Load, 1,368 H.P. ½ Load, 912 H.P.	12.93	\$21.52 23.16 27.29	\$26.30 29.67 37.06			

The final costs as given in this table do not take into account the overlapping of customers' maximum demands, and these prices would be considerably modified for any system of charges on maximum demand, but would practically hold for a combined charge of a meter rate added to a rate based on maximum demand. Seventeen industries were considered as likely to use electric power, at distances from the municipal receiving station ranging up to one and one-half miles.

Kingston.—In this city twelve industries were considered as admitting of electrical installation at varying distances from the substation, up to two and one-half miles. The necessary capital expenditure for a distribution system would be \$93,200 with total annual charges of \$12,976, including line and transformer losses at maximum demand. Adding the cost per H.P. to that already obtained in the summation sheet, the following costs would result:

TABLE XIV.

	Cost of 24-hour power per H.P. per annum.				
Amount of power delivered.	At Healey's Falls, includ- ing line and step-down sub-station losses.	At Sub-station.	At Customers'		
Full Load, 2,750 H.P. ¼ Load, 2,062 H.P. ½ Load, 1,375 H.P.	\$13.50 12.98 12.90	\$21.43 22.89 26.85	\$26,15 29,19 36,29		

The same remarks will apply to the final costs arrived at in this case as in the case of Oshawa. In Kingston, however, the conditions seem more favorable to a considerable modification of final costs, due to better prospects of obtaining limited hour motor contracts.

As the larger proportion of power sold is required for 10 hours only it is evident that this power will be available for lighting and pumping purposes after six o'clock p.m., to a municipality free of cost to them, but during the winter season there is a period between 4.30 p.m. and 6 p.m. not provided for, and in order to have free power for lighting purposes available all the year through, it becomes necessary to make what are called "limited hour contracts," by which certain motor users will agree to shut down during this period, namely 4.30 p.m. to 6 p.m., for say five months of the year. The compensation which it becomes necessary to make to these motor users under such an arrangement represents, evidently, the cost to the municipality of an equivalent amount of power for peak lighting purposes.

The utilization of the idle electric transmission capacity during the night for municipal pumping purposes will, of course, be seen to be dependent on the possession of sufficient storage capacity in reservoir or standpipe to carry the municipality over the daytime.

#### PART VII.

#### MOTOR INSTALLATIONS.

To complete the information regarding the cost of electric power to the consumer, the following table is given, showing the cost of induction motor service per H.P. per year.

TABLE XV.

CAPITAL COST AND ANNUAL CHARGES ON MOTOR INSTALLATIONS. POLYPHASE 25-CYCLE, INDUCTION MOTORS,

Capacity	Capital cost per	ANNUAL CHARGES.				
H.P. H.P. ins	H.P. installed.	Interest 5%	Depreciation and Repairs, 6°/,	Oil, Care and Operation.	Total per H.P. per Annum.	
5	\$41.00	\$2.05	<b>\$</b> 2.46	\$4.00	\$8,51	
10	39.00	1,95	2.34	3.00	7.29	
15	35,00	1.75	2.10	2.50	6.35	
25	28.00	1 40	1.88	2.00	5.28	
35	25.00	1.25	1,50	1.75	4,50	
50	24.00	1.20	1.44	1,50	4.14	
75	21 00	1.05	1.26	1.25	8,56	
100	20,00	1.00	1.20	1.00	3,20	
150	17.00	.85	1.02	.80	2,67	
200	16,00	.80	.96	.70	2,46	

By combining the results given in this table with the previously worked out cost of power as obtained for Oshawa and Kingston (or for any other town or city, making an allowance for distribution from the municipal sub-station to the customer of from \$3.00 to \$7.00 per H.P. per year), a total charge per H.P. per year will be obtained, which represents to any customer the entire yearly charge for electric power, including (as shown in tables) interest, repairs, replacement fund and operating charges.

#### PART VIII.

#### SINKING FUND.

In the above estimates for transmission and transformation, depreciation and replacement charges have been provided for which would replace the different classes of plant in periods ranging from 15 to 40 years. These depreciation charges would, therefore, amply serve the purpose of any sinking fund which might be considered needful. In the case of the generating plant estimates, however, the depreciation charges would not be sufficient for such a purpose in the so-called permanent portions of the development, comprising the dam, head-works and power-house. If a forty-year sinking fund were considered needful, a charge would have to be made on some \$45

expenditure per H.P. of capacity sufficient to repay this expenditure in 40 years; a charge of \$0.62 per H.P. per annum at 3 per cent. would meet this demand.

## PART IX

#### EXISTING RATES.

In Table XVI. will be found a fairly complete statement of the rates now being charged for electric light and power throughout this district. It will be noticed that the upper portion of the table pertains to the towns in the upper Trent valley, now generally supplied by hydro-electric power, while the lower portion gives the rates in the municipalities on or adjacent to Lake Ontario.

TABLE XVI.

Showing comparison of rates for power and light in various municipalities in the Trent District.

		1				
Municipality	Street arc lighting, per year.	Commercial.		Residential.		Power. Flat rate per

#### PART X.

#### STEAM POWER.

In order to institute a comparison between the cost of electric power as has just been set forth and the cost of power generated by steam or producer gas, the following tables have been compiled after a careful study of data available in technical journals and also from data collected by the Commission's engineers in various towns within the district under consideration. The capital costs have been compiled from information supplied by various makers of engines and other machinery. The tables represent average working conditions and assume a high class installation.

#### TABLE XVII.

#### STEAM POWER PLANTS.

Showing capital costs of plants installed and annual costs of power per brake horse-power.

Capital Cost of	of Plant per H	.P. Installed.	Annual Cost	Annual Cos
Engines, Boilers, etc., installed.	Buildings.	Total.	of 10-hour Power per B.H.P.	of 24-hour Power Per B.H.P.

Note: Annual costs include interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel, (coal at \$4.00 per ton). Brake horse-power is the mechanical power at engine shaft.

It will be noted that for a consumer requiring a large installation, operating for ten hours only, there appears to be little advantage to be derived from the use of transmitted electric power. provided the power is not to be distributed throughout a consumer's buildings by a complicated system of shafting, belts, etc. But in the majority of cases this condition obtains, and herein lies one of the specific advantages of electric power. Motors can be installed on each floor of a factory, or even on each machine, with but little loss in efficiency, and only such motors as are required to drive the machinery in use from time to time need to be operated. In many cases due to this fact the total electric power consumption of a large factory would be reduced from 25 per cent. to 50 per cent. below that which is required under steam operation, working from a central station.

Again where electric power is available throughout the 24 hours many industries will work night and day thereby effecting a great economy, as is evidenced by a comparison of the cost of 24-hour steam or producer gas power with 24-hour electric power.

Perhaps the most striking advantage to be derived from the use of electric power as compared with other power is that the small consumer can obtain power at a rate which should not be appreciably greater than that made to the large consumer, although the present practice in selling electric power is to discriminate against the small consumer for the reason that electric power prices made by private companies are not based on cost of service, but are merely made with a view to displacing steam.

#### PART XI.

#### PRODUCER GAS POWER.

#### TABLE XVIII.

SHOWING CAPITAL COSTS OF PRODUCER GAS PLANTS INSTALLED AND
ANNUAL COSTS OF POWER PER BRAKE HORSE-POWER.

	Capital Cost of Plant per H.P. Installed.			Annual Cost	Annual Cost
Size of Plant, H.P.	Machinery, etc.	Buildings.	Total.	of 10-hour Power per B.H.P.	of 24-hour Power per B.H.P.
10 20 30 40 50 60 80 100 150 200 300 400 500 750 750	\$187 00 110 00 93 00 84 50 80 00 79 00 78 20 77 50 76 00 74 00 73 00 71 50 70 00 67 50 65 00	\$40 00 \$6 00 \$3 00 29 00 24 00 22 00 20 00 19 00 16 00 14 00 12 00 10 00 8 00	\$177 00 146 00 126 00 113 50 106 00 103 00 100 20 97 50 95 00 91 00 85 50 82 00 77 50 73 00	\$53 48 44 47 38 73 85 06 32 27 30 49 28 70 27 05 25 87 24 24 23 41 22 54 21 55 20 46	\$90 02 75 22 65 99 59 85 55 22 52 03 48 95 45 40 43 17 41 78 40 40 39 03 37 54 35 99

Note: Annual costs include: interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel (Bituminous coat at \$4.00 and Anthracite coal at \$5.00 per ton).

A reference to Table XVII. will show that the cost of power developed by producer-gas plants and gas engines is less than that produced by steam plants of the same capacity. It may be said, however, that up to the present no very large installations of suction producers have been made, 250 to 300 horse-power being about the maximum. But this has been provided for in the table by assuming that the larger plants will be made up of several units, each unit being not greater than 350 H.P. capacity. While operation of producer-gas plants has not been going on many years, and complete knowledge on the subject is not available, with the information at hand it is believed that in many situations this form of power producer will be found more economical than a steam plant, and therefore a closer competitor of hydro-electric power. It must be remembered that the same objections hold against the producer-gas plant as those which have been

mentioned in reference to steam plants, namely, that 24-hour power costs proportionately more than 10-hour power; that the small consumer does not have the great advantage obtainable by the use of electric power; and also that a central installation in a factory is all that is possible if electric motors are required in various parts of the factory, and the only prime mover available is steam or gas. This will make the cost of electric factory operation very expensive, and considerably higher than the power costs shown in Table XVII. Speaking generally, however, it may be said that producer-gas plants have a bright future and as the design and construction is perfected undoubtedly the capital cost will be reduced and the cost of power lessened.

TABLE XIX.

Showing the effect on the cost of power of a variation in the price of coal of one-half dollar per ton.

## PART XII.

#### SAVINGS.

In Oshawa, at the present time, the probable amount of steam power which could be economically replaced by electric installations is 1,500 H.P., costing annually, in operating expenses alone, apart from heating, etc., about \$52,500. The amount of electric power necessary to replace this would be the 3-4 load of table XIII. or

1,368 H.P., costing \$40,589, showing a yearly saving, to power users alone, of \$11,919, besides cheap power for lighting and pumping.

In Kingston it is estimated that 2,062 H.P., costing \$60,190, could replace about 2,400 H.P., costing in operation expenses alone \$89,200, a saving, to power users alone, of \$29,100 per year, besides cheap power for lighting and pumping.

It may be confidently predicted that the above estimated savings would even be exceeded in actual practice, because of two considerations: first, the difference between the actual total electric power to be used and the steam power displaced by it would be even greater than shown due to overlapping, limited hour contracts, etc.; and second, taking the cost of electric power as for 10-hour power, (the displaced steam power being for the same period) the remaining idle capacity, over and above that used for pumping and lighting, could be utilized throughout the remainder of the day, through any possible channels at a merely nominal cost.

## THIRD REPORT.

#### LAKE HURON AND GEORGIAN BAY DISTRICT.

To his Honour.

The Lieutenant-Governor of Ontario:-

The undersigned Commissioners appointed by your Honour by Commission bearing date the 26th day of January, 1906, beg leave to submit the following report, as their third report upon the matters authorized and directed to be enquired into.

Your Commissioners made enquiries and obtained information from various sources, but did not find it necessary to hold formal sittings in this district, as the information which they have obtained has been given freely to members of their engineering staff, who have thoroughly canvassed this district both as to its hydraulic possibilities and its present industrial demands.

Your Commissioners have forborne to give in detail the names of their informants or the particulars of the information acquired from them, but have used the knowledge and facts so acquired for the purposes of computation, comparison, etc., and for the production of the results which they have now the honour to report.

The detailed scientific and technical information obtained has been tabulated and arranged by the Engineer employed by your Commissioners and is contained in his report which is submitted as an appendix hereto.

The following are the matters on which your Commissioners were authorized and directed to report, with the report upon each subjoined:—

#### DEMAND FOR ELECTRIC POWER.

(1) "The present and probable demand for hydraulic and electrical power in the various districts capable of being supplied from the different waterpowers within the jurisdiction of the Province of Ontario."

In this third report your Commissioners deal with that portion of Ontario bounded on the west by Lake Huron and Georgian Bay, and on the south, east and north by the districts covered by the Niagara and Trent reports already issued and by the watershed of the Ottawa River, and which, for the purposes of this report, may be called, The Lake Huron and Georgian Bay District. For convenience, the towns in this district have been assembled into four groups,

although the specific transmission schemes estimated upon do not apply to the groups as so made up, the subdivisions being geographical only.

The demand for electrical power will, in almost all cases, depend upon the relative cost of electricity as compared with that of steam, gas or other local source of power. The cost of electricity is dependent upon the distance over which it is transmitted and upon the quantity transmitted. As it is only feasible to transmit the power in large quantities, trunk transmission lines capable of carrying large quantities must be constructed at the outset; therefore the cost increases with the distance, and a point is eventually reached at such a distance from the generating station that electrical can no longer compete with steam or other local power.

Again the exhaust steam and heat from the steam plant of some factories is used in the process of manufacture, and it could not be expected that electricity would be adopted by manufacturers of this class for power only, as their production of steam and heat for manufacturing purposes apart from power would increase rather than diminish their expenses; and in many instances waste material is used in the production of steam; such industries have been excluded from the consideration of the extent of the market at present in sight. The capital cost of abandoning steam plants would also, in many cases, be considerable, and the ability of small users of power to bear this loss must always be a factor in the finding of a market.

Experience shows that where the distribution is controlled by private corporations, the distribution area remains restricted, and from the information obtained by your Commissioners they are able to say that the trend of affairs with private Corporations has been, not to compete for business and thus keep down prices to consumers, but to amalgamate or otherwise destroy competition, and then to fix the prices according to the slight saving which they may be able to induce particular customers to make. The natural result of this has been to force individual consumers, where the circumstances justified it, to instal generating plants of their own, or to adhere to existing methods, rather than to place themselves at the mercy of large combinations formed for the purpose of preventing competition and keeping up the price of electrical power.

As a result, however, of your Commissioners' enquiries in the various manufacturing centres of this district as to the present and probable market for electric power, it appears that under favourable conditions a total demand of 16,000 H.P. is at present existent. Of this total a considerable proportion can be supplied locally, or is already supplied locally or by transmission systems already constructed as indicated in the engineer's appendix. Again in some small scattered towns at a distance from water-powers there does not appear to be any opportunity to meet the small probable demands.

Aside from these, however, the power market dealt with in the Engineer's report totals some 12,800 H.P., the hydraulic supply for which is limited and could not take care of large increments, either industrial or for the operation of electric railways. This may become of importance in relation to the distribution of power from the Severn River, for, should Midland or Victoria Harbour make large demands for power beyond the market already in sight, either the supply of electric power to Meaford and Owen Sound would have to be abandoned or else further water-powers on the Moon or Muskoka River, some 10 to 15 miles north of the Big Chute of the Severn River, could be developed and operated in conjunction with those already studied at Big Chute and Eugenia Falls.

In connection with the Engineer's report recommending a common operation of the above mentioned water-powers it should be noted that the Georgian Bay Power Co., is already doing some work at Eugenia Falls, and it is hoped that this work will be carried on with a view to the future, by constructing large head works and pondage and installing machinery in large units so that allied operation with Big Chute power may become practicable.

Your Commissioners are convinced that there is now a market for the amounts of power above stated, and therefore, that if deliveries are based on 4% interest, the prices indicated in the Engineer's report can be made to the various municipalities as soon as the necessary works are constructed.

#### UNDEVELOPED LOCATIONS.

(2) "The location, capacity, and capital cost of development of the various water-powers within the legislative jurisdiction of the Province of Ontario at present undeveloped, but whose development is required to supply the present and probable needs of the surrounding districts, and to ascertain the cost of the attendant transmission plant necessary to the utilization of electrical and hydraulic powers to be provided from the aforesaid water-powers within the respective surrounding districts."

A systematic tabulation of the water-powers of the various rivers in this district based upon gaugings and meterings, supplemented by information derived from other sources, has been carried out during the past year, and although more minute information, particularly with reference to dry weather flow, could be obtained by continuing the work, it is felt that a fairly accurate hydraulic knowledge of the district has been obtained.

In the southern portion of this district the rivers do not possess natural storage, and to develop such beyond that required for daily variations of load is financially impracticable; thus for water power developments in this area the cost per horse power of dry weather capacity will be high and there will be a tendency to instal more machinery than can be operated during low water periods, the deficiency being made up in some cases by auxiliary steam equipment.

The proposed development on the Maitland river is now being promoted by the Maitland River Power Co. and there is already a small power plant near the mouth of the Saugeen River which would be abandoned in case the larger one were gone on with.

Also at Eugenia Falls a Company is now commencing construction, and it is much to be desired that the development at the Big Chute of the Severn River should be constructed by allied interests tending to ultimate economy in serving the Georgian Bay towns within transmission distance from these two water powers.

North of the Severn River many good natural water powers exist and they will doubtless be developed from time to time as needs arise; but at the present time the only town of importance not yet supplied or which has not water power in its vicinity is North Bay. for which a suggested source is the South River, although a much larger development could be made at the Chaudiere Falls of the French River, involving, however, a very long transmission not warranted by the present demand for power. It is considered that the undeveloped powers on the Sturgeon River will be required in the future at Sturgeon Falls, and that the water powers of the Mattawa are not available for development at present owing to the Dominion Government having now under consideration the Georgian Bay Ship Canal which might require the whole dry weather flow of this river for canal As shown in the Engineer's report, Table V, there are many undeveloped locations of considerable magnitude for whose power there is at present no near market; these are located on the Moon, Muskoka, Maganetawan, French and Wahnapitæ Rivers. The natural uses to which these powers might some day be devoted would be pulp grinding, wood working manufactures, or ultimately the operating of railways now operated by steam.

Your Commissioners, having considered the present requirements of the district, herewith present detailed estimates of the capital costs and annual charges of five hydro-electric developments of a total nominal capacity 9,950 H.P. for which see Part IV of the Engineer's report; and, in connection therewith, have caused careful studies to be made, and now present detailed estimates of the capital costs and annual charges, etc., of transmission systems and substations necessary to deliver this power to various municipalities, and also some 3,900 additional horse power from Niagara Falls to meet a demand for power in localities which it has not been found feasible to supply from water powers of this district. Part V of the Engineer's report contains this information.

#### RATES AND PRICES.

(3) "To ascertain the rates or prices that would require to be charged the various classes of consumers of hydraulic or electrical power within the respective districts in order to meet all expenditure of maintenance and operation."

The ascertainment of the rates that would require to be charged for electrical power in order to meet expenditure of maintenance and operation is based upon the cost of necessary plant for future calls upon it, original cost of construction, cost of maintenance and operation, and the probable market for electrical power, ascertained from local enquiries.

In order to ascertain the cost of delivering electrical power in large quantities at particular distances, your Commissioners have made computations with respect to all the municipalities (as localities and not as corporate bodies) which could be conveniently and economically supplied from five generating plants through transmission systems and sub-stations estimated on in Part V of the Engineer's report, supplemented by some additional power from Niagara Falls. It should be particularly noted that the basis of estimate is not the total present power consumed in the various manufacturing centres; but that portion which the Commission's Engineers, after consideration, denote as being probably available as customers, if electrical power were offered at reasonable rates.

The calculations have been three-fold:

1st—Present available market plus 25% arbitrary increase to allow for growth until such time as installations of transmission systems can be completed.

2nd-75% of this arbitrary total.

4th-50% of this arbitrary total.

Your Commissioners call attention to the fact, however, that when electricity is delivered at a municipal sub-station, as above, the cost of distribution among the consumers within such municipality must be added to this price in order to determine the cost to the individual municipal consumer.

In order to illustrate the cost of distributing power delivered at a sub-station your Commissioners have caused estimate to be made for a distribution system for the town of Collingwood as typical for towns in this district, and in Part VI of the Engineer's report will be found the results obtained, but it must be understood that local conditions, the proportionate amounts of lighting and power, and the variety of industries, hours of operation, etc., all point to the necessity of special local studies being made for each municipality.

Table XXII, Part V, also gives data in regard to the cost of supplying a particular customer with power at a considerable distance from a sub-station, the total cost to such a consumer being the sub-station cost added to the secondary cost given in the table.

#### SAVINGS.

(4) "To enquire into and ascertain the annual savings accruing to the consumers in the various districts aforesaid by the substitution of the rates or prices in the next preceding paragraph for the rates paid at present in the said district so far as the Commissioners may be able to ascertain or estimate them."

The estimated savings obtained by comparing the present conditions under steam operation with those obtainable by using electrical power supplied on the basis of the engineer's estimate is given in Part XII. for the town of Collingwood, as typical of this district; it must be understood, however, that this is on a 4% basis, and will not hold true if the electrical power is transmitted and distributed by private companies from, or including the generating station, as these companies will only make such rates as will barely induce consumers to change from steam to electrical operation by reason of greater cleanliness, convenience, etc.

The annual amount of savings which might accrue is very difficult to estimate because each town has its peculiarities. If some industries could be encouraged sufficiently by cheap power they might operate 24 hours per day; others might be willing to give limited hour contracts for the winter season; and the town pumping, if done by the municipality, and where reservoir capacity is available, might also be done chiefly by night. All these factors have such an intimate bearing on the solution that any estimate can only be considered approximate. However, the estimates given in Part XII. of the Engineer's report are considered to be conservative.

#### CAPITAL COST OF UNDERTAKINGS.

(5) "To enquire into and ascertain the cash capital cost of the hydraulic and electrical power undertakings of existing companies located within the Province of Ontario, the capacity and state of development thereof."

Your Commissioners considered that to enquire into the capital costs of ordinary electric lighting stations operated by water power adjacent to its distributing area would not be of any particular value for this report, as the evident intention and aim of the Commission's enquiries were to determine these matters with respect to larger undertakings, generating electrical energy both for purposes of power and light, and transmitting the same some distance.

The undertakings at present doing a business of this character in this district are situated at Sturgeon Falls, Sudbury, Bracebridge, and Orillia.

Sturgeon Falls electric installation is made by the Imperial Paper Co., and outside of some 210 H.P. for town lighting distributes 830 H.P. for operation in its own mills. The cost of this installation would be difficult to determine outside of machinery costs, as it is only a portion of a much larger installation for pulp grinding direct by turbines.

Sudbury is supplied with its electric power from the Wahnapitae River some 10 miles distant. The power plant is built with permanent works of 4,000 H.P. capacity, power house of 2,130 H.P. capacity and generating machinery of 1,065 H.P. capacity, it delivers at the present time 200 H.P. in Sudbury. The present cost is \$120,000.00 including transmission system and transformer stations.

Bracebridge owns a municipal power station of 665 H.P. from which at the present time is sold some 600 H.P. The capital cost to date has been \$75.500.

Orillia owns a municipal power station of 2,400 H.P. capacity with machinery installed for 1,600 H.P. The sales at the present time being close to the capacity, and the installation of the 800 H.P. additional of machinery is now in progress. The complete cost to date of power station and transmission system, with some distribution is \$250,000.

The above described constructions are none of great magnitude, but as they are all naturally easy developments, the capital cost per H.P. and annual charges are moderate except in the case of the Ragged Rapids plant of the town of Orillia which, owing to unfortunate incidents in connection with construction, has cost more than it should have cost.

#### POWER SUPPLIED AND UNDER CONTRACT BY THE EXISTING COMPANIES.

(a) "The quantities supplied and contracted for and the rates charged and to be charged under such contracts by these companies for hydraulic and electrical power."

In Part II. of the Engineer's report, Table V., will be found listed the amount of machinery installed at various points. It will be noted that in most cases the installations are for flour or for other mill work or for generation of electric energy for town lighting. In only three or four instances are any considerable amounts of electrical energy supplied for power purposes.

The prices or rates charged for power and light in various municipalities are set forth in Part IX. It will be noted that the charges for light by municipal plants are uniformly lower than those under private control and that the price for power at Bracebridge and Orillia is much less than at Sudbury where a privately owned power Company supplies power to the town.

#### APPRAISEMENT OF UNDERTAKINGS

(b) "The actual present value of the said undertakings, or such of them as may be required, after making such fair and reasonable allowances for existing conditions as in the judgment of the Commissioners seems necessary or expedient."

See Part V. of Commissioners' report.

(c) "To estimate the capital outlay, if any, necessary to complete these undertakings."

At the present time the town of Orillia is proceeding to expend some \$80,000 additional in the construction of a permanent dam and increase of generating machinery from 1,600 H.P. to 2,400 H.P.

The town of Bracebridge is expending \$14,000 in increasing its generating capacity from 330 H.P. to 660 H.P.

The Wahnapitae Power Co. can when desired add to its machinery capacity increasing it from 1,065 H.P. to 2,130 H.P. by an expenditure of about \$18,000.

At Eugenia Falls, on the Beaver River construction is just being commenced by the Georgian Bay Power Co., and near Goderich, on the Maitland River, the Maitland Power Co. is promoting the construction of the power plant outlined in Part V. of the Engineer's report.

#### CONCLUDING REMARKS.

Your Commissioners respectfully submit that in the thickly settled portions of this district water powers are scarce and limited, and valuable, a demand exists now for all the power which can be conveniently produced; in the near future demands will be made, in all probability, on the water powers of the Muskoka River for transmission to supplement the available power of the Severn and Beaver Rivers. It therefore is imperative that the water powers of the Severn, Muskoka, or other rivers not yet leased by the Crown, be retained for the use of the many municipalities which must, for all time, depend on these sources for whatever electrical energy they may obtain from water power, and should any lease of water power be granted in the future such lease should specify the rates at which the Hydro-Electric Power Commission may obtain electric power in

a condition and quantity at the generating plants ready for transmission, or at the points of delivery in the various municipalities.

This is particularly applicable with respect to the Georgian Bay towns where, if any widespread benefit is to be obtained, the concerted action of all the municipalities interested is necessary, as a private company would be interested in selling as much of the power as possible in those towns located near the water power, at rates which would approach as nearly as possible to coal produced rates; thus giving a maximum of profit to the Company and a minimum of benefit to the customers, leaving the more distant towns for all time without any benefit.

All of which is respectfully submitted.

(Sgd.) Adam Beck,
Chairman.
(Sgd.) George Pattinson,
(Sgd.) John Milne.

TORONTO, September 10th, 1906.

## THIRD REPORT

# Lake Huron and Georgian Bay District

## **ENGINEER'S REPORT**

ON

THE GENERATION, TRANSMISSION AND DISTRIBUTION OF ELECTRIC POWER

#### HONOURABLE ADAM BECK.

CHAIRMAN OF THE HYDRO-ELECTRIC POWER COMMISSION:

DEAR SIR,-

Herewith find my report on the Lake Huron and Georgian Bay district, extending as far north as Wahnapitae River and the town of Sudbury.

The report deals with the present demand for power within economical transmission distance of various water powers, and with the cost of generating and transmitting electrical energy within this area, based on 4% return on investment.

Yours respectfully,

CECIL B. SMITH,
Chief Engineer.

TORONTO, CANADA, AUGUST 23RD, 1906.

#### PART I.

#### GEOGRAPHICAL SUB-DIVISIONS.

In that portion of Ontario adjacent to Lake Huron and Georgian Bay, and over the interior of western Ontario, north of the district already covered by the Niagara Report, there is a large number of small towns scattered somewhat uniformly over the entire area as far north as the Severn River, while north of this there is a very sparse population with few towns, but adjacent to several of which are found water-powers sufficiently extensive to supply all their present needs.

The water-powers of the southern portion of this district are not very extensive and are widely scattered, leaving the central or interior territory at a disadvantage as regards delivery of electric power at reasonable rates, not only because of distance from source of supply, but also because of the small demand existing at any one point, making transmission relatively expensive, and even, in some cases, quite impracticable under present conditions.

In view of the above described conditions it has been found necessary to extend somewhat the sphere of influence of Niagara Falls, as will be noted later on, and it is proposed to carry a secondary transmission line from Berlin to meet the requirements of Elmira, Elora and Fergus, and from Toronto to Aurora and Newmarket.

#### PART II.

#### DEMANDS FOR POWER.

As a basis for estimates a full canvass was made by expert assistants in each town of this district. In this canvass care was taken to determine whether or not the consumer would be likely to adopt electric power if it were available at reasonable rates; the canvass included also present users of hydraulic and electric power. In the tables following, these various classes of consumers are tabulated, so that an estimate can be arrived at of the market available in the imme-

diate future for electric power, and in Tables I, II, III and IV this information is set forth in detail.

The map accompanying this report indicates the location of the chief water-powers on the Wahnapitae, Sturgeon, French, South, Muskoka, Severn, Beaver, Saugeen and Maitland Rivers, and, as shown thereon, specific transmission schemes have been adopted by which certain of the present available markets may be supplied from these water-powers.

Detailed estimates, etc., in connection with these transmission schemes will be found worked out in this report.

It will be noted that many of the smaller towns have not been taken into consideration, in some cases because the present consumption would not warrant the necessary expenditure, in some because the towns are already partially or entirely supplied locally, and in others because the amount of water-power available has not been found sufficient to meet all probable demands.

#### PART III.

#### SOURCES OF HYDRO-ELECTRIC POWER.

In the southern inland portion of this district water-powers are either very limited in extent or entirely absent, as the rivers all flow from a high table-land lacking in storage through a well-cleared country without important declivities. It is only near the mouths of rivers in this portion of the district that water-powers of any extent are met with.

Further northward, however, the Severn, Muskoka, Maganetawan, French, Sturgeon and Wahnapitae Rivers have entirely different characteristics, with their sources abounding in lakes and still practically in virgin forest, the result of which is that the water-powers on these rivers are both extensive and valuable, and have already been developed to a considerable extent in the cases of Orillia, Bracebridge, Sturgeon Falls and Sudbury.

In the following table is given the uniform low water flow only, but it should be understood that in all cases enough local pondage can be obtained above the headworks to provide for a considerably increased peak capacity. It is not generally feasible, however, to obtain storage sufficient to materially augment the natural dry weather flow over a greater period than that required to take care of the daily variation in load demands.

#### PART IV.

#### GENERATION OF POWER.

At the present time there is a large number of small local developments providing electric light and small amounts of power to local consumers, as will be noted by reference to the fifth column, Table V. Of these the most extensive are the developments at Bracebridge, which deliver about 1,000 h.p., all consumed locally.

The only developments in this district which generate electric power and transmit at high potential, are those constructed (a) by the town of Orillia on the Severn River at Ragged Rapids, twenty miles distant, 22,000 volts; and (b) on the Wahnapitae River for Sudbury, ten miles distant, 22,500 volts. In carrying out the construction of the dam, etc., at Ragged Rapids, considerably greater expense was incurred by Orillia than that at first contemplated, and the capitalization at the present time, including some items for water-works and for local distribution, amounts to \$250,000 for an installation of 1,600 h.p. in three units of 800, 400 and 400 h.p. respectively; and further expenditures are now contemplated for the construction of a permanent dam and increase of machinery equipment to a total capacity of 2,400 h.p., at a probable cost of \$80,000 additional. In spite of excessive investment per h.p., the town is able to furnish power and light at very reasonable rates, as will be seen by reference to Table XXIV. The

Wahnapitae Power Company has installed a plant on the Wahnapitae River, ten miles from Sudbury, and proposes an ultimate development of 3,200 h.p., with one spare unit additional. The present equipment is one of 800 k.w. in one unit, with a three-phase transmission to Sudbury, where some 200 h.p. is now marketed.

In this district 60-cycle frequency has been chosen for developments estimated upon, owing to the fact that a considerable number of installations are already operating at 60 cycles, and that this is, for lighting purposes, the frequency usually adopted; further, in that section of the district where electric railways are probable, and for which low frequency is desirable, the supply of hydraulic power will be altogether required for other purposes, such as lighting and small motor loads.

A careful study has been made of the present probable demands for electric power in relation to possible water-power developments capable of supplying these demands, and five developments have appeared to be worthy of serious consideration: namely, (1) On the Maitland River near Goderich, 80 feet head; (2) on the Saugeen River at Southampton, 40 feet head; (3) Eugenia Falls, on the Beaver River, 420 feet head; (4) Big Chute, on the Severn River, 52 feet head; and (5) on the South River near Nipissing, 85 feet head.

(1) Maitland River Development.—Some four miles east of Goderich on the Maitland River at the Ox Bow a development of 80 feet head can be obtained by the construction of a rather expensive dam, which will provide storage sufficient to take care of any reasonable daily peak load within the limit of the temporary overload capacity.

Surveys and estimates have been made by engineers on behalf of the Maitland River Power Company, and the reports in connection therewith have been examined by an engineer of the Commission, along with studies at the proposed development point, and close estimates of capital cost and annual charges will be found in Tables VI and VII, following.

(2) Saugeen River Development.—At Southampton there is at present a small development made by the Saugeen Light and Power Company under 13 feet head, amounting to some 200 h.p., and it is proposed to construct a dam below the Indian Reserve creating a development under 40 feet head, which would drown out the present one above mentioned.

The 24-hour capacity of this plant at low water would be about 1,200 h.p. electrical energy, and a suggested development, as shown in Tables VI and VII, is for 1,333 h.p. net, the storage created by the dam being sufficient to take care of any reasonable daily peak load up to the overload capacity of the generators.

(3) Beaver River (Eugenia Falls).—The development proposed at this point, as an independent plant, would probably be for about

1,000 h.p., which is the estimated 24-hour low-water capacity, but by combining this development with that on the Severn River, about to be described, it is feasible to instal at Eugenia Falls an equipment of 2,267 h.p., with a spare unit of 1,133 added. By this combination, making use of storage capacity, which can easily be created, the above installation can be employed for carrying all the excess of total load in the district dependent on these two plants above 4,000 h.p., continuous power to be drawn from the Severn River development. It will readily be seen that this will reduce operating expenses for the combined system by allowing complete shutting down of this plant for at least 12 hours per day and over Sunday.

- (4) Severn River (Big Chute).—A development at this point will be less expensive than ordinarily, owing to the small investment necessary for headworks and canal. Although the power available during an occasional low water period may fall slightly below 4,000 h.p., this amount can be safely depended upon during ordinary years, and the estimates are for works of this capacity, with the usual reserve unit. It will be noted in Table VII that estimates of annual charges are given (1) for this development alone, also (2) combined with Eugenia Falls, the idea being that at first the whole district, ultimately to be served by the two power plants just described, can be taken care of by the Severn River development alone. As soon as the market created becomes too large for the capacity of this plant, the Beaver River development would be undertaken to supply the increased demands, working, as just described in sub-section (3), as a peak load carrier for only a portion of each day.
- (5) On the South River a small development has been estimated on, for the supply of the industrial demands of North Bay, which might also furnish lighting current for Powassan and Callander.

TABLE VI.

ESTIMATED CAPITAL COST OF POWER DEVELOPMENTS.

Location of water-power.	Net amount of power to be developed, H.P.	Total capital cost.	Cost per H.P.
Maitland River		<b>\$</b> 325,000	\$203.12
Saugeen River	1,333 2,267	250,000 291,000	187.53 128.28
Severn River (Big Chute)	4,000	350 000	87.50
South River	750	115,000	153.33

The capital cost in each case includes step-up transformer stations, one reserve generating unit in excess of each of the above-mentioned capacities, and a spare transformer in each station.

#### TABLE VII.

#### ESTIMATED ANNUAL CHARGES ON FULLY DEVELOPED GENERATING PLANTS.

	1 <del>22 - 22 - 22</del> - 1		_ ++ :=.== =	· · · · · · · · · · · · · · · · · · ·

River.         Big Chute           \$5,665         \$4,840         \$4,100         \$17,433           2,754         3,247         2,620         8,571           2,755         3,247         2,620         8,571           13,000         9,984         4,534         14,000

The total annual charges on the Maitland River generating plant, including step-up transformer station are divided as follows: Goderich, 692 h.p., low-tension power, \$9,298, or \$13.44 per h.p. per annum, Clinton, Seaforth and Mitchell, 990 h.p., high-tension power, \$14,876, or \$15.03 per h.p. per annum.

The charges on the Saugeen River generating and step-up trans-

forming plant are assessed as follows:

Southampton and Port Elgin, 450 h.p., low-tension power, \$7,080,

or \$15.71 per h.p. per annum.

Note.—The 450 h.p. for Southampton and Port Elgin (250 and 200 respectively) is considered to represent the sum of the market now supplied and that available for electric power, since it is considered that the new hydro-electric plant will necessitate the removal of the present one.

Shallow Lake, 770 h.p., high-tension power, \$14,238, or \$18.49 per h.p.

#### PART V.

#### TRANSMISSION OF POWER.

In connection with the five hydraulic developments on the Maitland River, Saugeen River, Beaver River, Severn River and South River, detailed estimates of which have been given in Part IV, four main transmission schemes have been chosen as apparently best meeting present demands, and detailed estimates of these have been prepared with the following results:-

(1) The supply of power to Goderich, Clinton, Seaforth and Mitchell is contemplated from the development on the Maitland River. The scheme outlined involves transmission at generator voltage (2,200 volts, 60-cycle) to Goderich, but stepping up to 22,000 volts for trans-

mission to Clinton, Seaforth and Mitchell.

A high class wooden pole line upon the highways, with telephone wires upon the same poles, is considered as suitable for such a distance.

The table of transmission details shows the capital cost and annual charges on the transmission lines from the step-up transformer station to the step-down stations on the outskirts of the municipalities, and from the power house to Goderich, the service for which requires no transformation. The annual charges include depreciation and repairs, and the item called "Engineering and contingencies," includes interest during construction. The transmission charges are considered as fixed

for all loads within the capacity of the line.

The table of transformation details gives particulars concerning the proposed transformer stations. The step-up station building would be built full size at the outset, but equipment would be installed as required. In the case of Seaforth, one set of transformers and equipment would be installed for half-load, so arranged that when this capacity is exceeded the full equipment would be installed. In the other two cases, no division of equipment is considered feasible, and the charges are, therefore, fixed for all loads. As in previous reports, full load is 25 per cent. increase over the present estimated demand. The transformation charges provide for municipal taxes on building, insurance, depreciation, and 20 per cent. for engineering, contingencies and interest during construction.

The summation sheet contains the charges for transmission, transformation and administration, chargeause to each municipality, added to which in each case is the cost of power at the generating station. This cost includes in the case of Goderich the transmission line losses only, but for the other municipalities, transmission line and trans-

former losses.

The final column of costs is for 24-hour power at low-tension busbars of the municipal sub-stations, or in the case of Goderich, delivered at the town limits. It appears that the supply of anything less than three-quarter load is not feasible, in this district.

In the following table is shown in condensed form the total investment, annual charges and cost of power at the muncipal sub-stations

(sub-stations included).

#### TABLE XI.

Total horse-power distributed	Full load. 1,562	% load. 1,250	⅓ load. 781

(2) The Saugeen River at Southampton presents the natural source of supply for Southampton, Port Elgin, and the Shallow Lake Cement Co., 17 miles distant. Southampton's estimated demand of 250 h.p. would be supplied from the power-house at generator voltage, and Port Elgin also would only require a transmission at generator voltage over the five miles intervening. The cost of this transmission over and above the cost of ordinary local distribution will be found by referring to Table XXII of this report to be \$4.55 per h.p.; this amount added to \$15.71, the cost of power at the generating station for Southampton gives a cost at Port Elgin of \$20.26 per h.p. per annum, 24-hour power. This local transmission would require a capital investment of \$8,000. The power at Southampton station is generated 60 cycles at 2,200 volts, and the transmission line to Shallow Lake is estimated upon as operating at 22,000 volts, using high class wood pole construction on the highways, with telephone line on the same poles.

In the following table will be found the capital cost and annual charges on the transmission line required for Shallow Lake.

#### TABLE XII.

Distance Capital cost per mile, including telephone. Engineering, contingencies and interest during construction	17 miles. \$919 184
Total capital cost per mile	\$ 1,103 18,750 750 657
Total annual charges Annual transmission charges on a delivery of 710 H.P., per 24-hour H.P	\$ 1,407 \$ 1.98

The capital cost of and annual charges in connection with the stepdown transformer station at Shallow Lake are given in the following table:—

#### TABLE XIII.

Building	\$	1,600.00 12,000.00
Total capital cost	\$ :	3,600.00
Building, 1% Equipment, 7%	\$	16.00 840.00
Taxes on building, 2%		32.00

The total cost of power at Shallow Lake would be as follows:— High-tension power at generating station, per H.P. (including line and trans-		
former losses). Transmission, per H.P Transformation, per H.P	\$	19.84 1.98 2.09
Administration, per H.P. Annual cost per H.P. of 24-hour power, transformed to voltage suitable for		.60
motors	\$	24.51

(3) The demands for power in the towns along and adjacent to the south shore of Georgian Bay can be met by the development of water-power at the Big Chute on the Severn River and a subsequent one at Eugenia Falls on the Beaver River, as described in Part IV.

While this might be done by separate transmission systems each covering its own particular territory, it is considered that it will be much more advantageous, economical and efficient if the two developments are combined under one management, and transmission lines so constructed as to admit of the two power stations being operated in The considerations which show this combination to be highly favorable are: That by so doing practically all the reserve machinery can be installed at Eugenia Falls at a less cost per h.p., owing to the high head; that the parallel operation of the two power houses at widely distant points of a transmission line covering the whole district affords a comparatively high factor of safety with a minimum cost of line construction; and also that the storage possibilities at Eugenia Falls enable that station to be operated at a high output for a short period of each day, and to be closed down during the remainder of each twenty-four hours: from all of which it is evident that power can be developed and delivered by this combination at a considerably less cost than if two separate development and transmission schemes were undertaken.

It has already been noted that so long as the district is capable of using only a portion of the power herein estimated upon the develop-

ment at the Big Chute alone would be sufficient.

The transmission details following, Table XIV, show the capital costs and annual charges, including interest, depreciation, taxes on right of way, etc. The item called "engineering and contingencies" includes interest during construction. A single high-class wood pole line with a private right of way throughout, following the railways wherever feasible, is provided for, with a telephone line also installed on the power poles.

The transformation details, Table XV, show the estimated required capital outlay for municipal transformer stations, and the resulting annual capital charges and operating expenses. It is, in the case of the larger stations, quite feasible to install transformer capacity as needed, thus partially varying the investment and charges with the load requirements: but the buildings are estimated upon as built at the outset for full future load conditions (25 per cent. advance on present estimated demand) with equipment installed as needed.

The transformation estimates include municipal taxes on site and buildings and an allowance of 20 per cent. for engineering, contingencies and interest during construction.

The summation sheet (Table XVI) shows the charges due to the various sections of the service sub-divided amongst the various municipalities. Two-thirds of the total general administration expenses is charged to transmission and transformation, the remainder being included in the annual operating expenses of the generating plant. The

column showing the cost of power at the generating plants includes line and sub-station transformer losses, and is based on a price of \$12.00 per 24-hour h.p. per annum at the high-tension bus-bars of the step-up transformer station. (See Tables VI and VII.)

In the following table is shown in condensed form the total investment, annual charges and cost of power at the municipal sub-stations (sub-stations included).

#### TABLE XVII.

Total horse-power distributed		⅓ load. 4,781	⅓ load. 3,187
Total investment, including step-down and inter- switching stations	<b>\$4</b> 36,437.00	\$404,355.00 84.58	\$373,579.00 117.22
Total annual repairs, depreciation, patrolling, operation and administration	37,840.00	33,137.00	29,101.00
Annual interest, 4% of investment	17,457.00	16,174.00	14,943.00
Total annual charges	\$55,297.00	\$49,311.00	<b>\$44,044.00</b>

Cost of 24-hour power per h.p. per annum at low-tension bus-bars of step-down transformer sub-stations:

Owen Sound		\$ 21.55	\$ 26.90
Meaford	21.00	22.39 23.91	25.36
Collingwood		28.91 28.18	34 23
Midland		18.67	20.47
*Penetang	21.09	22.02	24.37
Victoria Harbour		19.43 22.31	21.21
*Coldwater	26. <b>27</b>	28.49	32.25

*It is not considered advisable to build high-tension lines to Penetang or Coldwater, but to have them participate in the scheme of secondary transmission as given in Table XXII, from which the cost of power to Penetang will be found to be the following amounts greater than the cost of power at Midland, three miles distant:—

Full load	250 H.P.	\$3.10 additional per H.P. per year.
% load	187 H.P.	3.35 additional per H.P. per year.
14 load	125 H P	3 00 additional per HP per year

Additional cost to Coldwater over that at Waubaushene, four miles distant:—

Full load	100 H.P.	\$5.20 additional per H.P. per year.
34 load 35 load	75 H.P.	6.18 additional per H.P. per year.
⅓ load	50 H.P.	7.92 additional per H.P. per year.

The above distribution lines will cost \$4,800 and \$6,000 respectively.

#### BRANCH TO SHELBURNE AND DUNDALK.

A minor transmission is also estimated upon for the supply of Dundalk and Shelburne from Eugenia Falls, with separate transformers at this generating station for 22,000 volts. A telephone line on the power poles is provided for, but no right of way allowance.

In the following table will be found the results of this estimate:—

#### TABLE XVIII.

Showing capital cost and annual charges on 22,000 volt, 60-cycle, transmission from Eugenia Falls to Dundalk and Shelburne.

Total horse-power transmitted:— Shelburne, 175 H.P.; Dundalk, 125 H.P Total investment, including step-down transformer stations		300

Total cost of 24-hour power per H.P.  If only 250 H.P. were contracted for.  If only 200 H.P. were contracted for.	\$26.21 29.97 33.74	\$16.85 18.20 19.75

As an alternative source of supply of power for these towns, attention is called to a small water-power near Horning's Mills, on a branch of the Nottawasaga River; although there is but small flow, the development can be made under 125 feet head, and, so made, would be capable of providing 250 h.p. twenty-four hour power, or, due to its good daily pondage conditions, the plant might be able to supply a peak demand of, say, 500 h.p.

(4) The most convenient immediately available source of power for North Bay, Powassan and Callander is considered to be a development on the South River. The estimates for a 22,000-volt transmission to Powassan and North Bay are here given. They are for a wood pole line along the highways and railways, with telephone wires on the power poles. The same allowance for engineering, contingencies, and interest during construction have been made as in previous cases. The final cost per h.p. is derived from charges which should be considered as fixed for lesser loads; in other words, the charges per h.p. will be inversely proportional to the demands up to the 750 h.p. mentioned.

#### TABLE XIX.

Showing capital cost and annual charges on 22,000-volt, 60-cycle. three-phase transmission from South River development to Powassan and North Bay.

Total amount of power transmitted:— Powassan, 125 H.P. (estimated); North Bay, 625	H.P. 750
Total investment, including step-down transformer stations.  Investment per horse-power delivered	\$50,500.00 67.33

Cost of 24-hour power per H.P. per annum at power-house, including line and transformer losses	\$19.80 5.09	\$20.10 8.25
Total cost of 24-hour power per H.P. per annum	\$24.89 33.19	\$28.35 39.80

#### NIAGARA EXTENSIONS.

As intimated in Part I of this report, it is proposed to supply certain towns, there mentioned, from the Niagara transmission systems.

(a) The estimates for a secondary 22,000-volt transmission from Berlin through Elmira to Elora are herewith submitted. The estimate is for wood pole line without right of way, telephone on power poles. Elora is at present supplied with lighting current from a steam station in Fergus, and it is proposed that the present lines between these two towns be used up to their capacity for the supply of low-tension, 2,200-volt power to Fergus from a common transformer station in Elora.

#### TABLE XX.

Showing capital cost and annual charges on secondary transmission, Berlin-Waterloo sub-station to Elmira, Elora and Fergus.

Total horse-power transmitted	Full load.	% load. 563	⅓ load. 375
Total investment, including step-down transformer stations  Investment per H.P. delivered	\$39,952.00 53.27	\$39,952.00 71.03	\$39,952.00 106.53
Total annual repairs, depreciation, operation and administration	\$2,837.00 1,598.00	\$2,816.00 1,598.00	\$2,783.00 1,598.00
Total annual charges	\$4,435.00	\$4,414.00	\$4,381.00
Cost of 24-hour power at Berlin-Waterloo sub-station, per H.P. per year	\$17.36	\$17.82	\$19.27
Cost of 24-hour power at low-tension bus-bars of sub-sta	ations, per H.	P. per year:	
Elmira Elora Fergus	\$24.10 26.56 29.91	\$25.80 29.47 33.37	\$30.28 36.84 41.44

(b) The supply of 1,600 h.p. required by the Toronto and York Radial Railway Company for the operation of the Metropolitan division can be reasonably combined with the power demands of Aurora and Newmarket. It is assumed that one-half of this quantity will be required at the Bond Lake station, and that the other half will be delivered at Newmarket for further transmission to the upper section. A 60,000-volt extension of the Niagara District transmission lines is estimated on, from Toronto, the results of which are as follows:—

#### TABLE XXI.

Showing capital cost and annual charges on 60-000-volt extension of transmission line, Toronto to Aurora and Newmarket.

Total horse-power distributed	Full load. 3,162	% load. 2,372	⅓ load. 1,581
stations.  Investment per H.P. delivered.  Total annual repairs, depreciation, patrolling, operation	\$116,130.00 36.73	\$101,900.00 42.97	\$87,430.00 55.30

AuroraBond Lake	22. 20.		

This transmission is over a wood pole line with telephone lines on power poles, and with fenced right of way.

#### INDIVIDUAL TRANSMISSION.

The various sub-stations have been estimated on the basis of transformation down to 2,200 volts, but the cost of distribution of power at this voltage will be dealt with in Part VI. Many instances arise, however, in which it is desired to supply a single large consumer or a small municipality at some distance from a sub-station. When this is the case the following table may be made use of. The total cost of power to such a consumer is ascertained by adding the rate per h.p. from this table to the cost of power at the nearest municipal sub-station. The charges for such a branch transmission do not include any allowance for right of way or telephone, it being assumed that the highways would be available for such low voltage lines.

#### TABLE XXII.

Showing cost of distribution from municipal sub-station to an individual consumer, not covered by local distribution.

Distance in miles from	Cost per	horse-power	r per annu	m for the de	elivery of v	arious amou	ints of power.
Municipal substation.	50 HP	75 HP	100 HP	150 HP	200 HP	250 HP	300 HP
2	\$5.58	\$4.20	\$8.53	\$2.92	\$2.74	\$2.60	\$2.51
3	6.89	5.20	4.41	3.60	3.25	3.10	3.03

15	22.74	17.08	13.48	10.89	9.35	8.84	8.32

#### PART VI.

### DISTRIBUTION OF POWER.

The cost of distribution from the municipal sub-stations to the the consumers' premises varies widely with different conditions and depends upon the distances involved, the magnitude of the demands of individual consumers and the grouping of these consumers.

This cost of distribution will not necessarily, however, give the increase of cost to the consumer above that paid for the power by the municipality unless a method of charging be chosen which will take into account the difference between the sum of the consumers' maximum demands and the maximum demand on the station. If the charging rate for power were one composed of a flat rate based on maximum demand plus a rate per k.w.-hour or h.p.-hour actually registered by meter, then it would be approximately correct to say that the combined rate per h.p. to the consumer should be the same as the cost of power at the sub-station plus the cost per h.p. of the distribution service. Besides this the ordinary municipality has such various means of modifying the rates for power, such as limited-hour contracts with motor users, contracts with summer users of electric power, etc., that fair rates could only be established after a careful study of the actual conditions after operations were begun. Under average conditions in a town demanding 1.000 h.p. or over, it could reasonably be expected that 10-hour power could be sold at the same or even a lower rate, if based on maximum demand, than that charged the municipality for 24-hour power at the sub-stations. In other words, the municipality might expect to profit sufficiently from overlapping peaks, 24-hour power for lighting, pumping, general motor users, etc., to pay the cost of its distribution.

The cost of a distribution system for the town of Collingwood has been estimated on, including such power service transformers as would probably be required; and it is found that a capital expenditure of \$31,000 would be necessary. This would only include the feeding of the necessary lighting current into the existing primary lighting network at suitable points and in no way covers lighting distribution. The substitution of 60-cycle transformers for those already in use in this town would be the only extra expenditure required for lighting distribution. The annual interest, depreciation and operation charges attendant upon such a power investment as above outlined would be \$5,713 for the distribution of 1,250 h.p., or at the rate of \$4.57 per h.p. per year, which, added to \$23.90 per h.p., the cost of low-tension power at the sub-station, gives an average rate for distributed power of \$28.47 per h.p. per year for 24-hour power, without any allowance for overlapping.

For the smaller towns the cost of the distribution service would not be likely to exceed the cost per h.p. found in Collingwood, but the opportunities for modifying the selling price would not be so extensive. It may be said, however, that the actual selling price of 10-hour power to the consumer would not be appreciably greater than the cost of 24-hour power to the municipality at the main sub-station, as given in this report.

# PART VII.

#### MOTOR INSTALLATIONS.

To complete the information regarding the cost of electric power to the consumer, the following table is given, showing the cost of induction motor service per h.p. per year.

#### TABLE XXIII.

Capital cost and annual charges on motor installations, polyphase, 60-cycle, induction motors.

Capacity   Capital cost per	ANNUAL CHARGES				
Capacity H.P.	H.P. installed	Interest 5%	Depreciation and repairs, 6%	Oil, care and operation.	Total per HI per annum.
5	\$39.00	\$1.95	\$2.34	\$4.00	\$8.29
10	36.00 30.00	1.80 1.50	2.16 1.80	3.00 2.50	6.96 5.80
15 25 35 50 75 100 150	25.00	1.25	1.50	2.00	4.75
35	22.00	1.10	1.32	1.75	4.17
50	20.00	1.00	1.20	1.50	3.70
75	19.00	.95	1.14	1.25	3.34
100	17.00	.85	1.02	1.00	2.87
150	15.00	.75	.90	□ .80	2.45
200	14.00	.70	.84	.70	2.24

By combining the costs given in this table with the cost of distributed power, as indicated in Part VI, the final or total charge per h.p. per year will be obtained.

#### PART VIII.

#### SINKING FUND.

In the above estimates for transmission and transformation, depreciation and replacement have been provided for which would replace the different classes of plant in periods ranging from 15 to 30 years.

The charges would, therefore, amply serve the purpose of any sinking fund which might be considered needful. In the case of the

generating plant estimates, however, these charges would not be sufficient for such a purpose in the so-called permanent portions of the development, comprising the dam, headworks, power-house, etc.

A forty-year sinking fund to cover these portions of the developments, amounting, on the average, to about \$65 expenditure per h.p. of capacity, would require a charge of \$0.77 per h.p. to repay this expenditure in forty years, interest being calculated at 4 per cent.

### PART IX.

#### EXISTING RATES.

In Table XXIV, following, will be found a statement of the lighting and power rates in a number of municipalities throughout the district. The municipally-owned steam plants show rates uniformly lower than Aurora and Seaforth, the two steam plants under private control. Sudbury has a municipal distribution, but it pays \$33.00 per h.p. for its water-generated power supply.

Bracebridge and Sturgeon Falls have locally generated hydro-

electric power.

TABLE XXIV.

# PART X.

#### STEAM POWER.

In order to institute a comparison between the cost of electric power as has just been set forth and the cost of power generated by steam or producer gas, the following tables have been compiled after a careful study of data available in technical journals and also from data collected by the Commission's engineers in various towns within the district under consideration. The capital costs have been compiled from information supplied by various makers of engines and other machinery. The tables represent average working conditions and assume a high class installation.

#### TABLE XXV.

Note.—Annual costs include interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel (coal at \$4.00 per ton). Brake horse-power is the mechanical power at engine shaft.

It will be noted that for a consumer requiring a large installation, operating for ten hours only, there appears to be little advantage to be derived from the use of transmitted electric power, provided the power is not to be distributed throughout a consumer's buildings by a complicated system of shafting, belts, etc. But in the majority of cases this condition obtains, and herein lies one of the specific advantages of electric power. Motors can be installed on each floor of the factory, or even on each machine, with but little loss in efficiency, and only such motors as are required to drive the machinery in use from time to time need be operated. In many cases due to this fact the total electric power consumption of a large factory would be reduced from 25 per cent. to 50 per cent. below that which is required under steam operation, working from a central station.

Again, where electric power is available throughout the 24 hours many industries will work night and day, thereby effecting a great economy, as is evidenced by a comparison of the cost of 24-hour steam or producer gas power with 24-hour electric power.

Perhaps the most striking advantage to be derived from the use of electric power as compared with other power, is that the small consumer can obtain power at a rate which should not be appreciably greater than that made to the large consumer, although the present practice in selling electric power is to discriminate against the small consumer for the reason that electric power prices made by private companies are not based on cost of service, but are merely made with a view to displacing steam.

# PART XI.

#### PRODUCER GAS POWER.

#### TABLE XXVI.

Showing capital costs of producer gas plants installed and annual costs of power per brake horse-power.

Size of Plant, H.P.	Capital Cost	of Plant per H.	Annual Cost	Annual Cost	
	Machinery, etc.	Buildings.	Total.	of 10-hour Power per B.H.P.	of 24-hour Power per B.H.P.
10	\$137.00	\$40.00	\$177.00	\$53.48	\$90.02
20	110.00	36.00	146.00	44.47	75.22
30	93.00	33.00	126.00	38.73	65.99
40	84.50	29.00	113.50	35.05	59.85
50	80.00	26.00	106.00	32.27	55.22
60	79.00	24.00	103.00	30.49	52.03
80	78.20	22.00	100.20	28.70	48.95
100	77.50	20.00	97.50	27.05	45.40
150	76.00	19.00	95.00	25.87	43.17
200	74.00	17.00	91.00	24.95	41.78
300	73.00	16.00	89.00	24.24	40.40
400	71.50	14.00	85.50	23.41	39.03
500	70.00	12.00	82.00	22.54	37.54
750	67.50	10.00	77.50	21.55	35.99
1000	65.00	8.00	73.00	20.46	34.66

Note.—Annual costs include: Interest at 5 per cent., depreciation and repairs on plant, oil and waste, labor and fuel (bituminous coal at \$4.00 and anthracite coal at \$5.00 per ton).

A reference to Table XXIV will show that the cost of power developed by producer-gas plants and gas engines is less than that produced by steam plants of the same capacity. It may be said, however, that up to the present no very large installations of suction producers have been made, 250 to 300 horse-power being about the maximum. But this has been provided for in the table by assuming that the larger plants will be made up of several units, each unit being not greater than 350 h.p. capacity. While operation of producer-gas plants has not been going on many years, and complete knowledge on the subject is not available, with the information at hand it is believed that in many situations this form of power producer will be found more economical than a steam plant, and, therefore, a closer competitor of hydro-electric power. It must be remembered that the same objections hold against the producer-gas plant as those which have been mentioned in reference to steam plants, namely, that 24-hour power costs proportionately more than 10-hour power; that the small consumer does not have the great advantage obtainable by the use of electric power; and also that a central installation in a factory is all that is possible if electric motors are required in various parts of the factory, and the only prime mover available is steam or gas. This will make the cost of electric factory operation very expensive, and considerably higher than the power costs shown in Table XVII. Speaking generally, however, it may be said that producer-gas plants have a bright future, and as the design and construction is perfected undoubtedly the capital cost will be reduced and the cost of power lessened.

#### TABLE XXVII.

Showing the effect on the cost of power of a variation in the price of coal of one-half dollar per ton.

Size of Plant	Suction Pro	ducer Gas.	Steam.			
H.P.	10-Hour.	24-Hour.	10-Hour.	24-Hour.

# PART XII.

#### SAVINGS.

In Collingwood, at the present time, about 1,100 h.p. of steam could be economically replaced by about 950 electrical horse-power. The present cost of this steam power in operating expenses alone, allowing for each case of utilization of exhaust steam for heating, etc., is not less than \$40,000 per annum. The cost of the 950 e.h.p. to replace it would be, power at \$23.90 per h.p., \$23,715, and distribution, \$5,713, totalling, \$28,425. This shows a yearly saving of \$11,575.

The savings for the other municipalities would vary with their size, the amount of 24-hour power used, and with their facilities for

influencing load factor, etc.

# RETURN.

Copy of an Agreement between the Inspector of Prisons and Public Charities and William Bernard Converse, of the City of Montreal, in the Province of Quebec, respecting the manufacture of rope at the Central Prison, Toronto.

Presented to the Legislative Assembly.

W. J. HANNA,

Provincial Secretary.

PROVINCIAL SECRETARY'S OFFICE, TORONTO, 29th March, 1906.

WARWICK BRO'S & RUTTER, LIMITED, PRINTERS, TORONTO.

This Agreement made this thirteenth day of July, in the year of Our Lord, one thousand nine hundred and five, between the Inspector of Prisons and Public Charities for Ontario, hereinafter called "The Inspector" for and on behalf of His Majesty, by virtue of the 38th Section of the Revised Statutes of Ontario, 1897, Cap. 308, respecting the Central Prison, of the First Part, and William Bernard Converse, of the City of Montreal, in the County of Hochelega, Province of Quebec, hereinafter called "The Contractor," of the Second Part.

It is hereby agreed between the Inspector and Contractor as follows:

- 1. This contract shall, subject to the provisions herein contained, come into force upon the first day of November, 1905, and be in force for a period of five years thereafter, renewable for such further period as may be agreed by both parties, provided that the Lieutenant-Governor-in-Council considers it in the public interest that such further period should be granted.
- 2. The Government of the Province of Ontario shall provide a rope-making and cordage plant with the main line shafting in the cordage building maintained in motion as now installed in the Central Prison, equal to a capacity to turn out four tons or over of binder twine or cordage per day of ten hours, and suitable for manufacturing rope of all sizes up to 2' in diameter, including all kinds of cordage and lath yarn, and prison labor to operate it to its full capacity, taking the material as it enters and until it leaves the Prison. The prisoners supplied to perform the labour to be ablebodied men who, having entered upon the work, shall continue in that employment until the expiration of their respective sentences.
- 3. The Government shall give to the Contractor use of the following portions of the Central Prison:
  - 1. The general railway facilities of the prison.
- 2. The main room in the basement under the old broom shops for storage of twine, rope, fibre and supplies.
- 3. The whole of the cordage shop, except the room now used as a plumber's shop.
- 4. The use of all machinery contained in the said cordage shop for manufacturing cordage and twine.
- 5. A building suitable and sufficient for the purpose of manufacturing lath yarn.
- 6. Office room in the administration building for the use of the Contractor.
- 4. The Contractor may at all times during the time that this contract is in force and during any renewal thereof, have the right to manufacture rope of all sizes up to 2" in diameter which shall include all kinds of cordage, binder twine, twine and lath yarn capable of being produced with the Central Prison Cordage Plant, as the same has been equipped for this purpose, provided always, that rope shall not be manufactured to the exclusion of binder twine nor to such an extent as to interfere with filling orders for binder wine from the farmers on the terms and conditions hereinafter set forth, but the Contractor shall make in each year a sufficient quantity of

good merchantable binder twine running 500 or 550 feet per pound, to fill with promptness all orders therefor when accompanied by cash for same which he shall receive from the farmers for binder twine required by them for use on their own farms, and will fill such orders at prices not exceeding the scale of prices provided under this agreement, such binder twine to be f.o.b. Toronto.

- 5. The Contractor further covenants and agrees—
- (1) That he will pay to the Inspector the sum of three dollars per ton of two thousand pounds for keeping the said rope and cordage plant in repair, furnishing necessary mill supplies, such as belting, bobbins, lubricating oil and power required to operate the plant up to its full capacity.
- (2) That the Contractor will at all times at his own cost, save as hereinafter provided, provide all expert labour and instructors necessary in manufacturing, supervising and instructing prisoners in the work required of them in operating the plant, and that we will likewise provide and deliver to the Central Prison Cordage Shop all material necessary for the manufacture of cordage and binder twine sufficient to cover the minimum quantity hereinafter provided for every day that the required number of prisoners are supplied.
- (3) That the Contractor will pay to the Inspector the sum of fifty cents per day of ten hours for each able-bodied prisoner that is supplied by the Government to the Contractor, which payment shall be calculated on a tonnage basis, that is, the number of hours of labour performed by prisoners and the quantity of goods manufactured during the month, that is to say, the payment for 100 prisoners working ten hours, if they turn out four tons, would be twelve dollars and fifty cents per ton, or in case they turn out five tons, ten dollars per ton, but should eighty prisoners during ten hours turn out four tons, the payment would be ten dollars per ton. The Contractor agrees to pay the money or amounts due to the Bursar of the Central Prison, or such other person as may be designated by the Inspector, on the twentieth day of each month as the account is rendered therefor.
- 6. The Contractor shall advertise during the months of June, July and August in each year, in not less than six newspapers, to be specified by the Inspector, the retail selling price to farmers in quantities of fifty pounds and over of the twine manufactured at the prison, which shall not exceed the actual cost to the Contractor of the material and labour with one cent per pound added.
- 7. On declaring the contract annulled, it shall be discretionary with the Inspector to take possession of part or all of the manufactured or unmanufactured material on the Prison premises, paying therefor the actual cost of the same to the Contractor, after deducting any amounts that may be due and owing by him.
- 8. The Contractor shall deposit with the Government as security for the performance of this contract the sum of five thousand dollars, on which bank interest will be allowed, the said sum so deposited to be forfeited as and for liquidated damages in the event of default in any of the provisions of this contract as determined by the Inspector and approved by the Provincial Secretary on due enquiry in respect thereto.
- 9. Accidents to machinery or buildings, deficiency in the number of prisoners supplied owing to the requirements of other industries, or to epi-

demic or contagious diseases breaking out in the Prison, whereby the production of cordage or twine is curtailed are not to subject the Government to a claim for damages on account thereof, but to a rateable rebate only from the production agreed upon, provided always, that no rebate shall be allowed unless after a daily demand in writing has been made for an additional number of prisoners and they have not been immediately furnished to any number called for within the ratio certified.

- 10. All goods stored on the Prison premises by the Contractor shall be at his risk from loss or damage from any cause whatever.
- 11. The Inspector shall, at all times, during the period that this agreement or any renewal thereof is in force provide at the cost of the Government two machinery experts, approved by the Contractor, to take charge of the machinery while in operation and to keep it in repair and to help in instructing the prisoners.
- 12. The Contractor shall not assign this agreement nor sublet the same without the consent of the Inspector.
- 13. It is distinctly understood that this agreement is not entered into by the Inspector in his personal capacity, but is binding upon him and his successors as a corporation sole by virtue of the 38th section of the Revised Statutes of Ontario, 1897, Cap. 338.
- 14. It is hereby declared that these presents shall not be constructed to be a demise of the said Central Prison premises or any portion thereof, nor to give to the said Contractor or his employees the right of going upon the said premises except at such times as may, having regard to the purposes of this agreement and the safe custody of the prisoners, be reasonable and proper.
- 15. The Contractor hereby agrees that he and his employees engaged in manufacturing and instructing and supervising the prisoners shall in all things abide by the rules and regulations that are now in force or may hereafter be adopted, for the good government and discipline of the said prisoners, and shall aid in enforcing the observation of all such rules and regulations by the prisoners under their charge.
- 16. The Inspector agrees that there shall not be placed on any of the cordage or binder twine or wrapping for the same any stamp, mark or other indication that such cordage or twine was manufactured by Prison labour.
- 17. The Contractor agrees that the minimum amount of output per annum shall be one thousand tons of cordage and binder twine combined.
- 18. For the purpose of working the contract and settling disputes that may arise in connection therewith the Inspector shall at all times, during business hours, have access to all cablegrams, telegrams, telegraph codes, contracts, letters, books and papers of the Contractor, and may order and conduct such tests in the work of manufacturing binder twine under the contract as he may deem necessary to decide the matter in dispute, whereupon his decision shall be final.
- 19. It is expressly agreed that this contract and everything herein contained shall be void and of no effect unless the same is ratified by resolution of the Legislative Assembly of Ontario at its next session, and should there be a failure to ratify, all material as provided by Clause 7 hereof then on the premises belonging to the Contractor shall be taken over by the

Inspector, provided, always, that anything obtained or done under the said contract shall nevertheless be paid over in accordance with the terms hereof.

20. This agreement is to be binding on the said Contractor, the party hereto of the Second Part, his heirs, executors, administrators and assigns.

In witness whereof the said Inspector and the said William Bernard Converse have signed this agreement, and the said Inspector has affixed his corporate seal, and the said William Bernard Converse his seal, the day and year first above written.

Signed, sealed and delivered, in the presence of L. E. C. THORNE. JAMES NOXON, [L.S.]

Inspector.

W. B. CONVERSE.

[L.S.]

County of To Wit: I, L. E. C. Thorne, of the City of Toronto, in the County of York, make oath and say:

- 1. That I was personally present and did see the annexed instrument duly signed, sealed and executed by William Bernard Converse, one of the parties thereto.
- 2. That the said instrument and duplicate were executed by him at the City of Montreal.
  - 3. That I know the said party.
- 4. That I am a subscribing witness to the said instrument and duplicate. Sworn before me at the City of Toronto,

Province of Ontario, this 8th day of August, 1905.
THOMAS MULVEY,
A Commr.

L. E. C. THORNE.

MEMORANDUM OF AGREEMENT made this fourth day of April, in the year of Our Lord, one thousand nine hundred and six, between The Inspector of Prisons and Public Charities for Ontario, hereinafter called "The Inspector" for and on behalf of His Majesty, by virtue of the 38th section of the Revised Statutes of Ontario, 1897, Cap. 308, respecting the Central Prison, of the First Part, and William Bernard Converse. of the City of Montreal, in the County of Hochelaga, Province of Quebec, hereinafter called "The Contractor", of the Second Part.

Whereas by an agreement dated the 13th day of July, 1905, and made between the parties hereto, the said Contractor agreed to operate the binder twine plant at the Central Prison, under the terms therein set out: And whereas there are several verbal inaccuracies and typographical errors in the said contract:

And whereas difference of opinion may arise regarding the interpretation of certain clauses of the said agreement, and the parties hereto have agreed to execute these presents for the purpose of avoiding any such difference of opinion, and setting out more clearly the terms of the aforesaid agreement:

Now therefore it is hereby agreed between the Inspector and the Contractor as follows:

- 1. Subsection 2 of paragraph 5 of the said contract shall be stricken out, and the following shall be read in lieu thereof:
- (2) That the Contractor will at all times at his own cost, save as hereinafter provided, provide all expert labour and instructors necessary in manufacturing supervising and instructing prisoners in the work required of them in operating the plant, and that he will likewise provide and deliver to the Central Prison Cordage Shop, all material necessary for the manufacture of cordage and binder twine sufficient to cover the minimum quantity, hereinafter provided for every day that the required number of prisoners is supplied.
- 2. Subsection 3 of paragraph 5 of the said contract shall be stricken out, and the following shall be read in lieu thereof:
- (3) That the Contractor will pay to the Inspector, the sum of five cents per hour for each able-bodied prisoner that is supplied by the Government to the Contractor. The Contractor agrees to pay the money or amounts due to the Bursar of the Central Prison or such other person as may be designated by the Inspector, on the 20th day of each month as the account is rendered therefor.
- 3. Paragraph 9 of the said contract shall be stricken out, and the following shall be read in lieu thereof:
- (9) Accidents to machinery or buildings, deficiency in the number of prisoners supplied owing to the requirements of other industries, or to epidemic or contagious diseases breaking out in the prison, whereby the production of cordage or twine is curtailed, are not to subject the Government to a claim for damages on account thereof, but a deduction shall be made from the amount of one thousand tons required to be manufactured in each year, and such deduction shall be calculated in the manner following: There shall be deemed to be two thousand five hundred working hours in each year, and the average production eight hundred pounds per hour; for every other hour during which there is no production on account of accidents or other causes as aforesaid, this amount, eight hundred pounds, shall be deducted from the amount required to be manufactured in each year, and for every hour during which there is a shortage of the number of men furnished, there shall be a deduction equal to such portion of eight hundred pounds as the shortage of the number of men provided bears to the number required to operate the plant; the number of men required to operate the plant shall be deemed to be the average number of men employd during the month prior to the time of stopping of plant or shortage of men as aforesaid: Provided

always that no rebate shall be allowed unless after a daily demand in writing has been made for an additional number of prisoners.

- 4. Paragraph 13 of the said contract shall be stricken out, and the following shall be read in lieu thereof:
- (13) It is distinctly understood that this agreement is not entered into by the Inspector in his personal capacity, but is binding upon him and his successors as a corporation, sole by virtue of the 38th section of the Revised Statutes of Ontario, 1897, Cap. 308.

In witness whereof the said Inspector and the said William Bernard Converse have signed this agreement, and the said Inspector has affixed his corporate seal, and the said William Bernard Converse his seal, the day and year first above written.

Signed, sealed and delivered in the presence of THOMAS MULVEY, W. B. CONVERSE. Seal. EDWIN R. ROGERS,

Inspector. Seal.

# RETURN.

Correspondence in the matter of the sale of \$6,000,000 Six months

Treasury Bills at a rate of discount not exceeding four per cent.

and to the subsequent issue of Government Bonds or Stock.

(Sessional Papers No. 68.)

Presented to the House on 29th March, 1906.

(Copy.) 99 Gresham Street, London, E.C., 10th November, 1905.

DEAR SIR,—We beg to refer the Agreement made with us by the Honorable Richard Harcourt, on behalf of the Government of the Province of Ontario on the 10th of October, 1904, relating to the sale of \$6,000,000 Six Months' Treasury Bills at a rate of discount not exceeding 4 per cent., and to the subsequent issue of Government Bonds or Stock, the sale of which during the currency of the bills of later was also to be negotiated through us.

The Bills in question were duly placed by our firm on behalf of the Government, under the arrangement in question, on November 15th, 1904. About the period of their maturity in May, 1905, the time not being opportune for the issue of the Bonds, we negotiated, at your request, on behalf of the Government, the sale of a new issue of Bills for the purpose of meeting the maturing obligations. The new Bills were dated May 15th, 1905,

and fall due for payment on the 15th instant.

Having regard to our contract with the Government, and to our subsequent correspondence and negotiations, as well as to establish financial custom, we expected, when you came to London for the purpose of arrangeing for the retirement of the maturing Bills, either by issue of Government Stock or otherwise, that the transaction would be completed through us. You, however, informed us for the first time, some days after your arrival, and much to our surprise, that the Government declined to recognize the Agreement, and that the business covered by our contract had been entrusted to other Agents. This repudiation of the Agreement, and the abrupt removal of the business from our firm, without any previous communica-

tion or just reason, is unaccountable to us.

We are advised, and believe, that the Agreement of October 10th, 1904, is a contract legally binding upon the Government of the Province of Ontario, and that we ought to lodge our protest against the course which has been followed. This we now do, and trust that it will not be necessary for us to take any other action in the matter. We think it right to state that if, on your arrival in London, you had afforded us the opportunity of negotiating the sale of the new Treasury Bills, we should have been able, aided by a consideration of the participation in the underwriting and issue of the ultimate securities, to arrange for the renewal of the Treasury Bills, for the Government, among our Clients (who had taken up the two previous issue of Bills) on very favourable terms, which we are prepared to disclose, and to substantiate, if necessary. We beg further to inform you, without prejudice, that, when the proper time arrives, we shall be readv. in the terms of our Agreement, to negotiate, on behalf of the Government. the sale of the Government Inscribed 31 per cent. Stock, or Bearer Bonds, which the Government may issue for the purpose of retiring the Treasury Bills or otherwise; and that we believe we shall be able to obtain for the Government, the maximum price at the minimum cost. We therefore venture to express the hope that the Government will give further consideration to this matter, and that nothing will arise to alter the cordial relations hitherto existing between the Government and ourselves and which it is our desire to do anything we properly can to maintain.

> We are, your obedient servants, (Sgd.) COATES, SON & CO.

Colonel the Hon. A. J. MATHESON, M.P.P., Provincial Treasurer, Province of Ontario, Toronto, Canada.

# (Copy.)

Toronto, November 21, 1905.

DEAR SIR,—I beg to acknowledge receipt of your letter of the 10th instant as to the Ontario Government loan.

I see no reason to change my opinion as expressed to Mr. Hanson and vourself in London.

Your chedient servant,

(Sgd.) A. J. MATHESON, Provincial Treasurer.

Messes. Coates, Son & Co., 99 Gresham St., London, E.C., Eng.

# (Copy.)

New York, October 10th, 1904.

#### MEMO. TEMISCAMINGUE RAILWAY SECURITIES.

(1) The Government is to issue Treasury Bills to the amount of £1,200,000, term six months, to mature May 15th next (1905), and payable at the Banking House of Glyn, Mills, Currie & Co., London.

(2) The sale of these Bills is to be negotiated through Coates, Son & Co., at a price representing a rate of interest not exceeding four per cent. per

annum.

(3) The sale of the Bonds during the currency of the Bills, or later to be entrusted to Coates, Son & Co.

(4) To save expense Bills, to be countersigned by Coates, Son & Co.
(Signed) R. HARCOURT.

# (Copy.)

99 Gresham Street, Bank, E. C.

London, 8th December, 1905.

The Honourable, The Provincial Treasurer,
Treasury Department, Toronto, Ontario, Canada.

SIR,—We are in receipt of your letter of the 21st ultimo, acknowledging our communication of the 10th idem, respecting the agreement between Government of Ontario and ourselves, dated October 10th, 1904.

You are good enough to inform us that you see no reason to change the opinion you expressed on the subject when in London. In these circumstances we have only to add to your previous letter that, when the proper time arrives, we shall be obliged to take any steps that may be necessary in the judgment of our legal advisers, for the protection of our interests.

We are, Sir,

Your obedient servants, (Signed) Coates, Son & Co. (Copy.)

TORONTO, March 28th, 1906.

To the Honourable, The Provincial Treasurer.

SIR,—Referring to the conversation our Mr. Hanson had yesterday with

the Premier and yourself, we have the honour to state:-

In October, 1904, an agreement was entered into between the Government and our firm under which we sold for the Government £1,200,000 of treasury bills, and one of the terms of our agreement was that we were to be entrusted with the negotiation of the sale of he permanent securities which were ultimately to replace the treasury bills. It was stipulated that this arrangement was to be binding during the currency of the treasury bills or at any time thereafter.

We have always held ourselves ready and willing to complete our part of this agreement, and have always been in a position to effect a sale of the permanent securities on terms as favourable as could be arranged for by

any other financial house.

In face of this formal agreement, it has been publicly announced that the permanent securities have been sold through another institution, and we feel that we now have a claim against the Government as stated by Mr. Hanson.

Yesterday the Premier asked that we should state what our claim is, and in reply to that question we beg to say that our claim is to be paid a proper brokerage, and we think a quarter per cent. of the face value of the loan would be a very fair brokerage.

We have no doubt as to the existence of our claim, and are quite willing to leave the question to any two Canadian Bankers of repute; in case of

difference, a third banker to be called in as umpire.

Mr. Hanson's address until 4th April prox., will be to the care of Hanson Bros., Montreal, and we beg that we may receive an early reply addressed to him.

We are, Sir,

Your obedient servants,
(Signed) COATES, SON & Co.

# **RETURN**

Copy of an Agreement between the Inspector of Prisons and Public Charities, on behalf of His Majesty, of the First Part, and Ellen Charlotte Taylor, of the City of Toronto, trading under the name of Taylor, Scott & Company, respecting the manufacture of woodenware at the Central Prison, Toronto.

Presented to the Legislative Assembly.

• W. J. Hanna,
Provincial Secretary.

Provincial Secretary's Office, Toronto, 18th April, 1906. This agreement made this twentieth day of July, in the year of our Lord one thousand nine hundred and five, between the Inspector of Prisons and Public Charities for Ontario, hereinafter called the Inspector, for and on behalf of His Majesty, by virtue of the 38th Section of R.S.O., Chap. 308, respecting the Central Prison, of the First Part, and Ellen Charlotte Taylor, of the City of Toronto, in the County of York, and Province of Ontario, trading under the name of Taylor, Scott & Company, hereinafter called the Company, of the Second Part.

It is hereby agreed between the Inspector and the Company as follows:

- 1. That the Government of the Province of Ontario shall provide and maintain a woodworking shop as now installed at the Central Prison, and shall furnish prison labour to operate the same, and shall receive and take charge of the lumber and other materials supplied by the Company from the time such lumber and materials are brought within the Central Prison until It is agreed that all labour, such as firing they are removed therefrom. boilers, running engines, loading and unloading raw material as well as furnishing products shall be included and considered to form part of the actual making of the product. The prisoners detailed to perform the labour under this contract to be in the same proportion of young and aged men as in the case of those assigned to other shops in the prison, and any prisoner who has once been assigned for work in the said shop shall continue to be employed therein until the expiration of his sentence. It is further agreed that any prisoners sent to the Central Prison who have had experience in any woodworking shop are to be assigned to the Company's shop, unless in the opinion of the Inspector or of the Warden of the Prison some good reason exists for arranging otherwise.
- 2. The Government shall give to the Company the uses of the following portions and property of the Central Prison:
  - 1. All building and yards used by the Prison woodworking shop when operated by the Government.
  - 2. The general railway facilities of the Prison.
  - 3. Any and all machinery now installed in the north shop.
  - 4. Sufficient yard room for piling 500 M. of lumber on the siding in the yards of the Prison.
- 3. The Company shall, while this contract or any renewal thereof is in force, have the right to manufacture any kind of washboards, single or double, step-ladders, broom handles, flooring, clothes pins or other products in the manufacture of which the use of machinery or tools of an unduly hazardous character is not required.
- 4. All goods and property stored on the Prison premises by the Company whether raw material or finished product shall be at their risk from loss or damage arising from any cause whatever.
- 5. The Company shall during the time that this agreement or any renewal thereof is in force provide one machinist whose duty it shall be to keep the machinery in good repair and in perfect order, to sharpen all knives and saws, to look after the motive power and heating plant and to make such reports to the Government as are directed by the Inspector. It is agreed that the said machinist shall have the use of the machine shop for repair work and such assistance

from prisoners as may be necessary. The person to be appointed machinist as aforesaid must be approved by the Inspector and is to have a salary, which together with allowance, shall not exceed \$900 per annum, one-half of which is to be paid by the Company and the other half by the Government. All other free labour, except disciplinary guards, to be provided by the Company at their own cost.

- 6. The Company agrees to provide all fuel required for the development of power to operate the shop, and in case the fuel to be used is identical with that bought in large quantities by the Government for use in the Prison, the Government on sufficient notice being given will sell such fuel to the Company at cost price. The Company agrees to burn the refuse from the Twine factory and other shops, such refuse to be delivered to them at convenient times. The Company also agrees to supply oil, cotton waste and other mill supplies for operating the shop. It is agreed that in case there should be failure in the development of power as mentioned in clause 6 owing to accident or other unavoidable cause, the Government will supply power free of cost during such time as may be required for necessary repairs.
- 7. It is agreed that the Government is to replace any worn out parts of the machinery, such as shafting, shaft pulleys, belts and other machinery parts.
- 8. It is agreed that the Government is to supply the Company with a minimum number of 80 men, and that should the Company require more men they are to have any number so required up to 1-3 of the total number in the Prison and as many more as in the opinion of the Inspector will not interfere with the carrying on of the work in the other industries.
- 9. The Company agrees that for the sake of settling any disputes, the Inspector or any officer of his Department authorized by him, shall at any time during business hours have access to all books, files and papers of the Company relating to the working of the shop and any other facilities which may be necessary to decide the matter in dispute.
- 10. It is agreed to that accidents to machinery or buildings or deficiency in the number of prisoners supplied owing to epidemic or contagious diseases in the Prison are not to subject the Government to any claim for damages.
- 11. Should the Government deem it expedient to resume the plant at the expiration of this contract, the Inspector shall give the Company six months' notice thereof in writing prior to such expiration. Should the Company so desire, on the expiration of the contract, the Inspector in his discretion may take over at cost price part or all of the manufactured or raw material belonging to the Company then on the prison premises, paying therefor the actual cost.
- 12. The Company agrees that they and their employees engaged in manufacturing, instructing and supervising the prisoners shall in all things abide by the rules and regulations that are now or may at any time hereafter be adopted for the good government and discipline of the Prison, and shall aid in enforcing the observance of such rules and regulations by the prisoners under their charge.
- 13. The Company shall not assign this agreement or sub-let the same without the consent of the Lieutenant-Governor-in-Council.
- 14. The Company agrees to pay to the Bursar of the Central Prison, or such other officer as may be designated, at any time by the Inspector on the

Digitized by Google

15th of each month the account for the preceding month, such account to be made up according to the following scale of prices:

- 1. For the making of zinc, glass and enamel washboards, eight cents per dozen.
- 2. Wood washboards known as the 17" dovetail made all wood, six cents per dozen.
- 3. Double washboards, i.e.: with rubbing surface on both sides, eleven cents per dozen.

4. Step ladders at the rate of half a cent per foot.

- 5. Broom handles, any length up to 50 inches at one dollar per thousand.
- 6. Flooring, 50 cents per thousand ft., lumber measure.
- 7. Window screens, small, four cents per dozen.
- 8. Window screens, medium, five cents per dozen.
- 9. Window screens, large, six cents per dozen.
- 10. Butter molds, 1" square, eleven cents per dozen.
- 11. Clothes pins, ever ready, seven and one-half cents per five gross box.
- 12. Clothes pins, best, five cents per three gross box.
- 13. Clothes pins, common, three and one-half cents per five gross box.
- 14. Toy or handv washboards, six-cents per dozen.
- 15. Self wringing mops, ten cents per dozen.
- 16. Diamond mops, one cent per dozen.
- 17. Ash sifters, six cents per dozen.
- 18. Broom racks, seventy-five cents per dozen.
- 19. Egg carriers, one dozen size, twenty cents per dozen.
- 20. Egg carriers, two dozen size, thirty cents per dozen.
- 21. Brush blocks, thirty-five cents per thousand.
- 22. Brush block handles, twenty cents per thousand.
- 23. Any goods not before mentioned to be paid for by day labour at the rate of 3½ cents per hour for each hour of every prisoner employed thereon.

The Contractor guarantees that the above prices will bring a revenue to the Government of three cents per hour of each prisoner employed, and in case the work done on the above scale of prices produces a less amount the company is to make up the amount to the said rate of three cents per hour. It is further agreed that should the work done at the above rates amount to more than four cents per hour, the excess over the said four cents is to be refunded to the Company by the Government. Adjustments of the account between the Government and the Company are to be made every six months on the average of such period.

15. The Company agrees to purchase from the Government all raw material on hand at the date on which this contract comes into force, so far as such material can be used by the Company in producing the goods which they are to manufacture. The price to be paid to be agreed upon by the Inspector and the Company, and in case of non-agreement to be settled by an arbitrator to be named by the Provincial Secretary.

Digitized by Google

- 16. The Company shall have the right at any time to install at their own cost any machinery necessary for the manufacture of their goods, such machinery to be in good repair and in good working order when installed, but the total machinery forming part of the plant at any time is not to require more than 150 horse power to operate it.
- 17. It is agreed between the Inspector and the Contractor that if the later desire to have work done on his raw material in any shop of the Central Prison other than the wood shop, he may deliver such material to the foreman of the required shop. There his requirements will be complied with and the work will be delivered to that department of the north shop designated by the Contractor. The Government shall receive five cents per hour for every hour of convict labour so employed, payment for which shall be due at the same time as other payments mentioned in this contract.
- 18. In case the boiler now installed in the north shop does not furnish sufficient steam to operate the engine, additional steam is to be furnished from the boilers in the other shops (which boilers are now connected with the engine in the north shop) with no cost to the Contractor. The Inspector retains the right to install additional wood-burning Dutch furnace boilers in the north shop at any time, and in case of such installation the Contractor is to furnish sufficient steam to operate the north shop.
- 19. This contract shall, subject to the provisions herein contained, be in force from the first day of September, 1905, until the first day of September, 1910, renewable for a further period of five years if so agreed by both parties.
- 20. It is hereby agreed and declared that these presents shall not be construed to be a demise of the said Central Prison premises, or any portion thereof, nor to give to the Company or its employees the right of going upon the said premises, except at such times as having regard to the purposes of this agreement and the safe custody of the prisoners may be reasonable and proper.
- 21. It is expressly agreed that this contract shall be void and of no effect unless the same is ratified by a resolution of the Legislative Assembly of Ontario at its next session, and should there be a failure to ratify, all material belonging to the Company then on the premises shall be taken over by the Inspector at a valuation, provided always that anything obtained or done under the contract shall nevertheless be paid for in accordance with the terms thereof.
- 22. This agreement is to be binding on the parties of the First Part, her or their heirs, executors, administrators and assigns.

In witness whereof the said parties hereto have signed this Agreement and fixed their seals thereto.

Signed, sealed and delivered in the presence of L. E. C. THORNE.

EDWIN R. ROGERS,
Inspector.

(Sessional Paper No. 80.)

# RETURN.

To the Honorable J. P. Whitney, Premier of Ontario;

AND TO THE HONORABLE ARTHUR JAMES MATHESON, Provincial Treasurer:

In the matter of a loan guaranteed by the Province of Ontario under the provisions of Chapter 19 of 4 Edward VII., and commonly called "The Sault Guaranteed Loan."

# RETURN.

(COPY.)

To THE HONORABLE J. P. WHITNEY, Premier of Ontario;

And to The Honorable Arthur James Matheson, Provincial Treasurer:

In the matter of a loan guaranteed by the Province of Ontario under the provisions of Chapter 19 of 4 Edward VII., and commonly called "The Sault Guaranteed Loan."

The undersigned begs to report as follows:—

Under instructions in that behalf and as solicitor and agent for the Province of Ontario, I accompanied the Honorable the Provincial Treasurer to New York, going via Montreal, for the purpose of rendering him what assistance I could in protecting the rights and interest of the Province on the maturity of the above mentioned loan of \$2,000,000, which said loan matured at the office of Morton Trust Co., at the said City of New York, on the 1st day of May, 1906.

Prior to the departure of the said the Honorable, the Provincial Treasurer, and the undersigned, for New York as aforesaid, a draft agreement was submitted by the solicitors for the Canadian Improvement Co. under the provision of the Act passed during the present session amending the above mentioned Act, which said draft agreement so presented provided in effect for the extinguishment of the old Loan Certificates issued under above mentioned Act, and the release of the Government securities in the hands of the Morton Trust Co., and the guaranteeing of a new loan by the Government on the pledge of the securities designated in said Act as "Pledged Securities," and on one-half of the securities designated in said Act as "Collateral Securities," but this arrangement the unedrsigned advised could not be safely entered into, as the "Pledged Securities" were subject to a second mortgage to United States Mortgage and Trust Co. to secure a \$10,000,000 issue of bonds of the Lake Superior Corporation, and if the securities held by the Government were in any way released, or if the Loan Certificates issued pursuant to the original Act and guaranteed by the Government, were extinguished, the said mortgage to United States Mortgage and Trust Co. would become a first charge on the "Pledged Securities" and the position of the Province would be thereby impaired; and the Canadian Improvement Co. were consequently given to understand that nothing in the nature of a new Loan Agreement could be considered.

In order that by no chance the good faith, credit or dignity of the Province might be impaired, the Honorable, the Provincial Treasurer, before proceeding to New York, deemed it prudent to make and did make all the

necessary financial arrangements to provide for the redemption of the guaranteed Loan Certificates promptly on their presentation on the 1st of May, and the foresight and wisdom of the Honorable Minister in making this provision no doubt greatly aided in the making of the favorable arrangement for the Province hereinafter mentioned.

On arrival in New York it was at once manifest that it would be impossible for the Canadian Improvement Co. to meet the whole loan at its maturity, and only two courses were open to the Government under the circumstances:

- 1. To pay the whole of the loan and instruct the Trust Co. to take proceedings to realize on the securities pledged with it; or
- 2. To grant a renewal of the Government guarantee for at least a portion of the principal.

It was felt that it would not be wise, under the circumstances, for the Government to adopt the course first mentioned, as not only would such an Act, on the part of the Government, have a most disastrous effect on the industries at Sault Ste. Marie, but might have involved the Province in heavy financial loss.

After prolonged negotiations an arrangement was eventually arrived at on the following basis, namely:

That the Improvement Co. should pay or cause to be paid to Morton Trust Co. \$1,050,000 cash, being one-half the principal of the whole secured loan, and interest on the whole loan to the 1st of May inst., and that the Government should release one-half the collateral securities, viz., \$1,209,000 Lake Superior Corporation Bonds; \$153,000 Lake Superior Corporation Income Bonds; and \$2,682,000 stock of the Lake Superior Corporation, and that the Government should renew the guarantee of the Province for six months on the remaining \$1,000,000 principal, the Province retaining all the securities held by it in respect of the original loan less half the collateral securities above mentioned; and that in order to enable the Canadian Improvement Co. to raise the necessary funds to provide for the remaining \$1,000,000 of old loan certificates on their presentation for payment, that renewal loan certificates aggregating in all \$1,000,000, bearing interest at 5 per cent., payable both as to principal and interest on the first of November, 1906, guaranteed by the Province, should be issued, the arrangements being that onehalf the loan certificates outstanding should be purchased by the Morton Trust Co. and retained by them uncancelled as security for the renewal loan certificates above mentioned, and that, in case of default in the payment of the renewal loan certificates, the Government should have all the rights and remedies to which they were entitled under the agreement entered into under said original Act, Chapter 19, 4 Edward VII., for the purpose of securing the \$2,000,000 loan.

In order to maintain and preserve inimpaired all the rights, powers and remedies of the Government, it was necessary to obtain the consent both of The Lake Superior Corporation and United States Mortgage & Trust Co. to the said arrangement, and a consent was procured from said Mortgage Co. both to the release of the collateral securities above mentioned and to the renewal agreement for the \$1,000,000 above set forth, and a duplicate of said consent is now on file in the office of the Honorable, the Provincial Treasurer. And an agreement was entered into bearing date the 30th day of April, 1906, between the Honorable Arthur James Matheson, representing the Province of Ontario of the first part, Morton Trust Company of the second part, Cans-

dian Improvement Company of the third part, and The Lake Superior Corporation of the fourth part, fully setting forth the arrangement hereinbefore mentioned. And said agreement was duly executed by all the parties thereto, the Honorable, the Provincial Treasurer executing the same on behalf of the Province of Ontario under the provisions of the Act passed during the present session of the Legislature in that behalf and an Order-in-Council bearing date the 28th day of April, 1906, and a duplicate of said agreement is now on file in the office of the said The Honorable, the Provincial Treasurer.

The said agreement distinctly preserves and retains for the Province all the rights and remedies to which it was entitled under the original Act authorizing the loan, and the agreement entered into pursuant to said Act, and all the securities possessed by the Province excepting only the collateral securities above mentioned, subject only to the provision that the Government shall not take action on its securities or under said agreement before the 1st of November, 1906.

Pursuant to the arrangement above mentioned and said agreement bearing date the 30th day of April, 1906, Canadian Improvement Co. on the first day of May, instant, caused to be paid to Morton Trust Co. \$2,050,000 in cash, and the Morton Trust Co. will at once proceed to purchase \$1,000,000 of loan certificates to remain with them in trust as security for the new loan certificates, and will further proceed to cancel the remaining \$1,000,000 worth of certificates so that they will become entirely extinguished, and 40 renewal loan certificates of \$25,000 each guaranteed by the Province were duly issued and delivered to the purchasers thereof.

The result of the foregoing arrangement is that the Province has been entirely relieved from liability for one-half of the original indebtedness, has secured the payment of all interest to date, and still retains all the original pledged securities, viz., the bonds and stocks of the Algoma Central & Hudson Bay Railway Co., and the promissory note of The Algoma Central & Hudson Bay Railway Co. for \$725,000 secured by mortgage on the steamships and vessels of the Algoma Central & Hudson Bay Railway Co., and also one-half the collateral securities, viz., \$1,209,000 Lake Superior Corporation Bonds, \$253,250 Lake Superior Corporation Income Bonds, and \$2,680,000 stock of the Lake Superior Corporation, and, in addition to this, the position of the Government has been very much strengthened owing to the fact that new capital has become interested and the holders of the securities released by the Government, will for their own protection, be bound, if within their power, to arrange for the retirement of the renewal loan certificates at their maturity.

Mr. I. F. Hellmuth, K.C., joined the Honorable, the Provincial Treasurer and the undersigned on their arrival at New York, and during all the negotiations there, as well as in the revision, settlement and consummation of said agreement of 30th April, 1906, acted as senior counsel with the undersigned for the Province of Ontario, and the arrangement above set forth was entered into by the Honorable, the Provincial Treasurer upon the advice and with the approval both of Mr. Hellmuth and the undersigned, both of whom approved not only of the arrangement made, but of the method in which it was carried out.

The agreement above referred to contains a provision that the Canadian Improvement Co. shall pay upon demand all expenses incurred by the Province of Ontario in connection with the matter.

For the better protection of all parties it is suggested that an Act, a copy of which is submitted herewith which said proposed Act has been submitted,

revised and approved by Mr. Hellmuth, be passed forthwith ratifying the agreement entered into and declaring it valid and binding on all the parties thereto.

All of which is respectfully submitted.

Dated at Toronto this 2nd day of May, 1906.

(Sgd.) W. H. HEARST,

Solicitor and Agent for Government of Ontario herein.

Approved:

(Sgd.) A. J. Matheson, Provincial Treasurer.

(COPY.)

MORTON TRUST COMPANY, 38 Nassau St., New York, May 1, 1906.

To Hon A. J. Matheson, Provincial Treasurer, Toronto.

DEAR SIR,—We beg to advise you that Morton Trust Co. has this day received the sum of two million and fifty thousand dollars (\$2,050,000) to be applied by it under and pursuant to the provisions of a certain Renewal Guaranty Agreement dated April 30, 1906, between His Majesty the King, acting in respect to the Province of Ontario, and therein represented by the Hon. Arthur James Matheson, Provincial Treasurer, Morton Trust Company, Canadian Improvement Company and The Lake Superior Corporation.

Yours very truly,

(Sgd.) J. I. Burke, Assistant Secretary.

(COPY.)

Whereas Canadian Improvement Company has borrowed the sum of two million dollars (\$2,000,000), and has secured the repayment thereof by pledge with Morton Trust Company under a certain Agreement Deed of Trust and Guaranty dated March 24th, 1904, of certain Securities therein denominated as "Pledged Securities" and of certain other Securities therein denominated "Collateral Securities," which said last mentioned securities consist of certain stocks, income bonds and first mortgage and collateral trust bonds of the Lake Superior Corporation, said loan being guaranteed by the Government of the Province of Ontario,

And whereas, the said Loan matures on the first day of May, 1906, and said Canadian Improvement Company is unable to pay said Loan in full, but has agreed to deposit the sum of one million dollars (\$1,000,000), with Morton Trust Company for the payment of one million dollars

(\$1,000,000) of said loan and desires to extend the time for the payment of the remaining one million dollars (\$1,000,000) of said loan to November 1, 1906, and the Government of the Province of Ontario has agreed to renew its guaranty with respect to the said remaining one million dollars (\$1,000,-000) of the said loan to the first day of November, 1906.

And whereas, said Canadian Improvement Company desires to secure the release from the lien and operation of said Agreement of March 24, 1904, of one-half of each class of said Collateral Securities,

And whereas the equity in the "Pledged Securities" is pledged under a certain Indenture of Mortgage dated May 21, 1906 (given to secure an issue of bonds of The Lake Superior Corporation), of which United States Mortgage & Trust Company is now acting as substituted Trustee.

Upon the deposit with Morton Trust Company by Canadian Improvement Company, or on its behalf, of the sum of one million dollars (\$1,000,000) to be applied in taking up and paying one million dollars of said loan, United States Mortgage & Trust Company hereby consents:

- (a) That one-half of each class of the "Collateral Securities" shall be delivered to Canadian Improvement Company or its order,
- (b) That the time for the payment of the balance of said one million dollars (\$1,000,000) of said loan shall be extended to November 1, 1906.

(Sgd.) United States Mortgage & Trust Co.

By J. W. PLATTEN, Vice-President.

(Seal) Attest:

> (Sgd.) CALVERT BREWER, Secretary.

> > (COPY.)

State of New York, County of New York.

On the 1st day of May, 1906, before me personally came J. W. Platten, to me known, who being by me duly sworn did depose and say, that he resided in New York, and that he is Vice-President of United States Mortgage & Trust Company, the Corporation described in, and which executed the above instrument; that he knew the seal of the said Corporation; and that the seal affixed to said instrument was such corporate seal; and that it was so fixed by order of the Board of Directors of said Corporation, and that he signed his name thereto by like order.

(Sgd.) E. G. BABCOCK, Notary Public.

Notary Public King's Co. No. 148 Cft. filed in N.Y. Co. Commiss. expires March 30, 1907. State of New York, County of New York.

Be it remembered that on the 1st day of May, A.D. 1906, before me the subscriber, personally came J. W. Platten, the Vice-President, and Calvert Brewer, the Secretary of United States Mortgage & Trust Company, each of whom is to me well known, being by me severally duly sworn, each of them for himself did depose and say that the said J. W. Platten resides in New York, N.Y., and is Vice-President of United States Mortgage & Trust Company, the Corporation which executed the foregoing instrument, and that the said Calvert Brewer resides in said New York, N.Y., and is Secretary of said Corporation; that he knows the corporate seal of said Corporation, that the seal affixed to the foregoing instrument as the seal of the said Corporation is the corporate seal thereof, and that it was affixed by authority of the Board of Directors of said Corporation, that the said J. W. Platten signed his name thereto as Vice-President, and that the said Calvert Brewer signed his name thereto as Secretary by like authority; and they severally acknowledged to me that the same was so done as a free and voluntary act and deed of said Corporation.

(Seal)

(Sgd.) E. G. BABCOCK, Notary Public.

Notary Public King's Co. No. 148 Cft. Filed in N.Y. Co. Commiss. expires Mar. 30, 1907.

THIS AGREEMENT made the 30th day of April, A.D. 1906, between His MAJESTY, THE KING, acting in respect of the Province of Ontario, and herein represented by the Honorable Arthur James Matheson, Provincial. Treasurer (hereinafter called "the Government") of the First Part;

MORTON TRUST COMPANY, a Corporation duly incorporated (hereinafter called the "Trust Company" or "Trustee") of the Second Part;

CANADIAN IMPROVEMENT COMPANY, a Corporation duly incorporated (hereinafter called the "Improvement Company") of the Third Part;

And THE LAKE SUPERIOR CORPORATION, a Corporation duly incorporated (hereinafter called the "Corporation") of the Fourth Part.

Whereas, by an Act passed by the Legislative Assembly of the Province of Ontario in the fourth year of the reign of His Majesty, King Edward VII, and chaptered 19, the Government of the Province of Ontario was authorized to guarantee the principal and interest of a loan of two million dollars (\$2,000,000), payable on the first day of May, 1906, which loan was to be obtained by the Improvement Company upon the pledge and deposit of the securities of the Algoma Central & Hudson Bay Railway Company and the Manitoulin & North Shore Railway Company, and upon the delivery and transfer of the Collateral Securities in the said Act more particularly mentioned and set forth, and

Whereas pursuant to the provisions of the said Act, and in order to carry the same into effect, an Agreement, Deed of Trust and Guarantee,

bearing date the 24th day of March, 1904, hereto annexed, marked Schedule "A" to this Agreement, was duly entered into between His Majesty, the King, acting in respect of the Province of Ontario, and therein represented by the Honorable George William Ross, Premier of the said Province of Ontario, and Provincial Treasurer, of the First Part, the Morton Trust Company, Trustee, of the Second Part, and Canadian Improvement Company, of the Third Part, and under the said Agreement, Deed of Trust and Guaranty the securities mentioned and set forth in the above recited Act were duly deposited with Morton Trust Company, as Trustee, and Loan Certificates guaranteed by the Government to the amount of two million dollars (\$2,000,000) were duly issued thereunder, payable on the first day of May, 1906, and all the said certificates are now outstanding.

And whereas, by a further Agreement bearing date the 21st day of May, 1904, and made between His Majesty, the King, acting in respect of the Province of Ontario, and therein represented by the Honorable George William Ross, Premier of the said Province of Ontario, and Provincial Treasurer, of the First Part, the Canadian Improvement Company, of the Second Part; The Lake Superior Corporation, of the Third Part, John W. Moffly, William H. Arrott, Nicholas Brice, Simon Gratz, Samuel F. Houston, William Rotch Wister, Edward J. Berwind, Thomas J. Drummond, Bayard Henry, John T. Terry, John T. Terry, Jr., George B. Turrell, Charles S. Hinchman, A. P. Boller, H. C. Hamilton and Charles E. Orvis, a committee formed under a plan and Agreement, dated October 20, 1903, for the reorganization of the Consolidated Lake Superior Company, of the Fourth Part, and Morton Trust Company, of the Fifth Part, and known as the "Supplemental Agreement" the Corporation, owner of the securities hereinafter referred to as the "Pledged Securities" and the Reorganization Committee, its predecessors in title, authorized the Improvement Company to make and pledge and deposit with the Morton Trust Company under the terms of the said Agreement, Deed of Trust and Guaranty, of the 24th day of March, 1904, of the pledged securities mentioned and referred to in the said Agreement and in this Agreement, and ratified and confirmed the said pledge and deposit so made by the Canadian Improvement Company authorized by the said Agreement, Deed of Trust and Guaranty dated the 24th day of March, 1904.

And whereas, by an Act passed by the Legislative Assembly of the Province of Ontario in the 6th year of the reign of His Majesty, King Edward VII, by way of amendment to the above recited Act, the Government of the Province of Ontario was authorized amongst other things to renew the said guaranty of the sum of two million dollars (\$2,000,000) or any portion thereof, and interest for a period not exceeding one year from the first of May, 1906,

And whereas, the Improvement Company has arranged to make a payment of one million dollars (\$1,000,000) on account of the said loan at maturity upon the release of the Improvement Company of one-half of each class of the collateral securities, deposited under the said Agreement, Schedule "A," and the Improvement Company has requested the Government to renew the said guaranty for one million dollars (\$1,000,000), the balance of the said loan, until the first day of November, 1906, and the Government has agreed to extend the time for the payment of one million dollars (\$1,000,000) of the said loan and to guarantee the payment of Loan Certificates in renewal issued to the amount of the said sum of one million dollars (\$1,000,000), to be paid to the Trust Company, to be by it applied in the purchase of Loan Certificates to the like amount issued under the said Agreement, Schedule "A" hereto.

And whereas, it has been further agreed that the said Loan Certificates, when so purchased, shall be deposited and held under the provisions of this Agreement as security for the Loan Certificates to be issued hereunder.

And whereas, the Corporation subsequent to the execution of the said Agreement, Schedule "A" hereto, pledged, subject to the pledge thereof under the terms of the said Agreement, Schedule "A" hereto, the equity in the securities herein denominated as "Pledged Securities" to Morton Trust Company under a mortgage dated May 21, 1904, and made between The Lake Superior Corporation and Morton Trust Company, as Trustee, to secure an issue of ten million dollars (\$10,000,000), par value of bonds.

And whereas, Morton Trust Company resigned as Trustee, under the said Mortgage of May 21, 1904, and the United States Mortgage & Trust

Company was duly substituted as Trustee thereunder;

And whereas, the said United Mortgage & Trust Company has, by an instrument of even date herewith, duly consented that, upon the deposit with the Trust Company by the Improvement Company, or on its behalf, of the sum of one million dollars (\$1,000,000) to be applied in taking up and paying one million dollars (\$1,000,000) of the said Loan Certificates, the Trust Company shall be at liberty to deliver over to the Improvement Company, or its order, one-half of each class of the securities mentioned and referred to in the said Agreement, Schedule "A" hereto annexed, as the Collateral Securities;

Now, therefore, this Agreement witnesseth that the parties hereto have, for valuable consideration contracted and agreed each with the other as follows:

1.—(1) The Improvement Company shall cause to be deposited with the Trust Company on the first day of May, 1906, the sum of one million and fifty dollars (\$1,050,000), the said sum to be paid out and applied by the Trust Company, as follows:

(a) Fifty thousand dollars (\$50,000) thereof to pay the Coupons maturing on the first day of May, 1906 on the Loan Certificates, to the amount of two million dollars (\$2,000,000) issued under the said Agreement, Sched-

ule "A."

(b) One million dollars (\$1,000,000) in paying one million dollars (\$1,000,000) of the said Loan Certificates on presentation to the Trust Company under the provisions of the said Agreement, Schedule "A," the said

Certificates to be cancelled by the Trust Company on payment.

(2) The Improvement Company shall also cause to be paid unto the Trust Company one million dollars (\$1,000,000) when borrowed under the terms of this Agreement, which shall be applied in the purchase by the Trust Company for the Trust Company, as Trustee, under this Agreement, of one million dollars (\$1,000,000) of the said Loan Certificates, issued under the said Agreement, Schedule "A," on presentation thereof to the Trust Company under the terms of the said Agreement.

So far as practicable the Morton Trust Company shall obtain from the holders of said Loan Certificates issued under the said Agreement, Schedule "A." a receipt substantially in the following form:

"Received from Morton Trust Company for the Transfer and delivery of Loan Certificates No....., issued an Agreement of March 24, 1904, and all rights thereunder, the sum of \$....."

The delivery of such Loan Certificates to the Morton Trust Company, together with the receipt aforesaid, shall be deemed for all purposes hereof.

a purchase by Morton Trust Company of Loan Certificates issued under the said Agreement, Schedule "A."

In so far as Morton Trust Company shall be unable to purchase Loan Certificates in the manner aforesaid, it shall disburse the sum of one million dollars (\$1,000,000) aforesaid against the delivery of Loan Certificates issued under the Agreement, Schedule "A," and shall retain the said Certificates uncancelled subject to the provisions hereof.

Before applying the one million dollars (\$1,000,000) to the payment of Loan Certificates issued under the Agreement, Schedule "A," and cancelling the same, as provided in Article 1, subdivision 1 (b) hereof, Morton Trust Company shall apply the one million dollars (\$1,000,000) paid to it under Subdivision (2) of this Article in purchasing in the manner aforesaid Loan Certificates issued under the Agreement, Schedule "A."

The said Loan Certificates, when so purchased, shall be held by the Trust Company, as Trustee, under and subject to the terms and provisions of this Agreement, such Certificates as purchased being hereinafter called the "Guaranteed Securities."

- (3) The Improvement Company may borrow from one or more persons from time to time, upon the security of the said "Guaranteed Securities" and the Guarantv of the Government, given as hereinafter provided, the sum of one million dollars (\$1,000,000), hereinafter called the "Secured Loan" which amount shall bear interest at the rate of five per cent. (5 per cent.) per annum, and the said sums of principal and interest shall be payable on the first day of November, 1906, on the presentation of the Loan Certificates hereinafter provided for, at the office of the Trust Company in the City of New York, in gold coin of the United States of America, of or equal to the present standard of weight and fineness.
- (4) The Improvement Company may issue from time to time certain certificates of participation, hereinafter called "Loan Certificates," in the said loan to the parties contributing thereto, said certificates shall be negotiable and may be payable to bearer and shall contain the obligation of the Improvement Company to repay the amount represented thereby with interest, as aforesaid, on presentation of such certificates, and such certificates shall be substantially in the following form:

  \$25,000

## CANADIAN IMPROVEMENT COMPANY,

#### Loan Certificate.

Due Nov. 1, 1906.

Interest five per cent. per annum.

Guaranteed principal and interest by the Province of Ontario.

The Canadian Improvement Company, a Corporation of the State of New Jersey, certifies that it is indebted to the bearer hereof for twenty-five thousand dollars (\$25,000), which amount it promises to pay bearer on the 1st day of November, 1906, with interest at the rate of five per cent. (5 per cent.) per annum, payable on the said first day of November, said sums of principal and interest both being payable on the presentation of this Loan Certificate at the office of Morton Trust Company in the City of New York in gold coin of the United States of or equal to the present standard of weight and fineness.

This Loan Certificate is one of a total issue not exceeding in all one million dollars (\$1,000,000) issued or to be issued under and subject to the

provisions of a certain Renewal Agreement, dated April 30, 1906, between His Majesty, the King, acting in respect of the Province of Ontario, and therein represented by the Honorable Arthur James Matheson, Provincial Treasurer (therein called the "Government") of the first part, Morion Trust Company, a Corporation duly incorporated (therein called the "Trust Company") of the second part, Canadian Improvement Company, a Corporation duly incorporated (therein called the "Improvement Company") of the third part, and The Lake Superior Corporation, a Corporation duly incorporated (therein called the "Corporation") of the fourth part.

Said Agreement of April 30th, 1906, in Section 11 thereof, contains the following provision:

"The Government covenants with the Trust Company for the benefit of the holders of the said Loan Certificates, and guarantees that the said Secured Loan, not exceeding in all one million dollars (\$1,000,000), together with interest thereon, as aforesaid, will be paid as and when the same shall respectively become payable."

To secure said issue of Loan Certificates there has been deposited with Morton Trust Company the sum of one million dollars (\$1,000,000) to be applied by Morton Trust Company under and pursuant to the terms and provisions of said Renewal Agreement of April 30th, 1906, in acquiring certain Loan Certificates aggregating one million dollars (\$1,000,000) guaranteed by the Government of Ontario (hereinafter called the "Guaranteed Securities"), and issued under and secured by an Agreement bearing date March 24th, A.D. 1904, made between His Majesty, the King, acting in respect of the Province of Ontario (therein called "the Government"), party of the first part; Morton Trust Company (therein called the "Trust Company"), of the second part; and Canadian Improvement Company (therein called the "Improvement Company"), of the third part, as modified by the said Agreement of April 30th, 1906. Which said Loan Certificates, when so acquired, are to be held by Morton Trust Company subject to the provisions of said Agreement of April 30th, 1906.

Said "Guaranteed Securities" are secured by the deposit with the Morton Trust Company of the following:

All the Shares of the Capital Stock of the Algoma Central & Hudson Bay Railway Company( hereinafter called "The Algoma Company"), and The Manitoulin & North Shore Railway Company (hereinafter called "The Manitoulin Company"), amounting respectively to ten million dollars (\$10,000,000) and two hundred and fourteen thousand dollars (\$214,000). (other than such shares as may be retained by the Directors of the said Companies for their qualification);

All the Mortgage Bonds which have been issued by the Algoma Company and The Manitoulin Company, amounting respectively to six million seven hundred and fifty thousand dollars (\$6,750,000), and four hundred and five thousand dollars (\$405,000);

Also, the note of The Algoma Company, dated Jan. 1st, 1903, for the sum of seven hundred and twenty-five thousand dollars (\$725,000), secured by Mortgages of certain vessels and steamships;

Also, by the Guaranty of the Government;

In witness wheref, the Canadian Improvement Company has caused this Loan Certificate to be sealed with its Corporate Seal, and to be signed by its President or Vice-President, and the execution hereof to be attested

by its Secreta	ry this, one thousand and six.
nine hundred	and six.
	CANADIAN IMPROVEMENT COMPANY,

	Secretary.
Such com	ificates shall contain a contificate to be signed by the Honor.

Such certificates shall contain a certificate to be signed by the Honorable A. J. Matheson, Provincial Treasurer of the Province of Ontario, sub-

stantially in the following form:

This is to certify that the Agreement herein referred to, securing said Loan Certificate, has been delivered to the Morton Trust Company, and contains a covenant and Guaranty by the Government of the Province of Ontario, with the Morton Trust Company for the benefit of the holders of the said Loan Certificates, that the said Secured Loan, not exceeding in all one million dollars (\$1,000,000) together wth interest thereon as set out in said certificate, will be paid as and when the same shall respectively become payable.

5. At any time after the delivery of this Indenture, the Trust Company shall authenticate and deliver the Loan Certificates upon the deposit with the Trust Company, under the terms of this Agreement, of the aggregate sum of two million and fifty thousand dollars (\$2,050,000), as hereinbefore provided. The Trust Company shall thereupon all at once or from time to time on the written order of the Treasurer of the Improvement Company, authenticate each of the said Loan Certificates, by executing thereon the following certificate:

### "TRUSTEE'S CERTIFICATE."

"This is one of the Loan Certificates mentioned in the Agreement referred to hereon, dated April 30th, 1906.

MORTON TRUST COMPANY, as Trustee,

By .......

Vice-President."

Such Loan Certificates when so certified shall be delivered by the Morton Trust Company on the written order of the Treasurer of the Improvement Company, and such order shall be full and complete protection to the Trustee for the certification and delivery of any such Loan Certificate in conformity therewith. The Trust Company shall not be in any wise responsible for the issue or negotiation of said Loan Certificates or the application of their proceeds, except as herein provided.

Only such certificates as shall bear thereon the aforesaid Trustee's Certificates, duly executed by the Trust Company, shall be secured by this

Indenture or shall be entitled to any lien or benefit hereunder.

6. Unless and until the whole of the said sum of one million dollars (\$1,000,000), deposited with the Morton Trust Company for the purchase of Loan Certificates issued under the said Agreement, Schedule "A" hereto, as hereinbefore provided, has been expended by the Trust Company for the said purpose and the said Loan Certificates to the amount of one million dollars (\$1,000,000) are held by the Trust Company under the

terms of this Agreement, the moneys so deposited for the purpose aforesaid and from time to time remaining in the hands of the Trust Company shall be held by it under and subject to the terms of this Agreement as security

for the Loan Certificates issued hereunder.

7. Upon the deposit with the Trust Company of the aggregate sum of two million and fifty thousand dollars (\$2,050,000), the Trust Company shall deliver over to the Improvement Company, or its order, one million two hundred and nine thousand dollars (\$1,209,000) of the First Mortgage and Collateral Trust Bonds of The Lake Superior Corporation, one hundred and fifty-three thousand dollars (\$153,000) of the Income Bonds of The Lake Superior Corporation, and two million six hundred and eighty-two thousand dollars (\$2,682,000) of the Capital Stock of The Lake Superior Corporation, being one-half of each class of the securities referred to in the said Agreement, Schedule "A" hereto, as "Collateral Securities."

8. The Improvement Company covenants with the Trust Company, the

Government and the Corporation, as follows:

(1) To pay the amount of the said Secured Loan and interest thereon at maturity.

(2) To pay upon demand all other moneys, if any, payable by the Im-

provement Company under the terms of this Agreement.

(3) To indemnify and keep indemnified the Government of and from the payment of the Secured Loan and interest thereon and every part thereof, and of and from and against all actions, suits, costs, damages and expenses which the Government may incur, sustain or be put to for or by reason or on account of its Guaranty of the said Secured Loan and in respect of all moneys expended by the Government under the provisions of this Agreement.

(4) To pay forthwith on the demand of the Treasurer of Ontario, all costs, expenses and disbursements in any way incurred by or on behalf of the Government in connection with this Agreement or the said Agreement, Schedule "A" hereto, or any matter or thing leading up to this Agreement or referred to or arising out of either this Agreement or the said Agreement,

Schedule "A" hereto.

- 9. Unless and until an event of default shall have happened under this Agreement, the Trustee shall not without the consent of the Government, the Improvement Company, and the Corporation, nor shall the Government take any proceedings under the said Agreement, Schedule "A" hereto, to realize the amount due thereunder or to realize upon any of the securities or properties pledged thereunder or affected thereby, and unless and until default shall be made under the terms of this Agreement, the Improvement Company shall not be deemed to be in default under the terms of the said Agreement, Schedule "A" hereto, and for all purposes thereof the Loan Certificates to be purchased thereunder, issued under said Agreement, Schedule "A" annexed hereto, shall be deemed to have been extended to and to mature on November 1st, 1906.
- 10.—(1) On the happening of any event of default under this Agreement or under the Agreement, Schedule "A" hereto, the Trust Company, as Trustee hereunder, with the consent of the Government, shall be entitled and shall upon the request of the Government require the Morton Trust Company, as Trustee, under the said Agreement, Schedule "A" hereto, to exercise all or any powers and rights given by virtue of the said Agreement, Schedule "A" hereto, in case of default thereunder.

(2) If at any time after any proceedings have been taken by the Morton Trust Company, as Trustee, under the said Agreement, Schedule "A"

hereto, under or in respect of any of the securities deposited or pledged thereunder and the Government deems it expedient that the said proceedings should be stayed or withdrawn the Trust Company shall request the Morton Trust Company, as Trustee, under the said Agreement, Schedule "A" hereto, to stay or withdraw such proceedings, but no such stay or withdrawal shall be deemed a waiver of the rights of the Government or of the Trustee in the premises, nor shall the same extend to or affect any subsequent default or impair any right consequent thereon.

1. The Government covenants with the Trust Company for the benefit of the holders of the said Loan Certificates and Guaranteees that the said Secured Loan, not exceeding in all one million dollars \$1,000,000), together with interest thereon as aforesaid, will be paid as and when the same shall respectively become payable, and the delivery of this Agreement by the Government to the Trust Company shall be deemed to be delivery of the

Government Guaranty under the provisions of this Agreement.

12. Upon payment or other satisfaction of the Secured Loan or upon the Loan Certificates issued hereunder being deposited with the Trust Company cancelled or for cancellation, the Trust Company shall issue to the Government under its Corporate Seal a certificate that such Secured Loan has been paid or that such Loan Certificates have been cancelled or delivered to the Trust Company for cancellation and upon payment of all other moneys payable to the Trust Company and to the Government or in respect of which the Government may be liable under any of the provisions of this Agreement, the Trust Company shall cancel the said Guaranteed Securities deposited under the terms of this Agreement and deliver over the said Guar-

anteed Securities cancelled to the Improvement Company.

13. All the provisions of paragraphs eleven (11), sixteen (16), seventeen (17), eighteen (18), nineteen, subd. one (19-1), twenty-two (22), twentythree (23), twenty-five (25), twenty-six (26), twenty-seven (27), twentyeight (28), thirty (30), thirty-one (31), thirty-two (32), thirty three (33) in the said Agreement, Schedule "A" hereto, shall apply to this Agreement as fully and effectually as if the said paragraphs were repeated verbatim in this Agreement, except as the same are herein expressly or by necessary implication modified, and without restricting the generality of the following, but for greater particularity, wherever in the said paragraphs above enumerated words referring to the Agreement of March 24th, 1904, Schedule "A" hereto, or the Loan Certificates issued thereunder or the Guaranty of the Government are referred to they shall be deemed also to refer to and include this Agreement, and the Loan Certificates issued hereunder and the Guaranty of the Government hereunder respectively, and the rights of the holders of the New Loan Certificates and of all parties to this Agreement shall be in all respects as if the said paragraphs as so modified had been repeated in this Agreement.

Said Agreement, Schedule "A" hereto, shall in all respects remain in full force, effect and virtue and all powers, rights, remedies and privileges thereunder shall remain unimpaired, unabridged and unaffected, save and except where the said Agreement, Schedule "A" hereto, or any of its provisions is or are expressly altered by this Agreement, or by necessary

implication therefrom.

14. In case of default the moneys realized by the Trust Company or held by it under this Agreement after deducting therefrom all the expenses of such realization, including counsel fees, and the reasonable remuneration of the Trust Company and after reimbursing the Trust Company for all sums by it disbursed on account of the Guaranteed Securities and all

interest thereon shall be applied in and towards the payment of the amount due upon the said Secured Loan and be distributed rateably among the holders of the Loan Certificates under this Agreement. If the amount so to be distributed shall be insufficient to pay the amount due to the holders of the said Loan Certificates, the Improvement Company shall forthwith pay the deficiency to the several holders of such certificates; if there shall be a surplus, such surplus shall be applied, first, in payment of all moneys due the Government under this Agreement, and the balance shall be paid to the Improvement Company, or its assigns, or as a court of competent jurisdiction shall direct.

15. Until the Trustees shall receive notice of default anything herein contained to the contrary notwithstanding it is expressly authorized and empowered in its discretion to take any action hereunder or to refrain from taking any action and to release any of the securities hereunder or under the Agreement, Schedule "A" hereto, or any part thereof, and to deal with the same as may be provided in a joint request of the Government and of Canadian Improvement Company and of The Lake Superior Corporation; after the Trustee shall have received notice of default hereunder it may do or refrain from doing any of the matters hereinabove specified upon the request or order of the Government alone, save in the event specified in paragraph twenty-seven of the Agreement, Schedule "A" hereto.

The joint request of the Government and of Canadian Improvement Company and of The Lake Superior Corporation or of the Government alone, as the case may be, shall be in each case, full authority and protection to the Trustee for any action it may take or refrain from taking upon the faith thereof, and the Trustee shall not be under any duty to look behind any

such request.

16. The Corporation hereby consents to the provisions of this Agreement and to the delivery to the Improvement Company or on its order of the Collateral Securities mentioned and set forth in paragraph 7 of this Agreement, and to the pledge and deposit of the Guaranteed Securities under and subject to the terms of this Agreement.

17. This Agreement shall be known as the "Renewal Guaranty Agree-

ment."

In witness whereof the Honorable Arthur James Matheson, Provincial Treasurer of the Province of Ontario, acting on behalf of His Majesty, the King, has hereunto set his hand and seal, and the Trust Company, the Improvement Company and the Corporation, the parties hereto of the second, third and fourth parts respectively, have caused their respective Corporate Seals to be affixed hereto under the hands of the proper officers of the said Companies respectively.

# SCHEDULE "A."

AGREEMENT, DEED OF TRUST, AND GUARANTY.

THIS AGREEMENT made the twenty-fourth day of March, 1904, between His Majesty, The King, acting in respect of the Province of Ontario, and herein represented by The Honorable George William Ross, Premier of the said Province of Ontario and Provincial Treasurer (hereinafter called "The Government,") of the First Part: The Morton Trust Company, a Corporation duly incorporated (hereinafter called the "Trust Company,") of the Second Part; and The Canadian Improvement Company. a Corporation duly incorporated (hereinafter called the "Improvement Company,") of the Third Part.

Whereas the Algoma Central and Hudson Bay Railway Company, hereinafter called the Algoma Company, has been duly incorporated and empowered to construct a line of railway from Sault Ste. Marie, in the Province of Ontario, to the main line of the Candian Pacific Railway, and from a point on the said proposed line of railway to Michipicoten Harbour on Lake Superior, and the Directors of the said Algoma Company, under the authority of the shareholders, were authorized to issue bonds, debentures or other securities, and to pledge all or any of the same, and the said directors of the Algoma Company were further authorized to secure such bonds, debentures or other securities by a mortgage deed creating such mortgages, charges and encumbrances upon its property, assets, rents and revenues;

And whereas the said Algoma Company has constructed and completed about ninety-one (91) miles of its said line of railway, of which about twenty-six (26) miles have double track or sidings, making in all about one hundred and seventeen (117) miles of single track laid, and has graded about one hundred and ten (110) additional miles, and has acquired and owns a large amount of rolling stock and equipment, and a fleet of vessels and steamships for cargo and passengers upon navigable water, with which its said railway

connects;
And whereas the directors of the said Algoma Company, under the authority of the shareholders thereof, have issued bonds to the amount of six million seven hundred and fifty thousand dollars (\$6,750,000), and have secured the same by a mortgage deed bearing date the first day of January, 1903.

made by and between the said The Algoma Central and Hudson Bay Railway Company, of the first part; and the Central Trust Company of New York, a corporation duly incorporated, of the second part; creating the same mortgages, charges and encumbrances upon its property, assets and revenue as in the said mortgage deed set forth, and has issued its note or obligation for the sum of seven hundred and twenty-five thousand dollars (\$725,000), dated first January, 1903, and has secured the same by several mortgages to the said Central Trust Company of New York upon the said vessels and steamships;

And whereas the Manitoulin and North Shore Railway Company, hereinafter called the Manitoulin Company, has been duly incorporated and empowered to construct a line of railway as set forth in the said Acts and the Acts amending and relating thereto, and the directors of the said Manitoulin Company, under the authority of the sharehloders, were authorized to issue bonds, debentures or other securities, and to pledge all or any of the same, and the said directors of the Manitoulin Company were further authorized to secure such bonds, debentures or other securities by a mortgage deed creating such mortgages, charges and encumbrances upon its property, asset, rents and revenues;

And whereas the said Manitoulin Company has constructed and completed about thirteen and one-half (13½) miles of the said line of railway;

And whereas the directors of the said Manitoulin Company, under the authority of the shareholders thereof, have issued bonds to the amount of four hundred and five thousand dollars (\$405,000), and have secured the same by a mortgage deed, bearing date the first day of January, 1903, made by and between the said The Manitoulin and North Shore Railway Company, of the first part; and the Central Trust Company, of New York, a corporation duly incorporated, of the second part, creating the same mortgages, charges and encumbrances upon its property, assets, rents and revenues as in said mortgage deed set forth;

And whereas the bonds aforesaid and all of the shares of the said the Algoma Company and the Manitoulin Company are now held by Messrs. Speyer & Co., of the City of New York, in the State of New York, one of the United States of America, bankers, and proceedings have been taken by the said Speyer & Co. to realize upon, and they claim to have acquired title to all the said bonds and shares so held by them, and they have now agreed to sell and transfer the said shares and bonds (with other securities, shares and bonds) to the Improvement Company aforesaid, upon payment to them, the said Speyer & Co., of the sum of five million and fifty thousand dollars (\$5,050,-000), with interest and expenses added thereto;

And whereas the said railways, so far as already constructed, run through sections of the country not accessible for the purposes of settlement and habitation before such construction, and when further completed or constructed, will open up for settlement and habitation further sections of the country as yet undeveloped and inaccessible, and in such sections of the country there are large areas of arable land well fitted for settlement, and extensive tracts of merchantable pine and other valuable timber and deposits of ores and minerals, the development of which would be of great advantage to the Province;

And whereas extensive industries and works have been established at the Town of Sault Ste. Marie, with buildings, power, plant and equipment of such magnitude, capacity and diversity as to develop and utilize to the fullest extent the timber, mineral and other natural resources of the country to be served by the said railways, and for the manufacture of the products thereof, and more than thirty million dollars (\$30,000,000) have been expended in

Digitized by GOOGLE

establishing such works and in and towards the construction of the said rail-ways, which have attracted, and, if operated, will continue to attract immigration, settlement and capital to the Province, and will furnish employment, to labor:

And whereas by an Act passed in the sixty-third year of Her Majesty's reign, Chapter 30, it was declared to be in the interests of the districts in which the proposed works are located, as well as of the Province at large, that the said Algoma Central Railway should be constructed and the work of construction thereof proceeded with at once, and that it was expedient, for the purpose of securing the advantages aforesaid, that aid by way of a land grant should be given towards the construction of the same, and it was enacted that such aid, by way of a land grant, be and the same was thereupon granted, but only on performance of the conditions named in the said Act prescribed;

And whereas by an Act passed in the first year of His Majesty's reign, Chapter 23, it was declared that the Manitoulin and North Shore Railway would aid materially in developing the districts through which it was to be constructed and in securing to the Province the benefits arising from the extensive development operations which were to be carried on in the said districts, and to enable the said railway to be constructed, it was enacted that aid by way of a land grant should be given towards the construction of the same, but only on performance of the conditions in the said Act;

And whereas none of the said land grants have been made to either of the said railways, and from the nature and character of the said districts of country the construction of the said railways hithereto has been and will continue to be difficult and costly, and the traffic upon the said railways, so far as already constructed, has been, and, when completed, will continue to be limited until the lands adjacent thereto become settled and the natural resources of the said districts shall become known and accessible to the people of the Province:

And whereas it is in the interest of the Province to secure and expedite the construction and operations of the said railways as speedily as possible, and the continued and increased development of the said districts to the fullest extent possible and with the least delay, and it is desirable to assist in

providing the moneys required for the purpose aforesaid;

And whereas the Improvement Company has agreed that if the Government will guarantee the payment of a loan of two million dollars (\$2.000,-000) to be borrowed by means of pledging the shares in and the bonds of the said railways and the note for seven hundred and twenty-five thousand dollars (\$725,000) secured by said mortgage of vessels and steamships, all of which are now held by the said Messrs. Speyer & Co., which loan shall become and be payable on the first day of May, 1906, with interest payable half yearly on the first days of May and November, in the meantime at the rate of five (5) per cent. per annum, the said Improvement Company shall and will provide for (1) The completion of the construction and the equipment of the Algoma Central and Hudson Bay Railway Company to the Canadian Pacific Railway; (2) The operation of the said railway for the carriage of passengers and freight; (3) The payment of the amount required by Messrs. Speyer & Company for the sale and transfer of all the shares, bonds and other securities acquired and held by them under or in respect of the loan made by them to the Consolidated Lake Superior Company; (4) Satisfying and procuring releases of, or receipts for all other outstanding liabilities of all the said industries and works at Sault Ste. Marie, including the said railways, or satisfactorily securing the same; (5) The organization of a company herein referred to as the "Re-organized Company," for the purpose of acquiring all the said industries and works, including the said railways, and the stocks,

bonds and securities thereof; (6) The conveyance and transfer to the "Re-organized Company" of all the said securities, subject to the pledge of the pledged securities hereinafter provided; (7) The said "Re-organized Company" not less than one million dollars (\$1,000,000) for working capital for the operation of the said industries and the railways; (8) Indemnifying and saving harmless the Government in respect of the said guaranty; (9) The appointment or approval by the Government of three Directors of the said "Reorganized Company" so long as the Government's liability continues in respect of the said loan; (10) The approval and ratification of the said deed of trust or agreement by The Algoma Central and Hudson Bay Railway Company and The Manitoulin and North Shore Railway Company and the "Reorganized Company."

Therefore this Indenture witnesseth that the parties hereto have, for valuable considerations, contracted and agreed with each other as follows:

- 1. The Improvement Company may borrow from one or more persons from time to time upon the security of the stocks, bonds and securities hereinafter referred to as the "pledged securities," and the guaranty of the Government as hereinafter provided, a sum not exceeding two million dollars (\$2,000,000), (hereinafter called the "secured loan"), which amount shall bear interest at the rate of five per cent. per annum, payable half-yearly on the first days of May and November, and the principal payable on the first day of May, 1906, the said sums of principal and interest, both being payable on presentation of the loan certificates hereinafter provided for at the office of the Trust Company, in the City of New York, in gold coin of the United States of or equal to the present standard of weight and fineness.
- 2. The Improvement Company may issue from time to time certificates of participation (hereinafter called "Loan Certificates") in the secured loan to the parties contributing thereto. Said certificates shall be in a form approved of by the Trust Company and shall be negotiable and may be payable either to bearer or to order, and shall contain the obligation of the Improvement Company to repay the amount represented thereby with interest as aforesaid, on presentation of such certificates.
- 3. The Improvement Company shall cause to be vested in the Trust. Company, as security for the secured loan, and upon the trusts hereinafter declared, all the fully paid up and non-assessable shares in the Capital Stock of The Algoma Company and The Manitoulin Company, amounting respectively to ten million dollars (\$10,000,000), and two hundred thousand dollars (\$200,000), (other than such shares as may be retained by the directors of the said companies, for their qualification), and also all the mortgage bonds which have been issued by the Algoma Company and Manitoulin Company, amounting respectively to six million seven hundred and fifty thousand dollars (\$6,750,000), and four hundred and five thousand dollars (\$405,000), and also the note of the Algoma Company, dated January 1st, 1903, for the sum of seven hundred and twenty-five thousand dollars (\$725,000), secured by mortgages of the vessels and steamships as hereinbefore mentioned. The Improvement Company shall also obtain and cause to be deposited with the Trust Company, certificates representing the shares held by the Directors of the Algoma and Manitoulin Companies, with proper transfers thereof, either in blank or as the Trust Company may require, and also the resignations of each of the said directors for the time being in office, to take effect at the pleasure of the boards of the respective companies, or at the request of the Government, so long as any part of the secured loan remains unpaid, but such transfers of shares shall not, with-

out the consent of the Improvement Company, be placed upon record with the railway companies prior to the happening of an event of default as hereinafter defined. The several securities and instruments transferred to and deposited with the Trust Company under the provisions of this clause are hereinafter referred to as the "pledged securities." The Trust Company shall be under no duty or obligation to see that said securities or the "collateral securities" hereinafter mentioned shall be transferred to or deposited with it.

- 4. The Improvement Company shall cause to be issued and deposited with the Trust Company all the first mortgage bonds, income bonds and stock in the company hereinafter called the Reorganized Company, which a cash underwriter in the said company, under the plan of reorganization, would be entitled to receive, who paid into the said company in respect of such underwriting the sum of two million (\$2,000,000) dollars, the first mortgage bonds, income bonds and stock to be held by the Trust Company as collateral security for the due payment of the said secured loan, and the due performance of the covenants and conditions of this agreement. certificates representing the shares in the "Reorganized Company" shall be issued in the name of, or duly transferred to the Trust Company. plan of reorganization referred to in this clause is the plan of reorganization adopted by the committee of the shareholders of the Consolidated Lake Superior Company, and bearing date the 20th day of October, A.D. 1903, and a copy of which said plan has been duly deposited in the office of the Fidelity Trust Company, in the City of Philadelphia, in the State of Pennsylvania, and a certified copy thereof deposited with the Provincial Treas-The said first mortgage bonds, income bonds and stock urer of Ontario. to be issued and deposited under the provisions of this clause are hereinafter referred to as the "collateral securities."
- 5.—(1) Until an even of default shall happen, the Improvement Company shall be entitled to receive from the Trust Company from time to time a proxy in favor of such person or persons as the Improvement Company may designate, authorizing such proxy to represent the shares vested in the Trust Company at all meetings of the Algoma and Manitoulin Companies and of the Reorganized Company.
- (2) Until an event of default shall happen, the Trust Company shall pay over to the Improvement Company the interest received by the Trust Company on any bonds that may be at any time pledged or deposited with the Trust Company under the terms of the agreement, or any of the dividends from time to time declared and received by the Trust Company in respect of the stock of any company at the time pledged or deposited with the Trust Company hereunder.
- (3) The Trust Company may at any time do whatever may be necessary for the purpose of preserving the corporate existence of any corporation, whose stock shall be pledged or deposited with the Trust Company hereunder.
- (4) On the happening of any event of default, then from and after such default, and so long as such default shall continue, the Trust Company shall exercise in its absolute discretion, with the consent of the Government, for the sole and exclusive benefit of the Government and the holders of the loan certificates all the rights of owner of the bonds and of the stock which may be pledged or deposited with the Trust Company hereunder, and the Trust Company shall collect the interest on the said bonds and the dividends on the said stock, and shall apply the same as directed by the Government or in paragraph 15 hereof provided.

6. After the delivery of the indenture the Trust Company shall authenticate and deliver the loan certificates in the manner hereinafter provided as soon as the Improvement Company shall deliver, or cause to be delivered, to the Trust Company, the following securities and instruments, viz:—

(1) Certificates representing ten million dollars (\$10,000,000) par value of the Capital Stock of the Algoma Central and Hudson Bay Railway Com-

pany, expressed on their face to be full paid and non-assessable.

(2) Certificates representing two hundred thousand dollars (\$200,000) par value of the Capital Stock of the Manitoulin and North Shore Railway Company, expressed on their face to be full paid and non-assessable.

(3) Six million seven hundred and fifty thousand dollars (\$6,750,000) par value of the bonds of the Algoma Central and Hudson Bay Railway Company, purporting to be secured by a mortgage deed bearing date Janu-

ary 1st, 1903, to the Central Trust Company of New York.

(4) Four hundred and five thousand dollars (\$405,000) par value of the bonds of the Manitoulin and North Shore Railway Company, purporting to be secured by a mortgage deed bearing date January 1st, 1903, to the Central Trust Company of New York.

(5) A certain note for seven hundred and twenty-five thousand dollars (\$725,000) of the Algoma Central and Hudson Bay Railway Company, dated

January 1st, 1903, endorsed as the Trust Company may direct.

(6) The resignations of the persons whom the Improvement Company shall certify to the Trust Company to be the Directors of the Algoma Central and Hudson Bay Railway Company and of the Manitoulin and North Shore Railway for the time being in office, expressed to take effect at the pleasure of the boards of the respective companies, or at the request of the Government, so long as any part of the secured loan remains unpaid.

The certificate of stock to be delivered as aforesaid shall be in the name of the Trust Company or in such name as the Trust Company may direct, except the shares necessary to qualify directors, which shall be accompanied with proper transfers thereof either in blank or as the Trust Company may

require.

The Trust Company shall thereupon all at once, or from time to time, on the written order of the Treasurer of the Improvement Company, authenticate each of said loan certificates by executing thereon the following Trustee's Certificate:

## "TRUSTEE'S CERTIFICATE.

This is one of the loan certificates mentioned in the indenture referred to within.

MORTON TRUST COMPANY,

Trustee,

By

Trust Officer."

Such loan certificates when so certified shall be delivered by the Trust Company on the written order of the Treasurer of the Improvement Company, and such order shall be full and complete protection to the Trustee for the certification and delivery of any such loan certificates in conformity therewith. The Trust Company shall not be in any wise responsible for the issue or negotiation of said loan certificates or the application of their proceeds.

Only such loan certificates as shall bear thereon the aforesaid Trustee's Certificate duly executed by the Trust Company shall be secured by this indenture or shall be entitled to any lien or benefit hereunder.

7. The Trust Company may for its own benefit lend to the Improvement Company the whole or any part of the secure loan, or may acquire from time to time any loan certificate or certificates of participation therein.

8. The Improvement Company further covenants with the Government

as follows:-

- (1) That all the work shall be done and all the materials supplied necessary for the completion of that part of the line of the Algoma Company which has been graded but not completed, extending about one hundred and ten (110) miles from the present terminus of the completed portion of said railway, and that the said railway shall be continued and constructed from such terminus of the now graded portion of the railway to a point on the line of the Canadian Pacific Railway so that the said railway may be connected with the said Canadian Pacific Railway, and such work shall be commenced by the Algoma Company so soon as, considering the climatic conditions, the same can be done advantageously, and shall be prosecuted continuously and expeditiously and to the satisfaction of the Government, until completed, and all materials shall be supplied and all such work shall be done in conformity with the requirements of the Railway Act and without any avoidable delay.
- (2) The Algoma Company shall be equipped and operated so far as the same may be from time to time required for the proper carriage of pas-

sengers or freight or as may be required by the Government.

(3) To acquire from Speyer & co. the shares, bonds and securities acquired and now held by them under or in respect of the loan made by them to the Consolidated Lake Superior Company.

(4) To forthwith satisfy and procure releases of for receipts for all the outstanding liabilities of the said industries and works and of the several companies heretofore formed for the purpose of operating the same, or other-

wise arrange for satisfactorily securing the same.

(5) A Company (herein called the Reorganized Company), shall be forthwith formed for the purpose acquiring all of the said industries and works, including the said railways, and the stocks, bonds and securities of the several companies formed for the purpose of operating the said industries and railways.

Without the consent of the Government, the capital stock of the said company shall not exceed forty million dollars (\$40,000,000), the first mortgage bonds of the said company shall not exceed ten million dollars (\$10,000,000); and the income bonds of the said company shall not exceed three million dollars.

(6) To convey and transfer to the said Reorganized Company so soon as formed all of the shares, bonds and securities and properties acquired and now held by Speyer & Co. under or in respect of the loan aforesaid, subject only to the pledge of the "pledged securities" herein contained, and save as to the said pledged securities; the first mortgage bonds of the said Reorganized Company, so to be issued, shall be a first charge upon all the said shares, bonds, securities and properties so transferred.

(7) To forthwith provide the reorganized company with not less than one million dollars (\$1,000,000) in cash for working capital for the operation of the said industries and works and the said Algoma and Manitoulin Railways, in addition to and exclusive of the raw material and partially worked-

up material on hand.

- (8) To cause sufficient stock in the reorganized company to be so voted that there shall be elected upon the Board of Dirrectors of the said Reorganized Company during the time the Government remains liable for the secured loan or any part thereof, three persons approved of by the Government.
- (9) That the Reorganized Company, the Algoma Company and the Manitoulin Company shall approve of, accept and agree to carry out the terms of this Agreement in so far as the same affect the said companies respectively, and all such documents as may be required by the Government for the said purposes shall be executed by the said companies respectively.

(10) To pay upon demand all moneys payable by the Improvement Com-

pany under this Agreement.

(11) To indemnify and keep indemnified the Government of and from the payment of the secured loan and interest thereon and every part thereof, and of, from and against all actions, suits, costs, damages and expenses which the Government may incur, sustain or be put to for or by reason or on account of its guaranty of the said secured loan and in respect of all moneys expended by the Government under any of the provisions of this

agreement.

(12) That upon payment of the claim of Speyer & Company, all the shares, bonds and securities and properties held by Speyer & Company under or in respect of the loan to the Consolidated Lake Superior Company other than the pledged securities, shall be transferred to the Trust Company, to be held by the Trust Company and handed by the Trust Company without further responsibility in respect thereto or as directed by the improvement company upon either; (1) the request of the Government or (2) The delivery to the Trust Company of the "collateral securities" aforesaid.

Pending and until such delivery the Trust Company may deal with such securities in every respect as requested by the Government and such request

shall be full protection to the Trust Company.

8. (a) So long as any part of the secured loan remains unpaid, the Improvement Company further covenants with the Trust Company and the Government that the Algoma Company and the Manitoulin Company shall pay and discharge all working expenditures and other sums which under The Railway Act would have priority over the mortgage bonds of said railway companies, and that neither the Algoma Company nor the Manitoulin Company shall, without the consent of the Government, permit or suffer the making or creation of any mortgage or other lien upon any of the property or assets of said companies or either of them, or issue any bonds which would rank rateably with those pledged with the Trust Company under the provisions hereof; nor shall said companies or either of them suffer or permit any lien to arise or be created upon any of its property or assets, nor shall any further shares of stock in either of the said Companies be issued, nor shall the said companies or either of them dispose of any property or assets or incur any indebtedness or liability out of the ordinary course of business, or incur any liability by endorsement or by guaranty; nor shall either of the said companies pay any dividend upon its capital stock.

9. In case the Government is not satisfied with the progress being made in the construction, completion or equipment of the Algoma Company, or the nature and character of the work being done or material supplied, as required by the provisions of section (1) of paragraph 8 hereof, or in case the Government is not satisfied with the manner in which the Algoma Company is from time to time equipped and operated, as required by the pro-

- visions of section (2) of paragraph 8 hereof, the Government may cause notice to be served upon the Improvement and the Algoma Companies, setting forth the character of the work and the nature of the material or equipment which the Government requires to be done and supplied, and the rate of progress which the Government requires to be made in the construction, completion and equipment of the Algoma Company, the manner in which the Government requires the said Algoma Company to be equipped and operated, and by the said notice the Government may name the time within which the Improvement Company and the Algoma Company shall comply with the terms of the said notice, and in case the terms of the said notice are not complied with within the time mentioned in the said notice, the Improvement Company shall be in default in the performance of its obligations contained in this agreement. Such notice on the part of the Government may be sent through the mails by registered letters addressed to the Algoma Company at Sault Ste. Marie, Ontario, and to the Improvement Company at New York, N.Y., and the Statutory Declaration of any person of the fact of such mailing shall for all the purposes of this agreement be conclusive evidence that such notice was mailed.
- 10. The Improvement Company shall furnish to the Government from time to time as required, evidence satisfactory to the Government that the Improvement Company has duly performed and carried out the covenants, stipulations and agreements on the part of the said Improvement Company contained in this Agreement according to the tenor thereof, and failure on the part of the Improvement Company to furnish such evidence, after request made therefor on behalf of the Government or a period of thiry days, shall be a deault on the part of the Improvement Company in the performance of its obligations contained in this agreement; such request may be sent or conveyed, by or on behalf of the Government, through the mails by registered letters addressed to the Improvement Company at New York, N.Y., and to the Algoma Company at Sault Ste. Marie, Ontario, and the Statutory Declaration of any person of the fact of such mailing shall, for all the purposes of this agreement, be conclusive evidence that such notice was mailed.
- 11. If any of the following events, herein called the "events of default" shall happen, that is to say:—
- (a) If default shall be made in the payment of the interest or of the principal of the secured loan or any part thereof.
- (b) If default shall be made in the performance of any of the obligations of the Improvement Company contained herein.
- (c) If a receiver shall be appointed of the Algoma Company or of the Manitoulin Company or of the property of either of the said companies.
- (d) If a receiver or liquidator shall be appointed of the Improvement Company or of the Reorganized Company or of the property of either of said companies.
- (e) If a judgment shall be entered against the Algoma Company or the Manitoulin Company or the Improvement Company or the Reorganized Company, and any such judgment shall for thirty days remain unsatisfied or unsecured on appeal then at the option of the Government, the secured loan shall become forthwith due and payable, anything herein contained to the contrary notwithstanding. Notice of such election on the part of the Government may be sent by or on behalf of the Trust Company or the Government through the mails by registered letters addressed to the Algoma and Manitoulin Companies at Sault Ste. Marie, Ontario, and to the Improve-

ment Company at New York, N.Y., and the Statutory Declaration of any person of the fact of such mailing shall for all the purposes of this agree-

ment be conclusive evidence that such notice was mailed.

This provision is, however, subject to the condition that if at any time after the principal of the said secured loan shall have been so declared due and payable all arrears of interest, (if any) upon such loan, and the charges and expenses of the Trust Company and of the Government, shall be paid by the Improvement Company; then in every such case the Government may by written notice to the said companies, given in the manner aforesaid, waive such default and its consequences, and may declare a recision of such declaration of the maturity of the principal, declare but no such waiver shall extend to or affect any subsequent default or impair any right consequent thereon, and the Statutory Declaration of any person of the fact of the mailing of such notice as aforesaid shall, for all the purposes of this agreement, be conclusive evidence that such notices were mailed.

12. Upon the happening of any event of default, The Trust Company shall upon the request of the Government, be entitled to have recorded by the Algoma and Manitoulin Companies, or either of them, all or any of the transfers of the shares of stockstanding upon the books of the railway companies in the name of the directors thereof: and the Trust Company shall be entitled to have the resignations of the directors of the said companies or any of them from time to time accepted by the boards of the said railway companies and each or either of them, and new directors, approved by the Trust Company and the Government, elected in the place of the directors

whose resignations shall be so accepted.

The directors so elected shall not in any sense, be considered as the agents of the Trust Company, nor shall it, in any wise, be responsible for the acts of any Directors elected as aforesaid with the approval of the Government, nor shall it be personally liable for any debts incurred by said directors us directors, or in the name of their respective companies.

After the appointment of such new directors any money expended by them in connection with the operation of the said railways, or either of them, shall be deemed to be advances to and a debt repayable by the Improvement Company to the said railway companies, respectively, and shall be payable by the Improvement Company to the said railway companies, respectively, and shall be payable by the Improvement Company upon demand, with interest thereon at the rate of five per cent. per annum.

- 13.—(1) On the happening of any even of default, the Trust Company shall be entitled, with the consent of the Government, and shall upon the request of the Government require the Central Trust Company, of New York, who are the trustees of the holders of the bonds of the Algoma and Manitoulin companies and the holders of the mortgages upon the steamships and other vessels of the Algoma Company, to exercise all or any of the powers and rights given by virtue of the mortgages and trust deeds securing the payments of the bonds and notes forming part of the pledged securities.
- (2) If at any time after any proceedings have been taken by the Central Trust Company, of New York, under or in respect of any of the said mortgage securities, and the Government deems it expedient that the said proceedings should be stayed or withdrawn, the Trust Company shall request the Central Trust Company, of New York, to stay or withdraw such proceedings, but no such stay or withdraway shall be deemed a waiver of the rights of the Government in the premises, nor shall the same extend to or affect any subsequent default or impair any right consequent thereon.

- 14.—(1) In the event of the non-payment of the said secured loan at maturity, or after the expiration of fifteen days after the mailing of the notice of the election by the Trust Company or Government to declare the said secured loan due, or in the event of the happening of any other event of default, the Trust Company may in its discretion, with the consent of the Government, without notice of the amount claimed to be due, without demand of payment, without advertisement and without notice of intention to sell, or of the time or place of sale (notice of each and every one of which is hereby expressly waived), sell the pledged and collateral securities, or any of them. or any part thereof at the stock exchange in the City of Toronto, or elsewhere, as the Government may elect, or at any public or private sale; and at any such sale the Trust Company, or the Government or any holder of any of the said loan certificates may bid for or purchase all or any part of the securities sold, discharged from any right of redemption on the part of the Improvement Company or its assigns, and all other parties, if any, interested therein.
- (2) The Trust Company, before selling the said pledged or collateral securities under the power of sale hereby given, may, but unless requested so to do by the Government shall be under no obligation so to do, give to the Improvement Company and to the Algoma and Manitoulin Companies fifteen days' previous notice of its intention to effect such sale; such notice shall be sufficiently given, if in any form of writing, signed by or on behalf of the Trust Company, and sent through the mails by registered letter, addressed to the Improvement Company, at New York, N.Y., and to the Algoma and Manitoulin Companies, at Sault Ste. Marie, Ontario, and the statutory declaration of any person of the fact of such mailing shall for all the purposes of this agreement, be conclusive evidence that such notice was mailed, but the giving of such notice shall not in any way limit or impair the right or power of the Trust Company to give a good title upon any such sale without such notice.
- (3) Notice of any such sale, if intended to be made by auction, shall state the place where and time when the sale shall be made, and shall contain a brief general description of the property to be sold, and shall be published once in each week for three successive weeks prior to such sale in a newspaper published in Toronto, Ontario, and in a newspaper published in New York, N.Y.; the Trust Company may adjourn any such sale, or cause the same to be adjourned from time to time by announcement at the time and place appointed for such sale or sales, or for such adjourned sale or sales, and without further notice or publication such sale may be made at the time and place to which the same shall be so adjourned.
- (4) Upon the completion of any such sale or sales the Trust Company shall execute and deliver to the accepted purchaser or purchasers a good and sufficient deed, conveyance, assignment or transfer of the property sold. The Trust Company and its successor or successors are hereby appointed the true and lawful attorney or attorneys irrevocably of the Improvement Company in its name and stead to make all necessary assignments, deeds of conveyance, sale and transfer of such property, and for that purpose and may execute all necessary acts of conveyance, assignment or transfer, and may substitute one or more persons or corporations with like power, the Improvement Company hereby ratifying and confirming all that its said attorney or attorneys, or such substitute or substitutes may lawfully do by virtue hereof, nevertheless the Improvement Company shall, if so requested by the trustees, ratify and confirm such sale by executing and delivering to the trustee or to such purchaser or purchasers all proper deeds, conveyances, assignments, transfers and release, as may be designated in such request.

(5) Any such sale or sales made under or by virtue of this agreement. either under the power of sale hereby granted and confirmd, or under and by virtue of the judicial proceedings, shall vest all right, title, interest, estate. claim and demand, whatsoever, either at law or in equity of the Improvement Company of, in and to the property sold, and shall be a perpetual bar, both at law and in equity, against the Improvement Company, its successors and assigns, and against any and all persons claiming, or to claim the property sold or any part thereof from, through or under the railway company. its successors or assigns.

(6) The Trust Company shall exercise the power of sale hereby given according to the tenor thereof, whenever requested so to do by the Government, or take appropriate proceedings at law or in equity for the foreclosure

thereof.

14a. The Government may, on the happening of any of the events of default as aforesaid, then or thereafter sell and dispose of all or any of the lands set apart by the Government as aid by way of land grants to the said Algoma Central and Manitoulin railways, as if the same had not been so set apart or granted or intended to be granted to the said railways, or any of them, and shall not be bound to credit the proceeds of any sales of any of such lands to the Improvement Company or to either of the said railways or

to any person acquiring any rights under this agreement or otherwise.

15. The pledged and collateral securities may be sold in one parcel or in such parcels and in such order as the Government may request, and in default of such request as the Trust Company may determine, and the Improvement Company waives any right to have such security marshalled upon any such No purchaser shall be under any obligation to see to the application of A certificate from Trust Company of the happenings the purchase price. of any one or more of the events of default, together with the production of this agreement, shall be sufficient evidence of such default, and no purchasers shall be bound to inquire into the correctness of any such certificate or whether any default has happened or whether any sum remains secured by this Any purchaser shall be entitled to turn in or apply towards the payment of the purchase price any loan certificate to the extent of the value of said certificate for principal and interest upon a distribution among the holders of such certificates of the net proceeds of such sale, after making all proper deductions allowable under the terms hereof, and such certificates shall be deemed to be paid to the extent of the amount so applied. The proceeds of such sale, after deducting therefrom all the expenses thereof, including counsel fees and the reasonable remuneration of the Trust Company, and after reimbursing the Trust Company for all sums by it disbursed on account of the pledged or collateral securities or in respect of the property or assets of the Algoma and Manitoulin Companies as aforesaid, and all interest thereon, shall be applied in or towards the payment of the amount due upon the said secured loan, and be distributed rateably among the holders of the loan certificates aforesaid. If the amount so to be distributed shall be insufficient to pay the amounts due to the holders of the said loan certificates, the Improvement Company shall forthwith pay the deficiency to the several holders of such certificates. If there shall be a surplus, such surplus shall be applied first in payment of all moneys due the Government under this agreement and the balance shall be paid to the Improvement Company or its assigns, or as a court of competent jurisdiction shall direct.

16. Except as herein expressly provided to the contrary, no remedy herein conferred upon or reserved to the Trust Company or the Government or the holders of the said loan certificates is intended to be exclusive of any other remedy, and every remedy herein provided shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity or by Statute, and every power or remedy given under this agreement to the Trust Company or the Government or the holders of the loan certificates may be exercised from time to time and as often as may be deemed expedient.

It is understood that the Trust Company may elect either to avail itself of one or more of the remedies provided herein, or to proceed by suits at law, or in equity, as it or its counsel may in its or their discretion deem advisable.

17. In case the Trust Company or the Government shall have proceeded to enforce any right under this agreement by foreclosure, sale, entry or otherwise, and such proceedings shall have been discontinued or abandoned because of waiver or for any other reason, or shall have been determined adversely to the Trust Company or the Government, or the holders of the said loan certificates, then and in every such case the parties hereto to this agreement shall severally and respectively be restored to their former position and rights hereunder in respect of the properties and assets covered by this agreement, and all rights, remedies and powers of the Trust Company and the Government shall continue as though no such proceedings had taken place.

18. No delay or omission of the Trust Company or the Government or of any holder of loan certificates in exercising any right or power acquired upon any default shall impair any such right or power or shall be construed to be a waiver of any such default or acquiescence therein, and every right and power given by this agreement to the Trust Company, the Government, or the holders of loan certificates may be exercised from time to time and as often as may be deemed expedient by the Trust Company, the Government, or the

holders of the said loan certificates.

19.—(1) The Improvement Company shall and will from time to time and at all times hereafter upon the reasonable request of the Government or the Trust Company and its successors in the trust appointed according to the provisions hereof, make, execute, acknowledge and deliver all such further acts, deeds, conveyances and assurances in law, and procure all such legislation as may be deemed necessary or desirable for the better and more effectual conveying, assuring and confirming unto the Trust Company and its successors in the trust by this agreement created, for the further security and satisfaction of the said secured loan and of the Government guarantee thereof, and for the due performance of the terms and conditions of this agreement, upon the trusts and for the uses and purposes herein expressed or considered, all the stocks, bonds, securities and properties hereby pledged or intended so to be, as by the Government or the Trust Company or any successor in the Trust under theadvice of counsel shall be reasonably advised or required.

(2) The Improvement Company shall and will from time to time and at all times hereafter, upon the request of the Government, cause to be executed and delivered to the said railway companies, respectively, all such deeds, transfers, conveyances and assurances in law as may be necessary, or as by the Government, under the advice of counsel, shall be reasonably advised or required to effectually vest the titles to the right of way, terminals and other properties occupied, used or enjoyed by the said railway companies,

or either of them, in the said railway companies, respectively.

20. The Government covenants with the Trust Company for the benefit of the holders of the said loan certificates and guarantees that the said secured loan, not exceeding in all two million dollars (\$2,000,000), together with interest thereon as aforesaid, will be paid as and when the same shall respectively become payable, and the delivery of this agreement by the Government to the Trust Company shall be deemed to be delivery of the Government guaranty under the provisions of this agreement.

21. Should the Government under its guarantee of the said secured loan pay at or after maturity thereof the amount due on any of the interest coupons of the said loan certificates, the Government shall be entitled to a lien upon the pledged securities next after the claims of the holders of the loan certificates under this agreement in respect of all sums so paid, together with interest thereon at the rate of four per cent. per annum from the date of payment.

22. Should the Government under its guarantee of the said secured loan pay at or after maturity the principal of the said loan certificates or any of them, the Government shall with respect to the loan certificates so paid, be deemed holders thereof within the meaning of this agreement, and shall be entitled to all the rights and remedies of the holders of the said loan certificates in respect thereof through or by means of the Trust Company or otherwise, and for the purposes of enforcing after the maturity of the loan certificates hereby secured, the lien of the Government as in the last preceding clause hereof provided, for any sums from time to time advanced and paid by the Government under the said guarantee for interest upon the said loan certificates, the Government shall be deemed to be holders of the unpaid interest coupons on such loan certificates to the amount of such lien, and shall be entitled on the maturity of the said loan certificates to all the rights and remedies of such holders through or by means of the Trust Company or otherwise.

23. For all other sums which the Government may pay or expend under the terms of this agreement, or for which the Improvement Company may be liable to the Government under the terms hereof, the Government shall be entitled to a lien upon the pledged securities next after the liens of the holders

of the loan certificates under this agreement.

24. Upon payment or other satisfaction of the secured loan and upon the loan certificates being deposited with the Trust Company, cancelled or for cancellation, the Trust Company shall issue to the Government under its corporate seal a certificate that such loan certificates have been so paid, satisfied or cancelled, and upon payment of all other moneys payable to the Trust Company or to the Government, or in respect of which the Government may be liable under any of the provisions of this agreement, the Trust Company shall transfer and convey to the Improvement Company, or on its order, all the pledged securities and collateral securities then remaining with the Trust Company. The Trust Company shall be under no duty to make said transfer

and conveyance unless the Government shall consent thereto.

25. No holder of any loan certificates or coupons shall have the right to institute any suit, action or proceeding at law or in equity upon or in respect of this agreement, or of the Government guarantee herein contained or for the execution of any trust or power hereof, or for the appointment of a receiver or for any other remedy under or upon this indenture, unless such holder shall previously have given to the Trust Company and the Government written notice of any existing default and of the continuance thereof as hereinafter provided; nor unless also the holders of onequarter in amount of the said loan certificates then outstanding shall have made written request upon the Trust Company and shall have afforded to the Trust Company reasonable opportunity to proceed itself to exercise the powers hereinbefore granted, or to institute such action, suit or proceeding in its own name after such right of action shall have accrued to the Trust Company; nor unless also such holder shall have offered to the Trust Company adequate security and indemnity against the costs, expenses and liabilities to be incurred in or by reason of such action, suit or proceeding, and such notification, request and offer of indemnity are hereby declared in every such case at the option of the Trust Company to be a condition precedent to the execution of the powers and trusts of this Indenture and

to any action or cause of action for foreclosure or sale or for the appointment of a receiver or for any other remedy hereunder, it being intended that no one or more holders of loan certificates or coupons shall have any right in any manner whatever to affect, disturb or prejudice the lien given by this agreement by his or their action, or to enforce any right hereunder, except in manner herein provided, and that all proceedings hereunder shall be instituted, had and maintained in the manner provided and for the equal benefit of all holders of such outstanding loan certificates and coupons, but the foregoing provisions of this section are intended only for the protection of the Trust Company and shall not be construed to affect any discretion or power by any provisions of this agreement given to the Trust Company to determine whether or not it shall take action in respect of any default without such notice or request from the holders of the loan certificates or to affect any other discretion or power given to the Trust Company:

26. Any request or other instrument required by this agreement to be signed and executed by the holders of loan certificates, may be in any number of concurrent instruments of similar tenor and may be executed by such holders of loan certificates in person or by agent or attorney appointed by any instrument in writing. Proof of the execution of any such request or other instrument, or of a writing appointing any such agent or attorney or if the holder by any person of loan certificates transferrable by delivery, shall be sufficient for any purpose of this agreement, and shall be conclusive in favor of the Trust Company with regard to any action taken by the Trust Company under such request or other instrument if made in the following

manner, namely:—

(a) The fact and date of the execution by any person of any such request, or of any other instrument in writing, may be proved by the certificate of any notary public or other officer authorized to take, either within or without the State of New York, acknowledgments of deeds to be recorded in such State, certifying that the person signing such request or other instrument acknowledged to him the execution thereof or by an affidavit of a witness to such execution.

- (b) The amount of the loan certificate transferrable by delivery held by any person executing and such request or other instrument as a holder of loan certificates and of issue numbers of the said loan certificates held by such person and the date of his holding, may be proved by a certificate issued by any Trust Company, bank or other depository wheresoever situate, whose certificate shall be deemed by the Trust Company to be satisfactory, showing that at the date therein mentioned such person had on deposit with such depositor, or exhibited to it the loan certificates numbered and described in such certificate, and such holding, for the purposes of action by the Trust Company, on the faith thereof shall be deemed to continue for two calendar months ensuing the date of such certificate.
- 27. In the event of the Improvement Company making default in the payment of the said loan certificates or any of them, or of the interest coupons thereon, or any of them, at the dates and on the times and in the manner provided in this agreement, the trust company may, with the consent of the Government; upon being requested so to do by the holders of loan certificates to the amount of one-quarter of the said secured loan in the manner herein provided, exercise all the rights and powers given to the Trust Company under the provisions of this agreement, and in case the Government fails within thirty days after such default on the part of the Improvement Company, to pay all such sums for interest or principal of the said secured loan, in respect of which the Improvement Company is so in

default, the Trust Company may, at its election, without the consent of the Government, upon a request by the holders of loan certificates to the amount of one-quarter of the said secured loan, exercise all the powers given to the Trust Company under this agreement, but which, save for this provision, could only be exercised by the Trust Company with the consent of the Government.

28. Any request, consent certificate or other instrument required or authorized by this agreement to be given or executed by or on behalf of the Government, unless otherwise expressly provided in this agreement, may be by any memorandum in writing signed by the Provincial Treasurer of the Province of Ontario for the time being, under the seal of the Provincial Treasurer, who for all purposes of this agreement shall be deemed to be the Government, and any such request, consent, certificate or other instrument so executed shall be conclusive in favor of the Trust Company with regard to any action taken by the Trust Company under such request, consent or other instrument:

29. No declaration made under the terms of this agreement, declaring the whole amount of the said loan due, shall entitle the Trust Company or the holders of the said loan certificates or any of them to call upon the Government to pay the amount of the said secured loan before the first day of May, 1906, the date when the same becomes due and payable under the terms of this agreement, and the Government shall not be called upon to pay the amount of the said secured loan before the said date, anything

herein contained to the contrary notwithstanding.

30. If any moneys shall from time to time be required by the Trust Company for the purpose of carrying out or enforcing the trusts hereof, with the consent of the Government in writing, the Trust Company may (although it shall be under no duty so to do), upon certifying the amount of its requirements by any instrument under its corporate seal and signed by the president or one of the vice-presidents, and countersigned by the secretary thereof, (which certificate shall for all purposes be conclusive on all parties hereto and upon the holders of the said loan certificates.) borrow money to the extent of the amount so certified, and may, as security for the payment of such moneys, issue to the persons or corporations from whom said amounts shall be borrowed, certificates of such borrowing in a form to be settled by counsel and approved of by the Government, and the amount so borrowed shall bear interest at the rate specified in the said certificates, and such amounts, together with such interest and all sums pavable pursuant to the terms of such certificates, shall form a first charge upon the pledged securities. The Trust Company may itself (although it shall be under no duty so to do) make any advance upon or acquire any of the said Trust Company certificates of borrowing for its own benefit.

31. Upon the terms and conditions stated in this and the subsequent articles hereof, and not otherwise, the Morton Trust Company hereby accepts the trust of this instrument, and the Government and the Improvement Company and all present and future holders of the loan certificates secured hereby, expressly assent and agree to and acknowledge themselves

bound by said terms and conditions.

The Trust Company shall incur no liability to anybody in acting upon any notice, request, consent, certificate of stock or other certificate, note, bond, document or paper believed by it to be genuine and to have been signed by the proper person.

The Trust Company, save for its wilful default, or for its gross negligence after personal notice and distinct specification in writing from some person interested in the trust, shall not be personally liable to anybody.

The Trust Company shall not be under any duty in respect to the recording, registering or filing of this instrument or any instrument of further assurance or the giving of notice or the lien hereof, or for the affixing or cancellation of any revenue stamps or the estimation or payment of any taxes, or the complying with the laws of Ontario with respect to such subject or with respect to any other subject; and the Trust Company may select and employ in and about the execution of any of the duties incumbent upon it hereunder, suitable agents and attorneys, and for their acts and neglects, if selected with reasonable care, the Trust Company shall be in no wise responsible;

The recitals and statements herein and in said loan certificates contained shall be taken as statements by the Improvement Company and shall not be considered as made by or as imposing any obligation or liability upon the Trust Company, nor shall the Trust Company be held responsible for the legality or validity of said loan certificates or of the guarantee of the Government under any provisions of the laws of Ontario or otherwise;

Any money received by the Trust Company under any provision of this indenture may be treated by it, until it is required to pay out the same conformably herewith, as a general deposit, without any liability for interest save such as during that time, it allows to its legal depositors;

The Improvement Company agrees, from time to time, on demand to pay to the Trust Company reasonable compensation for its services hereunder, also to make reimbursement to the Trust Company for all counsel fees, compensation of attorneys and agents, and other expenditures made by the Trust Company hereunder, with interest thereon; also to indemnify and save the Trust Company harmless against any and all liabilities of any kind which the Trust Company may incur in the exercise and performance of its powers and duties hereunder, including any penalty or liability suffered by the Trust Company under this instrument, or because of any action taken by it thereunder for non-compliance with the laws of Ontario concerning foreign corporations or otherwise; and for such indemnification, reimbursement and payment of Trust Company's compensation, a first lien is hereby imposed in favor of the Trust Company upon all the property and funds hereby conveyed in trust;

It shall be no part of the duty of the Trust Company to see to the insurance of any part of the properties covered by the securities deposited with the Trust Company, or itself to effect such insurance.

The Trust Company may become the owner of the loan certificates secured hereby with the same rights which it would have if it were not Trustee.

The Trust Company may, in its discretion, advise with legal counsel to be selected and employed by it at the expense of the Improvement Company, and anything done or suffered in good faith by the Trust Company, in accordance with the opinion of counsel, shall be conclusive in favor of the Trust Company on the parties hereto and on all holders of loan certificates secured hereby.

The trust estate, property and funds shall be primarily liable to third persons for all debts contracted by the Trust Company and for all damages to persons or property injured and for salaries and for non-performance of contract, and for all other torts, obligations and liabilities arising during any period wherein the Trust Company shall manage the trust property or any of it or otherwise, and the Trust Company shall not be personally liable in respect of any such matters.

In executing this indenture the Trust Company makes no covenant or representation as to the title or interest of the Improvement Company in or to the property therein, or as to the validity or security of the stock, bonds or note pledged hereunder, and it shall be no part of the duty of the Trust Company to see that any of the property intended to be conveyed in trust

hereunder is properly and legally subjected to the lien hereof.

It is expressly understood that the Trust Company shall be under no duty or liability in respect to any tax which may be assessed against it or against the owners of the loan certificates hereby secured in respect to the property hereby conveyed, nor shall the Trust Company be under any duty to pay or see to the payment of such tax, or take any notice of the assessment therefor or give any notice thereof to the holders of the loan certificates secured hereby or any other person, and for any expense or liability which the Trust Company may incur by reason of or growing out of any such tax and the Trust Company shall have a lien on the property hereby secured prior to the lien of the bonds hereby secured.

The Trust Company may resign and be discharged of the trusts created hereby by giving at least two months' notice thereof to the Improvement

Company and to the Government.

Whenever in this Deed of Trust the existence of any situation, matter, conclusion or fact of any character, or the sufficiency or validity of any instrument, paper or proceeding, or of any proof or evidence of any fact of any character shall be prescribed as a condition of or in any manner with respect to any action or proceeding on the part of the Trust Company, or shall be deemed necessary to be ascertained by the Trust Company as a basis of opinion by the Trust Company, a certified copy of a resolution of the Improvement Company, together with a certificate of the president, treasurer or secretary of the Improvement Company, verified under oath, shall in the discretion of the Trust Company be sufficient evidence of any such fact, situation, matter or conclusion, and shall be complete protection to the Trust Company for any act or proceeding upon the faith thereof, done or suffered by it with the consent of the Government.

A certificate of the Government of the happening of any one or more of the events of default, other than default in payment of the interest or principal upon the said loan certificates, shall be conclusive in favor of the Trust Company as to the default or defaults set forth in such certificate having been made, with regard to any action taken by the Trust Company

under this agreement in respect of such default.

32. Unless and until the Trust Company shall have received written notice to the contrary from the holders of not less than twenty-five per cent. in amount of the loan certificates outstanding, or from the Government, the Trust Company may for all purposes of this indenture assume that no default has been made in the payment of any loan certificates, or of the interest thereon, or in the observance or performance of any of the covenants contained in this agreement, and that none of the events hereinbefore nominated "events of default" have happened.

The Trust Company shall not be under any obligation to take any action towards the execution or enforcement of the trusts hereby created which in its opinion will be likely to involve it in expense or liability unless one or more of the holders of loan certificates or the Government shall, as often as required by the Trust Company, furnish it reasonable security, or indemnity, against such expense or liability; nor shall the Trust Company be required to take notice of any default hereunder unless notified in writing of such default by the Government or by the holders of at least

twenty-five per cent. in amount of the loan certificates then outstanding, or to take any action in respect of any such default involving expense or liability unless requested by an instrument in writing signed by the Government or by the holders of not less than twenty-five per cent. in amount of the loan certificates then outstanding, and unless tendered reasonable security and indemnity as aforesaid, anything herein contained to the contrary notwithstanding; but neither any such notice or request nor this provision shall affect any discretion herein given to the Trust Company to determine whether or not the Trust Company shall take action in respect of such default or to take action without such request.

The Trust Company shall be reimbursed and indemnified against any liability or damage it may sustain or incur in the premises, and shall have a lien upon the trust estate prior to the lien of the loan certificates, for its compensation and expenses, and also for any such liability or damages.

Any trustee hereunder may be removed at any time by an instrument in writing filed with the trustee for the time being and executed by the Government and the holders of a majority in amount of the said loan certificates

then outstanding.

In case at any time the trustee shall resign or shall be removed or otherwise shall become incapable of acting, a successor may be appointed by the Government and the holders of the loan certificates then outstanding, by an instrument or concurrent instrument signed by the holders of such loan certificates or their attorney in fact duly authorized, to the amount of fifty per cent. of the said loan certificates then outstanding, but until such new trustee shall be appointed by the holders of loan certificates and the Government as herein authorized, the Government may by a proper instrument in writing duly executed appoint a trustee to fill such vacancy; but any new trustee so appointed by the Government shall immediately and without further act be superseded by a trustee appointed in the manner as above provided by the Government, and the holders of fifty per cent. in amount of the said loan certificates; after any such appointment by the Government, it shall cause notice of such appointment to be published once a week in each of four successive weeks in two daily newspapers of general circulation published in the City of New York, N. Y.

In the event of the Government paying the full amount of the said secured loan and interest and all moneys due and payable to the Trust Company hereunder, the Government shall be at liberty to nominate and

appoint a new trustee.

Any successor trustee appointed hereunder shall execute, acknowledge and deliver to the Improvement Company and to the Government an instrument accepting such appointment hereunder, and thereupon such successor trustee, without any further act, deed or conveyance, shall be vested with the property and the authority, rights, powers and duties herein provided in that behalf, and upon the death, resignation or removal of any trustee, all the estate, right, title and interest of such trustee in the trust estate shall wholly cease and determine; but nevertheless the Improvement Company, its successors and assigns, will in every such case execute upon such request and such deeds, conveyances or assurances as shall in the judgment of the trustee so appointed be desirable or necessary to enable the trustee so appointed to execute the trusts by this indenture created as fully and completely as if such appointed trustee had been originally a trustee, and in every case of resignation by a trustee or of the removal of a trustee, the trustee so resigning or removed shall, at the request of the Improvement Company, its successors and assigns, or of the Government, or of the trus-

tee so appointed, hand over to the new trustee all the securities in its hands and shall make and execute all such deeds, conveyances hereinbefore provided for shall be at the cost of the Improvement Company, its successors

or assigns.

33. The Trust Company and the Government shall be entitled to obtain legal and other assistance in the execution of the trusts hereof, and the expenses of such assistance, as certified by the Trust Company under the hand of its secretary shall, as well as reasonable compensation for the services of the Trust Company, be paid by the Improvement Company to the Trust Company and the Government respectively on demand.

34. The provisions of this Agreement shall be submitted to and be subject to the approval of the Legislature of Ontario.

In witness whereof the Honorable George William Ross, Premier of the Province of Ontario and Provincial Treasurer of Ontario, acting on behalf of His Majesty the King, has hereunto set his hand and seal, and the Trust Company and the Improvement Company, being the parties hereto of the second and third parts respectively, have caused their respective corporate seals to be affixed thereto, under the hands of the proper officers of the said companies respectively.
